Advances Studies in Education (80 ECTS cr) (vähintään 80 op)

A250510: Advanced Studies in Education, 70 - 80 op

Advanced Studies include the following mandatory courses:

- 413069S: Orientation to Master's Studies, 5 op
- 408516S: Educational policy, planning and leadership, 5 op
- 408535S: Global Education Development, 5 op
- 408037S: Master's Level School Experience and Pedagogical Seminar, 15 op
- 408038S: Thematic Practice, 5 op
- 408043S: Master's Thesis, 30 op
- 408044S: Thesis Seminar, 5 op
- 408045S: Abstract / Maturity Test, 0 op

Student chooses either Advanced Course in Qualitative Research 5 ECTS cr or in Quantitative Research 5 ECTS cr

- 413030S: Advanced course in quantitative research, 5 op
- 413031S: Advanced course in qualitative research, 5 op

Optional study unit a or b:

- 402149S: Cooperation and Professional Interaction, 5 op
- 408537S: Finnish Educational Research and Development, 5 op

Minor studies (25 ECTS cr) (vähintään 25 op)

There are no strict stipulations on the minor subjects of degrees at the Faculty of Education. You may choose the minor subjects from among those offered by the University of Oulu.

Choose one minor subject (25 credits) to be completed as part of the Master's degree. If minor is larger than 25 ECTS cr, you need less optional studies.

Optional studies (15 ECTS cr)

The student can choose any higher education-level courses.

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish and English

Timing:

1st year of master studies

Learning outcomes:

The course equips the student as a future expert of education and learning. It combines two themes obvious to master level studies – the questions connected to work life and scientific production of knowledge. The course helps the student to recognize and strengthen their own expertise. It also provides experiences of finding, reading and producing scientific knowledge.

Having passed the course, the student is able to:

- find information regarding their own studies and future career, as well as to plan them
- analyze and produce scientific text
- perceive different ways of conducting educational research and producing academic knowledge
- present and compare different kinds of educational expertise and profile oneself in relation to them
- concern oneself as a future conductor of research and as a professional acting based on scientific knowledge

Contents:

- Study and career planning and counselling
- Presenting faculty research
- Expert talks
- General master's thesis information
- Master's thesis groups' information
- Information services
- Seminars and teacher tutor sessions
- Independent work
- STEAM in master studies

Mode of delivery:

Blended teaching

Learning activities and teaching methods:

Contact lessons minimum 20h, including lectures 16h. Independent study 100-115, depending on the amount of contact teaching. Total amount of work 135h.

Target group:

All master level students (with the exception of students from music education programme)

Prerequisites and co-requisites:

no

Recommended or required reading:

Active participation in the joint sessions, assessment is done in the seminar groups and depends on the working methods of the seminar

Timing:

1st year, 1st semester (EdGlo), 4th year, 1st semester (ITE)

Learning outcomes:

After completing this course students are able to:

- apply key concepts related to educational policy, planning and leadership
- reflect on socially responsible leadership approaches and the connections between educational policy and implementation
- find and analyse information about national and international educational policies
- discuss the processes of decision making, planning and implementation at local, national and international levels
- participate in research-informed discussions on educational leadership

Contents:

- key concepts related to educational leadership
- approaches to and research on educational leadership
- international organisations guiding educational policy, planning and monitoring
- educational policy in Finland: historical stages and key documents
- educational leadership in practice: structures, schools as a community, teachers as leaders, principals' qualifications and work

Mode of delivery:

20h lectures, 20h online group discussions, 95h independent study: research literature prior to the lectures and group discussions

Learning activities and teaching methods:

20h lectures, 20h online group discussions, independent study

Target group:

Master's level students

Prerequisites and co-requisites:

Timing:

1th or 2th year: 1. 2. and 3. period 2th year, 1st, 2nd and 3rd periods

Learning outcomes:

Having completed the course, the student knows how to:

- set learning objectives for him/herself and evaluate their fulfilment.
- plan and implement teaching based on the curriculum.
- perform student assessment and give feedback orally and in writing.
- plan and implement integrated teaching.
- show the skill of taking overall responsibility for the activities and teaching in a classroom.

