

Opasraportti

KTK - Minor Subject Studies 2011-2012 (2011 - 2012)

MINOR STUDIES 2011-2012

- The minor subjects offered by the Faculty vary year by year.
- As a rule, one group by minor subject is arranged.
- The size of a group is about 20 but no fewer than 10 students.
- An effort is made to guarantee a student's first choice within five years for all primary and kindergarten teacher students.
- A student can only be granted a single minor subject in the first round of applications.
- A student can be granted a maximum of two minor subjects in the minor subject selections of the same spring.
- All students studying for a basic degree are offered the possibility to complete two minor subjects within five years.
- No application is necessary for the minor subjects of sociology, women's studies and psychology.
- If the Faculty is offering minor subjects organised by the Open University, the course shall be a first or second minor subject that complies with the structure of the degree (multiculturalism, general theology, health education).
- Only minor subjects previously completed/started in the Faculty and Open University minor subjects financed by the Faculty are taken into account in the selection of minor subjects.
- Apply/register for study modules in other faculties as instructed by the faculties in question.

Criteria for minor subject selection

* Primary and kindergarten teacher students are given preference in the following minor subjects: pre-school and primary education (not for kindergarten teacher students), art, physical education, music, technical work, textile work, Finnish language and literature, and the cultural environments of early childhood.

Application for minor subjects takes place in the order of preference indicated by the students. If there are more than 20 applicants for a minor subject, the selection of students to the group is determined on the basis of the following criteria:

1. Student's rank of the choice
2. Minor subjects started/completed before
3. Progress in studies, starting year

Teaching in minor subjects

So far as contact teaching is concerned, all of the studies in a minor subject are arranged in the course of a single academic year.

A250507 Education for Intercultural Competences 25 credits

A250511 Education in Transition 25 credits

A255102 Special education 25 credits

A255202 Pre-school and primary education 25 credits

A250504 Introductory studies in education 25 credits

A250505 Intermediate studies in education 35 credits

A255301 Introductory studies in educational technology 25 credits

A255402 Art 25 credits

A255902 Handicrafts/technical work/technology 25 credits
 A256002 Handicrafts/textile work/technology 25 credits
 A255501 Physical education 25 credits
 A255702 Music 25 credits
 A212901 Introductory studies in women's studies 25 credits
 A212902 Intermediate studies in women's studies 35 credits
 A250603 Introductory studies in psychology 25 credits
 A250604 Intermediate studies in psychology 35 credits
 A212001 Drama and speech communication 25 credits
 A211401 Introductory studies in sociology 25 credits
 A211402 Intermediate studies in sociology 35 credits
 SSOG1300 Advanced studies in sociology (University of Lapland) 120 credits

Opintojaksojen kuvaukset

Tutkintorakenteisiin kuulumattomien opintokokonaisuuksien ja -jaksojen kuvaukset

402953A: Advanced Course in the Didactics of Health Studies, 5 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Open University, Oulu

Arvostelu: 1 - 5, pass, fail

Opettajat: Kyngäs, Helvi Aulikki

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay402953A Advanced Course in the Didactics of Health Studies (OPEN UNI) 5.0 op

ECTS Credits:

6 ECTS

Language of instruction:

Finnish

Timing:

2.-5. year

Learning outcomes:

- plan the contents and methods of teaching in health education in a goal-oriented way, taking into account different learners and the needs of the group
- build and reform teaching in health education and practices related to it from the viewpoint of developing the school

- consider his/her educational and health awareness and abilities to promote health from the educational point of view
- evaluate his/her ideas and activities as a health educator

Contents:

- the meaning of the worldview in health education
- development of the health education curriculum
- core content analysis and pupil analysis
- pedagogical approaches and related teaching methods
- learning materials in support of teaching and learning activities
- assessment of teaching and learning in general and in the matriculation examinations
- development of the school in promoting health

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and group teaching 15 h

Independent work 147 h

Target group:

Mnor subject students

Prerequisites and co-requisites:

Basic studies

Recommended optional programme components:

No

Recommended or required reading:

Koskinen-Ollonqvist, P., Rouvinen-Wilenius, P. & Palojärvi, E. (2003). Elämyksellisyys nuorten päihdekasvatuksessa. Paikallistoiminnan arviointikokonaisuuden, elämyksellisten päihdereittien ja draamojen arviointi. Terveyden edistämisen keskus, arviointipalvelu. Helsinki, Trio-Offset.

A255402: Art (Oulu), 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish / English

Timing:

3rd or 4th year

Learning outcomes:

The aim of this study unit is that the student

- is able to design and implement art education and to develop the school curriculum in grades 0 - 6
- can apply working, data acquisition, interpretation and evaluation skills typical of visual arts
- is able to develop curricula and assess didactic and pedagogical applications and solutions in art education

Contents:

In this study module the student studies the theory of art education and visual arts, strengthening her /his individual artistic expression. Art is examined from the viewpoints of art education and aesthetics, and the manifestations of visual arts are considered as part of culture.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Minor concentration consists of five study modules:

402713P Pedagogy of Art, 5 credits

402714P Visual Cultures, 5 credits

402715P Visual Expression and Visual Thinking, 5 credits

402716P Form, Space and Environmental Education, 5 credits

402717P Media Education and Visual Communication, 5 credits

For more details, see the "courses" tab in the minor subjects guide

Target group:

Students selected for studies in the minor of Art in the Faculty of Education

Prerequisites and co-requisites:

Visual arts studies in the primary teacher students' multidisciplinary studies (7 credits) or visual arts studies in the early childhood education professional studies (5 credits)

Recommended optional programme components:

None

Recommended or required reading:

To be agreed on at the beginning of the courses

Assessment methods and criteria:

Active participation in face-to-face teaching, assignments and portfolio

Grading:

0 - 5

Person responsible:

Minna Myllykangas, Tapio Tenhu

Working life cooperation:

None

Compulsory

402713P: Pedagogy of Art, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish / English

Timing:

3rd or 4th year

Learning outcomes:

During the courses, students construct their individual conception of art and art education.

After the course student is able to

- review art education practices and history and assess the underlying conceptions
- assess the meaning of art education as part of the school's educational mission and examine children's development of visual thinking, perception, imagination and creativity in art education

Contents:

- art museums, exhibitions and art institutions as part of art education
- school curricula and different learning environments
- planning classroom practices
- the use of art pictures in teaching

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small group sessions 60 h, independent work 75 h

The course consists of three parts:

402713P-01 1. Philosophical and practical approaches in art education (1 cr)

402713P-02 2. Art curriculum and themes (2 cr)

402713P-03 3. Art education project I (2 cr)

Target group:

Students selected for the minor of Art at the Faculty of Education

Prerequisites and co-requisites:

Art studies in the multidisciplinary studies for primary teachers (7 credits) or Art studies in the professional studies in early childhood education (5 credits)

Recommended optional programme components:

Art 25 cr

Recommended or required reading:

To be agreed on at the beginning of the course.

Assessment methods and criteria:

Active participation in contact teaching, completion of assignments and portfolio.

Grading:

0 - 5

Person responsible:

Minna Myllykangas, Tapio Tenhu

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA257301 Drama education (OPEN UNI) 25.0 op

ECTS Credits:

25 credits

Language of instruction:

Finnish/ English

Timing:

3rd or 4th year

Learning outcomes:

Having completed the study module, the student

- is familiar with the theoretical foundations of drama education
- knows how to teach theatre and applied drama in different learning environments and contexts
- knows how to work as a drama teacher
- is able to justify his/her activities as a drama teacher
- understands the field of research in drama education

Contents:

Basic Studies in Drama Education are suitable for all who are interested in drama as a genre of art and in the use of drama and activity-based working methods in educational and teaching work.

Drama education is an experiential discipline involving art education. It studies the means of drama and theatre in teaching and education and drama as a genre of art in educational and learning environments. As a discipline it is built on sociocultural and collaborative learning and focuses on the inclusive, integrative and inquiring role of art. The studies focus on the tight interaction between theory and practice: the activity-based periods in teaching are linked to theory in the learning assignments. In this way individual work and group learning alternate in the learning process. A practice-theoretical orientation is built in the studies through the development of the student's own skills to drama teacher ship, and a general picture is created of the working methods and genres in drama education. The basics of doing and directing presentational and applied drama are also studied. Teacher ship is considered from viewpoints combining different professional images: teacher-dramaturge, teacher-director, and teacher-actor.

It is also possible to do research for a Bachelor's and Master's thesis in the minor as part of the research group in drama education. After the Basic Studies (25 credits), the student can also take the Intermediate Studies (35 credits) in Drama Education.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures, exercises/projects, artistic and written learning assignments, visits, literature circle and/or exam

Target group:

Students selected for the minor in Drama Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

The minor in Drama Education (25 credits) consists of the following courses:

- 402518P Introduction to Drama and Theatre Education 2 cr.
- 402519P History and Theory of Drama and Theatre Education 4 cr.
- 402520P Genres, Dramaturgy and Working Methods in Drama Education 2 cr.
- 402521P Process and Applied Drama 4 cr.
- 402522P Projects in Drama and Theatre Education 7 cr.
- 402523P Current Issues in Drama Education 4 cr.
- 402524P Drama Education: Reflection, Assessment and Research 2 cr.

407524P	Critical Literacy in Education (optional)	5			5
	total	25–44	22	7	15

Learning outcomes:

- Identify the main issues and sub-areas of educational sciences: history of education, psychology of education, philosophy of education, didactics, sociology of education, special education, and comparative education.
- Discuss the impact of globalisation on educational contexts at local and global levels.
- Summarise current debates related to education in the globalised world.
- Critically analyse the production of knowledge in relations of power in North-South dialogue.

Contents:

Minor subject: A250511 Education in Transition (25–34 credits) consists of the following courses:

- 407509P Defining Education, Educational Sciences and their Tasks 7 credits
- 407512P Comparative Educational Research 5 credits
- 407509A Inclusive Education and Education for All 3 credits
- 407510P Economics of Education 5 credits
- 407511P Seminar: Education in Transition 5 credits
- 407518A Global Citizenship Education (optional) 5 credits
- 408502S Development and Education (optional) 4 credits
- 407523P Plurilingualism and Education in the 21st Century (optional) 5 credits
- 407524P Critical Literacy in Education (optional) 5 credits

Please see individual course descriptions in the curriculum for the Master's Degree Programme in Education and Globalisation (EdGlo)

Mode of delivery:

Contact teaching, blended learning, on-line learning

Learning activities and teaching methods:

Learning activities include exams, portfolio assignments, study reports and journals etc. (details in the curriculum).

