Degree Programme in Early Childhood Education

The basis for the degree programme in early childhood education is provided by the various tasks of early childhood education. This variety covers the following areas, among others: early childhood education training and planning, early childhood research and transmission of knowledge on early childhood education, as well as direction and management of early childhood education organisations.

The degree programme is a comprehensive pedagogical programme that aims at fostering the welfare of children and families in various educational, teaching and experts tasks in early childhood education and children's culture.

The students in the degree programme first complete a 180 ECTS credit Bachelor's degree followed by a 120 ECTS credit degree of Master of Arts (Education) degree. The education also qualifies them as kindergarten teachers.

407054A: Current Issues in Special Education, 5 op

Voimassaolo: 01.08.2013 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Faculty of Education
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
5ECTS cr

Language of instruction:
Finnish

Timing:
From September 2014 to May 2015

Learning outcomes:
By means of the “Online Lectures in Special Education” and other materials, the student is familiarised with current issues in special education, with the background to topical themes and a few recent publications on the topic. S/he understands and knows how to use essential concepts related to the relevant range of topics. The student forms an overall picture of the topic and knows how to view themes of special education that are close to the topic in addition to those given to her/him. S/he updates her/his ideas of current issues in special education.

Contents:
The student composes an essay in his lecture diary of at least 3 pages on each lecture (7-8 lectures of two hours each) including an introduction, main elements of the topic of the lecture, themes related to the topic and practical connections. S/he also writes a reflective discussion to consider future perspectives.

Mode of delivery:
Online lectures, lecture journal, exam

Learning activities and teaching methods:
listening to all the Online Lectures in Special Education (7-8 lectures, two hours each) and getting to know the lecture materials

- writing a lecture diary on each lecture with reflections, 3 pages each, totalling some 20 pages
- book (some 200-300 pages exam) to be agreed on later with the professor
- feedback in a group or individually, 1-2 hours
The lecture diary is returned at the end of the lecture series. The book exam is taken in the spring term of 2015.

**Target group:**
Students in the faculty of education

**Prerequisites and co-requisites:**

**408014S: Pedagogical Challenges in Research: Literature Course, 5 op**

**Voimassaolo:** 01.08.2005 -

**Opiskelumuoto:** Advanced Studies

**Laji:** Course

**Vastuuysikkö:** Faculty of Education

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kielet:** Finnish

**ECTS Credits:**
4 cr

**Language of instruction:**
Finnish

**Timing:**
4th and 5th years, spring/summer

**Learning outcomes:**
After completing this course, students are able to justify their educational viewpoints with recent and diverse scientific knowledge.
- The student acquaints her/himself with research carried out in the various research groups of the faculty and with modern educational literature.
- The student is capable of deepening the topics of her/his Bachelor's or Master's thesis
- The student enhances her/his pedagogical skills to respond to the challenges offered by current themes.

**Contents:**
The literature packages familiarize the student with various pedagogical challenges in the field of education. The student chooses one of the following literature packages, among others:

a) Ethical issues in education and multiculturalism
b) Prevention of and intervention in school violence
c) Environmental ethics and aesthetics
d) Child's voice and place
e) The teacher's work in terms of being in relationships
f) Learning and ways to support it

Mode of delivery:
Independent and face-to-face teaching

Learning activities and teaching methods:
The literature course is carried through in the spring term, but the course ends at the start of the next autumn term. It is thus possible to study in the summer to complete the course. The student chooses one of the available literature packages. Each package has a responsible leader of its own representing one of the faculty's research groups. The course consists of independent work and includes 2-3 meetings in a small group. The course starts with an information meeting, after which registrations for the course are allowed: the students register for their chosen package on Weboodi.

The literature course comprises
- an information meeting 2 h
- small group sessions 6 h
- independent work 73 h

Target group:
Primary teacher students and students in the degree programme in education (final exam)

Prerequisites and co-requisites:
None

Recommended optional programme components:
You may utilise the course literature in your Master's thesis.

Recommended or required reading:
To be handed out/agreed on at the start of the course.

