

Opasraportti

Logopedics (2015 - 2016)

Logopedics

Logopedics, PL 1000, FI-90014 University of Oulu, Finland

Telephone: Study counsellor +358 29 448 3393 Amanuensis and +358 29 448 3385 Academic Affairs Secretary

E-mail: firstname.lastname@oulu.fi (staff e-mail addresses)

Website: *(In Finnish)* <http://www.oulu.fi/logopedia/>

Admission requirements

To be admitted to the Logopedics degree programme, students must pass an entrance examination. Basic Studies in Logopedics can be completed as a subsidiary subject. More information on this option is available from the study counsellor.

Study guidance

Study guidance is provided by the Amanuensis. Tel. +358 29 448 3393, E-mail logo.amanuensis@oulu.fi.

Logopedics

Logopedics is a discipline that examines normal development of speech, language and communication skills as well as disorders related to these in a versatile manner. The main focus of the studies is on the manifestations of voice, speech, language and communication in addition to rehabilitation, the efficiency of rehabilitation and prevention of disorders.

Upon the completion of the degree programme in Logopedics, students may apply for qualification from Valvira, the Finnish National Supervisory Authority for Welfare and Health, in order to operate as licenced speech therapists and as professionals in various job settings that require expertise in speech, language and communication. The degree programme in Logopedics aims to train the students to become multidisciplinary experts. To attain this goal, the programme focuses on an appropriate selection of topics and on the multidisciplinary nature of research in the field.

Studies in Logopedics familiarises the students with the normal development of speech, language and communication as well as with related disorders and the rehabilitation and multiprofessional diagnostics of such disorders.

In addition to the core Logopedics studies, also Psychology, Medicine, Phonetics and Linguistics in particular have a prominent position in the studies. In the Logopedics programme, students first complete the three-year-long Bachelor of Arts degree (180 ECTS credits), and then move on to the two-year-long Master of Arts degree (120 ECTS credits). Studies include instruction on theory, guided clinical education, training to become a therapist and independent training in the profession of a speech and language therapist.

Fostering professional skills and research during the studies is essentially important for the development of the discipline. At the University of Oulu, the main focus areas of research in the Logopedics programme are the study of children's language and related disorders as well as neurocognitive study of language. This research is carried out primarily at the Child Language Research Center, which has been selected as one of the leading research groups of anthropology in the Eudaimonia Research Center at the University of Oulu.

Students are obliged to take part, to a reasonable degree, in the department's research activities, for example by collecting data or being a test subject in a Logopedics research project. The degree in Logopedics provides students the academic qualifications required to apply for a Doctoral degree programme in Logopedics.

Employment Prospects

Speech and language therapists have excellent employment prospects, and there are many openings and a good demand for private speech and language therapists. People with expertise in Logopedics are also needed in education, research and development of assistive instrument technology.

Practical information

Practical information is available in "Logopedian matkaopas" ("Travel Guide to Logopedics", *in Finnish*), which can be found in PDF form on the degree programme's website.

Study packages and learning outcomes

The Basic Studies of Logopedics will familiarise the students with the central concepts of Logopedics, scientific thinking and writing. Students will acquire a basic knowledge of the normal development of language and speech as well as the development and support of interaction and communication. Upon completion of the Basic Studies, students will be able to follow the ethical principles of academic writing.

Learning outcomes in Basic Studies of Logopedics:

- Students will have the knowledge, skills and conceptual expertise required to examine the research of interaction, communication and related disorders.
- Students will have an understanding the nature of logopedic reasoning and can acknowledge the characteristics of scholarly data and different research approaches.
- Students will have a general idea of the profession of a speech and language therapist.
- Additionally, students will have the ability to create small-scale written presentations based on their expertise.

The Intermediate Studies in Logopedics will familiarise the students comprehensively with the research methods and disorders of Logopedics. These studies are supplemented with a selection of subsidiary subjects. The main aim of the Intermediate Studies package is to deepen the students' informational and methodological abilities so that they will be capable of independent scientific work and able to apply their theoretical knowledge in the clinical courses during the Intermediate and Advanced Studies.

Learning outcomes in Intermediate Studies in Logopedics:

- Students will have knowledge of the perspectives, methods and data of researching the disorders in interaction and communication, and they will understand the scope and complexity of questions in research in the field of Logopedics.
- Students will be able to produce a Candidate's Thesis required for a Bachelor's Degree.
- Students will master the methodological fundamentals of logopedic rehabilitation and are able to work as speech and language therapists under supervision in the clinical courses.
- Students will have familiarised themselves with the ethical guidelines concerning the profession of a speech and language therapist.

The Advanced Studies in Logopedics, via studies of theoretical and clinical courses, will foster the students' skills to conduct research in Logopedics based on their own areas of interest as well as their ability to work independently as speech and language therapists. With the Advanced Studies, students will gain high-level skills for understanding, analysing and reporting the nature of disorders in interaction, communication and logopedic information. In addition, students will gain diverse qualifications needed in the professions in the field.

Learning outcomes in Advanced Studies in Logopedics:

- Students will be able to plan and execute advanced projects concerning research and the application of knowledge and to produce scholarly discourse.
- Students will be able to critically evaluate different data and arguments and present the results of a research process coherently in a written thesis.
- Students will be able to do demanding independent tasks that require analysis, creativity and ethical evaluation. They will be able to work as experts in different communities and in multiprofessional cooperation.
- Students will understand the diversity of logopedic research and can place their own research aims in the wider context of discourse in the field. Students will be able to independently follow the discourse in the field.
- Students will know and be able to apply essential research methods to clinical courses. They will be able to use the terminology of Logopedics and they will have the skills to apply methodological and theoretical tools from other disciplines in both research and clinical work.
- Via theoretical studies and clinical courses, students will have acquired advanced qualifications for understanding, analysing and communicating the nature of logopedic information or any other type of information both in the context of research and in the profession of a speech and language therapist.

The study packages of Linguistics and Phonetics

The study packages of Linguistics and Phonetics will familiarise the students with the nature of language and speech as well as the systematic analysis and examination of various phenomena in normal language and speech as well as the language and speech affected by disorders.

The study package of Psychology

The study package of Psychology will familiarise the students with human psychological development and functions and related disorders.

The study package of Medicine

The study package of Medicine will familiarise the students with the main principles of human physiological structures and function. Students will learn to understand how different disabilities and disorders are related to diagnostics and rehabilitation in the field of Logopedics.