Teaching activities include contact teaching and on-line tutoring.

Target group:

Priority is given to students in Master's Degree Programme in Education and Globalisation (EdGlo)

Prerequisites and co-requisites:

Please see individual course descriptions.

Recommended optional programme components:

Please see individual course descriptions.

Recommended or required reading:

Please see individual course descriptions.

Assessment methods and criteria:

Assessment is based on various learning activities and the grades of final exams. These learning activities may include portfolio assignments, study reports and journals etc. (details in the curriculum).

407509P: Defining education, educational sciences and their tasks, 7 op

Voimassaolo: 01.01.2007 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

7 credits

Language of instruction:

English

Timing:

1st year, autumn semester

Learning outcomes:

After completion of the course, students are able to

- Discuss the focuses, the role and the tasks of educational sciences in the globalised world
- Explain the main concepts and focuses of education and educational sciences
- Identify the main issues and sub-areas of educational sciences
- Examine the relation between the development of educational sciences, critical changes and educational contexts

Contents:

- The main concepts and phenomena of education
- The sub-disciplines of educational sciences: psychology of education, philosophy of education, didactics, sociology of education, special education and comparative education

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

30 h lectures/seminars, 155 h independent study

Target group:

- 1st year students on the Master's Degree Programme in Education and Globalisation
- Students pursuing minor studies "Education in Transition"

Prerequisites and co-requisites:

No

Recommended optional programme components:

Other courses in Education in Transition:

- 407512P Comparative Educational Research, 5 credits
- 407509A Inclusive Education and Education for All, 3 credits
- 407510P Economics of Education, 5 credits
- 407511P Seminar: Education in Transition, 5 credits
- 407518A Global Citizenship Education, 5 credits
- 408502S Development and Education, 4 credits
- 407523P Plurilingualism and Education in the 21st century, 5 credits
- 407524P Critical Literacy in Education, 5 credits

407511P: Seminar: Education in Transition, 5 - 15 op

Voimassaolo: 01.01.2007 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 - 15 credits

Language of instruction:

English

Timing:

2nd year, autumn semester

Learning outcomes:

After completion of the course, students are able to

- summarize current debates related to education in the 21st century and global competencies and critically analyse their implications.
- compare three social-cultural approaches in education and their implications in terms of curriculum design and social relations.
- map differences and convergences of approaches to education in relation to North-South-East-West dialogue.

Contents:

This is an 8-week online course that offers an introduction to contemporary educational literature related to education in the 21st century, knowledge societies and postmodernity. Students engage with the ideas of key theorists promoting educational reforms based on changing profiles of learners, economies and societies (e.g. Gee, Hargreaves, Biesta, Peters, Gilbert, Claxton, Rizvi) and their implications for curriculum design and educational practices.

- Education in the 21st century, knowledge societies and postmodernity
- Global competencies in knowledge societies
- Socio-cultural approaches to education and society
- North-South-East-West educational dialogue: what is education for?

Mode of delivery:

Face-to-face teaching or distance teaching

Learning activities and teaching methods:

10h lectures, 16h seminars, 110h independent study (8h online activities, 74h reading, 14h journal writing, 14h academic essay preparation (1500 words))

Target group:

- 2nd year students on the Master's Degree Programme in Education and Globalisation
- Students pursuing minor studies "Education in Transition"

Prerequisites and co-requisites:

No

Recommended optional programme components:

Other courses in Education in Transition:

- 407509P Defining Education, Educational Sciences and their tasks, 5 credits
- 407512P Comparative Educational Research, 5 credits

407518A: Global citizenship education, 5 op

Voimassaolo: 01.01.2011 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 credits

Language of instruction:

English

Timing:

Summer

Learning outcomes:

After completion of the course, students are able to

- Identify the ideological nature of different definitions of global citizenship education
- Summarize conceptual debates in two selected sub-areas of global citizenship education
- Distinguish between global citizenship education approaches that address colonial legacies and unequal relations of power and those that do not

Contents:

This is an 8-week online course designed as an entry point into contemporary conceptual debates and critical approaches related to global citizenship education. This course engages learners in a critical examination of case studies of educational practices and conceptual debates related to notions of knowledge and identity construction, globalisation, culture, indigeneity, nationalism, cosmopolitanism, cross-cultural dialogue, social action, and the roles of education in contemporary societies.

Different approaches to global citizenship education

North-South-East-West: unequal relations of power

The political economy of knowledge production

Optional themes: notions of cosmopolitanism, notions of multiculturalism, study and volunteer abroad schemes, majority world perspectives, teacher education for social justice, localisation vs globalisation, indigenous education

Mode of delivery:

Distance teaching

Learning activities and teaching methods:

12h online lectures, 10h online activities, 85h reading, 14h journal writing, 14h academic essay preparation (1500 words)

Target group:

- Students on the Master's Degree Programme in Education and Globalisation
- Students pursuing minor studies "Education in Transition"

Prerequisites and co-requisites:

No

Recommended optional programme components:

This course is part of the Summer School in Master's Degree Programme in Education and Globalisation.

All students are expected to be familiar with the effects of globalisation on educational practices, policies and changes within countries and between countries. All students are expected to have completed their Bachelor's degree in a relevant field. Preference will be given to the students with background in education /social sciences.

A250505: Education, Intermediate Studies (Oulu), 35 - 50 op

Opiskelumuoto: Intermediate Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA250505 Education, Intermediate Studies (OPEN UNI) 35.0 op

ECTS Credits:

35-45 credits

Language of instruction:

Finnish

Timing:

2nd to 3rd year

Learning outcomes:

At the end of the module, the student knows how to apply the approaches and theoretical foundations of educational and human sciences to research pedagogical phenomena. S/he is capable of independent scientific argumentation and Bachelor level academic work. S/he is also able to acquire knowledge in a flexible way and capable of analytical written work.

Contents:

The module consists of the following courses:

411004A Educational and Cultural Theory I, 4 credits

411005A Theoretical Foundations of Education, 5 credits

411006A Research Methods I, 10 credits

411007A Educational Systems I, 4 credits

411008A Educational Planning and Economics of Education I, 4 credits

411010A Bachelor's Thesis, 10 credits. The course consists of two parts (a and b):

a) 411010A-01 Proseminar, 8 credits

b) 411010A-02 Bachelor's Seminar, 2 credits

411013A Career Planning Studies

The Bachelor's seminar and Career Planning Studies are part of the major subject studies.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and other face-to-face teaching

Prerequisites and co-requisites:

Basic Studies in Education

Recommended or required reading:

To be announced in connection with the courses

ay411008A Introduction to the Economics of Education (OPEN UNI) 5.0 op

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

2nd year

Learning outcomes:

After completion, the students understand the association between the emergence of pedagogical institutions and the development of modernization, especially in relation to the development of work, distribution of work and the labour markets. The student identifies the tense relation between modern civilisation theory and economic thought. S/he also perceives the paradigmatic theories and models that explain the relationship between pedagogical institutions and the labour market.

Contents:

During the course the students are introduced to the basics of educational planning and the economics of education. In addition, the interdependent relationship between decision-making on educational systems and economic decision-making is investigated.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Contact teaching 20 h.

Recommended or required reading:

To be agreed on at the beginning of the course.

Assessment methods and criteria:

Participation in seminar work and an exam.

ECTS Credits:

4 cr

Language of instruction:

Finnish

Timing:

2nd year

Learning outcomes:

Having completed the course, the student

- is able to consider the Finnish educational system from a comparative perspective and to use its conceptual tools to do so
- perceives the developmental lines and changes in Finnish educational system
- knows how to evaluate the economic and political factors affecting national educational systems

Contents:

In addition to the Finnish educational system, the course also pays attention to international dimensions of the school system and to the economic and political factors affecting educational systems.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 4 h, seminar work 18 h.

Target group:

Students in the educational sciences programme studying the Intermediate Studies (35-45 ECTS) in Education.

Recommended optional programme components:

The course is part of the Intermediate Studies (35-45 credits) in Education.

Recommended or required reading:

Jauhiainen, A., Rinne, R. & Tähtinen, J. (eds.) (2001). *Koulutuspolitiikka Suomessa ja ylikansalliset mallit*.

411010A: Bachelor's thesis and seminar, 10 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10 credits

Language of instruction:

Finnish

Timing:

3rd year

Learning outcomes:

After completion of the course, the student knows how to compose a research plan in the field of educational research and implement it using methodologies relevant to the research problem. S/he is able to take a part in academic debate and report on research work according to academic standards and principles.

Contents:

The course consists of two parts, a) and b):

a) 411010A-01 Proseminar, during which the student prepares a research paper in a chosen area of education. In addition the seminar will focus on critical academic writing and functioning as an academic opponent.

b) 411010A-02 Bachelor's Seminar, during which the students finish and finalises their Proseminar research papers in the form of the Bachelor's theses, and present them at a seminar meeting. Finally, the student completes a maturity test in the subject field of the research paper.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work 16 + 16 h

Target group:

Students majoring in Education (parts a and b)

Students minoring in Education (part a)

Recommended or required reading:

Literature related to seminar work

Assessment methods and criteria:

Seminar paper, presenting the paper, acting as an opponent

Grading:

0-5

Person responsible:

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay411010A-01 Proseminar (OPEN UNI) 8.0 op

ECTS Credits:

8 credits

Language of instruction:

Finnish

Timing:

3rd year

Learning outcomes:

After completion, the student knows how to compose a research plan in the field of education and implement it using methodologies relevant to the research problem. The student is able to take a part in academic debate and report on research work according to academic standards and principles.

Contents:

The student prepares a research paper in a chosen area of education. The seminar will focus on issues such as academic thought, academic and theoretical research progress, setting research paradigms and knowing the basics of research methodology. In addition, the seminar will focus on critical academic writing and acting as an academic opponent. In setting research paradigms, experimentally and developmentally minded attitudes are encouraged.

Mode of delivery:

Face to face teaching

Learning activities and teaching methods:

Seminar work 16 h, proseminar thesis.

Target group:

Students majoring and minoring in Education

Recommended or required reading:

Research literature pertinent to research topic

Assessment methods and criteria:

Active participation in seminars and the proseminar thesis.

Grading:

pass/fail

Person responsible:

Assistant in Education

Working life cooperation:

None

Other information:

The course is part a) of the Bachelor's Thesis study module (411010A, 10 credits) and is also included in the minor subject studies in education.

