## KTK - Master's Degree Programme in Education and Globalisation 2012-2013 (2012 - 2013)

*Education and Globalisation* is a full-time two-year international Master's programme. It focuses on ethics, theory, policy, planning, curriculum, evaluation and comparative research in education. The central aim of the programme is to develop quality in education and to equip students to exercise socially responsible leadership in complex and diverse societies. The programme emphasises North-South-East-West dialogue and includes studies in multiculturalism, interculturalism, globalisation and their effects on various sectors of education. EdGlo graduates are competent to work in national and international contexts in the public, private and civil society sectors, in occupations such as project leaders, coordinators, educational consultants, evaluators, researchers, teachers and administrators.

Students major in educational sciences. The programme also includes a minor subject and an internship period which can be implemented in Finland or internationally in a variety of different settings such as intergovernmental agencies, non-governmental organisations or educational institutions. One third of the programme involves acquiring research tools, conducting research and writing a Master's thesis in a collaborative and multicultural research environment. After completing the programme, students are awarded a Master of Arts (Education) degree which enables them to continue their academic studies at doctoral level. This degree does not constitute a formal teaching qualification.