Assessment methods and criteria:
Participation in small group sessions and familiarisation with the chosen literature. Either a literature exam, or essays written on the literature.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
0 - 5

Person responsible:

After the course the student is able to
- identifies the theoretical premises underlying different curricula
- identify and interpret the values and goals underlying curricula as well as their connections with society and education policy.
- identifies and is able to determine the different levels of educational evaluation (local, national, international; theory and practice)
- design a curriculum and manage/develop its basis of evaluation

**Contents:**
- concept of curriculum
- different curricular theories and approaches
- foundations, levels and methods of evaluation
- evaluation and education policy

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
- lectures 20 h and small group sessions 12 h, as part of which a project plan is made in practice related to the field of curriculum or evaluation, or a project in progress in which you are involved is described and evaluated
- the planning or evaluation task can be integrated with teaching practice

**Target group:**

Timing:
Spring term, 1st year studies in the LET Master’s Degree Programme

Learning outcomes:
After completion of this course, the student knows how to
- describe the theoretical background and main stages of designing technology-enhanced learning (TEL)
- design a TEL course
- justify and evaluate instructional and technological design

Contents:
- Technology-Enhanced Learning (TEL) as a concept
- Designing TEL: instructional and technological design
- Structuring individual and collaborative learning activities
- Implementing and evaluating TEL

Mode of delivery:
Face-to-face and online

Learning activities and teaching methods:
Students become familiar with the key concepts, theories and approaches of technology-enhanced learning (TEL) and implement this knowledge by designing their own course in small groups. Students reflect and report on the different stages of the design process in a digital portfolio.

- name some of the major research topics in the field of learning sciences and technology enhanced learning  
- identify and discuss contemporary issues in educational technology in global and local educational contexts
• use contemporary educational software and hardware, and also evaluate those pedagogical usability
• create a digital portfolio in the form of a personal journal in a weblog

Contents:
• Basic concepts of instruction, learning and technology enhanced learning
• Introduction to the field of learning sciences and technology enhanced learning: objectives, research subjects and theoretical framework
• Reflection on one’s own learning and expertise
• Pedagogical use of contemporary educational software and hardware

Mode of delivery:
Face-to-face and online

Learning activities and teaching methods:
Face-to Face 50h
Collaborative and individual learning 80 h
In this course the students familiarise themselves with the theoretical background, core concepts, and contemporary tools of educational technology. The course introduces the students to the field of learning sciences and examines the role of learning and educational technology in a globalised world. One central goal of this course is to learn to use and evaluate technologies in a pedagogically meaningful way. In this course students start to reflect on their own learning and expertise in a digital portfolio.

After the course, the student identifies the concepts of corporate and individual entrepreneurship. The student is familiarised with the application of these concepts to basic education as part of his/her own and pupils' work in the form of assignments to be carried out. The assignments help the students to get an idea of what an enterprising life attitude is all about, what the requirement of future working life are like and how they are used in teaching. After the course, the student knows how to design examples of applications and know how to analyze curricula as outlined in "Yrittäjyyskasvatuksen suuntaviivat 2015". The goal is to interpret and solve together issues involving entrepreneurship education as part of the pedagogical activity of the school. After the course, the thematic entity "Inclusive citizenship and entrepreneurship" is identified as a positive working method.

Contents:
- theory of entrepreneurship education
- social status of entrepreneurship education
- policy decisions in education policy as part of the educational system
- creativity, innovation, production of ideas, taking responsibility, decision-making

901001Y: Second Official Language (Swedish), 2 op

Voimassaolo: 01.08.1995 -
Opiskelumuoto: Language and Communication Studies
Laji: Course
Opintokohteen kielet: Swedish

Proficiency level:
B1/B2/C1 (CEFR scale)

Status:
This course is compulsory to all students. The language proficiency provided by the course unit is equivalent to the language proficiency required of a state official with an academic degree working in a bilingual municipality area (Act 424/03 and Decree 481/03). According to the requirements of the law, the student must be able to use Swedish both orally and in writing in various professional situations. Achieving this kind of proficiency during a course unit that lasts for only one semester requires that the student has already achieved the necessary starting proficiency level prior to taking the course.