411010A-02: b) Bachelor's seminar, 2 op

Voimassaolo: 01.08.2005 -

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

411017A Bachelor's seminar 2.0 op

ECTS Credits:

2 credits

Language of instruction:

Finnish

Timing:

3rd year

Learning outcomes:

Having completed the course, the student will be able to compose a research plan in the field of education and implement it using methodologies relevant to the research problem. The student is able to take a part in academic debate and report on research work according to academic standards and principles.

Contents:

During this course, the students finalize the research begun during the Proseminar course and write a Bachelor's thesis, which they then present in a seminar session. After this, the research paper will be granted publication permission and the student will undergo a maturity test in the topic area of the research paper.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work 16 h, research paper, maturity test.

Target group:

Students majoring in Education

Recommended or required reading:

As agreed. Literature related to the thesis.

Assessment methods and criteria:

Active participation in seminars, research paper, maturity test

Grading:

0-5

Person responsible:

Ari Sutinen

Working life cooperation:

None

Other information:

The course is part b) of the the Bachelor's thesis (411010A, 10 credits) and belongs to the major subject studies.

411013A: Career planning studies, 8 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

8 cr

Language of instruction:

Finnish

Timing:

2nd and 3rd years

Learning outcomes:

- a) The student identifies her/his own interests by studying education, considers her/his major and minor subject choices and her/his own professional identity. The student knows how to take these issues into consideration.
- b) The student familiarizes her/himself with the field of educational work and working life in general. S/he understands the changing elements of working life (skills, knowledge, employment, coping with the workload, etc). S/he reflects on her/his own placement.
- c) The student gets a preliminary idea of the knowledge and skills needed in the practice place and masters general working life skills. The student knows how to write a project plan and report on her/his teaching practice periods thoroughly and concisely.

Contents:

The module has three different parts:

- a) 411013A-01 Paths to the future - this course provides the students with the capacity to begin to reflect on their own professional identity: supporting self-knowledge, seeking information, learning about different training and work opportunities (minor subjects, practice periods, Masters thesis, exchange programmes, worklife requirements, jobs, etc.). During the course, the students also amplify their personal study plans from the working life point of view.
- b) 411013A-02 Practical applications: study visits in different sectors of the educational field.
- c) 411013A-03 Project training: Getting to know one area of the education field (consultation, guidance, training and its planning, teaching, research, staff issues) by participating in the selected activity and familiarising with the relevant organisation.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminars, visits, practice

Target group:

Students majoring in Education or Educational Psychology

Recommended or required reading:

To be announced at the start of each course

Assessment methods and criteria:

Active participation, report

Grading:

pass/fail

Person responsible:

Tiina Kemppainen

Working life cooperation:

Yes. Part c) Project training includes a one-week-practice in a working place.

Other information:

The module is a part of the major subject studies. More information of the inclusive courses can be found in their respective course descriptions.

Compulsory

411013A-01: a) Paths to the future, 2 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Intermediate Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2 credits

Language of instruction:

Finnish

Timing:

2nd and 3rd years

Learning outcomes:

- the student identifies her/his own interests by studying education, thereby also piecing together her/his major and minor subject choices and professional identity
- the student is capable of adding to her/his self-knowledge
- the student knows how to acquire knowledge in a flexible way
- the student perceives the opportunities offered by education and working life (minor subjects, practice periods, Masters thesis, exchange programmes, worklife requirements, jobs, etc.)

Contents:

This course provides the students with a readiness to begin to reflect on their own professional identity. During the course the students add depth to their personal study plans from the viewpoint of working life.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work 20 h: brainstorming, discussion, exercises, and independent work. Alternatively, the course can be completed in some other way, e.g. an assignment based on literature as agreed with the course coordinator.

Target group:

Students majoring in Education or Educational Psychology

Recommended optional programme components:

This course belongs to the Career Planning Studies 411013A module.

Recommended or required reading:

As applicable:

Lampikoski, T. (1998). Urasuunnittelun opas. Tulevaisuus mahdollisuutena.

Finnish

Timing:

1st year

Learning outcomes:

Having completed the course, the student is able to perceive:

- the links between sociology of education, sociology and education.
- basic issues and concepts in social sciences and sociology of education
- the Finnish education system and educational policy as a part of social policy

Contents:

- central concepts in social sciences
- basic concepts and issues in sociology of education
- sociology of education: links to education and sociology
- socialization and the functions of education
- classic trends in the sociology of education: structuralism, conflict theory and critical sociology, socialization theory and interactionism
- the Finnish education system: past, present and future perspectives
- education policy as a part of social policy
- theoretical and practical issues in sociology of education: school practices (interactionist classroom research), hidden curriculum, equality of education, identity, normality and deviation.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and other contact teaching 18 h, independent work.

Target group:

Students in all programmes pursuing basic studies in education.

Prerequisites and co-requisites:

No

Recommended optional programme components:

The course is part of the Basic Studies in Education (25 cr).

Recommended or required reading:

Aittola, T. (toim.) (1999) Kasvatussosiologian teoreetikoita. Uudesta kasvatussosiologiasta oppimisen kriittiseen tarkasteluun.

Antikainen, A., Rinne, R. & Koski, L. (2000) Kasvatussosiologia.

Course material availability can be checked [here](#).

Assessment methods and criteria:

Exam and literature exam or written assignments.

Grading:

pass/fail

Person responsible:

Veli-Matti Ulvinen

Working life cooperation:

None

Other information:

In the early childhood education programme, this course consists of two parts, 01 (Sociology of education, 3 credits and exercises) and 02 (Child, education and culture, 2 credits). Students can find more information on coursework and reading materials in the relevant section of the course guide.

410071P: Educational philosophy, 4 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay410071P Educational philosophy: (OPEN UNI) 4.0 op

ECTS Credits:

4 cr

Language of instruction:

Finnish

Timing:

1st year

Learning outcomes:

Having completed the course, the student

- is familiar with the main areas of research in educational philosophy, educational issues emerging from them, educational philosophical research and its results.
- knows how to analyse and solve ethical and philosophical problems in education and teaching and is able to critically assess previously suggested solutions.

Contents:

- research of educational philosophy as an area of education, nature of philosophy as a science, philosophical questions and the most important areas of philosophy.
- objectives in education
- historically important trends in academic study of educational philosophy
- the ethical nature of education and teaching, ethical issues in pedagogical activity

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and other contact teaching 18 h, independent work.

Target group:

Students in all programmes pursuing basic studies in education.

Prerequisites and co-requisites:

None

Recommended optional programme components:

The course is part of the Basic Studies in Education (25 cr).

Recommended or required reading:

Applicable parts:

Ojakangas, M. (2001) Pietas - Kasvatuksen mahdollisuus.

Puolimatka, T. (1995) Kasvatus ja filosofia.

Etiikka koulun arjessa. (2002)

Atjonen, P. (2004) Pedagoginen etiikka koulukasvatuksen karttana ja kompassina.

Wulf, C. (2002) Anthropology of education.

Course material availability can be checked [here](#).

Assessment methods and criteria:

Lecture and literature exam or written assignments.

Grading:

pass/fail

Person responsible:

Eetu Pikkarainen

Working life cooperation:

None

Other information:

For early childhood education students, the scope of is course is 3 credits; in addition to the lectures, they will complete "Early Childhood Education - theoretical approaches", 2 credits of exercises.

410068P: Didactics, 4 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen oppimateriaali:

Hakkarainen, Kai , , 1999, pakollinen

Lisätiedot:

Kansanen, Pertti , , 2004, pakollinen

Lisätiedot:

Leikkaavuudet:

ay410068P Didactics: (OPEN UNI) 4.0 op

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

1st year

Learning outcomes:

Having completed the course, the students

- understand the basic concepts of learning and teaching, their theoretical foundations and their meaning in practice

- know how to describe the learning process and its cognitive, motivational and social features.
- recognize the teacher's role as a director/guide of learning and are familiar with new teaching models
- are able to analyse the characteristics of a good learner in theory and practice and are aware of how learning skills can be taught.

Contents:

- basic concepts of learning and teaching, their theoretical foundations and significance in practice
- basic processes of learning: learning process and its cognitive, motivational and social features
- theoretical foundations of learning guidance: the teacher's role as a director of learning and teaching models
- principles of curriculum design and lesson planning
- the characteristics of a good learner in theory and in practice: how learning skills can be taught
- basic models of ICT in teaching and learning

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and other contact teaching 18 h, independent work

Target group:

Students in all programmes pursuing basic studies in education

Prerequisites and co-requisites:

None

Recommended optional programme components:

The course is part of the Basic Studies in Education (25 cr).

Recommended or required reading:

Applicable parts:

Hakkarainen, K. , Lonka, K. & Lipponen, L. (2004) Tutkiva oppiminen. järki, tunteet ja kulttuuri oppimisen sytyttäjinä. (vuoden 2001 painos käy myös)

A255301: Educational Technology, Basic Studies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish, partly English

Timing:

1st to 5th years

Learning outcomes:

The student knows how to

- analyse knowledge on learning theory in the learning of individuals and communities and to support lifelong learning
- use and evaluate the ways to make use of various technological learning environments as part of interaction, learning and content production
- describe the main features of learning to be an expert and describe her/his own expertise in educational technology

Contents:

The course deals with the following topics:

- learning, expertise, collaboration
- self-regulation, motivation, learning skills
- pedagogical orientation of technology-supported learning
- new ICT applications in support of learning
- learning environments
- project management
- research methods

The study module consists of the following courses:

- 418019P Introduction to learning and educational technology 6 credits
- 418020P Learning theory and educational use of technology 7 credits
- 418021P Designing technology-enhanced learning 6 credits
- 418022P Educational projects 6 credits

Mode of delivery:

Face-to-face + online teaching

Learning activities and teaching methods:

The studies in educational technology focus on self-direction, collaborative knowledge construction and approaches surpassing science boundaries. Both face-to-face and online working methods are used, including small group sessions, self-study, lectures, expert sessions, discussions and workshops.

Target group:

Minor subject students in Educational Technology

Prerequisites and co-requisites:

-

Recommended optional programme components:

-

Recommended or required reading:

The learning materials to be used in the courses are evaluated and selected annually. The materials represent both the most central theoretical background in the field and its most recent scientific research. The students choose some of the materials themselves depending on the content of the learning assignments.

