

Opasraportti

FHum - Logopedics (2017 - 2018)

Logopedics

Logopedics, PL 1000, FI-90014 University of Oulu, Finland

Telephone: Study counsellor +358 29 448 3393 university teacher; Academic Affairs Secretary study.humanities@oulu.fi

E-mail: `firstname.lastname@oulu.fi` (staff e-mail addresses)

Website: *(In Finnish)* <http://www.oulu.fi/logopedia/>

Admission requirements

To be admitted to the Degree Programme in Logopedics, students must pass an entrance examination. Basic Studies in Logopedics can be completed as a subsidiary subject. More information on this option is available from the study counsellor.

Study guidance

Study guidance is provided by the university teacher Kaisu Heinänen. Tel. +358 29 448 3393, E-mail kaisu.heinananen@oulu.fi.

Logopedics

Logopedics is a discipline that examines normal development of speech, language and communication skills as well as disorders related to these in a versatile manner. The main focus of the studies is on the manifestations of voice, speech, language and communication in addition to rehabilitation, the efficiency of rehabilitation and prevention of disorders.

Upon the completion of the Degree Programme in Logopedics, students may apply for qualification from Valvira, the Finnish National Supervisory Authority for Welfare and Health, in order to operate as licenced speech therapists. They also can work as professionals in various job settings that require expertise in speech, language and communication. The degree programme in Logopedics aims to train the students to become multidisciplinary experts. To attain this goal, the programme focuses on an appropriate selection of topics and on the multidisciplinary research in the field.

Studies in Logopedics familiarises the students with the normal development of speech, language and communication as well as with related disorders and the rehabilitation and multiprofessional diagnostics of such disorders.

In addition to the core Logopedics studies, also Psychology, Medicine, Phonetics and Linguistics in particular have a prominent position in the studies. In the Logopedics programme, students first complete the three-year-long Bachelor of Arts degree (180 ECTS credits), and then move on to the two-year-long Master of Arts degree (120 ECTS credits). Studies include instruction on theory, guided clinical education, training to become a therapist and independent training in the profession of a speech and language therapist.

Fostering professional skills and research during the studies is essentially important for the development of the discipline. At the University of Oulu, the main focus areas of research in the Logopedics programme are the study of children's speech, language and communication development and related disorders. This research is carried out primarily at the Child Language Research Center, which has had good results in the international Research Assessment Exercise, RAE2014.

Students have the possibility to take part, to a reasonable degree, in the department's research activities, for example by collecting data or being a test subject in a Logopedics research project. The degree in Logopedics provides students the academic qualifications required to apply for a Doctoral degree programme in Logopedics.

Employment Prospects

Speech and language therapists have excellent employment prospects, and there are many openings and a good demand for private speech and language therapists. People with expertise in Logopedics are also needed in education, research and development of assistive instrument technology.

Practical information

Practical information is available in "Logopedian matkaopas" ("Travel Guide to Logopedics", *in Finnish*), which can be found in PDF form on the degree programme's website.

Study packages and learning outcomes

The Basic Studies of Logopedics will familiarise the students with the central concepts of Logopedics, scientific thinking and writing. Students will acquire a basic knowledge of the normal development of language and speech as well as the development and support of interaction and communication. Upon completion of the Basic Studies, students will be able to follow the ethical principles of academic writing.

Learning outcomes in Basic Studies of Logopedics:

- Students will have the knowledge, skills and conceptual expertise required to examine the research of interaction, communication and related disorders.
- Students will have an understanding the nature of logopedic reasoning and can acknowledge the characteristics of scholarly data and different research approaches.
- Students will have a general idea of the profession of a speech and language therapist.
- Additionally, students will have the ability to create small-scale written presentations based on their expertise.

The Intermediate Studies in Logopedics will familiarise the students comprehensively with the research methods and disorders of Logopedics. These studies are supplemented with a selection of subsidiary subjects. The main aim of the Intermediate Studies package is to deepen the students' informational and methodological abilities so that they will be capable of independent scientific work and able to apply their theoretical knowledge in the clinical courses during the Intermediate and Advanced Studies.

Learning outcomes in Intermediate Studies in Logopedics:

- Students will have knowledge of the perspectives, methods and data of researching the disorders in interaction and communication, and they will understand the scope and complexity of questions in research in the field of Logopedics.
- Students will be able to produce a Candidate's Thesis required for a Bachelor's Degree.
- Students will master the methodological fundamentals of logopedic rehabilitation and are able to work as speech and language therapists under supervision in the clinical courses.
- Students will have familiarised themselves with the ethical guidelines concerning the profession of a speech and language therapist.

The Advanced Studies in Logopedics, via studies of theoretical and clinical courses, will foster the students' skills to conduct research in Logopedics based on their own areas of interest as well as their ability to work independently as speech and language therapists. With the Advanced Studies, students will gain high-level skills for understanding, analysing and reporting the nature of disorders in interaction, communication and logopedic information. In addition, students will gain diverse qualifications needed in the professions in the field.

Learning outcomes in Advanced Studies in Logopedics:

- Students will be able to plan and execute advanced projects concerning research and the application of knowledge and to produce scholarly discourse.
- Students will be able to critically evaluate different data and arguments and present the results of a research process coherently in a written thesis.
- Students will be able to do demanding independent tasks that require analysis, creativity and ethical evaluation. They will be able to work as experts in different communities and in multiprofessional cooperation.
- Students will understand the diversity of logopedic research and can place their own research aims in the wider context of discourse in the field. Students will be able to independently follow the discourse in the field.
- Students will know and be able to apply essential research methods to clinical courses. They will be able to use the terminology of Logopedics and they will have the skills to apply methodological and theoretical tools from other disciplines in both research and clinical work.
- Via theoretical studies and clinical courses, students will have acquired advanced qualifications for understanding, analysing and communicating the nature of logopedic information or any other type of information both in the context of research and in the profession of a speech and language therapist.