Subsidiary Studies in Logopedics (25 ECTS credits)

694700P Introduction to Logopedics (6 ECTS credits) Autumn term

694754P Development of Language and Communication: Socialisation into the Language Community (3 ECTS credits) Autumn term

694809P Development of Language and Communication: Stages of the Language Development of Children (6 ECTS credits) Spring term

694768P Development of Language and Communication: Fostering Linguistic Development (2 ECTS credits) Spring term

694738P Introduction to Phonetics and Finnish Phonology and Morphology (4 ECTS credits) Autumn term

694769P Introduction to Disorders in the Communication, Language and Speech of Children and Youth (5 ECTS credits) Spring term

Major studies in Logopedics (213 ECTS credits)**Basic Studies in Logopedics (25 ECTS credits)**

694753Y Personal Study Plan 1 (Logopedics) (0 ECTS credits) 1st year, autumn term

694700P Introduction to Logopedics (6 ECTS credits) 1st year, autumn term

694754P Development of Language and Communication: Socialisation into the Language Community (3 ECTS credits) 1st year, autumn term

694809P Development of Language and Communication: Stages of the Language Development of Children (6 ECTS credits) 1st year, spring term

694790P Development of Language and Communication: Fostering Linguistic Development (2 ECTS credits) 1st year, spring term

694769P Introduction to Disorders in the Communication, Language and Speech of Children and Youth (5 ECTS credits) 1st year, spring term

694720A Introduction to Statistical Analysis (3 ECTS credits) 1st year, spring term

Intermediate Studies in Logopedics (78 ECTS credits)*Disorders in the Communication of Children and Youth (23 ECTS credits)*

694791A Assessment and Diagnostics of Disorders of the Communication, Language and Speech of Children and Youth (7 ECTS credits) 2nd year, autumn term

694792A Rehabilitation of the Disorders in the Communication, Language and Speech of Children and Youth I (7 ECTS credits) 2nd year, autumn term

694793A Rehabilitation of the Disorders in the Communication, Language and Speech of Children and Youth II (7 ECTS credits) 2nd year, spring term

694794A Rehabilitation of the Disorders in the Communication, Language and Speech of Children and Youth III (2 ECTS credits) 3rd year, autumn term

Disorders in the Communication of Adults (25 ECTS credits)

694714A Disorders in the Communication of Adults I: Voice Disorders (5 ECTS credits) 3rd year, spring term

694795A Disorders in the Communication of Adults II: Aphasiology (5 ECTS credits) 3rd year, autumn term

694796A Disorders in the Communication of Adults III: Hearing Disabilities, Aging and Memory Disorders of Adults (5 ECTS credits) 3rd year, autumn term

694797A Disorders in the Communication of Adults IV: Motor Speech Disorders (5 ECTS credits) 3rd year, spring term

694798A Disorders in the Communication of Adults V: Dysphagia (3 ECTS credits) 3rd year, spring term

694799A Disorders in the Communication of Adults VI: Final Seminar (2 ECTS credits) 3rd year, spring term

Research in Logopedics I

694810A Research in Logopedics I: Methodology and Ethics I (3 ECTS credit) 3rd year, autumn term

694708A Research in Logopedics I: Basic Seminar and Candidate's Thesis (10 ECTS credits)

Clinical Studies in Logopedics I

694800A Clinical Skills I (7 ECTS credits) 2nd year, autumn term

694801A Therapy I (10 ECTS credits) 2nd year, spring term, or 3rd year, autumn term, or 3rd year, spring term

694724A Maturity Test (Candidate's Degree/Logopedics) (0 ECTS credits) 3rd year, spring term

694758Y Personal Study Plan 2 (Logopedics) (0 ECTS credits) 3rd year, spring term

Advanced Studies in Logopedics (110 ECTS credits)

694732S Advanced Course in Statistical Analysis (3 ECTS credits) 4th year, autumn term

Research in Logopedics II

694811S Research in Logopedics II: Methodology and Ethics II (5 ECTS credits) 4th year, autumn term

694802S Research in Logopedics II: Advanced Seminar (6 ECTS credits) 4th year, autumn–4th year, spring

694803S Literature Overview for Master's Thesis (10 ECTS credits) 4th year, spring term

694730S Master's Thesis (30 ECTS credits) 5th year, autumn term

Special Skills

694725S Advanced Topics in Logopedics (7 ECTS credits) 4th year, autumn term–4th year, spring term

694813S Presentation on Field of Expertise (2 ECTS credits) 4th year, autumn term or 4th year, spring term or 5th year, autumn term

694814S Advanced Literature in Logopedics (6 ECTS credits) 5th year, spring term

Clinical Studies in Logopedics II

694804S Clinical Skills II (7 ECTS credits) 4th year, autumn term–4th year, spring term

694805S Therapy II (10 ECTS credits) 4th year, autumn term or 4th year, spring term or 5th year, autumn term

694806S Clinical Skills III (24 ECTS) 5th year, spring term

694737S Maturity Test (Master's Degree/Logopedics) (0 ECTS credits)

694759Y Personal Study Plan 3 (Logopedics) (0 ECTS credits) 4th year, autumn term

Subsidiary Studies

Linguistics and Phonetics (22 ECTS credits)

694926Y Structure of Finnish (3 ECTS credits) 1st year, autumn term

694738P Introduction to Phonetics and Finnish Phonology and Morphology (4 ECTS credits) 1st year, autumn term

694807P Acoustic Phonetics (3 ECTS credits) 2nd year, autumn term

694808P Research Course in Clinical Acoustic Phonetics (5 ECTS credits) 2nd year, autumn term–2nd year, spring term

695252P Psycholinguistics (3 ECTS credits) 3rd year, autumn term

695250Y Introduction to General Linguistics (4 ECTS credits) 1st year, autumn term

Studies in Psychology (25 ECTS credits)

730097P Introduction to Developmental Psychology (5 ECTS credits) 1st year, autumn term

730098P Introduction to Cognitive Psychology and Neuropsychology (5 ECTS credits) 1st year, autumn term

730099A Cognitive Neuroscience (5 ECTS credits) 1st year, spring term

730100P Introduction to the Psychology of Health and Mental Health (5 ECTS credits) 2nd year, spring term

730092A Clinical Neuropsychology (5 ECTS credits) 2nd year, spring term

Studies in Medicine (15 ECTS credits)

694766P The Anatomy and Physiology of the Speech Organs (1 ECTS credit) 1st year, spring term

694767P Orthodontics (1 ECTS credit) 1st year, spring term

694742P Medical Examination and Intervention in Voice Disorders (1 ECTS credit) 2nd year,
autumn term

694743P Medical Examination and Intervention in Craniofacial Disorders (1 ECTS credit) ** 2nd year, spring term or 3rd year, spring term

694745P Otorhinolaryngology and Plastic Surgery (1 ECTS credit) 1st year, spring term