Assessment methods and criteria:

Active participation in the courses

Grading:

pass/fail

Person responsible:

Sanna Järvelä and Pirkko Hyvönen

e1

418019P: Introduction to Learning and Educational Technology, 5 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

6 cr

Language of instruction:

Finnish

Timing:

autumn 2011

Learning outcomes:

After this module the student can

- describe the basic concepts of educational technology
- name some of the central research topics in the field of learning and educational technology
- identify societal trends and strategic policies affecting the research field of educational technology
- describe the central characteristics of collaborative expertise
- use core utility software and information networks and evaluate their pedagogical usability, as well as
- plan and implement a digital portfolio in a blog environment

Contents:

- Significance of educational technology in a learning society
- Basic concepts related to educational technology
- Introduction to the study of learning and educational technology: objectives, research subjects and the theoretical framework
- Expertise and reflecting upon one's own expertise
- Central ICT applications

Mode of delivery:

Face-to-face and web-based teaching

Learning activities and teaching methods:

Contact teaching 50 h, practice sessions 25 h, collaborative and independent study 86 h.

Target group:

Ed.tech minor subject students; EDUTOOL- Master's degree students

Prerequisites and co-requisites:

no

Recommended optional programme components:

no

Recommended or required reading:

To be announced at the beginning of the module.

Assessment methods and criteria:

Active participation in contact teaching, practice sessions, and the collaborative and independent work. Successful completion of the learning assignments.

Grading:

0-5

Person responsible:

contact person Niina Impiö, persons responsible will be divided according to the themes

418020P: Learning Theory and Pedagogical use of ICT, 7 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

7 cr

Language of instruction:

Finnish

Timing:

autumn 2011

Learning outcomes:

After this course, the student can

- identify the theoretical learning-related principles that form the basis of technology-supported studying and teaching
- define self-regulated learning, collaborative learning, and the acquisition of expertise on a conceptual level, as well as describe the relationships of those concepts
- justify the utilization of technology as support for learning from the point of view of learning research
- evaluate various collaborative learning models as supports for the learning sciences
- describe the basics of planning, supporting, and evaluating a learning process in a technology-based learning environment

Contents:

- Self-regulated learning: Motivation and learning strategies in technology-supported environments
- Collaborative learning, Computer-supported collaborative learning (CSCL) and collaborative learning models
- Learning of expertise
- Possibilities of supporting learning offered by technology
- Planning technology-supported learning, guiding, and evaluating learning

Mode of delivery:

Face-to-face and web-based teaching

Learning activities and teaching methods:

Contact teaching 45 h, small group sessions 50 h, collaborative and independent study 92 h.

Target group:

Ed tech minor subject students; EDUTOOL master's degree students

Prerequisites and co-requisites:

no

Recommended optional programme components:

no

Recommended or required reading:

To be announced at the beginning of the module.

Assessment methods and criteria:

Active participation in contact teaching, small group sessions, and the collaborative and independent work. Successful completion of learning assignments and examination.

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

6 cr

Language of instruction:

English

Timing:

spring

Learning outcomes:

- Students will be capable to describe characteristics of TEL
- Students will be capable to define main stages of designing TEL
- Students will be proficient to design and implement pedagogically well-grounded web-course
- Students will be competent to assess pedagogical use of Information and Communication Technology (ICT)

Contents:

- Technology-Enhanced Learning (TEL) concept
- Designing TEL: design process, selection of technology, constructing TEL environment
- Implementing TEL
- Evaluating TEL

Mode of delivery:

Face-to-face and web-based teaching

Learning activities and teaching methods:

Lectures 15 h, individual and collaborative studying in virtual learning environment 145 h.

Target group:

Students minoring Ed. tech; Students in EDUTOOL master's degree programme

Prerequisites and co-requisites:

No

Recommended optional programme components:

No

Recommended or required reading:

TBC

Assessment methods and criteria:

Active participation to the lectures and individual and collaborative studying in virtual learning environment.

Language of instruction:

Finnish

Timing:

Implementation 1: autumn 2011-spring 2012, Implementation 2: autumn 2012, Implementation 3: spring 2012

Learning outcomes:

After this course the student can

- plan and implement an educational project
- work responsibly as a part of the project team
- plan and evaluate educational projects utilizing current learning research information
- apply the special competence of his or her own field to the contents, planning, and implementation of projects
- work as an expert in his or her field in a multidisciplinary project team

Contents:

- Basics of project work
- Planning, practical realisation, and administration of project work
- Special characteristics of educational projects
- The utilization of technology in project work and educational projects
- Development challenges in the field of learning and educational technology

Mode of delivery:

Face-to-face and web-based teaching

Learning activities and teaching methods:

Contact teaching 40 h, independent and collaborative work in a project team, as well as practical project and reporting 120 h.

Recommended or required reading:

To be announced at the beginning of the module.

Assessment methods and criteria:

Active participation in contact teaching and the work of the project team. Implementation of the project and reporting.

Grading:

A256701: Finnish and Literature, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the minor subject studies in Finnish and literature, the student knows how to expound and apply the basic concepts of linguistics and literature. S/he knows how to analyse and evaluate texts from the viewpoint of pupils at different ages based on a broad conception of text. The student also knows how to evaluate and develop Finnish and literature teaching in such a way that the teaching supports comprehensive development of the pupil's interaction skills.

Contents:

The Finnish and Literature minor aims to deepen the students' knowledge of the Finnish language and literature so that the primary teacher is able to plan its teaching according to the needs of society. The studies take into consideration the application possibilities of new knowledge in language and literature as well as the growth the student's own skills and cultural capital.

Courses:

- 402562P Structure of Finnish (3 cr)

- 402563P Modern Finnish Usage (3 cr)
- 402564P Writing (4 cr)
- 402565P Critical Media Literacy (4 cr)
- 402566P Literary Interpretation (5 cr)
- 402567P Teaching and Histories of Literature (6 cr)

For more information see the respective course descriptions section in the minor studies handbook

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Methods vary depending on the course.

Target group:

Students selected for the minor of Finnish and Literature at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Recommended or required reading:

To be agreed on for each particular course.

Assessment methods and criteria:

Methods vary depending on the course.

A212905: From violence to caring - Women's studies' multidisciplinary study programme, 5 - 25 op

Voimassaolo: 01.01.2008 -

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 - 25 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

Having completed these studies, the student knows how to

- determine and analyse different manifestations of violence in the course of life in different local and global contexts
- apply theories of gender and intersectionality to analyse, identify, and prevent violence and to plan measures of intervention and help the victims
- plan practical activities to intervene in violence and to develop and non-secondarising methods of action and measures for equality
- reflect on and develop non-violence and caring in her/his own activities and interaction

- act in a group and reflect on the group's activities from the viewpoints of non-violence and equality

Contents:

From Violence to Caring offers an opportunity to include in your degree, or complement your degree with, a 25-credit study module on violence. Violence, its manifestations and non-violence are examined in gender-sensitive manner taking into account the various dimensions of secondarisation. Gender-sensitive research on violence is the central theoretico-practical and critical approach in this study module.

Violence in its many forms is a general phenomenon and in some way present in our everyday life through the media, for instance. Many professionals in different fields encounter victims and actors of violence in their work, or may be subjected to violence themselves. Everyone also has the responsibility to work to promote equality and non-violent action and to contribute to the construction of non-violent structures systematically in their own environments. The study module provides tools for this by familiarising the student with multidisciplinary research on violence, as well as with research to examine the conditions and practices of building a non-violent and caring action culture. The study module aims at enhanced knowledge of violence and provides tools to identify and encounter violence, to function in violent environments, to help the victims of violence, and to construct non-violent action environments.

The From Violence to Caring study module is targeted for students in different fields and also for professionals at work. 10 credits of the study module (courses IV and V) can be studied with a special emphasis on issues of violence in schools and educational environments and development of caring action environments.

Mode of delivery:

Online course

Learning activities and teaching methods:

417133P: Gendered and sexualized violence - multisectoral and multidisciplinary introduction, 5 op

Voimassaolo: 01.01.2008 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

- The student knows how to define the basic concepts of multidisciplinary research on violence and how to discuss violence with due consideration of gender and the various dimensions of secondarisation

- The student identifies manifestations of violence in the course of life and factors causing exposure to violence at different phases
- The student knows how to analyse the individual and collective effects of violence on human health, welfare and social relationships
- The student knows how to reflect on her/his own action from the viewpoint of non-violence

Contents:

The course familiarises the student with multidisciplinary research on violence in different fields of science, with due consideration of gender-sensitivity and the various dimensions of secondarisation. The course introduces the basic concepts of violence, the frequency of the phenomenon, its manifestations and accumulation in man's course of life in different walks of life. The course also discusses tools to observe and prevent violence in different environments and to support the development of a multiprofessional view on the phenomenon of violence. The student also is enabled to reflect on her/his own action from the viewpoint of violence.

Mode of delivery:

Online course

Learning activities and teaching methods:

Online course

Target group:

Students representing different fields and professionals at work

Prerequisites and co-requisites:

None

Recommended optional programme components:

Part of the From Violence to Caring study module, can also be studied as a separate course

Recommended or required reading:

Online course materials

Assessment methods and criteria:

Independent and joint work in the online environment, reflection diary

417134P: The Global Context of Violence, 5 op

Voimassaolo: 01.01.2008 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

- The student knows how to analyse violence as a broader social and global phenomenon in a gender-sensitive manner
- The student knows how to describe the global special manifestations of violence, challenges of intervention, main actors, and the significant currently ongoing prevention measures
- The student has familiarised her/himself with international comparative studies and knows their results
- The student knows the main international and national agreements to prevent violence and is able to evaluate their contents critically, identifying their advantages and shortcomings.

Contents:

The course familiarises the student with the global context, forms, scope and backgrounds of violence through multidisciplinary gender-sensitive research. The theme of interest is to examine violence as a broader social and international phenomenon, such as harmful traditional practices (HTP), and manifestations of violence in conflicts that have reached a crisis point, such as rape. The manifestations of violence are also discussed as issues connected with religions and world views, as well as in media meant to be entertaining. The course describes international agreements and national multiprofessional measures to remove violence and opens up critical perspectives on an evaluation of their success.

417135P: Sexual exploitation and trafficking, 5 op

Voimassaolo: 01.01.2008 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

- The student knows how to analyse the subareas connected with sexual exploitation, prostitution and human trafficking
- The student knows how to analyse sexual exploitation, human trafficking and prostitution in terms of sexual/gendered violence
- The student knows how to evaluate measures, action programmes and assistance systems to intervene in sexual exploitation, prostitution and human trafficking and knows the services offered by her/his own locality
- The student has the sensitivity and readiness to identify and encounter victims of sexual exploitation and human trafficking and to offer them help by experts

Contents:

Sexual exploitation and human trafficking has been identified as the biggest human rights violation of our times, and as an economic activity that is comparable to global slave trade. The course is a continuation to the theme of the Global Contexts of Violence. The course examines prostitution, human trafficking and sexual exploitation in terms of sexual violence, and introduces the student to the various dimensions of the phenomenon. The course discusses interdisciplinary research in this field, definitions, legislation and existing statistics. The students are acquainted with assistance systems for the victims and with their challenges from a multiprofessional point of view.

