Communication Studies (2015 - 2016)

Communication Studies

Address: Communication Studies, P.O.Box 1000, FI-90014 University of Oulu, Finland

Phone: study counsellor +358 29 448 3352 Erkki Karvonen, Professor of Information and Communication Studies, Academic Affairs Secretary +358 29 448 3385 Kaisa Kosola

E-mail: forename.surname@oulu.fi

Website: <http://www.oulu.fi/communicationstudies/>

Admission requirements

Communication Studies may be studied as a subsidiary subject by those students of the Faculty of Humanities who have successfully applied for admission. The next student intake will take place in the beginning of autumn semester 2015. Further application information will be announced on the website of Communication Studies. With the exception of PR Communication (695105P), all courses are compulsory to the students of Master's Degree Programme in Science Communication (TIEMA). The teaching language of all courses is Finnish.

Study Counselling

Study counselling is provided by Erkki Karvonen, Professor of Information and Communication Studies (E-mail: forename.surname@oulu.fi).

Communication Studies

Communication is a central dimension in all human interaction, cooperation and construction of meaning. Communication is everyone's everyday skill. Yet everyone is also able to enhance his/her communication skills by practicing and increasing his/her awareness of various communication principles.

Communication research is a subject of wide relevance, useful in all fields and most professions. In addition to communication professions, communication studies are useful in customer service and various expert and management positions.

The network-like structure of today's society is to a great extent based on communicative interaction: management, for example, is essentially communication. We need various skills for promoting our own ideas, within an organization as well as outside it. In today's society, large-scale social impact and interaction are essentially possible only through media forums. Effective social communication and media visibility require the understanding of the nature of different media, the characteristics of communication technologies as well as the principles of today's journalistic news production. On the other hand, media literacy skills are necessary for any citizen and consumer, in order to critically evaluate and interpret pictures and words pouring in from the media in an attempt to promote agendas of various interest groups by emphasizing certain aspects of the matter while ignoring certain others. Every citizen should be capable of realizing how various presentations such as advertisements aim to influence us, far from being objective and unbiased.

Employment prospects

Students are provided with the basic theoretical knowledge to help them qualify for employment in journalism, PR communication and marketing as well as management, customer service and various expert positions.

Practical information

The Basic Studies package in Communication Studies comprises 25 credits. This package is based on theoretical courses organized in cooperation with the Master's Degree Programme in Science Communication (TIEMA). The lectures will be scheduled in two-year cycles, in accordance with the timetable of the TIEMA programme. The package comprises 5 courses (5 credits each) selected from the following 6 courses: Introduction to Communication Studies, PR Communication, Introduction to Science Communication, Changing Media Culture, Media Law and Ethics in the Media, and Communication Research.

Learning outcomes of Communication Studies

Upon completing the Basic Studies in Communication Studies, the student will have the conceptual and theoretical knowledge required for understanding various communication phenomena. Aware of the fact that communication consists of sending and interpreting messages, he/she will be able to explain the nature of knowledge and information, and what the economic value of knowledge is based on. The student will be familiar with semiotic research on the production of meaning as well as research on the rhetorics of persuasion. He/she will also be able to demonstrate knowledge of various theories of interpretation: hermeneutical, cognitive and ones based on frame analysis. The student will be able to explain communication phenomena from several academic viewpoints. He/she will be familiar with the history of various communication media and the main developments of communication culture. The student will also be provided with an overview of the research traditions in communication studies along with the history of the discipline.

The student will be able to demonstrate knowledge of the basics of organizational communication, PR, brand and reputation management as well as crisis communication – at the theoretical level, but also through practical cases. The student will also be able to recognize the key issues in the public communication of science. He/she will be able to demonstrate understanding of both internal and external communication of science, popularization of science, public dissemination of science as well as the ways science is presented in the media.

The student will be able to approach the media and media culture as social, economical and technological phenomena. He/she will be able to demonstrate knowledge of the historical changes and current trends in the media and journalism along with the theory of public sphere and various key issues related to public discussion, democracy, freedom of speech, social responsibility in communication as well as the power of the media. The student will also be able to approach entertainment in theoretical terms.

The student will also know the principles and rules of fair and ethically sound communication. He/she will be familiar with the rules of professional ethics of journalism, PR communication and advertising, and will be able to recognize possible violations of these norms. The student will be provided with an overview of communication legislation, including the right to privacy and business secrets and, on the other hand, the freedom of speech, the principle of public access to official documents and the transparency of science. He/she will also be familiar with copyright legislation along with related issues in the world of digital copying.

Courses

695100P Introduction to Communication Studies 5 ECTS cr

695105P PR-Communication 5 ECTS cr

694597S Introduction to Science Communication 5 ECTS cr

694531S Changing Media Culture 5 ECTS cr

694532S Media Law and Ethics in the Media 5 ECTS cr

694533S Communication Research 5 ECTS cr