694746P Audiology and Audiometry (2 ECTS credits) 2nd year, autumn term

694747P Child Neurology (1 ECTS credit) 1st year, spring term

694748P Neurology and Neuroanatomy (3 ECTS credits) 2nd year, autumn term

694749P Psychiatry Across the Lifespan (3 ECTS credits) ** 2nd year, spring term or 3rd year, spring term

694750P Geriatrics (1 ECTS credit) ** 2nd year, spring term or 3rd year, spring term

**) The course is held biennially.

Elective Studies (10 ECTS credits) (MA)

694752S Optional Studies in Logopedics (1–10 ECTS credits)

Language and Communication Studies (15 ECTS credits)

Foreign Language (5 ECTS credits) 1st year, autumn term

Finnish or Swedish (5 ECTS credits) 3rd year, autumn term

Written and Oral Communication (5 ECTS credits) 1st year, autumn term–3rd year, spring term

Opintojaksosten kuvaukset

Tutkintorakenteisiin kuuluvien opintokohteiden kuvaukset

902001Y: Academic Communication, 3 op

Voimassaolo: 01.08.1995 -

Opiskelumuoto: Language and Communication Studies

Laji: Course

Vastuuyksikkö: Negotiated Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Proficiency level:

[B2/C1](#) (on the CEFR scale)

Status:

Obligatory foreign language course for students of logopedics and cultural anthropology and archaeology who choose English as their foreign language.

Required proficiency level:

English as A- or B-language in senior secondary school, or equivalent skills.

ECTS Credits:

3 op / 3 ECTS credits - The student workload is 80 hours of work

Language of instruction:

English

Timing:

First year spring, students of logopedics and cultural anthropology and archaeology, after completion of 902000Y Reading for Academic Purposes in the Humanities.

Learning outcomes:

In *Academic Communication*, you will focus on developing your academic and professional communication skills in English. The course will enable you to follow developments in your own field and succeed in international, intercultural contexts at an at least B2 level of proficiency.

Learning outcomes: By the end of the course, you are expected

- to have demonstrated your use of appropriate strategies and techniques for communicating effectively in English in an academic context.

to have demonstrated the ability to present field-related subjects using appropriate academic vocabulary.

Contents:

Skills in oral interaction, including presenting academic topics to classmates, are practiced in the classroom, where there is a strong focus on working in pairs and small groups. Homework tasks include online listening tasks, writing, and reading to prepare for classroom discussions.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

80 hours of student work including regular class attendance and homework.

Target group:

Students of logopedics and cultural anthropology and archaeology

Prerequisites and co-requisites:

902000Y Reading for Academic Purposes in the Humanities (RAP-Hum)

Recommended optional programme components:

See 902000Y RAP-Hum, which is the prerequisite for this course.

Recommended or required reading:

Available online, in the university library and/or provided by the teacher.

Assessment methods and criteria:

Student work is monitored by *continuous assessment*. You are required to participate regularly and actively in all contact teaching provided, and successfully complete all required coursework.

Read more about [assessment criteria](#) at the University of Oulu webpage.

Grading:

pass/fail

Person responsible:

Heather Kannasmaa (logopedics), Karen Niskanen (cultural anthropology and archaeology)

Voimassaolo: 01.08.1995 -

Opiskelumuoto: Language and Communication Studies

Laji: Course

Vastuuyksikkö: Negotiated Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Proficiency level:

B2/C1 (on the [CEFR scale](#))

Status:

Obligatory foreign language course for students of logopedics and cultural anthropology and archaeology who choose English as their foreign language and whose matriculation exam grade is lower than *laudatur* or *eximia cum laude approbatur*.

Required proficiency level:

English as A- or B-language in senior secondary school, or equivalent skills.

ECTS Credits:

2 op / 2 ECTS

Language of instruction:

English

Timing:

1st year students of logopedics and cultural anthropology and archaeology; autumn term (only), BEFORE completion of *902001Y Academic Communication*

Learning outcomes:

The general aim is to be able to read more extensive academic - general or discipline-specific - text with increased confidence and at sufficient speed and to process it critically. More specifically, the aim is to be able to read and understand the main ideas of an academic text, scan sufficiently quickly for relevant details, and extract information from the readings.

Learning outcomes: By the end of the course, you are expected to be able to

- have acquired effective vocabulary learning techniques
- be able to distinguish parts of words to infer meanings
- utilize your knowledge of text structure and cohesion markers to understand academic texts
- extract information and learn content from English readings in academic and professional contexts

Contents:

The course will focus on reading strategies; these include recognizing how texts are organized, identifying key points in a text, and understanding words in context. Vocabulary work in the course will focus on a) academic vocabulary, as used in formal scientific writing, and b) using your knowledge of the meanings of parts of words (affixes) to infer meaning.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

The scope of the course is 2 op (54 hours student workload).

Target group:

Students of logopedics and cultural anthropology and archaeology

Prerequisites and co-requisites:

-

Recommended optional programme components:

See 902001Y Academic Communication, which is taken AFTER completion of this course

Recommended or required reading:

Photocopies will be provided by the teacher and/or required texts will be accessible online or from the university library.

Assessment methods and criteria:

Student work is monitored by *continuous assessment*. You are required to participate regularly and actively in all contact teaching provided, and successfully complete all required coursework. Three lessons, at monthly intervals, will start with a short test on material covered so far.

Learning activities and teaching methods:

Students in the Faculty of Humanities select their written and oral communication studies from the course units offered in the Communication Buffet in such a way that the selected course units include both written and oral studies. With most of the course units, the student has the option to choose between versions worth 2 credits or 3 credits; the student may choose to take a 3 credit written skills course and a 2 credit oral skills course - or vice versa - to form the required total amount of 5 credits. The student must discuss the additional assignments required for the 3 credit version with the teacher of the course unit in question. It is also possible to complete the communication studies with one course unit, which combines both oral and written studies and is worth 5 credits.

Students of Saami Language and Saami Culture complete the Communication Buffet course unit 900050Y-04 Scientific Communication (Tieteellinen viestintä) - 5 ECTS credits.

Students in the Master's Degree Programme in Business Communication may complete their communication studies by taking the course unit 900055Y Communication Skills in Business and Economic Life (Talouselämän viestintä)(3 ECTS credits) intended for students of Economics and one freely selectable course unit (2 ECTS credits) from the Communication Buffet.

Faculty of Information Technology and Electrical Engineering

Students of Information Processing Science complete the course unit in teaching groups reserved for them by **either** taking the course unit 900050-27 Scientific Communication (TOL) (Tieteellinen viestintä [TOL]) - 4 ECTS credits (Option A) **OR** the course units 900050Y-18 Written Communication 1 (TOL) (Kirjoitusviestintä [TOL]) - 2 ECTS credits and 900050Y-26 Oral Communication (TOL) (Puheviestintä [TOL]) - 2 ECTS credits (Option B).

