FEdu - Pedagogical Institutions and Expertise, MA (Education) (2018 - 2019)

After completing the Master’s programme, the student is able to:

- describe the scientific tradition of their discipline, use its basic terminology and understand its research areas
- compare different points of departure in the context of theory of science and methodology as well as various educational science research methods
- determine and analyse key research results of their discipline and assess them
- participate in discussions on the discipline in their mother tongue and a foreign language
- plan, implement and report on a research project
- defend their own research and evaluate the success of both their own and other people’s research projects
- assess and develop their personal competence and work as part of a multiprofessional or multidisciplinary team
- define and place different task areas in the education sector and assess their own placement and interest in different sectors in the labour market.

Advanced studies (80 ECTS cr)

The major subject of his/her Master's degree in Pedagogical Institutions and Expertise is Educational Science. Basic and intermediate studies in the major subject must have been completed.

A250506: Education, Advanced Studies, 80 op

Compulsory

413061S: Professional Ethics and Human Relations Work, 5 op
413062S: Theory of Education and Bildung: Pedagogical Action, 5 op
413063S: Pedagogical Institutions, 5 op
413064S: Economics of Education, 5 op
413065S: Management and Development of Educational Organisations, 5 op
413030S: Advanced course in quantitative research, 5 op
413031S: Advanced course in qualitative research, 5 op
413019S: Working Life Studies, 10 op
408043S: Master's Thesis, 30 op
408044S: Thesis Seminar, 5 op
408045S: Abstract / Maturity Test, 0 op
Minor studies (25-35 ECTS cr) (25 - 35 op)

There are no strict stipulations on the minor subjects of Pedagogical Institutions and Expertise. You can choose your minor subjects from among those offered by the University of Oulu. A Bachelor's or Master's degree shall include at least one minor that is equivalent to intermediate studies in the subject.

You can select either 1x25 credits OR 1x35 credits worth of minor subjects to be completed as part of the Master's degree.

Optional studies (5-15 ECTS cr)

Depending on the scope of the minor subject studies, you need 5-15 credits of optional studies for your Master's degree. The studies can include any university-level studies. Optional studies can consist of following courses:

- 413066S: Adult Education and Pedagogical Supervision, 5 op
- 413068S: Comparative education and educational research, 5 op
- 413058S: Current Issues in Education, 5 op
- 413060S: Edusemiotics, 5 op
- 413067S: Sosiology of education, 5 op

- Moral in human relations as a starting point of professional ethics
- Dilemmas in professional ethics
- Commitment to work, coping at work, peer groups as a support

Mode of delivery:
Face-to-face teaching, blended learning
Learning activities and teaching methods:
Lectures 16h, seminars 10h, independent work 100h

Target group:
Master's level students / Pedagogical institutions and expertise

Prerequisites and co-requisites:
Basic and intermediate studies in education

Recommended optional programme components:
The course is part of the advanced studies in education.

Recommended or required reading:
- Topical scientific articles agreed on at the beginning of the course.

Assessment methods and criteria:
Active participation in lectures and seminars, accomplishing the assignments. Alternative ways to complete the course can be discussed in the beginning of the course.

Criteria for evaluating the assignments:
0 = the text is unfinished, fragmentary, not connected to the theme of the course, few references
1 = the text is very superficial, disconnected matters are presented, references are weakly used
2 = the text is superficial, matters are disconnected in some places, references are satisfactorily used
3 = the text contains reflection on the theme, matters are connected to each other, there is a plot in the essay, using references is at a good level
4 = the text is written in an analytical way, matters are well connected to each other, using references is mainly at a very good level
5 = the text is written in a systematic and analytical way, matters are connected to each other very well, the using of references is excellent

Learning outcomes:
Having completed the course, the student
- knows how to use on his/her own the theoretical concepts and starting-points of education to discuss pedagogical activity
- is capable of participating in theoretical debate in his/her branch of science and field of research
- knows how to interpret and evaluate critically recent theoretical debate in his/her branch of science and field of research
Contents:
In this study module the is familiarized with theoretical and conceptual ways to discuss pedagogical activity. It is essential to identify the special characteristics of pedagogical (educative and instructive) interaction which set it apart from other intercourse between people and forms of human activity. The student understands how pedagogical activity opens up possibilities for the development of subjectness in the growing person and for individual choices in life. The student adopts conceptual-theoretical tools which allow him/her to view the special characteristics of pedagogical activity from the frame of reference offered by educational theory formation, and to conceptualize the essential areas of competence from the viewpoint of professional pedagogical activity. The course helps the student to develop his/her professional competence, to evaluate critically and analytically both scientific research results on pedagogical activity and views arising from different practical experiences.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
24h lectures, independent work

Target group:
Master's level students in the Faculty of Education

Prerequisites and co-requisites:
Basic studies in education

Recommended optional programme components:
The study module is part of the Master's programme "Pedagogical expertise and institutions".

Recommended or required reading:
The student also chooses two of the following books:

Assessment methods and criteria:
Written assignment or exam
Assessment criteria:
0 = unfinished, fragmented, issues presented not essentially connected with the topic, the use of sources is non-existent.
1 = highly superficial, issues presented quite detached from each other, use of sources is poor.
2 = superficial, matters are partly presented disconnected from each other, use of sources is satisfactory.
3 = reflective and matters are related to each other to some extent; a common thread is to be seen, and the use of sources is mainly at a good level.

After the study module, the student
- perceives the institutional and organizational forms of school systems in their political, historical, philosophical and educational theoretical contexts
- is able to make use of what s/he has learnt to analyze and evaluate the various forms of institutional education

Contents:
The study module discusses the contents and forms of pedagogical institutions in the light of political, historical and pedagogical theories, and the student is familiarized through working life cooperation with certain educational and pedagogical institutions.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
12h lectures, 12h exercises, small group sessions, independent work

Target group:
Students in the Faculty of Education

Prerequisites and co-requisites:
Basic studies in education

Recommended optional programme components:
The study module is part of the advanced studies in education

Recommended or required reading:
As a basis for the essay assignment, at least half of the course literature is read as applicable. By agreement with the teacher, it is also possible to use other literature that suits the theme of the study module.

Assessment methods and criteria:
Active participation in lectures and exercises. Writing an essay and a report on an educational institution.
Assessment criteria:
0 = core materials of the materials to be read are not manifested by the essay
1 = matters are presented superficially, connections between issues remain unclear, poor use of sources.
2 = matters are presented quite superficially, connections between issues remain unclear to some extent, poor use of sources, little or no personal reflection
3 = subject content is mastered well, literature is considered in a reflective manner and matters are related to each other to some extent, the use of sources is mainly good
4 = subject content is mastered very well, topics are discussed quite systematically and analytically, matters are related well to each other and the use of sources is mainly excellent. There is also some well-grounded independent thinking.

Learning outcomes:
Having completed the course, the student
- knows how to analyse and interpret typical educational and psychological quantitative research data by using research methods designed for the examination of one-, two- or more dimensional distributions
- knows how to describe the basic ideas of research data analysis based on structural equation modelling and how to interpret models created by others
- knows how to assess the credibility, reliability and ethicality of her/his own research and research done by others

Contents:
- statistical testing
- classic multivariate methods
- modelling by means of linear structural equations
- publishing the results of statistical methods of analysis in a research report

Mode of delivery:
Face-to-face teaching (and possibly blended-learning)

Learning activities and teaching methods:
Lectures 18h, small group sessions 14h, independent work app. 100h

Target group:
Students pursuing advanced studies in the Faculty of Education

Prerequisites and co-requisites:
Basic course in quantitative research 5 cr. or equivalent studies in statistics

Recommended optional programme components:
The study module is part of the advanced studies in the education programme and supports the writing of a Master's Thesis

Recommended or required reading:
Metsämuuronen, J. (2003 or later edition) Tutkimuksen tekemisen perusteet ihmistieteissä (pages 273-764) OR

Assessment methods and criteria:
The students carry out, either independently or in small groups, assignments of analyzing quantitative data, in which the basis and materials are provided by the lectures, literature and other sources whenever possible (such as recordings of expert lectures). In concrete terms, a learning assignments can consist, for instance, of the analysis of data collected for the student's own thesis, or of sample data used in the course. By agreement, the course can also be arranged and carried out in other ways, such as by taking part in the activities of a research group in the faculty.
The student's course performance is
0 = unfinished and fragmented, with no concretization of the basic principles of analyzing quantitative research data
1 = highly superficial, the analysis is very superficial and contains lots of mistaken interpretations and erroneous conclusions
2 = superficial, the analysis is superficial and contains some mistaken interpretations and erroneous conclusions
3 = reflective. the analysis is justified and the results do not reveal many mistaken interpretations or erroneous conclusions
4 = an analytical and partly very successful whole, in which the proper methods of analysis were chosen for each situation, the student knew how to interpret the results mainly right without any significant erroneous conclusions
5 = a systematic and analytical whole, in which the proper methods were chosen for each situation, the student knew how to interpret the result correctly without any erroneous conclusions

- knows how to analyse and interpret typical educational and psychological research data
- knows how to assess the credibility, reliability and ethicality of her/his own research and research done by others

LET STUDENTS:
After completion of this course, the student is able to
- process and analyse qualitative data
- describe and report on results based on qualitative research data
- utilize mixed method approach
- evaluate the ethicality and reliability of qualitative research

Contents:
- the meaning of different paradigms and research traditions in the planning and implementation of qualitative research
- different reading methods in the analysis and interpretation of qualitative research data
- proving credibility in qualitative research
- research reporting in qualitative research
- ethical issues in qualitative research

LET STUDENTS:
Completion of the course requires active participation in face-to-face teaching and successful completion of all individual learning tasks:
5: The student has participated actively in all face-to-face meetings and done all required individual tasks according to the course requirements. All tasks represent very good familiarity with course contents, course materials, and additional materials. The student is able to express deep understanding of core course contents in the digital portfolio.
4: The student has participated actively in all face-to-face meetings and done all required individual tasks according to the course requirements. All tasks represent good familiarity with course contents and course materials. The student is able to express understanding of core course contents in the digital portfolio.
3: The student has participated actively in most of the face-to-face meetings and done all required individual tasks. Tasks mostly represent good familiarity with course contents and core course materials. The student is able to express understanding of core course contents in the digital portfolio.
2: The student has participated in several face-to-face meetings and done individual tasks, but there are a
few tasks missing. Tasks are done mostly based on one’s own experiences and opinions, not on course
literature and other course materials. Reflection of one’s own learning in the digital portfolio is mostly
superficial.
1: The student has been passive in face-to-face meetings, and there are assignments missing or they
represent superficial understanding of the course content. The student is able to express the understanding
of some course content either in the digital portfolio or in individual tasks, but the level of reflection is
superficial and irrelevant, and it does not represent familiarity with the course materials.
