Research has shown that business failures abroad have been and are a result of the inability to understand and adapt to foreign ways of thinking and acting, not technical or professional incompetence. International negotiation comes hand in hand with many challenges which arise from basic cultural differences. Even within one culture successful negotiation is dependent on many interconnected variables. In cross-cultural negotiation, this variety of variables broadens and values disperse. In this course we will examine the concept of culture, the culture triangle, 12 variables in the context of seven cultures among other things. We will review the art of negotiation in general and examine prescribed "ways of doing business" and dimensions of business in different cultures.

The course will have a short study group segment in which students will search for information about doing business and negotiating within a culture of their choice. The study group results will be presented to the class in a presentation.