- apply the essential characteristics of the culture of the school in his/her teaching.
- build and make use of learning environments to support learning and well-being.
- support the development of learning skills for individual students and groups of students.
- make use of varied and student-centred teaching methods.
- make skilled use of professional interaction.
- implement research-based teaching encouraging inquiry learning and evaluate its success.
- based on research knowledge, analyze, report on and evaluate his/her own view of teachership and education.

Contents:

The theme of Master's level teaching practice is working as a teacher. Themes connected with it are discussed in the practice period and in a seminar.

The students are working in the school and classroom community in collaboration with other students and the supervising teachers. The practice introduces the student to the teacher's job as a whole. The student gets to know the various partners and forms of collaboration that are connected with the work of a teacher.

The practice period offers the student a supervised opportunity to deepen the skills of planning, implementing and evaluating lessons and larger blocks of studies.

The student plans and implements teaching based on the basic education curriculum in collaboration with the supervising teacher and other students. The teaching practice is based on the objectives and contents mentioned in the curriculum. The areas of transversal competence mentioned in the curriculum are taken into account in the planning and implementation of teaching. The student acquaints him/herself with some special theme or multidisciplinary learning entity connected with the school's activities.

Please note the pedagogical seminar for ITE students can be found: 408508S Seminar III: Education and Professional Ethics.

Mode of delivery:

Face-to face teaching: Exercises for a pedagogical seminar

Supervision in subject-specific didactics

Teaching practice in the Linnanmaa and Koskela units of the Oulu Teacher Training School. Oulu International school for non-Finnish speakers.

Learning activities and teaching methods:

Teaching practice, individual supervision, group supervision, large group supervision sessions, lectures, exercises and independent work.

Exercises 24h

Teaching practice 160h-170h. Practice tied to time and place includes the lessons given and followed as well as any supervision sessions.

Each student gives 60 lessons as individual lessons or in the form of entire school days. Some of the lessons can be implemented through co-teaching

Target group:

Masters' level primary teacher students

Prerequisites and co-requisites:

KKa Bachelor of Arts (Education)

Recommended optional programme components:

The Master's level teaching practice is part of the Master's level studies in primary teacher education

Recommended or required reading:

The Oulu Teacher Training School Curriculum and the other material to be agreed on at the start of the study module

Assessment methods and criteria:

pass

The student's performance shows a competence that is in line with the expected learning outcomes at an acceptable level. S/he deals with the theoretical substance of the study module analytically enough, and is able to apply it in an appropriate manner.

fail

The student's performance reveals shortcomings in his/her skills compared to the expected learning outcomes, or is unfinished.

Opettajat: Sari Harmoinen

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS

Language of instruction:

Finnish, English for ITE

Timing:

1. or 2. year

Learning outcomes:

Having completed the course, the student knows how to

- analyze his or her own needs for development
- apply the skills s/he has learnt in the practice period
- evaluate the significance of skills achieved in thematic practice for his/her own growth as a teacher
- apply a research-based approach to experimental and development activities, or has acquired other special skills
- applies his/her skills to the planning of project work

Contents:

In Thematic Practice, the student has an opportunity to get to know the teacher's field of work widely by choosing a theme for the practice that is important for growth as a teacher. The practice consists of either educational, guidance or teaching activities.

The practice can be carried out in either general or vocational education, in educational and training organizations or projects also in an environment other than grades 0-6 of basic education.

The Thematic practice can also be about experimental, developmental or research activities with cooperating parties in the field of education.

In the Thematic practice the student plans, implements and evaluates teaching and gets to know the status of the as part of the practice site as part of the educational system.

Mode of delivery:

Practice

In the ITE program, Thematic Practice is presented in [408508S Seminar III: Education and Professional Ethics](#), the preparation time is included in Thematic Practice independent work hours

Learning activities and teaching methods:

Thematic Practice is an unpaid practice period in which the student needs a tutor in the practice site, The practice plan needs to be approved before Thematic Practice is started. The practice comprises 135h including set literature, practical training, and report. The practice report is approved after the Thematic Practice.