*Compulsory basic studies***694700P: Introduction to Logopedics, 6 op**

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay694700P Introduction to Logopedics (OPEN UNIV) 6.0 op

ECTS Credits:

6

Language of instruction:

Finnish

Timing:

1st year, autumn term

Learning outcomes:

Upon completion of this course, students will be able to explain the development of Logopedics into its own discipline and what connections it has to other disciplines. Students will be able to identify the main research areas and essential scientific literature, and to use different research methods within the field of Logopedics. Additionally, they will be able to describe the field of work of speech and language therapists in the different sectors of Social and Health Care Services.

Contents:

Development of Logopedics as a science, connections to other disciplines, the duties of a speech and language therapist in the prevention and assessment of communication disorders and rehabilitation

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures and independent work on essay assignments

Target group:

Students majoring and minoring in Logopedics

Recommended or required reading:

Lecture material and scientific literature available

Assessment methods and criteria:

Essays

Grading:

0–5

Person responsible:

Professor

Working life cooperation:

694754P: Development of Language and Communication: Socialisation into the Language Community, 3 op

Voimassaolo: 01.08.2009 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3

Language of instruction:

Finnish

Timing:

1st year, spring term

Learning outcomes:

Upon completion of this course, students will be able to explain how infants, in active interaction with their environment, evolve into social individuals that use language for communication. They will be able to apply this knowledge when examining delayed and deviant development.

Contents:

Theories of the development of language and communication, the development of language in interaction, the connection between the language and communication development and the overall development of children

Mode of delivery:

Virtual lecture

Learning activities and teaching methods:

Contact teaching, which includes video observation tasks, as well as group work (a written assignment), and a final essay or examination

Target group:

Students majoring and minoring in Logopedics

Recommended or required reading:

Lecture material and literature. Information on required and recommended reading can be obtained from the lecturer.

Assessment methods and criteria:

Exercises, group work, and an essay or exam

Grading:

0–5

Person responsible:

University Lecturer

Working life cooperation:

None

694809P: Development of Language and Communication: Stages of the Language Development of Children, 6 op

Voimassaolo: 01.08.2015 -

ay694809P Development of Language and Communication: Stages of the Language Development of Children (OPEN UNIV) 6.0 op

ECTS Credits:

6

Language of instruction:

Finnish

Timing:1st year, spring term**Learning outcomes:**

Upon completion of this course, students will be able to describe the progress of the different areas of language development. They will be able to identify the characteristics of deviant development and to apply this knowledge when assessing the linguistic development of a child. Students will also be able to describe the features of the linguistic development of bilingual and multilingual children, and identify how culture and the linguistic environment affect the acquiring of language, speech and communication.

Contents:

Description of the typical development of the different areas of language, description of the linguistic development of bilingual and multilingual children

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures, which include analysing videos and transcribed speech samples

Target group:

Students majoring and minoring in Logopedics

Recommended or required reading:

Lecture material and literature: Kunnari, S. & Savinainen-Makkonen, T. (Eds.), *Pienten sanat. Lasten äänteellinen kehitys* (2012) (pp. 65–142) and Loukusa, S. & Paavola, L. (Eds.) *Lapset kieltä käyttämässä. Lasten pragmaattisten taitojen kehitys ja sen häiriöt* (Part 1, pp. 25–125) and other literature provided by the lecturer

Assessment methods and criteria:

Individual assignments and group assignments, examination based on the materials provided during lectures as well as the reading

Grading:

0–5

694720A: Introduction to Statistical Analysis, 3 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3

Language of instruction:

Finnish

Timing:

1st year, spring term

Learning outcomes:

Upon completion of the course, students will be able to describe the process of planning a quantitative study and the process of acquiring observational data. Students will be able to present tables, figures and parameters of the data studied. Additionally students will be able to identify the fundamental principles of statistical deduction.

Contents:

Planning a quantitative study, acquiring observational data, presenting the data studied in the form of tables, figures and parameters, the principles of statistical inference

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures and exercises

Target group:

Students of Logopedics and Information Studies

Recommended or required reading:

Lecture material. Information about additional literature can be obtained from the teacher of the course.

Assessment methods and criteria:

Formal examination

Bachelor's Thesis and Maturity Test

694708A: Research in Logopedics I: Basic Seminar and Bachelor's Thesis, 10 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10

Language of instruction:

Finnish

Timing:

3rd year autumn term or 3rd year spring term

Learning outcomes:

Upon completion of the course, students will be able to explain the different phases of scientific study and to analyse the structure of scientific texts. Students will be able to apply the basics of scientific writing in their papers. Additionally, they will be able to evaluate and analyse scientific information, use sources critically and prepare their own theses.

Contents:

Phases of a research process, research plan for a Candidate's Thesis and writing a Candidate's Thesis

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures, instruction, independent work, and seminars, which include presenting a Candidate's Thesis and acting as an opponent

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses *694720A Introduction to Statistical Analysis* and *694707A Research in Logopedics I: Methodology and Ethics I* is required.

Recommended or required reading:

Lecture material, scientific literature available

Assessment methods and criteria:

Seminars, which include presenting the Candidate's Theses the students will make, and acting as an opponent (80% attendance required), producing a Candidate's Thesis

Grading:

0–5

Person responsible:

University Lecturer

Working life cooperation:

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

7

Language of instruction:

Finnish

Timing:

2nd year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to explain the aetiology and differential diagnosis of the disorders of the communication, language and speech of children and youth. Students will be able to classify and identify different disorders in the development of communication, language and speech. Students will also be able to name, select and use assessment methods.

Contents:

Aetiology and differential diagnosis and assessment of the disorders of the communication, speech and language of children and youth

Mode of delivery:

Blended learning

Learning activities and teaching methods:

Varying teaching and learning methods

Target group:

Students majoring in Logopedics

Prerequisites and co-requisites:

The completion of the course *Introduction to Disorders in the Communication, Language and Speech of Children and Youth* is required.

Recommended or required reading:

Lecture material, additional material to be agreed on during the course

Assessment methods and criteria:

Examinations and written assignments

Grading:

0–5

Learning outcomes:

Upon completion of the course, students will be able to explain different neural processes behind deglutition and to analyse different types of dysphagia. They will be able to select and implement the essential rehabilitation methods of dysphagia. Additionally, students will be able to identify and use some of the assessment methods of the process of deglutition.