Required proficiency level:
The required starting proficiency level for students of all faculties is a grade of 7 or higher from the Swedish studies at secondary school (B-syllabus) or equivalent knowledge AND a passing grade from the proficiency test held at the beginning of the course unit. Based on this proficiency test the students are directed to brush up on their language skills with a self-study course (901028Y På väg 1-3, 2 ECTS credits) if it is deemed necessary; mastering basic vocabulary and grammar is a prerequisite to achieving the necessary language proficiency for the various communication situations one faces in professional life.

- If a student has not completed Swedish studies (B-language) at secondary school with a grade of 7 or higher, or his/her language skills are otherwise lacking, he/she must achieve the required proficiency level BEFORE taking this compulsory Swedish course unit. Information about brushing up on one's language skills can be found in Finnish here.

ECTS Credits:
2 ECTS credits

Language of instruction:
Swedish

Timing:
autumn or spring term

Learning outcomes:
Upon completion of the course the student should be able to read and understand texts from his/her academic field and make conclusions based on them. The student should be able to write typical
professional emails and short reports. He/she should be able to carry himself/herself according to Swedish etiquette when acting as host or guest. The student should also be able to discuss current events and special field-specific matters, use the vocabulary of education and plan and give short oral presentations relating to his/her own field.

Contents:
Communicative oral and written exercises, which aim to develop the student's Swedish proficiency in areas relevant to his/her academic field and future professional tasks. The student practises oral presentation and pronunciation. Situational oral exercises done individually and in pairs and groups. Discussions in small groups. Current texts about the student's special field. Listening comprehension exercises. Written exercises relating to the student's professional field.

Mode of delivery:
Contact teaching

Learning activities and teaching methods:
1 x 90 minutes or 2 x 90 minutes of contact teaching per week and related exercises, self-directed study, a total workload of 52 hours per course.

Target group:
Students of the Faculty of Education

Prerequisites and co-requisites:
See Required proficiency level

Recommended optional programme components:
-

Recommended or required reading:
The students will receive course material during the course.

Assessment methods and criteria:
The course unit focuses on improving both oral and written language skills and requires active attendance and participation in exercises, which also require preparation time. 100% attendance is required. The course unit tests both oral and written language skills. Students participate in the teaching in either autumn semester or spring semester.

Read more about assessment criteria at the University of Oulu webpage.

Grading:
Oral and written language proficiencies are tested separately and assessed using the so called KORU-criteria (publication of HAMK University of Applied Sciences, 2006). Separate grades will be awarded for the successful completions of both oral and written portions of the course unit: the possible passing grades are satisfactory skills and good skills (see language decree 481/03). The grades are based on continuous assessment and testing.

Person responsible:
See Contact teachers from Languages and Communication's home page

Working life cooperation:
-

Other information:
Students sign up for teaching in WebOodi. A student can only sign up for one teaching group. When signing up in WebOodi, it is imperative that the student fills in his/her university email address (paju.oulu.fi), major subject and Swedish grades attained during secondary education in the Further Information field. The student will be notified of a place in the course unit via email prior to the beginning of teaching.

410072P-03: Orientation to Work at School, 2 op
Voimassaolo: 01.08.2013 -
Opiskelumuoto: Basic Studies
Laji: Partial credit
Learning outcomes:

After completion of the course, the student is able to:
- report on the activities of a class
- critically describe his/her conception of teachership and education
- assess the activity of a class by means of observation
- understand the contents and significance of curricula in school education

Contents:

School experience orientation is a part of the studies in the major subject at the Bachelor level. It is also a part of the pedagogical studies in teacher training. All the student teachers complete this practice period, irrespective of prior work experience.

The principal theme of this practice period is the pupil as a member of the classroom community. The aim is for the students to build upon the themes and their individual levels of understanding of Pedagogical Seminar I by working in a concrete classroom context. In addition, this practice period introduces the students to the curriculum and its flexible implementation in teaching.

School experience orientation offers the students a guided opportunity to investigate child development and interaction in a classroom environment, as well as relevant socio-cultural phenomena, based on study assignments formulated in Pedagogical Seminar I. In the School experience orientation period, the students are introduced to the teaching profession by participating in the teaching and learning activities of their own student class groups and those of neighbouring classes.

Place: Oulu Teacher Training School, grades 0-6.

Duration of the period: two calendar weeks

Mode of delivery:

School Work

Learning activities and teaching methods:

Description of the activities: During Orientation to School Work, the student works together with the staff of the Teacher Training School and his/her fellow students.