417136P: Tools for practitioners, 5 op

Voimassaolo: 01.01.2008 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

- The student knows how to analyse and evaluate the theoretical and ideological premises underlying the identification of violence and work against violence, as well as the meaning of gender in considerations of violence
- The student is familiar with methods of identification and assistance of victims of violence and intervention in violence as well as methods to support professional work against violence
- The student knows how to plan for the support of her/his own and the work community's welfare
- The student knows the professional actors for work against violence in her/his own field and knows how to reflect on and plan her/his own professional activities

Contents:

The "Working Methods for Practice" course aims at supporting the development of a multiprofessional approach to work. The course familiarises the student with methods identified as good practice by professional to identify victims of violence, to help them but also to support those who work to help victims of violence, encounter an immediate threat of violence and prevent violence.

The student can focus on issues of violence at schools and in educational environments by including a special section on school violence and physical violence.

417137P: Gender equality and non-violent environment, 5 op

Voimassaolo: 01.01.2008 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

1st to 5th year

Learning outcomes:

- The student is familiar with the human rights documents and essential equality legislation
- The student knows how to draw up functional equality and safety plans to prevent violence and to remove inappropriate treatment, and to develop and evaluate concrete measures to achieve in practice the goals set in the plans
- The student knows how to prevent and defuse conflicts by putting into practice theoretical knowledge on non-violence, and is able to evaluate her/his own actions in conflict situations
- The student is able to follow and utilise professionally multi- and interdisciplinary research knowledge on the field

Contents:

The course provides a multidisciplinary inspection of the challenges and opportunities of multidisciplinary work to prevent violence and build caring environments. The course familiarises the student with the basic concepts, premises, legislation and measures of equality. Abilities are developed to remove inappropriate treatment and to develop non-secondarising measures by getting acquainted with interaction skills, conflict management and development of action methods in organisations.

A791404: Health Education, Basic Studies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA791404 Health Education, Basic Studies (OPEN UNI) 25.0 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

25 ECTS

Language of instruction:

Finnish

Timing:

1.-5. year

Learning outcomes:

Having completed the Basic Studies, the student identifies the individual, social and environmental factors connected with health, health behavior, health challenges and most common illnesses among all population groups, especially children and adolescents. The student also knows how to describe the meaning for health of the biological processes in the organs and of mental and social factors. S/he also knows how to apply the principles of subject didactics to promote the health of people in different ages, especially children and adolescents, and to reinforce their knowledge of health. S/he knows how to solve ethical issues connected with promotion of health and with health education, and knows how to explain both the individual and the community's responsibility for healthy life.

Contents:

The module consists of the following courses:

Basics of Health Education (5 credits) – 402960P

Challenges of Mental Development among Children and Adolescents (5 credits) – 402103P

Nutrition in Promotion of Health (4 credits) – 402956P

Basics of Anatomy and Physiology (6 credits) – 402961P

Basics of the Didactics of Health Education (5 credits) – 402951P

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures, group work sessions

Target group:

Health Education minor subject students

Prerequisites and co-requisites:

no

Recommended optional programme components:

no

414068P: Introduction to sociological research, 10 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay414068P Introduction to sociological research (OPEN UNI) 10.0 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

10 cr

Language of instruction:

Finnish (replaceable with English literature)

Timing:

Autumn and Spring Term

Learning outcomes:

After completion the student will have an initial idea of the foundations of scientific research, the basis of empirical social research and the main methods and related concepts.

Contents:

The course offers an introduction to various ways of conducting empirical sociological research. It provides the student with a good foundation for assessing studies and for one's own research work. The course is divided into 2 sections.

Introduction to methodology and method:

The aim of these lectures and literature is to give the student an initial level of understanding the theoretical and methodological foundations of sociological research, the ethics of research, and research methods. During the lectures, we will look at both qualitative and survey-based data collections, sampling methods, and aspects of reliability and validity analysis. Through statistical analysis we look especially at measuring and descriptive statistical analysis. In terms of qualitative research, we examine qualitative content analysis technique on a general level.

Summary seminar and Essay:

In this section, we look at recent sociological research a) by writing a summary on a recent sociological study which is to be presented at a seminar and b) by writing an essay on the topic presented in part a). In the summary seminar we begin to look at the production of producing scientific knowledge. The section consists not only of the summary and essay (under supervision) but also of independent reading with recent sociological research (tbc).

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

1. Lectures 24 and literature.
2. Seminar sessions 20h and referat and essay writing.

Target group:

Students of basic studies

Recommended or required reading:

Optional literature and lecture materials.

Assessment methods and criteria:

1. Exam.
2. Presentation of summary, acting as an opponent for a presentation, active participation in seminar sessions and completion of written essay.

Grading:

pass/fail

Person responsible:

ayA255601 Multiculturalism, Basic Studies (OPEN UNI) 25.0 op

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

In our increasingly multicultural and international society the need for understanding different cultures and ways of living and thinking is growing. Awareness and knowledge of different cultures and their importance is increasingly important across a variety of different sectors in today's globalized world, including education, social authorities, health care, and culture and media.

Contents:

The studies aim to increase knowledge of the importance of culture in the personal development and identity formation, lifestyle and value system of an individual; to raise the level of understanding the notion of difference as well as knowledge of foreign cultures, and to develop the students' capacities to function in a multicultural environment. The studies help the students understand and appreciate the distinctive features of different cultures, lifestyles and ways of thinking, as well as the interaction between culture and personality. Hot topics relating to cultural and linguistic minorities are also discussed. The intercultural approach taken in these studies, which takes into account the background of immigrant and cultural minorities, is built on the importance of recognizing the significance of one's own culture and understanding others.

3rd or 4th year

Learning outcomes:

The students are able to examine "Finnishness" from different perspectives and familiarize themselves with the country's traditional and newer minorities. They are able to define core concepts (nationality, ethnicity, identity, etc.)

Contents:

- exploring concepts and meanings of nationality, citizenship and identity
- learning about Finland's traditional cultural minorities (Saami, Roma, Finnish-Swedes) and the newer cultural minorities (e.g. immigrant groups)

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

20 h (Lectures and student-suggested topics of discussion which are based on set literature)

Target group:

Students selected for the minor of Multiculturalism

Prerequisites and co-requisites:

No

Recommended optional programme components:

Other courses in basic studies in Multiculturalism:

- 417010P Introductory Course (3 cr)
- 417011P Basics of Cultural Research (3 cr)
- 417012P Geography of Cultures (3 cr)

ay417016P Multiculturalism in Working Life (OPEN UNI) 3.0 op

ECTS Credits:

3 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The students learn to understand the distinctive features and demands of work involving multiculturalism and internationalism, obtain new information in the field, and develop their own intercultural competencies. The students immerse themselves in an area of their own choice during this internship, and explore what they have learnt and experienced and any particular issues they have encountered in their internship.

Contents:

- during this internship, the students focus on an area of their own choice (e.g. multiculturalism in education and schooling, in social and health care work, in culture and media or in guidance and counselling services)
- the students explore relevant special issues in their line of work, as well as discuss the value of what they have learned and experienced during the internship

Mode of delivery:

Distance teaching

Learning activities and teaching methods:

Internship 2-3 weeks, total hours of work 100 h, internship report.

Target group:

Students selected for the minor of Multiculturalism

Prerequisites and co-requisites:

No

Recommended optional programme components:

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The minor in music is a pedagogically oriented study module, upon completion of which the student identifies the comprehensive significance of music as part of the surrounding culture. The student is able to analyse the possibilities of music as a tool to reinforce the identity, integrate the emotional life and construct the community. The student knows how to use music in a varied way to support learning and the child's development in general education. The student is able to evaluate her/his pedagogical competence as a broadly based music educator especially in the grades 0-6. S/he is capable of developing and applying various functional working methods to music education in its constantly changing scope of work.

After the course the student knows how to play music in the field of different musical styles, genres and practices. These include studies in instruments and singing, music technology, musicology and integrative project studies.

Contents:

The music minor consists of pedagogically inclined studies, which cover, comprehensively, different work methods in music education and pedagogy in the grades 0-6. 18.5 credits of the studies are congruent with the basic studies in the music teacher education programme.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Courses

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2 cr

Language of instruction:

Finnish

Timing:

1st year (Music Education Programme)

3rd or 4th year (minor subject)

Learning outcomes:

The student knows how to identify basic phenomena, concepts and terms of western music, especially tonal music, and how to notate basic tonal sets.

The student knows how to develop her/his own sense of tune, rhythm and tone and how to make pedagogical applications based on the pedagogies of Kodaly and Orff, among others.

Contents:

The course is divided into 3 parts:

01-Basics of Music Theory (1 cr)

02-Basics of Ear Training (0.5 cr)

03-Musical Invention (0.5 cr)

The following topics will be covered:

- Basic concepts of music theory
- Basics of the composition of mono- and polyphonic tonal sets
- Distinctive features of different styles in tonal sets
- Introduction to musical invention as a pedagogical activity

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Contact teaching: theory 13 h, ear training 7 h and musical invention 6 h. Independent studies: theory 13 h, ear training 7 h and musical invention 7 h.

Target group:

Music education students

Students selected for the minor of Music Education at the Faculty of Education

Prerequisites and co-requisites:

402416P: Major Instrument, 3 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The student has a wide range of technical and expressive skills to manage a variety of accompaniment tasks in practical music playing situations.

The skills acquired by the student in the basic studies are deepened and expanded including both classic music and free accompaniment.

Contents:

The following things are done in the course:

- familiarisation with the basics of classic playing and free accompaniment, playing techniques, different styles of music, harmonizing and transposing of melodies
- the student gets practical experience in playing in various matinees and accompaniment and ensemble playing situations

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Contact teaching 30 h and independent study 51 h

Target group:

Students selected for the minor of Music Education at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in the minor subject studies in music

Recommended or required reading:

Tenni, J. & Varpama, J. (2004) Vapaa säestys ja improvisointi.

Styng, J. (1997) Vapaa säestys ja melodiasoitto kitaralla. Opi musiikkia 1.