The study packages of Linguistics and Phonetics

The study packages of Linguistics and Phonetics will familiarise the students with the nature of language and speech as well as the systematic analysis of phenomena in language and speech.

The study package of Psychology

The study package of Psychology will familiarise the students with human psychological development and functions and related disorders.

The study package of Medicine

The study package of Medicine will familiarise the students with the main principles of human physiological structures and function. Students will learn to understand how different disabilities and disorders are related to diagnostics and rehabilitation in the field of Logopedics.

Subsidiary Studies in Logopedics (25 ECTS credits)

694700P Introduction to Logopedics (6 ECTS credits), Autumn term

694809P Development of Language and Communication: Stages of the Language Development of Children (6 ECTS credits), Spring term

694817P Development of Language and Communication: Fostering Linguistic Development and Instructing of Child Group (2 ECTS credits), Spring term

694769P Introduction to Disorders in the Communication, Language and Speech of Children and Youth (6 ECTS credits), Spring term

694959Y Introduction to General Linguistics and Phonetics (5 ECTS credits), Spring term

Major studies in Logopedics (218 ECTS credits)

Basic Studies in Logopedics (25 ECTS credits)

694753Y Personal Study Plan 1 (Logopedics) (0 ECTS credits) 1st year, autumn term

694700P Introduction to Logopedics (6 ECTS credits) Autumn term

694816P Speech acoustics (2 ECTS credits) 1st year, Autumn term

694809P Development of Language and Communication: Stages of the Language Development of Children (6 ECTS credits) 1st year, Spring term

694817P Development of Language and Communication: Fostering Linguistic Development and Instructing of Child Group (5 ECTS credits) 1st year, Spring term

694824P Introduction to Disorders in the Communication, Language and Speech of Children and Youth (6 ECTS credits) 1st year, Spring term

Intermediate Studies in Logopedics (83 ECTS credits)

Disorders in the Communication of Children and Youth (26 ECTS credits)

694791A Assessment and Diagnostics of Disorders of the Communication, Language and Speech of Children and Youth (7 ECTS credits) 2nd year, autumn term

694825A Rehabilitation of the Disorders in the Communication, Language and Speech of Children and Youth I (8 ECTS credits) 2nd year, autumn term

694826A Rehabilitation of the Disorders in the Communication, Language

and Speech of Children and Youth II (6 ECTS credits) 2nd year, spring term

694827A Rehabilitation of the Disorders in the Communication, Language

and Speech of Children and Youth III (5 ECTS credits) 3rd year, autumn term

694758Y Personal Study Plan 1 (Logopedics) (0 ECTS credits) 3rd year, autumn term

Disorders in the Communication of Adults (27 ECTS credits)

694714A Disorders in the Communication of Adults I: Voice Disorders (

5 ECTS credits) 3rd year, spring term

694830A Disorders in the Communication of Adults II: Aphasiology

(5 ECTS credits) 3rd year, autumn term

694796A Disorders in the Communication of Adults III: Hearing

Disabilities, Aging and Memory Disorders of Adults (5 ECTS credits) 3rd year, autumn term

694797A Disorders in the Communication of Adults IV: Motor Speech

Disorders (5 ECTS credits) 3rd year, spring term

694828A Disorders in the Communication of Adults V: Dysphagia

(3 ECTS credits) 3rd year, spring term

694799A Disorders in the Communication of Adults VI: Final Seminar

(2 ECTS credits) 3rd year, spring term

694758Y Personal Study Plan 2 (Logopedics) (0 ECTS credits) 3rd year, spring term

Research in Logopedics I

694810A Research in Logopedics I: Methodology and Ethics I

(3 ECTS credit) 3rd year, autumn term

694708A Research in Logopedics I: Basic Seminar and Candidate's Thesis

(10 ECTS credits) 3rd year, autumn–3rd year, spring

694724A Maturity Test (Candidate's Degree/Logopedics) (0 ECTS credits) 3rd year, spring term

Clinical Studies in Logopedics I

694800A Clinical Skills I (7 ECTS credits) 2nd year, autumn term

694801A Therapy I (10 ECTS credits) 2nd year, spring term–3rd year, spring term

Advanced Studies in Logopedics (110 ECTS credits)

694759Y Personal Study Plan 3 (Logopedics) (0 ECTS credits) 4th year, autumn term

Research in Logopedics II

694811S Research in Logopedics II: Methodology and Ethics II

(5 ECTS credits) 4th year, autumn term

694802S Research in Logopedics II: Advanced Seminar (6 ECTS credits) 4th year, autumn–4th
year, spring

694803S Literature Overview for Master's Thesis (10 ECTS credits) 4th year, spring term

694812S Master's Thesis (30 ECTS credits) 5th year, autumn term

694737S Maturity Test (Master's Degree/Logopedics) (0 ECTS credits) 5th year, autumn term or 5th year,
spring term

Special Skills

694822S Expertise and working life skills in Logopedics I

(12 ECTS credits) 4th year, spring term

694823S Expertise and working life skills in Logopedics II

(5 ECTS credits) 5th year, spring term

Clinical Studies in Logopedics II

694804S Clinical Skills II (7 ECTS credits) 4th year, autumn term

694805S Therapy II (10 ECTS credits) 4th year, autumn term– 4th year, spring term

694829S Clinical Skills III (**25** ECTS) 5th year, spring term

Elective Studies (10 ECTS credits) (MA)

694752S Optional Studies in Logopedics (10 ECTS credits) 4th year, autumn term

Subsidiary Studies, 57 ECTS credits*Linguistics and Phonetics (10 ECTS credits)*

694958Y Structure of Finnish (5 ECTS credits)	1 st year, autumn term
694959Y Introduction to General Linguistics and Phonetics	1 st year, autumn term

Studies in Psychology (26 ECTS credits)

