

ON DISTRIBUTIONS OF EXPONENTIAL SUMS OF FOURIER COEFFICIENTS OF CUPS FORMS

ANNE-MARIA ERNVALL-HYTÖNEN
UNIVERSITY OF HELSINKI

I will speak about distributions of exponential sums involving Fourier coefficients of cusp forms. The starting point of the work is Heath-Brown's result for the error term in the size estimate for the sum involving values of the divisor function. I will give both theoretical results and computational data. This is work in progress.