Target group:

Students in the Primary Teacher Education programme.

Prerequisites and co-requisites:

Orientation to School Work and Bachelor-Level School Experience

Recommended optional programme components:

The study module is part of the Advanced Studies in Primary Teacher Education

Recommended or required reading:

To be agreed on at the start of the course.

Assessment methods and criteria:

Pass:

The student's accomplishments represent achievement of the expected learning outcomes at an acceptable level. S/he processes the theoretical materials in the course analytically enough and applies them in an appropriate manner.

Fail:

The student's accomplishment reveals deficiencies in his/her skills relative to the expected learning outcomes, or is incomplete.

ECTS Credits:

5 ECTS + 30 ECTS Thesis

Language of instruction:

Finnish and English

Timing:

1th and 2th years

Learning outcomes:

The student

- gets practice in using the basic concepts of his/her branch of science and knows how to determine and analyze the main research results in his/her field of science and how to evaluate them in relation to his/her own research
- masters the research methods chosen by him/herself and is able to describe the scientific traditions of the educational and social sciences, especially education and educational psychology
- knows how to compose alone, in pairs or in a group an educational thesis that shows familiarity with its topic and proves a readiness for scientific thinking
- knows how to evaluate studies made by others and take part in scientific debate and defend his/her own thesis

Contents:

5 credits: seminar session and 30 credits: writing a thesis

1. Composing your own research plan and presenting it in a seminar.
2. Presenting an international (or domestic) refereed article related to your own thesis in a seminar (to be agreed on with the supervisor)
3. Presenting an intermediate stage of your own thesis (e.g. methodological solutions/basis of analysis - to be agreed on with the supervisor)
4. Presenting your Master's thesis and responding to an opponent's criticisms.
5. Acting as an opponent to another student's thesis
6. Other activities in the seminars
7. Finishing your own thesis

Learning outcomes:

Having completed the course, the student

- knows how to analyse and interpret typical educational and psychological quantitative research data by using research methods designed for the examination of one-, two- or more dimensional distributions
- knows how to describe the basic ideas of research data analysis based on structural equation modelling and how to interpret models created by others
- knows how to assess the credibility, reliability and ethical aspects of her/his own research and research done by others

Contents:

- statistical testing
- classic multivariate methods
- modelling by means of linear structural equations
- publishing the results of statistical methods of analysis in a research report

Mode of delivery:

Teaching and independent study

Learning activities and teaching methods:

Lectures 18h, small group sessions 14h, independent work 96h

Target group:

Students pursuing advanced studies in the Faculty of Education

Prerequisites and co-requisites:

Basic course in quantitative research 5 cr. or equivalent studies in statistics

Recommended optional programme components:

The study module is part of the advanced studies in the education programme and supports the writing of a Master's Thesis

Recommended or required reading:

Metsämuuronen, J. (2003 or later edition) Tutkimuksen tekemisen perusteet ihmistieteissä (pages 273-764)

OR

Kerlinger, F. & Lee, H. (2003 or later edition) Foundations of behavioral research. Fourth edition.

OR

Hair, J.F., Anderson, R.E, Tatham, R.L. & Black, W.C. (1998 or later edition) Multivariate data analysis.

Assessment methods and criteria:

The students carry out, either independently or in small groups, assignments of analyzing quantitative data, in which the basis and materials are provided by the lectures, literature and other sources whenever possible (such as recordings of expert lectures). In concrete terms, a learning assignments can consist, for instance, of the analysis of data collected for the student's own thesis, or of sample data used in the course. By agreement, the course can also be arranged and carried out in other ways, such as by taking part in the activities of a research group in the faculty.