Styng, J. (1998) Pop/Jazz -improvisaatio kitaralla. Opi musiikkia 2.

Playing materials in different styles and genres of music, such as textbooks and music books and playing guides by different publishers.

The availability of course books can be checked [here](#).

Assessment methods and criteria:

Active participation in instrument lessons and completion of individual assignments given in them.

Participation in playing exams and matinees.

A212903: Northern Women Studies, 19 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

19 credits

Language of instruction:

English

Timing:

1.-5. year

Learning outcomes:

Student will gain an insight into Finnish society, Finnish research on gendered power and violence in educational environments, popular and traditional cultures and traditions, and Nordic environment, nature and wellbeing. Student is able to illustrate life in the North on these four areas of research and understands the culturally constructed gender.

Contents:

Northern Women's Studies (NWS) is a 10 cr points programme intended for both international and Finnish graduate and postgraduate students. The goal of the NWS programme is to convey and produce locally contextualized multidisciplinary knowledge about the life of women (and men) in the Northern areas of Europe from three critical perspectives: 1. the gender perspective, 2. the regional perspective, and 3. the multicultural perspective. Each student will construct their own personal curriculum supported by the lecturer of Women's Studies. Four courses will be offered in Northern Women Studies (NWS). Information about NWS can be found on the "Naistutkimus" bulletin board which is situated opposite the Snellmania library in the 1st floor of the Faculty of Education.

Mode of delivery:

Face-to-face and web-based teaching

Learning activities and teaching methods:

Face-to-face and web-based teaching

Target group:

All students

Prerequisites and co-requisites:

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The student

- knows how to describe the basic skills and knowledge in different forms of physical exercise required by teaching in grades 0-6 of basic education
- knows how to apply the basics of teaching different forms of physical exercise according to the seasons to pupils at different ages and skill levels

Contents:

The study module in Physical Education consists of five courses:

- 402365P Teaching Sports I and II (15 cr)
- 402364P Didactics of Physical Education (3 cr)
- 402366P Basics of Motoric Development (3 cr)
- 402367P Applied Physical Education (2 cr)
- 402368P Subject Seminar (2 cr)

For more information see the respective course descriptions section in the minor studies handbook

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures, exercises in different sports, planning, implementation and assessment of teaching, seminar work, written work, exams

Target group:

Students selected for the minor of Physical Education at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

It is recommended that you should have completed the studies in physical education as part of the "multidisciplinary studies in the subjects and crosscurricular themes taught in basic education".

3rd or 4th year

Learning outcomes:

The student understands the meaning of physical exercise to a person's physical, psychological and social ability level, health, and well-being, as well as its significance in society.

Contents:

- basic concepts of the musculoskeletal system in terms of structure and functions
- connections of physical education with physical, psychological and social ability, health, and well-being and the basics of health-enhancing exercise
- special features of the Finnish sports culture and physical exercise as a local, national, and international phenomenon

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 16 h, independent study 36 h.

Target group:

Students selected for the minor of Physical Education at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in the Physical Education study module:

- 402365P Teaching Sports (15 cr)
- 402364P Didactics of Physical Education (3 cr)
- 402366P Basics of Motor Development (3 cr)
- 402368P Subject Seminar (2 cr)

Recommended or required reading:

Assessment methods and criteria:

Exam and active participation in lectures

Grading:

0 - 5

Person responsible:

Lecturer in Physical Education

Working life cooperation:

None

402368P: Subject Seminar, 2 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Student is able to compare and combine his/her knowledge in different fields of physical education.

Contents:

The following things are done in the course:

- a problem area in physical education is chosen
- the student familiarizes her/himself with the problem and its solution through literature, interviews etc.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar sessions 16 h, planning, literature study and reporting alone or in pairs 38 h.

Target group:

Students selected for the minor of Physical Education at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in the Physical Education study module:

- 402365P Teaching Sports (15 cr)
- 402364P Didactics of Physical Education (3 cr)
- 402366P Basics of Motor Development (3 cr)
- 402367P Applied Physical Education (2 cr)

Recommended or required reading:

Agreed on at the beginning of the course

Assessment methods and criteria:

Active participation in the seminars, presentation of a seminar paper and familiarization with the other students' papers

Grading:

Pass/fail

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA255202 Preschool and Primary Education (OPEN UNI) 25.0 op

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

On completion of the package students are able to observe and recognize the world of pre-school and primary (grades 1 and 2) children as well as their individual and developmental characters, and is able to pay attention to them when they guide the preschool and primary (grades 1 and 2) children's learning process in different content areas.

Students are able, using the national core curriculum, to create an integrated research-based curriculum, which leads to the development of the children's problem solving and collaboration processes.

Students are able apply a diversity of the theoretical, didactic and ethical principles involved in pre-school and primary education (grades 1 and 2) in order to support the children`s growth, development, and learning

Students are able meet and interact with children and their parents in a pedagogically sensitized way.

Contents:

These studies cover a wide range of theoretical and practical issues in preschool and primary level education which relate to teaching, learning, growth and development. When applicable, teaching methods which bind together the different content areas presented in the courses, are used.

Mode of delivery:

Face-to-face teaching

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Underpinning the course is a comprehensive and contextual view of children and their growth, learning and development. The course explores the principles related to K (0-2) level teaching and learning as well as curricular design, implementation and assessment. The course links the different subareas of preschool and primary education.

Learning outcomes:

- The student is able to identify the theoretical foundations of curricular design for K-2 children, their applications and principles of development.
- The student has proficiency in curricular design, implementation and assessment in the continuum of the K-2 period.
- The student understands the role of play in K-2-education.
- The student recognizes the special nature of K-2 education and the principles and means of collaboration.

Contents:

The following topics are covered:

- comprehensive child growth and learning
- concept formation at the age level
- basics in curricular design and applications
- special nature of K-2 educational cultures
- collaboration and interaction between preschool and primary education and the home

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small-group sessions 28 h, independent study, curricular development, observation task.

Target group:

Students selected for studies in the minor of Preschool and Primary Education

Prerequisites and co-requisites:

402156P: Arts and Crafts Education/Stories in Opening Experience and Understanding, 7 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay402156P Arts and Crafts Education/Stories in Opening Experience and Understanding (OPEN UNI) 7.0 op

ECTS Credits:

7 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Student:

- can design and take into the practice the suitable methods in handcraft teaching for primary grades 0-2
- is able to design, implement and develop art education in grades 0-2
- can explicate the meaning of physical education for development of a child in grades 0-2
- is able to create motor coordinationaly stimulating physical education environments taking into consideration facilities, seasons and different skill levels of children in grades 0-2
- understands the significance of experience in facilitating learner comprehension in children
- has an advanced outlook of comprehensive and expressive music education, in which play, stories and art interaction are emphasized
- has the capacity to understand and implement music education, especially for students aged 6-8
- learns methods to implement arts and crafts education in an integrated manner

Contents:

The core of the course lies in stories, through which studies in arts and crafts education (visual arts, handicraft, music and physical education) are combined in a project as an experiential, creative entity. The studies focus on deepening the different perspectives of different subjects when teaching small children. The students also work on a pedagogical portfolio on aspects of children's culture.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

The course consists of several parts. The integrative project combines these parts together.

The course includes the following parts:

Handicrafts: Technical/Textile 9 h + 9 h

Arts 20 h

Music Education and Guitar Playing 15 h

Physical Education 14 h

Children's Dance 8 h

Project 10 h

In addition to these contact teaching lessons, there about 100 h of independent work

Active participation in teaching and the portfolio together form an entity that earns a pass.

Target group:

Students selected for studies in the minor of Preschool and Primary Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

The course is part of the minor of Preschool and Primary Education (25 credits)

Recommended or required reading:

No

Recommended optional programme components:

Other courses in the minor of Preschool and Primary Education (25 cr)

Recommended or required reading:

To be agreed on at the start of the course.

Assessment methods and criteria:

Active participation in lectures and small group sessions, a presentation in the small-group seminar, an essay or learning diary as agreed at the start of the course.

Grading:

Pass/fail

Person responsible:

Markku Salakka

Working life cooperation:

None

Other information:

This is a part of 402157P The Exploring Child, 12 credits

402157P-04: Mathematics and science education, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay402157P-04 Mathematics and science education (OPEN UNI) 5.0 op

ECTS Credits:

3 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the mathematics course, the student

- is familiar with learning theories related to mathematics learning and its research
- understand what activity-based and problem-based mathematics teaching mean
- understands the significance of repeating classification, ordering and order in the development of mathematical thinking
- understands the development of the concept of number and the learning of the decimal system and knows how to apply this knowledge in teaching
- understands the development of a child's geometrical thinking and measurement thinking and knows how to apply it in teaching
- knows how to apply various tools to teach the mathematics contents of preschool and primary education

Contents:

- Learning theories connected with maths learning, activity-based and problem-based maths teaching
- Classification, order and the repetition of order
- Development of the number concept and learning the decimal system
- Geometrical thinking and measurement
- Use of learning aids in teaching preschool and primary education mathematics contents
- Preprimary mathematics curriculum and familiarization with textbooks for preprimary education

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 16 h, exercises 10 h, independent work 54 h.

Target group:

Students selected for studies in the minor of Preschool and Primary Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in the minor of Preschool and Primary Education (25 cr)

Recommended or required reading:

To be agreed at the start of the course.

None

Other information:

The course is a b) part of the 411068A module and it belongs to the major subject studies in Educational Psychology.

412068A-03: c) Maturity Test (Bachelor of Arts, educational psychology), 0 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Intermediate Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

411013A: Career planning studies, 8 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

8 cr

Language of instruction:

Finnish

Timing:

2nd and 3rd years

Learning outcomes:

- a) The student identifies her/his own interests by studying education, considers her/his major and minor subject choices and her/his own professional identity. The student knows how to take these issues into consideration.
- b) The student familiarizes her/himself with the field of educational work and working life in general. S/he understands the changing elements of working life (skills, knowledge, employment, coping with the workload, etc). S/he reflects on her/his own placement.
- c) The student gets a preliminary idea of the knowledge and skills needed in the practice place and masters general working life skills. The student knows how to write a project plan and report on her/his teaching practice periods thoroughly and concisely.