730097P Introduction to Developmental Psychology (5 ECTS credits)	1 st year, autumn term
730098P Introduction to Cognitive Psychology and Neuropsychology (5 ECTS credits)	1 st year, autumn term
730099A Cognitive Neuroscience (5 ECTS credits)	1 st year, spring term
730100P Introduction to the Psychology of Health and Mental Health (5 ECTS credits)	2 nd year, spring term
730101A Child Neuropsychology (3 ECTS credits)	2 nd year, spring term
730102A Neuropsychology (3 ECTS credits)	2 nd year, spring term

Studies in Medicine (16 ECTS credits)

694766P Anatomy and Physiology of the Speech Organs (5 ECTS credit)	1 st year, autumn term–1 st year, spring term
694819A Child and adult neurology (5 ECTS credits)	2 nd year, autumn term
694749P Psychiatry Across the Life-span (3 ECTS credits)	2 nd year, spring term
694820A Clinical medicine (3 ECTS credits)	2 nd year, autumn term

Statistics, 5 ECTS credits

694821A Statistics (5 ECTS credits)	2 nd year, spring term
-------------------------------------	-----------------------------------

Language and Communication Studies (15 ECTS credits)

902000Y Reading for Academic Purposes in the Humanities (2 ECTS credits)	1 st year, autumn term
902001Y Academic Communication (3 ECTS credits)	1 st year, spring term
901030Y Second Official Language (Swedish), Written Skills (2 ECTS credits)	2 nd year, autumn term
901031Y Second Official Language (Swedish), Written Skills (3 ECTS credits)	2 nd year, autumn
900096Y Speech Therapist as Communicator (5 ECTS credits) term	1 st year, autumn term–3 rd year, spring term

Language of instruction:

Finnish

Timing:

4th year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to identify the special nature and research questions of research in Logopedics. Students will be able to plan the research frame and the methods suitable for their own Master's Thesis.

Contents:

The research frames, ethical questions and the efficiency of rehabilitation in research in Logopedics

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures and literature

Target group:

Students of Logopedics

Prerequisites and co-requisites:

This course is to be completed alongside or after the following courses: *694720A Introduction to Statistical Analysis*, *694707A Research in Logopedics I: Methodology and Ethics I* and *694708A Research in Logopedics I: Basic Seminar and Candidate's Thesis*.

Recommended or required reading:

Lecture material and the following books: Schiavetti, N., Metz, D. E. & Orlikoff, R.F. (2011). *Evaluating Research in Communicative Disorders*. 6th Edition. New Jersey: Pearson Inc., pp. 57–157, 364–410 and Remes, P., Hirsjärvi, S. & Sajavaara, P. (2014). *Tutki ja kirjoita*. Helsinki: Tammi. (Where applicable)

Assessment methods and criteria:

Lectures (80% attendance required), literature, a book exam

Grading:

0–5

Opintokohteen kielet: Finnish

ECTS Credits:

30

Language of instruction:

Finnish, Swedish or English

Timing:

4th year, spring term, or 5th year, autumn term

Learning outcomes:

Upon completion of this course, students will have produced a scientific research paper, usually based on empirical data.

Contents:

Independent work as instructed, a written Master's Thesis

Mode of delivery:

Contact teaching and independent work

Learning activities and teaching methods:

Independent work as instructed

Target group:

Students of Logopedics

Prerequisites and co-requisites:

The completion of Candidate's Degree is required in addition to the following courses or packages: *Research in Logopedics II* and *Literature Overview for Master's Thesis*.

Recommended or required reading:

Scientific literature available

Assessment methods and criteria:

Master's Thesis

Grading:

0–5

Arvostelu: 1 - 5, pass, fail

Opettajat: Kaisu Heinänen

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish

Learning outcomes:

Upon completion this course student will be able to analyze and apply theoretical and methodological knowledge and working life skills needed for professional development. The student can apply scientific knowledge in clinical practice.

Contents:

The student compiles courses from different disciplines that support his/her expertise in logopedics and working life skills (eg. special pedagogics, gerontology, economics, genetics, computer science; participation in scientific and professional congresses; entrepreneurship studies; advanced literature exam).

Mode of delivery:

Blended learning

Learning activities and teaching methods:

The implementation methods of the course vary, altogether 135 h.

Target group:

Students in Logopedics

Assessment methods and criteria:

There are many ways to complete the course. The lecturers define attendance requirements. Read more about assessment criteria at the University of Oulu webpage.

Grading:

Pass / Fail

Person responsible:

Professor, university lecturer or university teacher

Working life cooperation:

During completion of this course different work assignments and projects in collaboration with companies and organizations are possible.

694804S: Clinical Skills II, 7 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Kaisu Heinänen

Opintokohteen kielet: Finnish

ECTS Credits:

7

Language of instruction:

Finnish

Timing:

4th year

Learning outcomes:

Upon completion of the course, students will be able to define the essential characteristics and the co-operational aspects of the work of a speech and language therapist in multiprofessional work groups in different posts of social care, health care and education. Additionally, students will be able to analyse different aspects and ethical questions related to the work of a speech and language therapist. Students will also learn to reflect and analyse their own professional growth.

Contents:

Observing the work of a speech and language therapist, general picture of the organisations where speech and language therapists are employed, a multiprofessional working community, the multidimensional aspects of a speech therapy work, professional interaction and growth

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Attending information sessions and exercises, completing assignments appointed in the training facility, lectures, exercises

Target group:

Students of Logopedics

Prerequisites and co-requisites:

This course is to be completed alongside or after the following courses or packages: Basic Studies and Advanced Studies in Logopedics up to Clinical Skills II, Studies in Psychology and Medicine, Therapy I and II.

Recommended or required reading:

Information about the additional literature can be obtained from the teacher of the course.