The student observes and monitors the activity in the class based on the learning assignments agreed on in Pedagogical Seminar I. The students gets to know school as a growth and learning environment and is familiarised with the school curriculum, especially its general part.

The period starts with a cell-specific joint planning session, discussing the course and supervision arrangements and agreeing on the working classes where the planning continues. The planning is attended by all the persons taking part in the school work period. During this period, the student gets to know the class and carries out the monitoring tasks given in Pedagogical Seminar I.

There are 40 hours of activities tied to a time and place in this period, consisting of the following:
- In cooperation with Liikenneturva, the students in each class give a traffic education lesson to the pupils. There is a two-hour lecture on the contents of this lesson at a time to be specified later.
- The students also give small-scale simultaneous teaching, small group teaching or a jointly implemented teaching episode or lesson.
- In addition to the above, the students also monitor the activities in their own and neighbouring classes for a total of 36 hours.

Supervision: General supervision in Orientation to School Work is provided by the primary school principal at the Teacher Training School. Tutoring in a student's class or for a group of students is provided by specifically appointed class teachers. Tutoring in the major subject studies focuses on supervision of the practice period in Pedagogical Seminar I.
Information seminar: School experience orientation will begin with an information meeting to be held in the canteen for the grades 0-6 at the Teacher Training School.
Assessment: The class teacher assesses the student's performance on the scale pass/fail based on assessment discussions and the pedagogical portfolio. An entry on a “pass” is made in the practice card. The card is also signed by the staff member who delivered Seminar I. There are specific instructions available on the composition and contents of the pedagogical portfolio. Its composition is also discussed in Pedagogical Seminar I. A fail may need to be retaken or supplemented. A failed school experience period can be retaken twice. There are specific instructions on supplementation or retakes. If a registration for the period is not cancelled, it is considered a fail.
Evaluation seminar: At the end of the Orientation to School Work, an evaluation seminar is organised at the Teacher Training School to analyse the fulfilment of the goals for the period and to discuss how the experiences can be utilised for future school experience periods. The seminar is attended by all the persons who contributed to the school experience period. A secretary chosen from among the students keeps minutes in the evaluation seminar, and the document is delivered to the members of the school experience team in electronic form within one week of the seminar.

410072P-04: Pedagogical Seminar I: Knowing the Pupils and Interaction, 3 op

Voimassaolo: 01.08.2013 -
Opiskelumuoto: Basic Studies
Laji: Partial credit
Vastuuysikkö: Faculty of Education
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
3 ECTS cr
Language of instruction:
Finnish

Timing:
1st year

Learning outcomes:
Upon completion of the course, the student
- identifies knowledge of pupils as learners as a dialogical relationship and as a continuous process
- identifies the most important group phenomena in the classroom and knows how to observe interaction between pupils
- knows how to describe his/her pedagogical theory-in-use and how to critically describe and reflect on his/her views on teaching and education
- knows how to apply his/her pedagogical expertise in a diversified, attentive and pupil-centred manner in different interaction situations
- is familiar with research on classroom interaction

Contents:
- changing knowledge in educational and development psychology, especially the traits of the growth and development of children at school age, but also the theories in which these traits are seen as socially produced
- familiarisation with classical sociological studies that apply or develop theories by observing classroom situations
- pedagogical portfolio as a tool for reflection on the development of your own teachership: aims of the portfolio and starting to compile one

Taika-students: The seminar focuses on the arts and crafts education perspective in learner growth and development and the study of interactive and socio-cultural phenomena in the classroom. We learn how to identify the opportunities provided by the arts in deepening the teacher-student relationship.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Small group teaching 24 h/ self-study 56 h
The student works on her/his portfolio also in a blog environment between the face-to-face meetings

Target group:
Luokanopettajaokoulutusten opiskelijat

Prerequisites and co-requisites:
Basic Course in Education, Didactics

Recommended optional programme components:
Pedagogical Seminar I is part of a module formed by "Educational Psychology", "Sociology of Education" and "Orientation to School Work". Integrating the themes of these courses, students focus on studying the pupils' growth and development as well as interaction and sociocultural phenomena in the classroom. The pedagogical seminars I-III form a continuum in which the essential viewpoint is the student's comprehensive professional growth into a critical, reflective and inquiring teacher.