Contents:

The module has three different parts:

- a) 411013A-01 Paths to the future - this course provides the students with the capacity to begin to reflect on their own professional identity: supporting self-knowledge, seeking information, learning about different training and work opportunities (minor subjects, practice periods, Masters thesis, exchange programmes, worklife requirements, jobs, etc.). During the course, the students also amplify their personal study plans from the working life point of view.
- b) 411013A-02 Practical applications: study visits in different sectors of the educational field.
- c) 411013A-03 Project training: Getting to know one area of the education field (consultation, guidance, training and its planning, teaching, research, staff issues) by participating in the selected activity and familiarising with the relevant organisation.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminars, visits, practice

Target group:

Students majoring in Education or Educational Psychology

Recommended or required reading:

To be announced at the start of each course

Assessment methods and criteria:

Active participation, report

Grading:

pass/fail

Person responsible:

Tiina Kemppainen

Working life cooperation:

Yes. Part c) Project training includes a one-week-practice in a working place.

Other information:

The module is a part of the major subject studies. More information of the inclusive courses can be found in their respective course descriptions.

Compulsory

411013A-01: a) Paths to the future, 2 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Intermediate Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2 credits

Language of instruction:

Finnish

Timing:

2nd and 3rd years

Learning outcomes:

- the student identifies her/his own interests by studying education, thereby also piecing together her/his major and minor subject choices and professional identity
- the student is capable of adding to her/his self-knowledge
- the student knows how to acquire knowledge in a flexible way
- the student perceives the opportunities offered by education and working life (minor subjects, practice periods, Masters thesis, exchange programmes, worklife requirements, jobs, etc.)

Contents:

This course provides the students with a readiness to begin to reflect on their own professional identity. During the course the students add depth to their personal study plans from the viewpoint of working life.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work 20 h: brainstorming, discussion, exercises, and independent work. Alternatively, the course can be completed in some other way, e.g. an assignment based on literature as agreed with the course coordinator.

Target group:

Students majoring in Education or Educational Psychology

Recommended optional programme components:

This course belongs to the Career Planning Studies 411013A module.

Recommended or required reading:

As applicable:

Lampikoski, T. (1998). Urasuunnittelun opas. Tulevaisuus mahdollisuutena.

Jokihaara, K., Räisänen, M., Tahvola, A. & Vuorikoski, M. (toim.) (2004). Se on se avain! Kasvatustieteiden tieteenalaohjelmasta valmistuneiden tarinoita opiskelusta ja työhön sijoittumisesta. Verkkojulkaisu,

Active participation in seminar work.

Grading:

pass/fail

Person responsible:

Tiina Kemppainen

Working life cooperation:

None

Other information:

The course is completed within the major subject.

411013A-02: b) Applications, 2 op**Voimassaolo:** 01.08.2006 -**Opiskelumuoto:** Intermediate Studies**Laji:** Partial credit**Vastuuyksikkö:** Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2 credits

Language of instruction:

Finnish

Timing:

2nd-3rd year

Learning outcomes:

The student

- knows how to describe and evaluate the field of educational work and working life in general
- knows how to evaluate elements of working life such as worklife competences, general skills and coping
- is able to consider her/his placement in working life

Contents:

Visits to different work places in the educational sector.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Visits and seminar work (20 h).

Target group:

Students majoring Education and Educational Psychology

Recommended optional programme components:

This course belongs to the Career Planning Studies 411013A module.

Recommended or required reading:

As applicable:

Jakku-Sihvonen, R. (2005) Uudenlaisia maistereita. Kasvatusalan koulutuksen kehityslinjoja. Tynjälä P., Välimaa, J. & Murtonen, M. (toim.) (2004) Korkeakoulutus, oppiminen ja työelämä. Pedagogisia ja yhteiskuntatieteellisiä näkökulmia.

Grading:

pass/fail

Person responsible:

Tiina Kemppainen

Working life cooperation:

None

Other information:

This course is completed within the major subject studies.

411013A-03: c) Project training, 4 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Intermediate Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

3rd year

Learning outcomes:

- the student gains an initial insight into the knowledge and skills required in work practice and has a mastery of general working life competencies
- the student knows how to prepare a project plan and how to produce a compact report on work practice
- the student has acquainted her/himself with one area of the field of education such as counselling, guidance or training and its planning, teaching, research and staff issues

Contents:

Getting to know one area of the education field (consulting, guidance, training and its planning, teaching, research, staff issues) by participating in the selected activity and learning about the relevant organisation.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Orientation lecture 2 h, project work about 40 h, closing seminar 4 h, project plan and report.

Target group:

Students majoring in Education and Educational Psychology

Recommended optional programme components:

This course belongs to the Career Planning Studies 411013A module.

Recommended or required reading:

As agreed.

Assessment methods and criteria:

Preparing a project plan and completing a report. Participation in seminars.

Grading:

pass/fail

Person responsible:

Tiina Kemppainen

Working life cooperation:

Yes. One-week-practice period in one working place.

Other information:

This course is completed within the major subject studies.

411006A: Research course I, 10 op

Voimassaolo: 01.08.2005 - 31.07.2016

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Peltonen, Jouni Aslak

Opintokohteen oppimateriaali:

Metsämuuronen, Jari , , 2005, pakollinen

Metsämuuronen, Jari , , 2003, pakollinen

Metsämuuronen, Jari , , 2006, pakollinen

Opintokohteen kielet: Finnish

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

10 cr

Language of instruction:

Finnish

Timing:

2nd to 3rd years

Learning outcomes:

Having completed the course, the student knows how to

- define the basic ideas in the approaches and methods of research in the human sciences from the viewpoint of different traditions of science
- plan and implement the main stages of a simple qualitative and quantitative study
- evaluate and interpret qualitative and quantitative studies conducted by others

Contents:

The course is divided into two main parts (1, 2), of which 1 is further divided into three subsections (1-3).

1) Basic course in quantitative research 5 cr

411006A-01 1.1 Basis of research

- basic features of empirico-analytical research
- role of theory in research
- main stages of the research process
- formulating and shaping the research question
- types of research
- data collection
- accountability/reliability analysis

411006A-02 1.2 Statistical analysis

- description of one- and two-dimensional empirical distribution
- foundations of statistical deduction
- estimation
- statistical testing

411006A-03 1.3 Exercises (1 credit)

- enhancing knowledge of content areas in 1.1 and 1.2.

2. Basic course in qualitative research 5 cr

- formulating and shaping research questions
- approaches to qualitative research
- different approaches to qualitative research
- progression of the research process
- interviews and observation in qualitative research

411006A-04 2.1 Lectures 3 cr

411006A-05 2.2 Exercises 2 cr

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

1.1: Lectures 18 h

1.2: Lectures 20 h

1.3: Small group sessions 16 h

2: Lectures 20 h, small group sessions 16 h

Target group:

Students in all programmes pursuing Intermediate Studies in Education (/Music Education)

Prerequisites and co-requisites:

No

Recommended optional programme components:

Thesis studies support the writing of a Bachelor's thesis

Recommended or required reading:

1) Metsämuuronen, J. (2003). Tutkimuksen tekemisen perusteet ihmistieteissä (s. 1-146).

2) Ruusuvoori, J. & Tiittula, L. (toim.)(2005). Haastattelu. Tutkimus, tilanteet ja vuorovaikutus.

Course material availability can be checked [here](#).

Assessment methods and criteria:

1.1: Exam.

1.2: Exam.

1.3: Active participation in small group sessions, an essay.

1.4. Exam, active participation in small group sessions, an essay.

Grading:

0 - 5

Person responsible:

Jouni Peltonen, Leena Syrjälä

Working life cooperation:

None

Other information:

Education Programme: if Research Methods I has been completed in the major subject studies, the student will complete equivalent credits worth of intermediate level studies in minor subject literature instead.

Early Childhood Education Programme: Small groups of their own, with Hannele Karikoski and Asko Pekkarinen in charge.

414070A: History of sociology, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Vesa Puuronen

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish (English if necessary)

Timing:

Autumn and spring term

Learning outcomes:

The student knows the classic background central to sociology, and can continue personal familiarisation with relevant theory independently, which will benefit the student in advanced studies in sociology as well as other subjects.

Contents:

The course examines sociological theory and research traditions from the beginning of sociology onwards. The main focus of the course is on the history of ideology and sociology of the classic era, but it will also evaluate the role of the classical tradition in modern day research.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lecture, substituted by lectures as far as possible

Target group:

Students who have completed the Basic Studies in Sociology.

Prerequisites and co-requisites:

Basic Studies

Recommended optional programme components:

Completion of Basic Studies in Sociology required, a compulsory module for those aiming to move on the Advanced Studies in Sociology

Recommended or required reading:

Literature by choice:

414076A: Research methods in sociology, 5 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Anu Alanko

Opintokohteen kielet: Finnish

ECTS Credits:

3 cr

Language of instruction:

Finnish (replaceable by English literature)

Timing:

Spring term

Learning outcomes:

Based on the set lecture literature, the student receives complementary knowledge on both qualitative and quantitative sociological research methods and on ways to combine them. This can benefit the student in the project studies and in the planning and implementing of her/his other research.

Contents:

Succeeding the Basic Studies methods course, the objective of this course is to lay the groundwork for project studies and later research-based studies. During the course, we focus on central methodological issues and on analytical methods of survey-based and qualitative data. Covered analytical methods for survey-based data include analysis of two-dimensional and multi-dimensional tables, correlation analysis, regression analysis, factor analysis and other relevant testing procedures. We also discuss the principles of other multiple variable analytical methods. In the section on qualitative research, we look at the main features of certain analytical methods.

Note! The students at the Faculty of Education shall not choose this section, as it largely corresponds to the methodology studies in education.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 24h, literature.

Target group:

Students having completed the Basic Studies in Sociology

Prerequisites and co-requisites:

Basic sStudies

Recommended optional programme components:

Completion of Basic Studies in Sociology required, a compulsory course for students in faculties other than that of Education aiming to move on the Advanced Studies in Sociology.

Recommended or required reading:

Lectures and literature by choice (one of the following):

Jokinen, A. & Juhila, K. & Suoninen, E. 1999 ja 2002. Diskurssianalyysi liikkeessä.

Metsämuuronen, J. 2006. Tutkimuksen tekemisen perusteet ihmistieteissä. Opiskelijalaitos. 2. laitos. 3. renewed edition (same as 4th edition in 2007). Helsinki: International Methelp. Chapter I, sections 10-14, V, VI and VII of chapter II.

Töttö, P. 2004. Syvällistä ja pinnallista. Teoria, empiria ja kausaalisuus sosiaalitutkimuksessa.

Course material availability can be checked [here](#).

Assessment methods and criteria:

Lecture and book exam

Grading:

0-5

Person responsible:

Lecturer Pentti Luoma

Working life cooperation:

None

Other information:

The Faculty of Education students who complete Research Methods II as part of their major subject studies will complete 2 ECTS of 414077A Project Studies course instead of this course and, in addition, and an extra section (5 ECT) of 414075A Special Fields of Sociology.