Assessment methods and criteria:

Information sessions and exercises (100% attendance required), completing assignments appointed in the training facility, feedback from the information sessions and the training, lectures, exercises and assignments

Grading:

Pass/Fail

Person responsible:

University Lecturer, University Teacher, Amanuensis

Working life cooperation:

Yes

694805S: Therapy II, 10 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10

Language of instruction:

Finnish

Timing:

4th and 5th year

Learning outcomes:

Upon completion of this course, students will be able to plan and implement rehabilitation related to speech therapy. Additionally, they will be able to analyse the process of speech therapy as well as the profession of a speech and language therapist.

Contents:

Speech therapy related assessment and rehabilitation of different disorders in communication

Mode of delivery:

Blended learning

Learning activities and teaching methods:

Supervised planning and implementation of one or more assessment or speech therapy programmes and written assignments related to them, discussing and observing speech therapy organised by students

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses *Clinical Skills I*, *Rehabilitation of the Disorders in the Communication, Language and Speech of Children and Youth* (where applicable), and *Disorders in the Communication of Adults* (where applicable) is required.

Grading:

Pass/Fail

Person responsible:

University Lecturer or University Teacher

Working life cooperation:

None

694829S: Clinical Skills III, 25 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Advanced Studies

Laji: Practical training

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Terhi Hautala

Opintokohteen kielet: Finnish

ECTS Credits:

24 ECTS credits

Language of instruction:

Finnish

Timing:

5th year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to work independently as speech therapists. They will be able to examine clients, plan and organise rehabilitation, instruct the people close to the client as well as to function as a member of a work community and a work group.

Contents:

Practical training period

Mode of delivery:

Contact teaching (practical training period)

Learning activities and teaching methods:

Four months of practical training period under the supervision of a speech therapist in a unit offering the Social and health care services or education, or at rehabilitation firm.

A written report of the training, in which own learning and professional growth are reflected.

Target group:

Students in Logopedics

Prerequisites and co-requisites:

Completion of a Candidate's Degree is required in addition to the following courses in Advanced Studies: Research in Logopedics II, Expertise and working life skills in Logopedics I and I1, Clinical Skills II and Therapy II.

Assessment methods and criteria:

Practical training period and a report on the training. Read more about assessment criteria at the University of Oulu webpage.

Grading:

0–5 (based on the assessment done by the supervisor during the training period) and a report on the training professional growth (pass/fail).

Person responsible:

University Lecturer or University Teacher

Working life cooperation:

Practical training period of 4 months in a unit offering the Social and health care services or education, or at rehabilitation firm.

902001Y: Academic Communication, 3 op

Voimassaolo: 01.08.1995 -

Opiskelumuoto: Language and Communication Studies

Laji: Course

Vastuuyksikkö: Languages and Communication

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Proficiency level:

[B2/C1](#) (on the CEFR scale)

Status:

Obligatory foreign language course for students of logopedics and cultural anthropology and archaeology who choose English as their foreign language.

Required proficiency level:

English as A- or B-language in senior secondary school, or equivalent skills.

ECTS Credits:

3 op / 3 ECTS credits - The student workload is 80 hours of work

Language of instruction:

English

Timing:

First year spring, students of logopedics and cultural anthropology and archaeology, after completion of 902000Y Reading for Academic Purposes in the Humanities.

Learning outcomes:

In *Academic Communication*, you will focus on developing your academic and professional communication skills in English. The course will enable you to follow developments in your own field and succeed in international, intercultural contexts at an at least B2 level of proficiency.

Learning outcomes: By the end of the course, you are expected

- to have demonstrated your use of appropriate strategies and techniques for communicating effectively in English in an academic context.

to have demonstrated the ability to present field-related subjects using appropriate academic vocabulary.

Contents:

Skills in oral interaction, including presenting academic topics to classmates, are practiced in the classroom, where there is a strong focus on working in pairs and small groups. Homework tasks include online listening tasks, writing, and reading to prepare for classroom discussions.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

80 hours of student work including regular class attendance and homework.

Target group:

Students of logopedics and cultural anthropology and archaeology

Prerequisites and co-requisites:

902000Y Reading for Academic Purposes in the Humanities (RAP-Hum)

Recommended optional programme components:

See 902000Y RAP-Hum, which is the prerequisite for this course.

Recommended or required reading:

Available online, in the university library and/or provided by the teacher.

Assessment methods and criteria:

Student work is monitored by *continuous assessment*. You are required to participate regularly and actively in all contact teaching provided, and successfully complete all required coursework.

Read more about [assessment criteria](#) at the University of Oulu webpage.

Grading:

pass/fail

Person responsible:

Heather Kannasmaa (logopedics), Karen Niskanen (cultural anthropology and archaeology)

902000Y: Reading for Academic Purposes in the Humanities, 2 op

Voimassaolo: 01.08.1995 -

Opiskelumuoto: Language and Communication Studies

Laji: Course

Vastuuyksikkö: Languages and Communication

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Proficiency level:

B2/C1 (on the [CEFR scale](#))

Status:

Obligatory foreign language course for students of logopedics and cultural anthropology and archaeology who choose English as their foreign language and whose matriculation exam grade is lower than *laudatur* or *eximia cum laude approbatur*.

Required proficiency level:

English as A- or B-language in senior secondary school, or equivalent skills.

ECTS Credits:

2 op / 2 ECTS

Language of instruction:

English

Timing:

1st year students of logopedics and cultural anthropology and archaeology; autumn term (only), BEFORE completion of *902001Y Academic Communication*

Learning outcomes:

The general aim is to be able to read more extensive academic - general or discipline-specific - text with increased confidence and at sufficient speed and to process it critically. More specifically, the aim is to be able to read and understand the main ideas of an academic text, scan sufficiently quickly for relevant details, and extract information from the readings.

Learning outcomes: By the end of the course, you are expected to be able to

- have acquired effective vocabulary learning techniques
- be able to distinguish parts of words to infer meanings
- utilize your knowledge of text structure and cohesion markers to understand academic texts
- extract information and learn content from English readings in academic and professional contexts

Contents:

The course will focus on reading strategies; these include recognizing how texts are organized, identifying key points in a text, and understanding words in context. Vocabulary work in the course will focus on a) academic vocabulary, as used in formal scientific writing, and b) using your knowledge of the meanings of parts of words (affixes) to infer meaning.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

The scope of the course is 2 op (54 hours student workload).

