

Opasraportti

FHum - Master's Degree Programme in Science Communication (2017 - 2018)

Master's Degree Programme in Science Communication (TIEMA)

Address: TIEMA, PL 1000, 90014 University of Oulu, Finland

Telephone: Coordinator of TIEMA +358 29 448 3322

E-mail: tiema@oulu.fi

Website: <http://www.oulu.fi/sciencecommunication/>

Admission requirements

Students with a Bachelor's, or a higher level University Degree can apply to take Science Communication as a major subject leading to the MA degree. Students with a Bachelor's Degree from a University of Applied Sciences are also eligible applicants if their degree is in Communications or Media. In addition, students who have completed a similar degree abroad are also eligible applicants. Along with fluency in spoken and written language and an interest in the media and the world of science, selected students are expected to show motivation and a commitment to attending classes regularly. Students are selected on the basis of their previous grades, an application, and an interview. A total of 12 new students will be accepted into the programme every second year (2017, 2019). The teaching language of the programme is Finnish.

Study Counselling

Study counselling is provided by the TIEMA Coordinator (+358 29 448 3322), the Professor of Information Studies and Communication Studies (+358 29 448 3352) and the University Lecturer of History of Science and Ideas (+358 29 448 3304).

Master's Degree Programme in Science Communication

The role of science, research, and technology is becoming increasingly important, both from the social and economic viewpoints. Thus, it is extremely important that the public and the decision-makers have access to information about science that is both current and understandable. The Master's Degree Programme in Science Communication (TIEMA) is designed to meet this requirement by providing its students with an opportunity to become experts in the communication and popularisation of science. The TIEMA Degree aims to facilitate students' practical communication skills, as well as their understanding of scientific knowledge.

By learning to understand the nature of the media and the scientific community, as well as the language inherent in them, the students of TIEMA will gain the ability to work as mediators between science and the media. The students will learn to think analytically, use various appliances, retrieve, manage, and produce information effectively, and work independently on projects.

The two-year Programme is comprised of 120 ECTS credits, leading to the completion of the MA degree, with the possibility of continuing towards a Ph.D. The TIEMA Programme is organised by the Faculty of Humanities of the University of Oulu, and it is run jointly by the subjects of History of Science and Ideas and Information Studies.

Employment prospects

Students are provided with the necessary skills and knowledge to qualify for employment in scientific journalism, content production and other areas of science communication. Upon graduating, students can pursue careers in the public, private and non-profit sectors, either as employees, freelancers or entrepreneurs.

Learning outcomes of the Programme

Upon completing the TIEMA programme, students will have the theoretical knowledge and practical skills necessary to be able to engage in the public communication of science. Students will be aware of the differences between the communication practices in science and in journalism, they will be able to popularise scientific research results and translate the language of science into accessible, everyday language. Students will be able to demonstrate knowledge and understanding of the practices and key issues in modern and more traditional science communication. Students will have the basic practical skills required in the communication of science and the use of various media. Students will also be familiar with the history of science, the philosophy of science, the sociology of science, science education, the politics of science, as well as the ethics of science and communication. Students will be able to seek information from various sources and databases of scientific information. Students will be able to apply various methods in communication research and the study of science. Students will also be able to formulate and define a relevant research problem, carry out research on their topic, and present it in the form of a written Master's (Pro Gradu) thesis. Students will be able to present and discuss their scientific research together with fellow students and thesis supervisors in seminars and workshops. Students will also have an overview of the professions and work opportunities in the field of science communication.

Courses

Compulsory courses:

695100P Introduction to Communication Studies, 5 ECTS cr

694597S Introduction to Science Communication, 5 ECTS cr

694531S Changing Media Culture, 5 ECTS cr

694532S Media Law and Ethics in the Media, 5 ECTS cr

694533S Communication Research, 5 ECTS cr

694643S History and Politics of Science, 5 ECTS cr

694644S Sociology and Philosophy of Science, 5 ECTS cr

694645S Publicity and Ethics of Science, 5 ECTS cr

694646S Information Skills and Scientific Communication, 5 ECTS cr

694647S Web Publishing, 5 ECTS cr

694648S Journalism Workshop, 10 ECTS cr

694649S Television Workshop, 5 ECTS cr

694650S Radio Workshop, 5 ECTS cr

694544S Communication and PR Workshop, 5 ECTS cr

694652S Science Education and Science Visualisation, 5 ECTS cr

694653S Publication Design, 5 ECTS cr

694549S Pro Gradu Thesis and Seminar, 35 ECTS cr

694527S Maturity Test (Master's Degree Programme in Science Communication), 0 ECTS cr

Optional courses:

695105P PR Communication, 5 ECTS cr

694651S Practices in Communications, 5-10 ECTS cr

694528S Business Plan of a Communications Entrepreneur, 5 ECTS cr

694529S Work Practice, 5 ECTS cr

Compulsory 35 ECTS cr

694549S: Pro Gradu Thesis and Seminar, 35 op
 694527S: Maturity Test (Master's Degree Programme in Science Communication), 0 op