Contents:

Neural processes related to deglutition, types and rehabilitation of dysphagia, rehabilitation methods

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures, exercises and written assignments

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the course *694748P Neurology and Neuroanatomy* is required.

Recommended or required reading:

Lecture material, scientific literature available

Assessment methods and criteria:

Lectures, exercises and written assignments

Grading:

0–5

Person responsible:

Professor, University Lecturer or University Teacher

None

694799A: Disorders in the Communication of Adults VI: Final Seminar, 2 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2

Language of instruction:

Finnish

Timing:

3rd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to analyse the disorders related to communicating and deglutition of adults as well as their rehabilitation. Additionally, they will be able to evaluate their learning process.

Contents:

Summary of the disorders of communication of adults

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Seminar and a written assignment

Target group:

Students majoring in Logopedics

Prerequisites and co-requisites:

Completion of the courses *Disorders in the Communication of Adults I–V* is required.

Recommended or required reading:

Lecture material from the lectures of the courses *Disorders in the Communication of Adults I–V*

Assessment methods and criteria:

Seminar and a written assignment

Grading:

0–5

Person responsible:

Professor or University Lecturer or University Teacher

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3

Language of instruction:

Finnish

Timing:

3rd year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to explain and analyse the basics and norms of scientific research, different research settings and methods as well as to assess aspects of ethical research.

Contents:

Basics of scientific research, norms of science, research settings and methods, ethical aspects of research

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures and exercises

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses *694700P Introduction to Logopedics* and *694720A Introduction to Statistical Analysis* is required.

Recommended or required reading:

Lecture material. Information about additional literature can be obtained from the teacher of the course.

Grading:

694800A: Clinical Skills I, 7 op**Voimassaolo:** 01.08.2015 -**Opiskelumuoto:** Intermediate Studies**Laji:** Course**Vastuuyksikkö:** Faculty of Humanities**Arvostelu:** 1 - 5, pass, fail**Opintokohteen kielet:** Finnish**ECTS Credits:**

7

Language of instruction:

Finnish

Timing:2nd year, autumn term**Learning outcomes:**

Upon completion of the course, students will be able to explain what the areas of the rehabilitation system are and how they operate in this country. They will also be able to explain the implications of the legislation of health care to the speech therapist, and they will learn to evaluate the ethical questions related to the work of a speech and language therapist. Additionally, students will have the knowledge required to start a clinical practicum. They will be able to identify the speech and language therapist's occupational concepts and fields of operation.

Students will be able to describe the theoretical basis of speech therapy testing and evaluation. Moreover, they will be able to use different methods of fostering linguistic development with children of varying ages. Finally, they will be able to apply the different principles of instructing a group to practice.

Contents:

The service system and its sectors, legislation of health care, basics of clinic work, ethical questions, the theoretical background of testing and evaluation, applying the methods of fostering linguistic development to a group of children

Mode of delivery:

Blended learning

Learning activities and teaching methods:

The learning activities and teaching methods of this course might vary.

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses titled *Development of Language and Communication* and *694700P Introduction to Logopedics* is required.

Recommended or required reading:

Lecture material, and the book Rissanen, P. Kallanranta, T. & Suikkanen, A. (Eds.) *Kuntoutus* (2008). 2nd Edition. Helsinki: Duodecim (Where applicable). http://www.terveysportti.fi/dtk/oppi/koti?p_artikkeli=inf04503&p_selaus=15739 (in Finnish)

Instructing nursery school groups on fostering language development

694801A: Therapy I, 10 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10 ECTS credits (5 + 5)

Language of instruction:

Finnish

Timing:

2nd year and 3rd year

Learning outcomes:

Upon completion of the course, students will be able to plan and implement speech therapy rehabilitation. Additionally, they will be able to analyse the process of speech therapy and the profession of a speech and language therapist.

Contents:

Speech therapy rehabilitation of different disorders in communication

Mode of delivery:

Blended learning

Learning activities and teaching methods:

Supervised planning and implementing of two speech therapy periods and written assignments related to them, following and discussing therapy organised by students

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the course *Clinical Skills I* and the courses related to *Disorders in the Communication of Children and Youth* is required when applicable.

Grading:

ay694926Y Structure of Finnish (OPEN UNI) 3.0 op

ECTS Credits:

3 ECTS credits / 81 hours of work

Language of instruction:

Finnish

Timing:1st year, period I**Learning outcomes:**

Students will be able to define the basic phonological, morphological, and syntactic structures of modern standard Finnish.

Contents:

Introduction to scholarly depiction of structures of Finnish

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures (24 h); exercises (10 h); and independent study (47 h); or alternatively independent study online (81 h)

Target group:

Students in language programmes in the Faculty of Humanities

Prerequisites and co-requisites:

None

Recommended optional programme components:

Introduction to General Linguistics must be completed at the same time.

Recommended or required reading:

Online reading material

Assessment methods and criteria:

The assessment of the course is based on a formal examination, and the assessment criteria are based on the learning outcomes of the course.

Grading:

0–5

Person responsible:

University Lecturer Katja Västi

Working life cooperation:

None

Other information:

Students majoring in Finnish Language will include the course in the Language and Communication studies.

695250Y: Introduction to General Linguistics, 4 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Language and Communication Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Santeri Palviainen

Opintokohteen kielet: Finnish

ECTS Credits:

4

Language of instruction:

Finnish

Timing:

1st year, autumn term (as an optional course timing is free)

Learning outcomes:

Upon completion of this course, students will be able to analyse the structure of language scientifically and systematically. They will be able to apply the analytical tools of phonology, morphology, and syntax in novel linguistic data and define the basic terminology in linguistics.

Contents:

Basic linguistic concepts and analysis. The focus is on phonology, morphology, and syntax.

Mode of delivery:

Lectures

Learning activities and teaching methods:

40 hours of lectures, 68 hours of independent study

Target group:

Students of languages and others interested in languages

Prerequisites and co-requisites:

None

Recommended or required reading:

Assigned readings

Assessment methods and criteria:

Formal examination

Grading:

0–5

Person responsible:

Lecturer in Linguistics

Working life cooperation:

None

Other information:

It is recommended that the course be passed in the first semester if the course is mandatory for the student.