Target group:

Students of logopedics and cultural anthropology and archaeology

Prerequisites and co-requisites:

-

Recommended optional programme components:

See 902001Y Academic Communication, which is taken AFTER completion of this course

Recommended or required reading:

Photocopies will be provided by the teacher and/or required texts will be accessible online or from the university library.

Assessment methods and criteria:

Student work is monitored by *continuous assessment*. You are required to participate regularly and actively in all contact teaching provided, and successfully complete all required coursework. Three lessons, at monthly intervals, will start with a short test on material covered so far.

ECTS Credits:

6 ECTS credits

Language of instruction:

Finnish

Timing:

1st year, autumn term

Learning outcomes:

Upon completion of this course, students will be able to explain the development of Logopedics into its own discipline and what connections it has to other disciplines. Students will be able to identify the main research areas and essential scientific literature, and to use different research methods within the field of Logopedics. Additionally, they will be able to describe the field of work of speech and language therapists in the different sectors of Social and Health Care Services.

Contents:

Development of Logopedics as a science, connections to other disciplines, the duties of a speech and language therapist in the prevention and assessment of communication disorders and rehabilitation.

It is recommended to complete the Information retrieval course together with this course.

Mode of delivery:

Blended learning

Learning activities and teaching methods:

Lectures and independent work altogether 162 h.

Target group:

Students majoring and minoring in Logopedics

Recommended or required reading:

Lecture material and scientific literature available

Assessment methods and criteria:

Written assignments. The lecturer defines attendance requirements. Read more about assessment criteria at the University of Oulu webpage.

Arvostelu: 1 - 5, pass, fail

Opettajat: Elisa Heikkinen

Opintokohteen kielet: Finnish

ECTS Credits:

6 ECTS credits

Language of instruction:

Finnish

Timing:

2nd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to explain and analyse the special characteristics of the rehabilitation of the disorders in the communication, language and speech of children. Additionally, students will be able to apply rehabilitation methods in speech therapy rehabilitation.

Contents:

The special characteristics and rehabilitation methods of the disorders in the communication, language and speech of children and youth

Mode of delivery:

Blended learning

Learning activities and teaching methods:

Varying teaching and learning methods, altogether 162 h of work.

Target group:

Students majoring in Logopedics

Prerequisites and co-requisites:

Completion of the courses Introduction to Disorders in the Communication, Language and Speech of Children and Youth and The Assessment and Diagnostics of Disorders of the Communication, Language and Speech of Children and Youth is required.

Recommended or required reading:

Lecture material, additional material to be agreed on during the course.

Assessment methods and criteria:

Examinations and written assignments. The lecturer defines attendance requirements. Read more about assessment criteria at the University of Oulu webpage.

Grading:

0-5

Person responsible:

University lecturer or university teacher in Logopedics

694827A: Rehabilitation of the Disorders in the Communication, Language and Speech of Children and Youth III, 5 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Tuula Yliherva

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish

Timing:

3rd year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to describe the assessment and rehabilitation of the disorders in the communication, language and speech of children and youth in the context of topical research material.

Contents:

Studying the special area of either the assessment or the rehabilitation of the disorders in the communication, language and speech of children and youth

Mode of delivery:

Blended learning

Learning activities and teaching methods:

Varying teaching and learning methods, altogether 135 h of work.

Target group:

Students majoring in Logopedics

Prerequisites and co-requisites:

Completion of the courses Rehabilitation of the Disorders in the Communication, Language and Speech of Children and Youth I and II is required.

Assessment methods and criteria:

Written assignments. The lecturer defines attendance requirements. Read more about assessment criteria at the University of Oulu webpage.

Grading:

0-5

Person responsible:

University lecturer or university teacher in Logopedics

694758Y: Personal Study Plan 2 (Bachelor's degree), 0 op

Voimassaolo: 01.08.2009 -

Opiskelumuoto: General Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

0 ECTS cr

Language of instruction:

Finnish

Timing:

3rd year, autumn term

Learning outcomes:

Students will present an updated and revised plan for their studies for a Candidate's Degree and evaluate their studies so far.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Group and personal guidance, a written evaluation of the studies so far

Recommended or required reading:

Course catalogue

Assessment methods and criteria:

Personal study plan, self-evaluation of the studies

Grading:

Pass/Fail

Tutor Teacher

Working life cooperation:

None

694714A: Disorders in the Communication of Adults I: Voice and Voice Disorders, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish

Timing:

3rd year, autumn term

Learning outcomes:

Upon completion of this course, students will be able to explain what normal voice control is and to classify voice disorders. Under supervision, they will be able to plan and implement clinical examination and therapy on a client with a voice disorder.

Contents:

Normal voice and voice control, voice disorders and their clinical examination and rehabilitation

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures, exercises, assignments individually and in groups

Target group:

Students of Logopedics

Prerequisites and co-requisites:

This course is to be completed alongside of after the following courses *694766P Anatomy and Physiology of the Speech Organs* and *694742P Medical Examination and Intervention in Voice Disorders*.

Recommended or required reading:

Teaching material and literature: Literature will be announced later.

Assessment methods and criteria:

Examination, assignments individually and in groups

Grading:

0-5

Person responsible:

University Lecturer

Working life cooperation:

None

694830A: Disorders in the Communication of Adults II: Aphasiology, 6 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

6 ECTS credits

Language of instruction:

Finnish

Timing:

3rd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to explain the neural processes behind aphasia, to analyse different types and the psychosocial effects of aphasia. Students will be able to name, select and use the testing and assessment methods of aphasia. Additionally, they will be able to explain and analyse the special characteristics of aphasia rehabilitation and apply the rehabilitation methods.