Recommended or required reading:

410072P-06: Research Seminar, Education, 5 op

Voimassaolo: 01.08.2013 -
Opiskelumuoto: Basic Studies
Laji: Partial credit
Vastuuyksikkö: Faculty of Education
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS cr

Language of instruction:
Finnish

Learning outcomes:
Having completed the course, the student
- has an understanding of the contents of and mutual relations between the courses in the Basic Studies in Education.
- has familiarised him/herself with current educational research especially in his/her own faculty.
- knows how to design, produce and evaluate scientific texts

Contents:
Current educational research

Mode of delivery:
In the Education Programme, face-to-face teaching scheduled to last an entire term. E.g. lectures on current research themes by researchers in the research group Theory and Philosophy of Education followed by discussion based on the lectures and production of a learning portfolio. In the Open University, lectures and seminar

Learning activities and teaching methods:
Lectures and seminar sessions, 20 h. In the Education Programme, to be implemented as a 2-hour lecture session at the end of each basic studies course, with 10 hours of seminar sessions at the end of the course in which the students present their learning portfolios.

Target group:
Students pursuing the Basic Studies in Education

Prerequisites and co-requisites:
no

Recommended optional programme components:
The course links together the various courses in the Basic Studies in Education (25 credits).

Recommended or required reading:
You can check for the availability of the course books here.

Assessment methods and criteria:
Active attendance in lectures is recommended, while a 80% class attendance is required in the seminars. The student composes a learning portfolio to study the core contents of the courses in the basic studies based on the 2-hour lectures arranged at the end of each basic studies course. In the portfolio written on the basis of these lectures given by researchers, the student shows that s/he has understood the main contents of the basic studies course, and also outlines his/her own research interests and specific educational viewpoints. The student is expected to discover for him/herself a meaningful and topical theme for further educational research. The portfolios are presented, discussed and assessed in the seminar groups. The portfolios are based on the researchers’ lectures, the course materials in the basic studies, and supplementary literature as agreed individually based on the focus of each student’s portfolio. There is more information on the grading of studies in the university’s website.
In the Open University, the course is implemented as a lecture providing an introduction to seminar work, in which the student composes a report for a research plan, on the basis of which the course grade is given.

The course provides students with the necessary capacities for curricular design at the school and municipal levels, and training for curricular evaluation at the local level. The course familiarises the students with curriculum theory - especially with the significance of the curriculum in the development of a school's activities - and discusses the connections of the curriculum with society and education policy. In addition, educational evaluation is looked at in terms of both theory and practice at local, national and international levels. As a whole, the course gives student teachers the capacity to function as committed, critical and responsible actors in the development of the curricular and its evaluation.

After the course the student is able to:
- identify and interpret the values and goals underlying curricula as well as their connections with society and education policy.
- identify and is able to determine the different levels of educational evaluation (local, national, international; theory and practice)
- design a curriculum and manage/develop its basis of evaluation

Contents:
- concept of curriculum
- different curricular theories and approaches
- foundations, levels and methods of evaluation
- evaluation and education policy

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
- lectures 20 h and small group sessions 12 h, as part of which a project plan is made in practice related to the field of curriculum or evaluation, or a project in progress in which you are involved is described and evaluated
- the planning or evaluation task can be integrated with teaching practice

Vastuuysikkö: Faculty of Education
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
7 ECTS

Language of instruction:
English/Finnish

Timing:
Spring term, 1st year studies in the LET Master’s Degree Programme

Learning outcomes:
After completion of this course, the student knows how to
- describe the theoretical background and main stages of designing technology-enhanced learning (TEL)
- design a TEL course
- justify and evaluate instructional and technological design

Contents:
- Technology-Enhanced Learning (TEL) as a concept
- Designing TEL: instructional and technological design
- Structuring individual and collaborative learning activities
- Implementing and evaluating TEL

Mode of delivery:
Face-to-face and online

Learning activities and teaching methods:
Face-to-face / online 32h
Collaborative and individual learning 150h
Students become familiar with the key concepts, theories and approaches of technology-enhanced learning (TEL) and implement this knowledge by designing their own course in small groups. Students reflect and report on the different stages of the design process in a digital portfolio.
Target group:
1st year students on the LET Master’s Programme
Educational Technology minor students
Other students

Prerequisites and co-requisites:
No

Recommended optional programme components:
No

Recommended or required reading:
Contemporary readings in the field of technology-enhanced learning, to be announced at the beginning of the course

Assessment methods and criteria:
Active participation in face-to-face teaching and collaborative and independent work. Successful completion of all the learning assignments and exercises. Read more about assessment criteria at the University of Oulu webpage.