694738P: General Phonetics and Finnish Phonology, 4 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Pentti Körkkö

Opintokohteen kielet: Finnish

ECTS Credits:

4 (108h of studies)

Language of instruction:

Finnish

Timing:

1st autumn term, periods I and II

Learning outcomes:

upon completion the student is able to explain processes of speech production, to name and to classify speech sounds and features and to explain the general and special features of the Finnish sound system and, finally, to identify its major phonetic variations

Contents:

language and speech, speech production, phonetic description and classification of speech sounds, speech prosody, basics of Finnish phonology

Mode of delivery:

face-to-face teaching and online exercise work

Learning activities and teaching methods:

lectures 42h / exercises 8h of which independent online studies 5h / independent study work 54h including recommended readings and preparations for exam / examinations 2h+2h

Target group:

major and minor students of logopedics

Recommended or required reading:

recommended reading: Suomi, Toivanen & Ylitalo (2009), Finnish sound structure

Assessment methods and criteria:

written examination, assessment criteria is based on the learning outcomes of the course; read more about assessment criteria on the University of Oulu webpage

Grading:

1–5 (0 = fail)

Person responsible:

lecturer in phonetics

Working life cooperation:

694807P: Acoustic Phonetics, 3 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Pentti Körkkö

Opintokohteen kielet: Finnish

ECTS Credits:

3 (81h studies)

Language of instruction:

Finnish

Timing:

2nd autumn term, periods I and II

Learning outcomes:

upon completion the student is able to explain the basic concepts of speech acoustics and the acoustic theory of speech production; the student is able to identify and to describe Finnish vowel and consonant sounds and the acoustic properties of prosodic phenomena; the student is also able to use special software tools to locate and to annotate speech samples and to record speech samples in the studio

Contents:

basic acoustics, acoustics of speech and speech production; acoustic features of Finnish vowels and consonants; software tools for acoustic analysis and measurements of speech and voice; recording speech materials

Mode of delivery:

face-to-face teaching, online exercise work and recording studio work

Learning activities and teaching methods:

lectures 24h / total exercises 8h with 4h independent online and studio work / independent studies 47h including recommended readings and preparation for exam / 2h examination

Target group:

major and minor students of logopedics

Prerequisites and co-requisites:

completion of the course 694738P General phonetics and Finnish phonology

Recommended or required reading:

recommended reading: Suomi, Johdatusta puheen akustiikkaan, pp. 1–170 (or a similar text book on speech acoustics in English)

Assessment methods and criteria:

written examination, assessment criteria is based on the learning outcomes of the course; read more about assessment criteria on the University of Oulu webpage

Grading:

1–5 (0 = fail)

Person responsible:

lecturer in phonetics

694808P: A Laboratory Course in Clinical Acoustic Phonetics, 5 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opettajat: Pentti Körkkö

Opintokohteen kielet: Finnish

ECTS Credits:

5 (135h of work)

Language of instruction:

Finnish

Timing:

2nd autumn (period II) and spring terms (period I)

Learning outcomes:

upon completion the student is able to independently carry out clinically valuable acoustic measurements of speech and voice using relevant speech material recorded in the field and/or studio; the student is able to select relevant acoustic analyses and measurements and to interpret and to evaluate the significance of measurement results; the student is also capable of selecting and utilizing adequate tools in writing scientific lab reports

Contents:

research area and aims of acoustic clinical phonetics; acoustic measurements of speech and voice; research tools for acoustic analyses and measurements; planning and writing lab reports

Mode of delivery:

face-to-face teaching, online and independent exercise work and recording studio work

Learning activities and teaching methods:

lectures 10h / total exercises 30h with 20h independent exercises, studio and analysis-measurement work / independent studies 53h including recommended readings and preparation for exam / lab report writing 40h / 2h examination

Target group:

major and minor students of logopedics

Prerequisites and co-requisites:

completion of the courses 694738P General phonetics and Finnish phonology and 694739P Acoustic Phonetics

Recommended or required reading:

recommended reading: Baken & Orlikoff, Clinical measurement of speech and voice, pp 93–284

Assessment methods and criteria:

written exam, laboratory and studio exercises, measurements of speech and voice in the lab, written lab report (8–12 pages); assessment criteria is based on the learning outcomes of the course; read more about assessment criteria on the University of Oulu webpage

Grading:

1–5 (0 = fail)

Person responsible:

lecturer in phonetics

Working life cooperation:

3

Language of instruction:

Finnish

Timing:

3rd year, autumn term

Learning outcomes:

The student obtains a picture of linguistic behaviour from e.g. the following psycholinguistic perspectives: language and cognition, language and speech production and understanding, language acquisition, second language learning, and bilingualism.

Upon completion of the course, the student is able to evaluate linguistic behaviour from the central perspectives of psycholinguistics.

Contents:

Central aspects of psycholinguistics

Learning activities and teaching methods:

Independent study of literature

Target group:

Logopedics, Phonetics and General Linguistics students

Recommended or required reading:

Danny D. Steinberg & Natalia V. Sciarini 2006: An introduction to psycholinguistics (2nd ed.)

Assessment methods and criteria:

Written examination

Language of instruction:

Finnish, English

Timing:

2nd year, spring term

Learning outcomes:

Upon completion of the course, students will be able to identify the specific nature of neuropsychological disorders and define some of the basic mechanisms of the neuropsychological disorders of adults and children.

Contents:

The main types and mechanisms of the neuropsychological disorders of adults and children.

Mode of delivery:

A series of virtual lectures, and books

Learning activities and teaching methods:

26 hours of lectures

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the course *730099A Cognitive Neuroscience* is required.

Recommended or required reading:

Lecture material and the books Kolb & Whishaw: *Fundamentals of Human Neuropsychology*, 5th edition, chapters 11–28 and Anderson, Northam & Wrennall: *Developmental Neuropsychology: A Clinical Approach (Brain, Behaviour and Cognition)*, chapters 1, 4–11. Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish

Timing:

1st year, autumn term

Learning outcomes:

Upon completion of this course, students will have fundamental knowledge about the theories and central issues of developmental psychology.

Contents:

The course covers the psychological development of people from early childhood to old age.

Mode of delivery:

Lectures and books. The course consists of a series of national virtual lectures. Additional information can be obtained from <http://www.psykonet.fi/> (*In Finnish*).

Learning activities and teaching methods:

20 hours of lectures

Target group:

Students of Logopedics

Recommended or required reading:

Lecture materials and the book: Nurmi, Ahonen, Lyytinen, Lyytinen et al. (Eds.): *Ihmisen psykologinen kehitys*, Additional reading: Berger: *The Developing Person Through the Life Span*, 6th edition (pp. 1–412) or 7th edition (pp. 1–443).

ECTS Credits:

1

Language of instruction:

Finnish

Timing:

1st year, spring term

Learning outcomes:

Upon completion of the course, students will be able to define and explain the development, clinical examination and intervention of the most common otorhinolaryngological diseases.

Contents:

The development, clinical examination and intervention of the most common otorhinolaryngological diseases

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses *694766P Anatomy and Physiology of the Speech Organs* and *694767P Orthodontics* is required.

