Admission requirements

All students presently enrolled and registered at the University of Oulu are entitled to study General Linguistics. The only prerequisite for participating in the General Linguistics programme is completion of 695250Y Introduction to General Linguistics.

Study guidance

The person responsible for General Linguistics is the Lecturer of General Linguistics, Santeri Palviainen, who can be reached in room HU129 during office hours, via telephone (+358-8-553 3482) and email. Office hours are confirmed yearly and announced on the programme's website.

General Linguistics

Altogether, General Linguistics programme at the University of Oulu offers students 60 ECTS credits of instruction (Basic Studies 25 ECTS credits and Intermediate Studies 35 ECTS credits). General Linguistics cannot, however, be studied as a major subject in the University. Studies in the programme aim to familiarize the students with the general principles of the scientific study of natural language. General Linguistics uses concrete language materials from different languages as data and utilizes various theoretical and methodological approaches.

General Linguistics is a particularly suitable subsidiary (minor) subject for students of the Finnish Language, Saami or other foreign languages or students in the Logopedics programme. For native speakers, General Linguistics provides

a novel perspective on Finnish, Swedish and Saami in connection to other languages of the world. Students of foreign languages, too, can benefit from studies in General Linguistics, as the programme provides the skills to analyse the structure of the languages they are studying.

Employment prospects

Subsidiary studies in General Linguistics helps prepare the students for various careers. General Linguistics is a useful subsidiary subject not only for researchers but also for students planning to become teachers as it provides a wide perspective on the nature of language and grammar.

Practical information

Curriculum

The current curriculum of General Linguistics courses is available on the bulletin board of the programme as well as on its website. Most of the courses may also be completed by book exam on the examination dates of the Faculty of Humanities (see individual course descriptions); examination dates of degree groups are not used however. The scope of the book exams in ECTS credits is calculated according to the general instructions of the Faculty: one ECTS credit is approximately 170 pages of Finnish text or 100 pages in English or another language. Students may compile the Basic Studies package (25 ECTS credits) and Intermediate Studies package (35 ECTS credits) based on the available courses according to their own interests and needs. The only compulsory courses are Introduction to General Linguistics (695250Y) and the Seminar (695281A) at the Intermediate stage of studies.

General Linguistics is closely linked with other programmes in the Faculty of Humanities, and students may combine courses from Phonetics, Logopedics and various other disciplines (for example Finnish Language) with their studies in General Linguistics. The students themselves are responsible for taking care of possible overlaps and obtaining the required study rights.

Exams and sign-up

Several courses include exams. Lecture examinations do not require separate sign-up. Students must sign up for book exams on the Faculty examination dates in Weboodi 10 days in advance. Faculty examination dates can be found on the Faculty of Humanities' website.

Study packages and learning outcomes

The aim of the Basic Level study package is to provide a wide perspective on the various subsystems (phonology, morphology, syntax, semantics and pragmatics) related to the structure and use of language. During the Intermediate Level studies, students deepen and learn to apply the knowledge acquired in the Basic Level courses. Students may use Intermediate Level courses when compiling their Basic Studies package or, upon agreement, courses from other subjects as well.

Upon completion of the Basic Studies, students are familiar with and can recognize various structures of language on different levels (sounds, forms, clauses and meaning). They can analyse and classify linguistic phenomena in different kinds of languages. Students have a grasp of the central linguistic terminology and can point out essential language theories.

Upon completion of the Intermediate Studies, students can evaluate different language theories and combine previously learned structures with new structures. Students can evaluate the significance of central actors (linguists, researchers etc.) in linguistics and their influence on the development of the field. Students can collect and classify their own linguistic data and make theoretical generalizations.

695261A: Classics in Linguistics, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Santeri Palviainen

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish, for closed-book examination also English or other foreign language

Timing:

Free

Learning outcomes:

Upon completion of this course, students will be able to describe the significance of a classical work in the history of linguistics. The students will be able to classify different theoretical approaches and analyze their interrelationships.

Contents:

Classics in linguistics. The student will read the classic itself, not merely a secondary work. The classics selected can also be grouped so that they form a coherent whole, e.g., a particular theory (structuralism, cognitive grammar /linguistics, generative grammar, Optimality Theory etc.).

Mode of delivery:

Contact teaching or self study

Learning activities and teaching methods:

Lectures, or alternatively closed-book examination or paper

Target group:

Linguistics students and others interested in languages

Prerequisites and co-requisites:

The student must have completed *Introduction to General Linguistics* prior to enrolling in this course

Recommended or required reading:

Approximately 500 pages to be selected from the following (other books are subject to approval):

Hannele Dufva and Mika Lähteenmäki: *Kielentutkimuksen klassikoita*,

Ferdinand de Saussure: *Cours de Linguistique Générale* (also available in English and Finnish),

Leonard Bloomfield: *Language*,

Noam Chomsky: *Syntactic Structures*,

Noam Chomsky: *Aspects of the Theory of Syntax*,

Noam Chomsky & Morris Halle: *Sound Pattern of English*,

Zellig Harris: *Methods in Structural Linguistics*,

Nikolai Trubetzkoy: *Grundzüge der Phonologie*,

Eduard Sapir: *Language*,

Ronald Langacker: *Foundations of Cognitive Grammar*,

or other classics in linguistics.