The student's course performance is

0 = unfinished and fragmented, with no concretization of the basic principles of analyzing quantitative research data

1 = highly superficial, the analysis is very superficial and contains lots of mistaken interpretations and erroneous conclusions

2 = superficial, the analysis is superficial and contains some mistaken interpretations and erroneous conclusions

3 = reflective. the analysis is justified and the results do not reveal many mistaken interpretations or erroneous conclusions

4 = an analytical and partly very successful whole, in which the proper methods of analysis were chosen for each situation, the student knew how to interpret the results mainly right without any significant erroneous conclusions

5 = a systematic and analytical whole, in which the proper methods were chosen for each situation, the student knew how to interpret the result correctly without any erroneous conclusions

Timing:

1st year

Learning outcomes:

Having completed the course, the student

- knows how to describe and interpret qualitative data analysis methods used in education and psychology and their background
- knows how to analyse and interpret typical educational and psychological research data
- knows how to assess the credibility, reliability and ethicality of her/his own research and research done by others

Contents:

- the meaning of different paradigms and research traditions in the planning and implementation of qualitative research
- different reading methods in the analysis and interpretation of qualitative research data
- proving credibility in qualitative research
- research reporting in qualitative research
- ethical issues in qualitative research

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 18h, small group sessions 16h, independent work approx. 100h

Target group:

Students in the Faculty of Education.

Prerequisites and co-requisites:

Completion of the Basic course in Qualitative Research (5 ECTS) or an equivalent course

Recommended optional programme components:

The study module is a part of the advanced studies and supports the writing of a Master's thesis

Recommended or required reading:

English literature on request. Contact the teacher responsible for the course.

Assessment methods and criteria:

Lectures: Students write a lecture diary, based on the lectures and the literature either alone or in pairs. In the lecture diary, students are also expected to discuss their own research ideas.

Seminars: Students practice the analysis of research material, either alone or in pairs. Students may utilize their own research material (if available) or some other material. Analysis reports are presented and discussed in the seminars.

Completion of the course requires active participation in face-to-face teaching and successful completion of all individual learning tasks:

5: The student has participated actively in all face-to-face meetings and done all required individual tasks according to the course requirements. All tasks represent very good familiarity with course contents, course materials, and additional materials. The student is able to express deep understanding of core course contents in the digital portfolio.

4: The student has participated actively in all face-to-face meetings and done all required individual tasks according to the course requirements. All tasks represent good familiarity with course contents and course materials. The student is able to express understanding of core course contents in the digital portfolio.

3: The student has participated actively in most of the face-to-face meetings and done all required individual tasks. Tasks mostly represent good familiarity with course contents and core course materials. The student is able to express understanding of core course contents in the digital portfolio.

2: The student has participated in several face-to-face meetings and done individual tasks, but there are a few tasks missing. Tasks are done mostly based on one's own experiences and opinions, not on course literature and other course materials. Reflection of one's own learning in the digital portfolio is mostly superficial.

1: The student has been passive in face-to-face meetings, and there are assignments missing or they represent superficial understanding of the course content. The student is able to express the understanding of some course content either in the digital portfolio or in individual tasks, but the level of reflection is superficial and irrelevant, and it does not represent familiarity with the course materials.

- can apply the main concepts to the real-life cases about school life and can analyze them critically
- has practiced and got readiness both to participate in multidisciplinary digital cooperation and plan and evaluate the progress of the cooperation
- has practiced and got readiness for solution-focused professional interaction in digital environment

Contents:

Content of the course comes from the special education research as well as from the educational psychological research about counseling and interaction.

- Professional interaction
- Solution-focusedness
- Inclusion
- Co-teaching
- Pedagogical consultation
- Multidisciplinary cooperation

Mode of delivery:

Delivered as an e-course, the only contact meeting is in the beginning of the course. Carried out in cooperation with educational psychology, teacher education and special education programmes.

Learning activities and teaching methods:

Lectures, article reading, independent and group work online 135h. On the course students proceed in groups. The course consists of modules which include weekly assignments (both individual and group assignments). Completing the course requires committing to the group work and following the module timetable. Groups organize their group work as they prefer so contact meetings during the course are not required.

Target group:

Students in educational sciences, especially special needs teacher and class teacher students