Timing:
autumn 2013

Learning outcomes:
After completion of this course, the student knows how to
- describe the basic concepts of learning sciences and educational technology
- name some of the major research topics in the field of learning sciences and technology enhanced learning
- identify and discuss contemporary issues in educational technology in global and local educational contexts
- use contemporary educational software and hardware, and also evaluate those pedagogical usability
- create a digital portfolio in the form of a personal journal in a weblog

Contents:
- Basic concepts of instruction, learning and technology enhanced learning
Introduction to the field of learning sciences and technology enhanced learning: objectives, research subjects and theoretical framework

Reflection on one’s own learning and expertise

Pedagogical use of contemporary educational software and hardware

Mode of delivery:
Face-to-face and online

Learning activities and teaching methods:

Face-to Face 50h
Collaborative and individual learning 80 h

In this course the students familiarise themselves with the theoretical background, core concepts, and contemporary tools of educational technology. The course introduces the students to the field of learning sciences and examines the role of learning and educational technology in a globalised world. One central goal of this course is to learn to use and evaluate technologies in a pedagogically meaningful way. In this course students start to reflect on their own learning and expertise in a digital portfolio.

Target group:
1st year students on the LET Master’s Programme
Educational Technology minor students
Other students (as a part of their optional studies)

Prerequisites and co-requisites:
no

Recommended or required reading:

- and/or other contemporary readings in the field of learning and educational technology, to be announced at the beginning of the course.

Learning outcomes:
After completion of this course, the student knows how to

- identify the theoretical principles underlying technology-enhanced learning
- define the concepts of self-regulated learning, collaborative learning and learning of expertise
describe the use of technology to support such learning
justify pedagogical use of technology by using current theoretical knowledge of learning

Contents:
- Self-Regulated Learning
- Collaborative Learning and Computer-Supported Collaborative Learning (CSCL)
- Learning of Expertise
- Supporting learning with technology

Mode of delivery:
face-to-face and online

Learning activities and teaching methods:
Face-to-face 30 h
Collaborative and individual learning 157 h
The course includes three theoretical viewpoints on learning: self-regulated learning, collaborative learning, and learning of expertise. The goal of the course is to understand these theoretical principles of learning and comprehend the possibilities to support such learning with technology. Students reflect on their theoretical knowledge and their own learning process in their digital portfolio

Target group:

Timing:
2nd year

Learning outcomes:
After the course, the student identifies the concepts of corporate and individual entrepreneurship. The student is familiarised with the application of these concepts to basic education as part of his/her own and pupils' work in the form of assignments to be carried out. The assignments help the students to get an idea of what an enterprising life attitude is all about, what the requirement of future working life are like and how they are used in teaching. After the course, the student knows how to design examples of applications and know how to analyze curricula as outlined in "Yrittäjyyskasvatuksen suuntaviivat 2015". The goal is to interpret and solve together issues involving entrepreneurship education as part of the pedagogical activity of the school. After the course, the thematic entity "Inclusive citizenship and entrepreneurship" is identified as a positive working method.

Contents:
- theory of entrepreneurship education
- social status of entrepreneurship education
- policy decisions in education policy as part of the educational system
- creativity, innovation, production of ideas, taking responsibility, decision-making
- familiarisation with and analysis of curricula for basic education
- practical arrangements for a corporate visit and legislation
- characteristics of an enterpriser
- significance of motivation and volition in teaching through entrepreneurship education as part of the teaching activities
- personal economics management
- the effect of the hidden curriculum in a learning environment

Thematic entities:
- Inclusive citizenship and entrepreneurship
- Man and technology