Recommended or required reading:

Lecture material. Information about additional literature can be obtained from the teacher of the course.

Assessment methods and criteria:

Formal examination

Grading:

0–5

Person responsible:

Professor

Working life cooperation:

None

694746P: Audiology and Audiometry, 2 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2

Language of instruction:

Finnish

Timing:

2nd year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to define and explain essential facts about normal hearing, balance control, hearing disorders and their examination, intervention and rehabilitation methods as well as the rehabilitation services of hearing.

Contents:

Normal hearing, balance control, hearing disorders and their examination, intervention and rehabilitation methods, the rehabilitation services of hearing

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the course *694745P Otorhinolaryngology and Plastic Surgery* is required.

Recommended or required reading:

Lecture material and additional literature: Jauhiainen, T., Arlinger, S., Baldursson, G., Laukli, E., Nielsen, P., Svendsen, B. (Eds.), *Audiologia* (2008). Duodecim.

Assessment methods and criteria:

Formal examination

694748P: Neurology and neuroanatomy, 3 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3

Language of instruction:

Finnish

Timing:

2nd year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to explain essential facts about human neuroanatomy, identify neurological diseases and their medical diagnosis methods as well as to apply their logopedic knowledge to the different levels of the rehabilitation of neurological diseases.

Contents:

Neuroanatomy, neurological diseases and their diagnosis and rehabilitation services

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the course *694766P Anatomy and Physiology of the Speech Organs* is required.

Recommended or required reading:

Language of instruction:

Finnish

Timing:4th year, autumn term**Learning outcomes:**

Upon completion of the course, students will be able to explain the basics of test theory, and to apply the methods of statistical deduction to data in research in Logopedics. Students will be able to critically assess studies which have used statistical methods and patterns. Additionally, students will be able to process statistical information using SPSS analysis software.

Contents:

Test theory, statistical methods, evaluating statistical methods and patterns, the basics of processing statistical information, the use of SPSS software

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures and exercises

Target group:

Students of Logopedics and Information Studies

Prerequisites and co-requisites:

Completion of the course *694720A Introduction to Statistical Analysis* is required.

Recommended or required reading:

Lecture material. Information about the additional literature can be obtained from the teacher of the course.

Assessment methods and criteria:

Formal examination

Grading:

0–5

694811S: Research in Logopedics II: Methodology and Ethics II, 5 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish

Timing:

4th year, autumn term

Learning outcomes:

Upon completion of the course, students will be able to identify the special nature and research questions of research in Logopedics. Students will be able to plan the research frame and the methods suitable for their own Master's Thesis.

Contents:

The research frames, ethical questions and the efficiency of rehabilitation in research in Logopedics

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures and literature

Target group:

Students of Logopedics

Prerequisites and co-requisites:

This course is to be completed alongside or after the following courses: *694720A Introduction to Statistical Analysis*, *694707A Research in Logopedics I: Methodology and Ethics I* and *694708A Research in Logopedics I: Basic Seminar and Candidate's Thesis*.

Recommended or required reading:

Lecture material and the following books: Schiavetti, N., Metz, D. E. & Orlikoff, R.F. (2011). *Evaluating Research in Communicative Disorders*. 6th Edition. New Jersey: Pearson Inc., pp. 57–157, 364–410 and Remes, P., Hirsjärvi, S. & Sajavaara, P. (2014). *Tutki ja kirjoita*. Helsinki: Tammi. (Where applicable)

Assessment methods and criteria:

Lectures (80% attendance required), literature, a book exam

Grading:

0–5

Person responsible:

University Lecturer

Working life cooperation:

None

694802S: Research in Logopedics II: Advanced Seminar, 6 op

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

6

Language of instruction:

Finnish

Timing:4th year, autumn term or spring term**Learning outcomes:**

Upon completion of this course, students will be able to produce scientific texts, present theoretical and practical questions about their topic of research, compile a research plan, justify their choices and define and explain the basic concepts, methodology and research ethics of research in Logopedics. They will be able to independently produce a Master's Thesis using scientific methods.

Contents:

Seminar, presenting the thesis, acting as an opponent

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Seminar sessions, independent work, exercises, presenting a thesis, acting as an opponent

Target group:

Students of Logopedics

Prerequisites and co-requisites:

This course is to be completed alongside or after the following courses or packages: *Research in Logopedics I, 694727S Research in Logopedics II: Methodology and Ethics II, 694720A Introduction to Statistical Analysis and 694732S Advanced Course in Statistical Analysis.*

Assessment methods and criteria:

Seminar sessions (80% attendance required), independent work, exercises, presenting a thesis, acting as an opponent

Grading:

Pass/Fail

Person responsible:

694803S: Literature Overview for Master's Thesis, 10 op**Voimassaolo:** 01.08.2015 -**Opiskelumuoto:** Advanced Studies**Laji:** Course**Vastuuyksikkö:** Faculty of Humanities**Arvostelu:** 1 - 5, pass, fail**Opintokohteen kielet:** Finnish**ECTS Credits:**

10

Language of instruction:

Finnish, Swedish or English

Timing:4th year, spring term**Learning outcomes:**

Upon completion of this course, students will be able to compile a literature overview for their Master's Thesis

Contents:

Instruction meetings, independent work

Mode of delivery:

Contact teaching, independent work

Learning activities and teaching methods:

Independent work as instructed

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of *Research in Logopedics II* is required.

Recommended or required reading:

Scientific literature available

Grading:

Pass/Fail

Person responsible:

Professor or University Lecturer

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

7 ECTS credits

Language of instruction:

Finnish

Timing:

3rd Spring / 4th Autumn / 4th Spring

Learning outcomes:

By the end of the course, the student is able to integrate knowledge from various fields in logopedic research.

Contents:

Various special short courses in logopedics

Mode of delivery:

Contact teaching or self study

Learning activities and teaching methods:

Lectures and coursework

Target group:

Students of Logopedics

Recommended or required reading:

Information on recommended reading can be obtained from the lecturer.

Assessment methods and criteria:

Coursework or essay

Read more about [assessment criteria](#) at the University of Oulu webpage.

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

7

Language of instruction:

Finnish

Timing:

4th year

Learning outcomes:

Upon completion of the course, students will be able to define the essential characteristics and the co-operational aspects of the work of a speech and language therapist in multiprofessional work groups in different posts of social care, health care and education. Additionally, students will be able to analyse different aspects and ethical questions related to the work of a speech and language therapist. Students will also learn to reflect and analyse their own professional growth.