Contents:

Neural processes related to aphasia, evaluation methods, types and rehabilitation methods of aphasia

Mode of delivery:

Contact teaching and independent studies

Learning activities and teaching methods:

Lectures, exercises, independent studies altogether 162 h.

Target group:

Students majoring in Logopedics

Prerequisites and co-requisites:

Child and Adult Neurology

Recommended or required reading:

Lecture material, scientific literature available

Assessment methods and criteria:

Written assignments and exam. The lecturer defines attendance requirements. Read more about assessment criteria at the University of Oulu webpage.

Grading:

0-5

Person responsible:

University lecturer or university teacher

694796A: Disorders in the Communication of Adults III: Hearing Disabilities, Aging and Memory Disorders of Adults, 5 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Terhi Hautala

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish

Timing:

3rd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to define the essential characteristics of the communication of adults suffering from hearing disabilities on different levels, and to analyse the circumstances affecting them. Students will be able to plan and implement clinical logopedic examination and rehabilitation of hearing disabilities adults have. Additionally, students will be able to analyse normal aging-related changes in communication and separate them from disorders caused by minimal cognitive impairment and dementia.

Contents:

The characteristics and evaluation of the communication of adults suffering from different levels of hearing disabilities and their rehabilitation; age-related changes in communication, communication disorders related to minimal cognitive impairment and dementia; identifying and using of cognitive ability screening

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures, exercises and written assignments

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses *694748P Neurology and Neuroanatomy*, *694745P Otorhinolaryngology and Plastic Surgery* and *694746P Audiology and Audiometry* is required.

Recommended or required reading:

Lecture materials, scientific literature available, and the book Tye-Murray, N. (2009). *Foundations of Aural Rehabilitation. Children, Adults and their Family Members*. Clifton Park: Delmar Cengage Learning. Pp. 383–527, Part III.

Assessment methods and criteria:

Lectures, exercises and written assignments

Grading:

0–5

Person responsible:

University Lecturer

Working life cooperation:

None

694797A: Disorders in the Communication of Adults IV: Motor Speech Disorders, 5 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish

Timing:

3rd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to explain the essential neural processes behind the motor speech disorders and dysphagia, to identify the different disorders related to them, and to apply this knowledge in the assessment and rehabilitation of motor speech disorders.

Contents:

Neural processes related to motor speech disorders, the diagnosing and rehabilitation of motor speech disorders

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures, exercises, written assignments

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the course *694748P Neurology and Neuroanatomy* is required.

Recommended or required reading:

Lecture material, scientific literature available

Assessment methods and criteria:

Lectures, exercises and written assignments

Grading:

0–5

Person responsible:

University teacher

694828A: Disorders in the Communication of Adults V: Dysphagia, 4 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Eeva Vesa

Opintokohteen kielet: Finnish

ECTS Credits:

4 ECTS credits

Language of instruction:

Finnish

Timing:

3rd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to explain different neural processes behind deglutition and to analyse different types of dysphagia. They will be able to select and implement the essential rehabilitation methods of dysphagia. Additionally, students will be able to identify and use some of the assessment methods of the process of deglutition

Contents:

Neural processes related to deglutition, types and rehabilitation of dysphagia, rehabilitation methods

Mode of delivery:

Contact teaching and independent studies

Learning activities and teaching methods:

Lectures, exercises and written assignments altogether 108 h.

Target group:

Students of Logopedics

Recommended or required reading:

Lecture material, scientific literature available

Assessment methods and criteria:

Lectures, exercises and written assignments. The lecturer defines attendance requirements

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2

Language of instruction:

Finnish

Timing:

3rd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to analyse the disorders related to communicating and deglutition of adults as well as their rehabilitation. Additionally, they will be able to evaluate their learning process.

Contents:

Summary of the disorders of communication of adults

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Seminar and a written assignment

Target group:

Students majoring in Logopedics

Prerequisites and co-requisites:

Completion of the courses *Disorders in the Communication of Adults I–V* is required.

Recommended or required reading:

Lecture material from the lectures of the courses *Disorders in the Communication of Adults I–V*

Assessment methods and criteria:

Seminar and a written assignment

694810A: Research in Logopedics I: Methodology and Ethics I, 3 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Taina Välimaa

Opintokohteen kielet: Finnish

ECTS Credits:

3

Language of instruction:

Finnish

Timing:

3rd year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to explain and analyse the basics and norms of scientific research, different research settings and methods as well as to assess aspects of ethical research.

Contents:

Basics of scientific research, norms of science, research settings and methods, ethical aspects of research

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures and exercises

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses *694700P Introduction to Logopedics* and *694720A Introduction to Statistical Analysis* is required.

Recommended or required reading:

Lecture material. Information about additional literature can be obtained from the teacher of the course.

Grading:

Pass/Fail

Person responsible:

University Lecturer

694800A: Clinical Skills I, 7 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

7

Language of instruction:

Finnish

Timing:

2nd year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to explain what the areas of the rehabilitation system are and how they operate in this country. They will also be able to explain the implications of the legislation of health care to the speech therapist, and they will learn to evaluate the ethical questions related to the work of a speech and language therapist. Additionally, students will have the knowledge required to start a clinical practicum. They will be able to identify the speech and language therapist's occupational concepts and fields of operation.

Students will be able to describe the theoretical basis of speech therapy testing and evaluation. Moreover, they will be able to use different methods of fostering linguistic development with children of varying ages. Finally, they will be able to apply the different principles of instructing a group to practice.

Contents:

The service system and its sectors, legislation of health care, basics of clinic work, ethical questions, the theoretical background of testing and evaluation, applying the methods of fostering linguistic development to a group of children

Mode of delivery:

Blended learning

Learning activities and teaching methods:

The learning activities and teaching methods of this course might vary.

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses titled *Development of Language and Communication* and *694700P Introduction to Logopedics* is required.

