Medication records

Laboratory animal legislation seminar
12. Nov 2014
Laboratory Animal Centre, University of Oulu
Sakari Laaksonen
Medication records

- Stipulated in the laboratory animal legislation
- Applies both to the medicines used for medical care and those used for research purposes.
- Applies only to officially registered medicines; other pharmacologically active chemical preparations are not recorded.
Medication records

• The use of medicines acquired by KEKS and used in the premises of KEKS is entered in the record forms situated by the medicine cabinets.

• Researchers must keep their own records for the medicines they have acquired themselves.
  • A copy of the records is delivered to KEKS after the project or subproject ends, or at least yearly.
Medication records must include

- **ID** of animal or group of animals
- **Date** of administering the medicine
- **Name** of the medicine
- **Dosage and duration** of treatment
- **Cause or diagnosis**
- (Withdrawal period in foodproducing animals)
- **The person administering** the medication

Sakari Laaksonen
Special case: N-drugs

- Narcotic drugs
- In KEKS: fentanyl, buprenorphine
- Consumption form of the hospital pharmacy follows every package
- Only members of KEKS staff make working dilutions for the researchers, and enter the use in the consumption forms and medication records.