Contents:

Observing the work of a speech and language therapist, general picture of the organisations where speech and language therapists are employed, a multiprofessional working community, the multidimensional aspects of a speech therapy work, professional interaction and growth

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Attending information sessions and exercises, completing assignments appointed in the training facility, lectures, exercises

Target group:

Students of Logopedics

Prerequisites and co-requisites:

This course is to be completed alongside or after the following courses or packages: Basic Studies and Advanced Studies in Logopedics up to *Clinical Skills II*, Studies in Psychology and Medicine, *Therapy I* and *II*.

Recommended or required reading:

Information about the additional literature can be obtained from the teacher of the course.

Assessment methods and criteria:

Information sessions and exercises (100% attendance required), completing assignments appointed in the training facility, feedback from the information sessions and the training, lectures, exercises and assignments

Grading:

Pass/Fail

Person responsible:

University Lecturer, University Teacher, Amanuensis

Working life cooperation:

694805S: Therapy II, 10 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10

Language of instruction:

Finnish

Timing:

4th and 5th year

Learning outcomes:

Upon completion of this course, students will be able to plan and implement rehabilitation related to speech therapy. Additionally, they will be able to analyse the process of speech therapy as well as the profession of a speech and language therapist.

Contents:

Speech therapy related assessment and rehabilitation of different disorders in communication

Mode of delivery:

Blended learning

Learning activities and teaching methods:

Supervised planning and implementation of one or more assessment or speech therapy programmes and written assignments related to them, discussing and observing speech therapy organised by students

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses *Clinical Skills I*, *Rehabilitation of the Disorders in the Communication, Language and Speech of Children and Youth* (where applicable), and *Disorders in the Communication of Adults* (where applicable) is required.

Grading:

Pass/Fail

Person responsible:

University Lecturer or University Teacher

Working life cooperation:

694806S: Clinical Skills III, 24 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Advanced Studies

Laji: Practical training

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

24

Language of instruction:

Finnish

Timing:

5th year, autumn term and spring term

Learning outcomes:

Upon completion of the course, students will be able to work independently as speech therapists. They will be able to examine clients, plan and organise rehabilitation, instruct the people close to the client as well as to function as a member of a work community and a work group.

Contents:

Practical training period

Mode of delivery:

Contact teaching (practical training period)

Learning activities and teaching methods:

Four months of practical training period under the supervision of a speech therapist in a unit offering the Social and health care services or education, a report of the training, discussion on professional growth

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of a Candidate's Degree is required in addition to the following courses in Advanced Studies: *Research in Logopedics II*, *694725S Advanced Topics in Logopedics*, *Clinical Skills II* and *Therapy II*.

Assessment methods and criteria:

Practical training period, a report on the training, a discussion

Grading:

0–5 (70% based on the assessment done by the supervisor, 30% based on the report)

Person responsible:

University Teacher or University Lecturer

Working life cooperation:

Practical training period of 4 months

694813S: Presentation on Expertise Field, 2 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2

Language of instruction:

Finnish

Timing:

4th Autumn / 4th Spring / 5th Autumn

Learning outcomes:

By the end of the course, the student is able to prepare and give a presentation on a field of expertise in Logopedics.

Contents:

Oral and written presentation on a special theme in Logopedics

Mode of delivery:

Independent study

Learning activities and teaching methods:

Oral and written presentation on a special theme in Logopedics

Target group:

Students of Logopedics

Assessment methods and criteria:

Oral and written presentation

Grading:

Pass/fail

Person responsible:

Lecturer or Amanuensis

Working life cooperation:

694812S: Master's Thesis, 30 op

Voimassaolo: 01.08.2015 -

Opiskelumuoto: Advanced Studies

Laji: Diploma thesis

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

30

Language of instruction:

Finnish, Swedish or English

Timing:

4th year, spring term, or 5th year, autumn term

Learning outcomes:

Upon completion of this course, students will have produced a scientific research paper, usually based on empirical data.

Contents:

Independent work as instructed, a written Master's Thesis

Mode of delivery:

Contact teaching and independent work

Learning activities and teaching methods:

Independent work as instructed

Target group:

Students of Logopedics

Prerequisites and co-requisites:

The completion of Candidate's Degree is required in addition to the following courses or packages: *Research in Logopedics II* and *Literature Overview for Master's Thesis*.

Recommended or required reading:

Scientific literature available

Assessment methods and criteria:

Master's Thesis

Grading:

0–5

Person responsible:

Professor or University Lecturer

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

6

Language of instruction:

Finnish or English

Timing:

5th year, spring term

Learning outcomes:

Upon completion of this course, students will be able to assess the level of scientific literature. Additionally, they will be able to justify their opinions and compare and comment on scientific literature, research and rehabilitation in Logopedics.

Contents:

Students will select the books from a list provided. They will be chosen from different areas of research or rehabilitation so that the selection will include topics of communication or disorders of the speech of children or adults.

Mode of delivery:

Independent study

Learning activities and teaching methods:

Examination based on books agreed with the person responsible

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of Candidate's Degree is required.

Recommended or required reading:

Scientific literature available

Assessment methods and criteria:

Examination

Grading:

0–5

Person responsible:

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2

Language of instruction:

Finnish

Timing:

1st year, spring term

Learning outcomes:

Upon completion of the course, students will be able to describe and use different methods for fostering linguistic development. Additionally students will be able to identify different principles of instructing a group.

Contents:

Describing the methods for fostering linguistic development, principles of instructing a group.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures, excercises and group work

Target group:

Students of Logopedics

Prerequisites and co-requisites:

Completion of the courses *694702P Development of Language and Communication: Stages of the Language Development of Children* and *694752P Development of Language and Communication: Socialisation into the Language Community* is required.

Recommended or required reading:

Lecture material and additional related literature

694711A: Neurological communication disorders in children, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Humanities

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5

Language of instruction:

Finnish

Timing:

3rd Autumn

Learning outcomes:

After the course, the student is able to explain the principles of etiology, differential diagnostics, and rehabilitation concerning neurological communication disorders in children. The student is able to analyse the effect of neurological and motor development on speech, language and communication, and can explain the principles and implementation of rehabilitation of feeding and speech motor skills. In addition, the student is able to identify various rehabilitation methods and is able to apply them in speech and language therapy.

Contents:

Assessment and principles of rehabilitation of neurological communication disorders in children

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures, training sessions, workshops

Target group:

Logopedics students

Prerequisites and co-requisites:

Requires successful completion of course on Child Neurology. Mental Retardation and Autism is also suggested as a prerequisite or supplementary course.

Recommended optional programme components:

None

Recommended or required reading:

Hand-outs and literature

Assessment methods and criteria:

Lectures, training sessions: 80% attendance required, workshops, written examination