Recommended or required reading:

Lecture material, and the book Rissanen, P. Kallanranta, T. & Suikkanen, A. (Eds.) *Kuntoutus* (2008). 2nd Edition. Helsinki: Duodecim (Where applicable). http://www.terveysportti.fi/dtk/oppi/koti?p_artikkeli=inf04503&p_selaus=15739 (in Finnish)

Grading:

Instructing nursery school groups on fostering language development

694801A: Therapy I, 10 op

Voimassaolo: 01.08.2015 -

Opiskelumoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10 ECTS credits (5 + 5)

Language of instruction:

Finnish

Timing:

2nd year and 3rd year

Learning outcomes:

Upon completion of the course, students will be able to plan and implement speech therapy rehabilitation. Additionally, they will be able to analyse the process of speech therapy and the profession of a speech and language therapist.

Contents:

Speech therapy rehabilitation of different disorders in communication

Mode of delivery:

Blended learning

Learning activities and teaching methods:

Supervised planning and implementing of two speech therapy periods and written assignments related to them, following and discussing therapy organised by students

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the course *Clinical Skills I* and the courses related to *Disorders in the Communication of Children and Youth* is required when applicable.

Grading:

Pass/Fail

Person responsible:

University Lecturer or University Teacher

Working life cooperation:

None

694821A: , 5 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish

Timing:

2nd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to plan data collection and to consider the process of acquiring observational data; to evaluate the sample of current survey and measuring the variables; to create observational data using statistical software and to use it independently for handling and analysing the data; to describe the data with applicable methods; to apply the fundamental principles of statistical deduction in analysing study questions; to identify the multivariable and statistical methods applied in analysing the observational data; to report scientific study results and to critically assess studies which have used statistical methods.

Contents:

Planning a quantitative study and acquiring observational data; variables and measuring, and creating data matrix; choosing and presenting the data studied; choosing statistical method: statistical tests and confidence intervals; analysing the data with statistical software: regression analysis, variance analysis and covariance analysis with interpreting the results; reliability, factor analysis and principal component analysis; statistical literacy: interpreting tables and figures, evaluating statistical results.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Contact teaching: 28 h lectures and 21 h exercises, partly in computer class. Independent studies 86 h which include accomplishing pre-lecture exercises.

Target group:

Students of Logopedics

Recommended or required reading:

Lecture and exercise material. Information about additional literature can be obtained from the teacher of the course. Pre-lecture exercises and examination. The lecturer defines attendance requirements. Read more about assessment criteria at the University of Oulu webpage.

Assessment methods and criteria:

Pre-lecture exercises and examination. The lecturer defines attendance requirements. Read more about assessment criteria at the University of Oulu webpage.

Arvostelu: 1 - 5, pass, fail

Opettajat: Kunnari, Sari Maarit

Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

Compulsory minor subject 22 credits

694958Y: Structure of Finnish, 5 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Language and Communication Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Katja Västi

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits / 135 hours work

Language of instruction:

Finnish

Learning outcomes:

Students will be able to define the basic phonological, morphological, and syntactic structures of modern standard Finnish.

Contents:

Introduction to scholarly depiction of structures of Finnish

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures (24 h); exercises (12 h); and independent study (99 h); or alternatively independent study online (135 h)

Target group:

Students in language programmes in the Faculty of Humanities

Recommended or required reading:

Online reading material

Assessment methods and criteria:

The assessment of the course is based on a formal examination, and the assessment criteria are based on the learning outcomes of the course

Grading:

0-5

Person responsible:

University lecturer Katja Västi

Working life cooperation:

Other information:

Students majoring in Finnish Language will include the course in the Language and Communication studies.

694959Y: Introduction to General Linguistics and Phonetics, 5 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: General Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Santeri Palviainen

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish

Timing:

It is recommended that the course be passed in the first semester if the course is mandatory for the student. It is also a prerequisite for other courses in Linguistics.

Learning outcomes:

Upon completion of this unit, students will be able to analyze the structure of language scientifically and systematically. They will be able to apply the analytical tools of phonetics, phonology, morphology, syntax and semantics in novel linguistic data and define the basic terminology in linguistics and phonetics.

Contents:

Basic linguistic concepts and analysis. The focus is on phonetics, phonology, morphology, and syntax.

Mode of delivery:

Lectures

Learning activities and teaching methods:

48 hours of lectures, 87 hours of independent study

Target group:

Students of languages and others interested in languages

Recommended or required reading:

Readings distributed in class

Assessment methods and criteria:

Home work and examination

Grading:

0-5

Person responsible:

Santeri Palviainen

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish

Timing:

1st year, autumn term

Learning outcomes:

Upon completion of this course, students will have fundamental knowledge about the theories and central issues of developmental psychology.

Contents:

The course covers the psychological development of people from early childhood to old age.

Mode of delivery:

Lectures and books. The course consists of a series of national virtual lectures. Additional information can be obtained from <http://www.psykonet.fi/> (*In Finnish*).

Learning activities and teaching methods:

20 hours of lectures

Target group:

Students of Logopedics

Recommended or required reading:

Lecture materials and the book: Nurmi, Ahonen, Lyytinen, Lyytinen et al. (Eds.): *Ihmisen psykologinen kehitys*, Additional reading: Berger: *The Developing Person Through the Life Span*, 6th edition (pp. 1–412) or 7th edition (pp. 1–443).

Students in Logopedics

Prerequisites and co-requisites:

Completion of the course Cognitive Neuroscience is required.

Recommended or required reading:

Lecture material and the books.

Kolb & Whishaw: Fundamentals of Human Neuropsychology, 5th, 6th or 7th edition, chapters 11–28. Recommended reading: Hämäläinen ym. (Eds.): Mieli ja Aivot: Kognitiivisen neurotieteen oppikirja (2006), chapters 2–4, 6–9.

Assessment methods and criteria:

Exam. The lecturer defines attendance requirements. Read more about assessment criteria at the University of Oulu webpage.