Elective studies

695105P: PR-Communication, 5 op
 694651S: Practices in Communications, 5 - 10 op
 694529S: Work Practice, 5 op
 694528S: Business Plan of a Communications Entrepreneur, 5 op

Opintojaksojen kuvaukset

Tutkintorakenteisiin kuuluvien opintokohteiden kuvaukset

A115103: Science communication, advanced studies, 120 op

Opiskelumuoto: Advanced Studies

Laji: Study module

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

Compulsory

695100P: Introduction to Communication Studies, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Erkki Karvonen

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay695100P Introduction to Communication Studies (OPEN UNI) 5.0 op

ECTS Credits:

5 ECTS credits / 135 hours of work

Language of instruction:

Finnish

Timing:

1st year, period I

Learning outcomes:

Upon completion of the course, students will be able to explain communication from several points of view. Students will be able to interpret communication from the viewpoints of information transmission, community creation, and meaning construction. Students will be able to explain the ways in which people are influenced by communication and in which various messages are received. Students will be able to outline the historical development of the media as well as various approaches and schools of communication research. Students will be able to recognise, analyse, and evaluate various communication methods used e.g. in advertisements and journalistic representations. They will be able to apply communication research to new communicational situations and plan their own communication activities on the basis of the learnt principles.

Contents:

Basic concepts and theories of Communication Studies

Mode of delivery:

Contact teaching, independent study

Learning activities and teaching methods:

Lectures 18h / independent study 117h

Target group:

Students of TIEMA, students minoring in Communication Studies, and students of Information Studies

Prerequisites and co-requisites:

None

Recommended or required reading:

Kurnelius, Risto: *Viestinnän vallassa* (2003 or newer), and web material: Karvonen, Erkki: Johdatus viestintätieteisiin (<http://www.uta.fi/viesverk/johdviest/johdatus.html>)

Assessment methods and criteria:

Lecture and book exam

Grading:

The course uses a numerical grading scale 1–5. In the numerical scale, 0 (zero) means fail.

Person responsible:

Professor Erkki Karvonen

Working life cooperation:

None

694597S: Introduction to Science Communication, 5 op

Voimassaolo: 01.08.2007 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Erkki Karvonen

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay694597S Introduction to Science Communication (OPEN UNI) 5.0 op

ECTS Credits:

5 ECTS credits / 135 hours of work

Language of instruction:

Finnish

Timing:

1st year, period II

Learning outcomes:

Upon completion of the course, students will be able to explain the key issues in the public communication of science. They will be able to explain how internal and external communication of science works, how science is popularised, how science is disseminated, and how science is represented in the media. Students will be able to recognise the different cultures of science and journalism. They will be familiar with the principles of writing a press release aimed at the media and the public.

Contents:

ECTS Credits:

5 ECTS credits / 135 hours of work

Language of instruction:

Finnish

Timing:

2nd year, period II

Learning outcomes:

Upon completion of the course, students will be able to evaluate journalistic activities on the basis of the ethical guidelines for journalists and the most important aspects of communications legislation. They will be able to distinguish between legal, moral, and ethical issues in journalism. Students will be able to explain copyright legislation, in particular, with a view to the publication of textual and visual material. They will also be able to apply this knowledge to publishing decisions related to journalistic work.

Contents:

Media self-regulation (Council for Mass Media, Guidelines for Journalists, YLE's Broadcasting Guidelines) and the laws and regulations governing the media. Special attention will be paid to copyrights.

Mode of delivery:

Contact teaching, independent study

Learning activities and teaching methods:

Lectures 30h / Independent study 105h

Target group:

Students of TIEMA, students minoring in Communication Studies, and students of Information Studies

Recommended or required reading:

Material assigned during lectures

Assessment methods and criteria:

Group project and lecture and book exam

Grading:

Upon completion of the course, students will be able to describe the key developments in scientific thinking from the antiquity to the present day. Students will also be able to recognise the greatest revolutions in scientific thinking and their importance to world views. Students will be able to define in general the terms of how Finnish science and university policies have developed over time and how the most important scientific institutions and the university system have developed, both structurally and administratively. Students will be able to interpret various programmes of science and university policies and evaluate related social background factors. Students will also be able to pinpoint the social prerequisites of various sciences.

Contents:

The history of science from the antiquity to the present day, and the main schools of Finnish university policies

Language of instruction:

Finnish

Timing:

1st year, periods I–II

Learning outcomes:

Upon completion of the course, students will be able to conceptualise their themes for research into search terms. Students will be able to systematically search for scientific and other information and utilise a variety of databases and other web sources of information and their features. Students will know how to use the RefWorks software for handling references. Students will be able to use techniques for scientific information evaluation, and they will understand the concepts of scientific publishing activities. In addition, students will know how to evaluate the reliability of other information sources.

Contents:

The theory of information gathering. Techniques for searching databases and other information sources. Saving information searches, alert services and news feeds. Different publishing channels and types. The evaluation of scientific publications and other information sources. RefWorks software.

Mode of delivery:

Contact teaching, independent study

Learning activities and teaching methods:

Lectures and exercises 34h / independent study 101h

Target group:

Students of TIEMA

Recommended or required reading:
