Opasraportti

FEdu - Primary teacher education, BA (Education) (includes Taika and Tekno) (2018 - 2019)

Degree Programme in Primary Teacher Education

Primary Teacher Education specifically aims at working in the learning and growth environments of the basic education grades 0 to 6. The programme gives the student plentiful capabilities in pedagogy, didactics and subject mastery to encounter educational challenges in the future school.

The studies offer ingredients for the construction of a student’s own pedagogical views and activities, and they guide the student to become aware of the social meaning of a primary teacher’s work. In addition to the courses offered by the Faculty of Education, the student can also apply for a right to pursue studies in the modules offered by five other faculties.

Course Structure Diagrams of the Studies you find here.

Knowledge

The student is familiar with the main concepts, methods, scientific traditions, theories, research results and methodology of his or her own discipline of science.

The student knows how to analyze knowledge obtained through research on growth, development, teaching and learning and how to apply this knowledge in different environments.

The student is familiar with the principles of inclusive education.

Working method and application (skill)

The student knows how to plan, implement and report on a small-scale study, compose reports needed in working life and evaluate the reliability of different sources of knowledge.

The student is familiar with mechanisms and documents of educational planning, such as curricula, and knows how to analyze and apply them meaningfully.

The student knows how to consider individual needs related to growth and learning and how to take them into account in her or his own activities.

The student is capable of evaluating his or her own activity and to act empathetically, ethically, cooperatively and with pedagogical tact in different functions in the field of education.

The student knows how to interpret the social and global links of education and identifies his or her social responsibility as a pedagogical expert.

The student knows how to evaluate and analyze human interaction and its psychological foundations from the viewpoints of equality, human rights and caring.

Responsibility, leadership and entrepreneurship
The student knows how to define and identify the various areas of responsibility in the field of education and how to evaluate his or her placement and interest in different sectors of working life.

The student has the basics to function in expert and management duties in his or her own field in an independent and responsible manner as part of a multi-professional work community.

Evaluation

The student is capable of evaluating his or her own development and taking responsibility for the development of individual groups and persons, taking into account the continuum of lifelong learning.

Key skills of lifelong learning

The student is capable of taking part in discussion in his or her field of science in mother tongue, the second national language and one foreign language, both orally and in writing.

The student is capable of continuous learning and developing and evaluating his or her own competence.

**Laji:** Course  
**Vastuuysikkö:** Faculty of Education  
**Arvostelu:** 1 - 5, pass, fail  
**Opettajat:** Jari Laru  
**Opintokohteen kielet:** Finnish  
**Leikkaavuudet:**  
ay405028Y Technology-Enhanced Learning and Orientation to Studies (OPEN UNI) 5.0 op  

**ECTS Credits:** 5 credits  
**Language of instruction:** Finnish  
**Timing:** 1st year, autumn  
**Learning outcomes:**  
Having completed the course, the student knows how to:  
- identify and understand the basic concepts and phenomena of technology-supported learning and teaching  
- identify the skills of transversal competence (21st century skills) and knows how to apply them as part of learning and teaching  
- apply the basic concepts and research results of technology-supported learning and teaching when planning and implementing practical teaching and learning situations  
- apply the phenomena of technology-supported learning and teaching to solve challenges in practical working life  

Having attended the informative orientation lectures and small group sessions, the student  
- knows how to plan his/her studies on his/her own and in collaboration with the student community.  
- understands the degree structures, contents and studying practices in his/her degree programme.  
- becomes a member of his/her own small group  

**Contents:**  
- Orientation to the studies: issues related to starting to study, objectives, course, structure and contents of the studies, ethical principles and studying culture, constructing a personal study plan, group formation and integration to the university community and your own faculty  
- Research subjects, basic concepts and developmental trends in technology-supported learning and teaching  
- Core skills of the 21st century and the skills of transversal competence in the basic education curriculum  
- Practical applications of technology-supported learning and teaching: a) learning environments, cloud services and office softwares, b) production and distribution of digital materials, c) hardware and networks, d) introduction to programming  
- Making competence visible: digital portfolio and open badges  

**Mode of delivery:**  
Blended teaching  
**Learning activities and teaching methods:**  
Orientation to studies, 1 credit  
Information lectures and supervision sessions by senior tutor and in small groups, 20-30h. PLEASE NOTE! In the course implementation of the Open University, the Orientation to Studies part of the study module is replaced by a separate additional assignment that is given in connection with the appropriate course.  
Technology-Supported Learning, 4 credits  
Technology-supported learning and teaching comprises three sections:  
- introduction (10h of large group sessions, 20h of workshop exercises, 40h of group or individual work),  
- study integration (30h of independent or group work), and  
- sharing (a 4h session + 10h of independent or group work)  

1) The large group sessions common to all (10h) in the Introduction part consist of expert talks that are implemented through blended teaching as applicable, making use of the newest available technology. The exercise workshops (20h) concentrate on exercises in the phenomena and applications of technology-supported learning and teaching. In connection with this part, various exercises are made and the student starts composing his/her personal portfolio comprising (40h of group and/or individual work)
2) In the part of the course integrated in the studies, students apply the skills and knowledge learnt in the introductory part in practical teaching, learning and interaction situations. Such situations arise, among other things, in connection with the intermediate, multidisciplinary and professional studies. (This integrative phase is supported by a support person on duty, and it includes 30h of independent or group work)

3) In the sharing part, competences are made visible in three ways:

- a) The student share their productions making use of tools assigned for the purpose. The productions and other performances shared are created during the introductory and integrated parts of the course.
- b) Competence is made visible by means of digital open badges, for instance, for which applications are made in return for performances. When a sufficient number of badges proving practical competence have been gathered, the student is automatically awarded a certificate of competence.
- c) The student creates a digital portfolio that functions both as a tool of personal reflection and as a bank of materials.

(A 4h joint session + 20h of independent or group work have been reserved for the sharing part)

**Target group:**
Students of education in the various degree programmes

**Prerequisites and co-requisites:**
None

**Recommended optional programme components:**
The study module is part of the orientation studies

**Recommended or required reading:**
Available in the learning environment used in the study module

**Assessment methods and criteria:**
Course methods: Participation in blended learning, construction of a personal study plan (PSP), discussion on the PSP with senior tutor, and completion and sharing of technology-supported learning assignments.

The achievement of learning outcomes is assessed on the basis of the materials produced by the student, the open badges and/or the portfolio

To complete the course with a pass, the student shows that s/he is familiar with the main tools, concepts and approaches of technology-supported learning and teaching, and their development. The student also shows that s/he is familiar with the 21st century core skills (in terms of the curriculum, the skills of transversal competence) as part of the frame of reference of technology-supported learning and teaching. S/he knows how to make systematic use of applications and tools as part of learning, teaching and interaction. The student knows how to evaluate his/her own production critically and how to present suggestions for improvement. S/he is capable of making his/her competence visible by means of a portfolio, open badges and sharing of productions.

In a failed course, the student has not shown any competence as described in the course instructions. His/her productions are unfinished, fragmentary and superficial. The student does not show familiarity with the basic tools, concepts and approaches of technology-supported learning and teaching. S/he also does not perceive the meaning of the 21st century core skills (skills of transversal competence in the basic education curriculum) in the frame of reference of technology-supported teaching and learning. The student has not made her/his competence visible by means of a portfolio, open badges and/or shared productions.

**Grading:**
Pass/Fail

**Person responsible:**
Jari Laru & education coordinators

**Working life cooperation:**
The student has an opportunity to earn some of the course credits in working life environments. Some of the course studies are also integrated with the intermediate, multidisciplinary or professional studies (depending on the degree programme) or they can be implemented as a project, for instance, in a field-specific working context (such as school).

**Other information:**
The study module is connected with the multidisciplinary studies in primary teacher education and professional studies in early childhood education.

Language of instruction:
Finnish. English for the ITE students.
Timing:
1st year
Learning outcomes:
After completion the student is able
- to use the central concepts of social sciences in educational research and analyze the related basic issues in various contexts of education and growth
- to apply social, multicultural and juridical issues related to education and schooling in everyday life situations
- to describe the historical, socio-political and professional starting points of Finnish education system and educational politics

Contents:
Contents
- The basics of social sciences in educational research
- The possibilities and limitations of education and growth determined by the context, i.e. culture, society and environment
- The social, multicultural and juridical issues related to education
- Education systems as part of the historical development of society
- Education politics as a part of social politics

Mode of delivery:
Face-to-face teaching / blended teaching and learning

Learning activities and teaching methods:
Basic part 3 ECTS: Lectures for all 14 h, independent working 67 h
The basic part is composed of studying pre-given material, expert lectures (possibly by guest lecturers), and learning task. In addition, the adoption of learning outcomes are measured by separate assignment (e.g. examination or essay).

Seminar part 2 ECTS: Contact teaching in small study programme groups 10 h, independent working 44 h
The assignment can be for instance learning portfolio, which combines the contents of basic part and student’s own life-world experiences.

**Target group:**
Students in all study programmes of Faculty of Education

**Prerequisites and co-requisites:**
No

**Recommended optional programme components:**
The course is part of the Basic Studies in Education (25 ECTS)

**Recommended or required reading:**
(in applicable parts; to be negotiated with instructor):
- Original text from one of these theorists: Louis Althusser, Basil Bernstein, Pierre Bourdieu, Michel Foucault, Henry Giroux, Jürgen Habermas, Axel Honneth, Peter Jarvis, Peter McLaren, Paul Willis, or Thomas Ziehe.

**Assessment methods and criteria:**
Basic part 3 ECTS.
Assessment method: Both learning task and examination or essay based on the learning material and lectures.

Seminar part 2 ECTS.
Assessment method: Learning portfolio in study group working

The assessment criteria are weighted in the following way:
- first learning outcome is highlighted in learning task (Basic part)
- all three learning outcomes are highlighted in examination or essay (Basic part)
- third learning outcome is highlighted in portfolio (Seminar part)

In approved (Pass) completion of the course, the use of central concepts of social sciences in educational research and analytical handling of basic issues in various contexts of education and growth is clearly structured, and matters are connected to each other at least to some degree. The handling of social, multicultural and juridical issues related to education and schooling in everyday life situations is reflective, and connections between matters are handled at least to some degree. In addition, the description of the historical, socio-political and professional starting points of Finnish education system and educational politics is clear and appropriate. In all assignments, there has to be a visible plot and mainly the use of references has to be at a good level.

In not approved (Fail) completion of the course, student’s study products are unfinished, fragmentary and superficial, matters are presented in disconnected way, or the presentation does not show own thinking nor acquisition to the core themes of the course. Study material is not utilized sufficiently, and references are weakly used.

The study module is part of the intermediate studies in education/psychology and supports the writing of a Bachelor’s thesis

Recommended or required reading:
As agreed, other works and videotaped expert lectures may also be used as learning materials.

Assessment methods and criteria:
The students carry out a learning assignment, either independently or in small groups, based on the lecture and other teaching in the course, the video materials compiled from the expert lectures, and literature. The learning assignment is planned and elaborated through work in small groups with the help of the teacher and other students, and the work is finally presented to the other students in a poster session, for instance. The learning assignment can also consist of several smaller parts.

In concrete terms, the learning assignment can be a small-scale quantitative study, analysis or summary of quantitative studies conducted by others on a certain theme, an analysis of an available quantitative data set, or an essay analyzing a special issue in quantitative research.

As agreed, the course can also be arranged and credits earned in some other way, for instance by taking part in the activities of a research group in the faculty.

Criteria for course performance:
0 = unfinished and fragmented, matters presented are not essentially connected with the topic, the use of sources is almost non-existent and the is no successful concretization of the basic principles of research.
1 = highly superficial, matters are presented detached from one another, the use of sources is one-sided and superficial.
2 = superficial, matters are presented partly in detachment from each other, the use of sources is satisfactory.
3 = reflective and matters are related to each other to some extent, the core argument is to be seen and the use of sources is mainly good.
4 = quite an analytical and partly successful whole, matters are related to each other well, and the use of sources is mainly very good.
5 = a systematic and analytical whole, in which the matters are related to each other very well, and the use of sources is mainly excellent.

- History and social studies: Jukka Rantala & Sirkka Ahonen (2015) Ajan merkit, Historian käyttö ja opetus. Gaudeamus. Other literature to be agreed on when the study module is being implemented.
- Religion: Ubani, Martin (2013) Peruskoulun uskonnonopetus / Martin Ubani. PS-kustannus. Helsinki. Other literature to be agreed on when the study module is being implemented.

Assessment methods and criteria:
A pass for the course requires active participation in teaching and independent work. Depending on the subject, either a group introduction and learning diary, essay, or examination is required. The teacher may also accept alternative methods if necessary. The teacher will agree on the methods of assessment with the students at the start of the course.

Assessment criteria:
0 = unfinished, fragmented, the matters presented are not essentially connected with the thematics, and there is almost no use of sources at all.
1 = highly superficial, matters are presented as if they were fully detached from one another, the use of sources is at a poor level.
2 = superficial, matters are partly presented as if they were detached from each other, and the use of sources is satisfactory.
3 = reflective and matters are related to each other to some extent; a common thread is to be seen, and the use of sources is mainly good.
4 = quite analytical, matters are related well to each other, and the use of sources is mainly very good.
5 = systematic and analytical, matters are related very well to each other, and the use of sources is mainly excellent.

The student’s performance is incomplete or deficient and it does not indicate any learning in line with the expected learning outcomes.

1
The student shows a minor degree of learning in line with the learning outcomes, but his/her attainment remains superficial or lacking in terms of one or more objectives. The student is not really applying or using essential theoretical course materials at all.

2
The student’s accomplishment is in line with the expected learning outcomes, but it only indicates superficial ability. The performance shows narrow and limited assimilation of the theoretical substance on the level of retention.

3
The student’s performance is in line with the expected outcomes. The student processes and analyzes essential theoretical course materials at the level of retention and description, but without being able to apply or analyze them.

4
The student’s performance is in line with the expected outcomes. S/he shows that s/he has a comprehensive familiarity with the essential theoretical substance of the course, and knows how to apply it in an appropriate manner.

5
The student exhibits a knowledge that is in line with the learning outcomes in a deep, wide and varied manner. S/he shows her/his ability to describe, evaluate and analyze essential theoretical course materials and to use and apply them in an appropriate manner.

- knows how to apply methods of data acquisition, working, manufacturing and assessment typical of crafts, making use of information and communication technology.
- knows how to implement creative musical activities, in which a basis is established through various musical working methods for consistently accumulating experiences and knowledge of music.

Contents:
Crafts:
- During the study module in crafts, the student designs, implements and evaluates collaborative projects making use of the information and communication technologies.
- The student develops his/her pedagogical thinking by analyzing his/her learning process orally and in writing.

The study module in crafts comprises the following contents:
- basic elements of the safe use of crafts tools
- making use of information and communication technology in teaching
- collaborative learning assignment

The study module in music comprises the following contents:
- basic techniques and pedagogical uses of instruments used in schools
- musical collaboration, learning to take into account children's individual skills and prerequisites for learning
- various functional working methods in listening education
- making use of information and communication technology in teaching
- collaborative learning assignment

Contents:
The overarching theme in this practice is teaching and learning with special reference multilingual/ intercultural/ international school settings. The purpose is that the student should deepen and enrich her/his personal understanding of the themes introduced in the courses "Curriculum, Planning and Evaluation of Teaching" and "Pedagogical Seminar II" through hands-on work in the classroom. Other themes that will emerge in this practice will include different learners, obstacles to learning and pupil welfare. School Experience II offers the student an opportunity to practice the fundamental skills of planning, implementing and evaluation of lessons and longer periods of teaching. The emphasis is on critical evaluation of one’s own teaching, and on how the teaching circumstances require flexible implementation of plans which are nevertheless based on the core framework.
From the experience, the student will use this opportunity to study the main phenomena and concepts of pedagogical action, such as pedagogical relationships, pedagogical tact, encountering the child and teacher responsibility, all in the context of intercultural education.
The student also has an opportunity to observe and consider how educational research and its results are linked to the work of a teacher.
The student should develop and experiment with various teaching methods appropriate for different learners that address the special characteristics of different subjects and cross-curricular themes. At all times there should be reflection on issues related to intercultural matters.

**Mode of delivery:**
The placement of school experience II is a school in Finland or abroad. There must be a particular colleague or mentor from the permanent staff of the school who will work with the student. School Experience II is supervised by the tutor of Seminar II and additional advice can be sought from the university teachers responsible for the various Multidisciplinary Studies modules.