Grading:

0-5

Person responsible:

University of Turku, Psychology, Heikki Hämäläinen

A100011: Medicine, 16 - 40 op

Opiskelumuoto: Minors

Laji: Study module

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Kunnari, Sari Maarit

Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

Compulsory minor subject 15 credits

694749P: Psychiatry across the life-span, 3 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Kaisu Heinänen

Opintokohteen kielet: Finnish

ECTS Credits:

3

Language of instruction:

Finnish

Timing:

2nd year, spring term or 3rd year, spring term (The course is held biennially.)

Learning outcomes:

Upon completion of the course, students will be able to remember essential questions about psychiatry in different stages of life and related diseases, diagnostics and intervention. Additionally, they will be able to explain the services of mental health care and psychiatric intervention in Finland.

Contents:

Essential questions about psychiatry in different stages of life and related diseases, diagnostics and intervention, services of mental health care and psychiatric treatment in Finland

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures

Target group:

Students of Logopedics

Recommended or required reading:

Lecture material. Information about additional literature can be obtained from the teacher of the course.

Assessment methods and criteria:

Formal examination

Grading:

0#5

Person responsible:

Professor

Working life cooperation:

None

694818A: Anatomy and Physiology of the Speech Organs, 5 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Elisa Heikkinen

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish

Timing:

1nd year, autumn and spring term

Learning outcomes:

Upon completion of this course the student will be able to name the principles of speech organs and can outline their functioning.

Contents:

Basic knowledge of the anatomy and physiology of speech organs

Mode of delivery:

Independent studies

Learning activities and teaching methods:

Book exam. Independent studies altogether 135 h.

Target group:

Students in Logopedics

Recommended or required reading:

Seikel, J. A., Drumright, D. G. & King, D. W. (2016). Anatomy & physiology for speech, language and hearing. New York: Cengage Learning. pp. 49–498.

Assessment methods and criteria:

Book exam

Grading:

0-5

Person responsible:

Professor, university lecturer or university teacher

694819A: , 5 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Kaisu Heinänen

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish

Timing:

2nd year, autumn term

Learning outcomes:

Upon completion of this course the student will be able to explain basic knowledge about neuroanatomy and -physiology. The student will be able to identify neurological diseases in children and adults, and their medical diagnostic markers, etiological factors and medical treatment.

Contents:

Neuroanatomy and -physiology, child and adult neurology, neurological diseases and its diagnostic and treatment.

Mode of delivery:

Blended learning

Learning activities and teaching methods:

The implementation methods of the course vary, altogether 135 of work.

Target group:

Students of Logopedics

Assessment methods and criteria:

Exam

Grading:

0-5

694820A: Clinical medicine, 3 op

Voimassaolo: 01.08.2017 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Kaisu Heinänen

Opintokohteen kielet: Finnish

ECTS Credits:

3 ECTS credits

Language of instruction:

Finnish

Timing:

2nd year, autumn term

Learning outcomes:

Upon completion of this course the student will be able to name medical diagnoses essential in logopedics. Also the student will be able to explain medical diagnostic features, etiological factors and medical treatments.

Contents:

Medical diseases, their diagnostics and treatment essential in logopedics.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Blended learning, altogether 81 h of work.

Target group:

Students in Logopedics

Assessment methods and criteria:

Exam. Read more about assessment criteria at the University of Oulu webpage.

Grading:

0-5

Person responsible:

Professor, university lecturer or university teacher

Tutkintorakenteisiin kuulumattomien opintokokonaisuuksien ja -jaksojen kuvaukset

694808P: A Laboratory Course in Clinical Acoustic Phonetics, 5 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Pentti Kärkkö

Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

730092A: Clinical Neuropsychology, 5 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish, English

Timing:

2nd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to identify the specific nature of neuropsychological disorders and define some of the basic mechanisms of the neuropsychological disorders of adults and children.

Contents:

The main types and mechanisms of the neuropsychological disorders of adults and children.

Mode of delivery:

A series of virtual lectures, and books

Learning activities and teaching methods:

26 hours of lectures

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the course 730099A *Cognitive Neuroscience* is required.

Recommended or required reading:

Lecture material and the books Kolb & Whishaw: *Fundamentals of Human Neuropsychology*, 5th edition, chapters 11–28 and Anderson, Northam & Wrennall: *Developmental Neuropsychology: A Clinical Approach (Brain, Behaviour and Cognition)*, chapters 1, 4–11. Recommended reading: Hämäläinen ym. (Eds.): *Mieli ja Aivot: Kognitiivisen neurotieteen oppikirja* (2006), chapters 2–4, 6–9.

Assessment methods and criteria:

Examination

Grading:

0–5

Working life cooperation:

None

694815S: Evolution of communication, 5 op

Voimassaolo: 21.09.2016 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Matti Lehtihalmes

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish

Timing:

Spring 2017

Learning outcomes:

Students learn about the special features of communication of human and other animals, various forms of human linguistic and non-linguistic communication as well as different theories of evolution of human speech and language. After the course, students are able to explain basic evolutionary routes of communication.

Contents:

Forms and features of animal communication. Evolution of cognition and culture. Evolution of speech, language and interaction.

Mode of delivery:

Lectures and workshops 20 h; independent work 115 h

Learning activities and teaching methods:

Lectures and learning diary

Target group:

Not specified

Prerequisites and co-requisites:

No prerequisites

Recommended or required reading:

Scientific literature on the evolution of communication

Assessment methods and criteria:

In order to pass the course, students have to actively participate in the classes, return their writing assignments in time and display their knowledge about the contents of the course as well as their own thinking about the subject in the learning diary.

Grading:

Pass/fail

Person responsible:

Matti Lehtihalmes

Working life cooperation:

None

Other information:

The course is part of the minor subject "Human evolution and behaviour"

694767P: Orthodontics, 1 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.