414075A: Special fields of sociology, 10 op

Voimassaolo: 01.08.2005 - 31.07.2014

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10 cr

Language of instruction:

Finnish (replaceable by English literature)

Timing:

Autumn and spring term

Learning outcomes:

The students have been familiarised on important and current research connected with their own research interests on a certain special field of sociology, or they have expanded their knowledge of environmental and educational sociology since the basic studies. Having completed the course, the student masters the main concepts, theoretical tradition and current research related to the field. S/he is able to use this knowledge in research and practical working duties and to take part in social debate on the range of topics.

Contents:

Based on the student's interests, s/he shall focus on two or three of the following special fields of sociological research:

- a) Work, Technology, Economy, 5 credits
- b) Culture and Everyday Life, 5 credits
- c) Sociology of Gender, 5 credits
- d) Sociology of Health, 5 credits
- e) Environmental Sociology, 5 credits
- f) Sociology of Education, 5 credits

The students in the Faculty of Education and those pursuing educational studies related to secondary teacher education cannot choose this set of studies, as they correspond largely to certain courses in education.

The aim is to get acquainted with current research on a particular special field and to provide opportunities to specialise in certain special areas in later studies.

Mode of delivery:

Face-to-face teaching: literature exam

Learning activities and teaching methods:

Literature, substituted by lectures as far as possible

Target group:

Students having completed the Basic Studies in Sociology

Prerequisites and co-requisites:

Basic Studies

Recommended optional programme components:

Completion of Basic Studies in Sociology required, a compulsory course for students aiming to move on to the Advanced Studies

Recommended or required reading:

Literature and possibly lectures.

414077A: Project studies, 5 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Anu Alanko

Opintokohteen kielet: Finnish

ECTS Credits:

6 cr

Language of instruction:

Finnish or English

Timing:

Autumn and spring term

Learning outcomes:

In this course we aim to synthesize what has been learnt in sociology so far by writing a sociological "miniature thesis" within an agreed theme. The course gives the student abilities for scientific writing and discussion.

Contents:

The project studies focus on research on a certain thematic area, which should be connected with the research projects in sociology whenever possible. The student's abilities for problem-centred work and the writing of a scientific essay are developed on this basis. The aim is to create a theoretical frame of reference and to formulate a research problem, based on which an empirical survey is constructed based on data that already exists or is to be gathered separately (only required in the 6-credit implementation). In connection with the project studies, the student is also given an opportunity to complete the work in association with one of the research projects in sociology.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work and a report to be written alone or in a group

Target group:

Students having completed the Basic Studies in Sociology

Prerequisites and co-requisites:

Basic Studies

Recommended optional programme components:

Completion of Basic Studies in Sociology is required, a compulsory course for those aiming to move on to the Advanced Studies

Recommended or required reading:

Selected literature and empirical research data (for non-Faculty of Education students)

Assessment methods and criteria:

Participation in the seminar (24 h) and assignment

Grading:

pass/fail

Person responsible:

Pentti Luoma

Working life cooperation:

None

Other information:

Faculty of Education students complete this course with a scope of 4 credits only.

A211401: Sociology, Basic Studies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA211401 Sociology, Basic Studies (OPEN UNI) 25.0 op

Required proficiency level:

Undergraduate students

ECTS Credits:

25 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

Having completed the basic studies in sociology, the student knows how to analyse the social conditions and impacts of social activity on her/his studies, work and other areas of life. S/he knows how to use the basic concepts, theories and methods of sociology in communication and research and how to search for sociological knowledge relevant for their own competence. S/he also knows how to summarise and evaluate research and write reviews on topics important for her/his learning goals and own work based on current sociological research literature.

Contents:

Sociology, often referred to as general social studies, became an academic subject at the turn of the 19th century. It seeks to find scientific explanations and understandings for how different social structures, cultures and the ties between humans and groups, relationships and networks develop. As a general social science, it also attempts to create a broader picture of societal structures and social action, and its special subfields cover a range of extraordinarily complex research areas. In addition, sociology develops methods and general theories on society from globalisation to the smaller ways of social interaction, which can be used in empirical social research as well as other fields of applied research in humanistic studies.

At the Department of Educational Sciences and Teacher Education, sociology teaching and research focus on environmental and educational sociology in addition to general sociology. Sociology can be studied at basic level or intermediate level. These studies are completed according to the requirements of the University of Lapland and the coordinator for the course is lecturer Leena Suopajarvi.

A211401 Basic Studies in Sociology, 25 cr:

- 414067P Basic Course in Sociology, 5 credits
- 414068P Introduction to Sociological Research, 10 credits
- 414069P Research Areas in the Social Sciences, 10 credits

Mode of delivery:

face-to-face teaching, book exams

Learning activities and teaching methods:

Methods vary: lectures, book exams, seminar sessions

Target group:

Undergraduate students

Prerequisites and co-requisites:

none

Recommended or required reading:

To be announced during each course.

Assessment methods and criteria:

Lecture and book exams, seminar paper

Grading:

pass/fail

Person responsible:

Pentti Luoma

Working life cooperation:

None

Other information:

Minimum standard for successful completion is 3/5.

ay414067P Basic course in sociology (OPEN UNI) 5.0 op

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

Autumn term

Learning outcomes:

Having completed the course, the student knows the connections and differences between the field of sociological research and sociology and other disciplines of science, knows how to distinguish between research trends in sociology and how to use the most important concepts of sociology.

Contents:

During the course we generate an overview of sociology as an original, critical and developing basic social science. Attention is given to the classic, modern, and current traditions and trends in sociological research, their central concepts and theories, along with current applications. Special emphasis is given to discussion on the nature and place of sociology among the sciences in general.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 24 h and optional literature

Target group:

Students pursuing Basic Studies in Sociology

Prerequisites and co-requisites:

None

Recommended optional programme components:

First course in the Basic Studies, a compulsory course for those moving on to pursue the Intermediate Studies

Recommended or required reading:

ay414069P Social research fields (OPEN UNI) 10.0 op

ECTS Credits:

10 cr

Language of instruction:

Finnish (replaceable with English literature)

Timing:

General examination days in both autumn and spring terms.

Learning outcomes:

The student has familiarised her/himself with central and topical research on some special field of sociology. Having completed the course, the student has a mastery of the main concepts and theoretical tradition as well as current research in this field. S/he is able to use this knowledge in research and practical working duties and to take part in social discussion on the relevant range of themes.

Contents:

During the course we explore the recent research work in two areas of sociology which are of special interest to the student. Possible areas are:

- a) Family studies and lifespan analysis (5 credits)
- b) Society and the environment (5 credits)

c) Globalisation (5 credits)

d) Sociology of Education (5 credits) Education students cannot choose this topic, as it is basically the same as 410070P.

Mode of delivery:

Book exam

Learning activities and teaching methods:

Book exam. Lectures.

Target group:

Students of Basic Studies in Sociology

Prerequisites and co-requisites:

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the basic studies, the student knows how to

- determine the position of special education as a support of the educational system
- identify and analyse the features of a separate special education service system and, on the other hand, an inclusive educational system
- describe the individual challenges in learning

Contents:

As a field of research and science, special education is an area of education which studies theoretical and practical aspects of special education. Closely related subjects include linguistics, psychology, sociology and medicine, as well as physical education and music, the concepts and theories of which are used in special education. As an area of education, special education supports the development, teaching and learning of children and adolescents in need of special support. The aim is to give educators, teachers and counsellors the necessary mindset, knowledge and skills needed in encountering learners and students who need special assistance, who need individual support in learning, as well as personal and alternative teaching methods and arrangements. Special education supports the child or adolescent through practical pedagogical means to develop socially, functionally, emotionally and intellectually in accordance with individual development resources. Special education in the school supports both general teaching and learning, but can also target individual learning, teaching and learner rehabilitation, in which cases we talk more widely of remedial education. In addition to alternative teaching methods, remedial education also includes the support from social services. Today, special education is a profession in its own right, in which practical goal-oriented methods are emphasized as are the teaching, cooperative and teamwork skills requirements of those who need alternative and personal teaching solutions. Special education teachers work as their school's and/or municipality's field experts, with special qualifications in the wide area of special education pedagogy, in some special sector or in classroom-based teaching. A special education teacher is required to have both theoretical perspective and practical skills, as well as have a capacity for continuous learning in order to be able to support the student's development and learning. A special education class teacher focuses on the teaching of a group of special education students (max. 10 students/class) depending on their characteristics or age group. In order to become a special education teacher, 25 credits of the minor subject are required, which can be completed at the University of Oulu's Educational Sciences and Teacher Education (KASOPE) Department. Further studies can be completed at the University of Lapland or the University of Jyväskylä. The minor studies curriculum follows the study programme of the University of Jyväskylä. The core themes include: respecting difference; learning difficulties; challenges in behaviour and communication; and familiarization with the special education service system, prevention of exclusion and integration development. The minor subject is completed by literature study, assignments, participation in lectures and small-group sessions and visits to special education units and venues in the Oulu region. In addition, the minor requires the successful completion of the minor studies practice period. The minor studies are assessed on a pass/fail basis. For more information, contact the coordinating lecturer.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Courses in the Basic Studies in Special Education:

- 402106P Basic Course in Special Education (5 cr)
- 402107P Challenges of Communication (5 cr)
- 402108P Challenges of Learning (5 cr)
- 402109P Challenges of Behaviour (5 cr)
- 402110P History of Special Education, Service System and Course of Life (5 cr)

For more information see the respective course descriptions section in the minor studies handbook

Target group:

Students at the Faculty of Education chosen to study in the minor subject of Special Education

ay402106P Basic Course in Special Education (OPEN UNI) 5.0 op

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Upon completion of the course the student knows how to

- describe activities in special education and their goals
- discuss activities in special education in practice
- examine and analyse key values in special education
- apply the individual and social model of disability
- describe tentatively the developmental lines of special education

Contents:

- Ideologies, value and principles underlying special education
- Views of the essence, dissimilarity and diversity of man
- Special education and close sciences
- Monitoring, observation and early intervention in the child's development
- General, special and reinforced support and care, teaching and rehabilitation
- Collaboration, multiprofessionalism and educational partnership
- Familiarisation with the field, target groups and practices of special education

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

20 h lectures, 20 h reports, visits and independent work, literature exam or assignment

Target group:

Students selected for the minor of Special Education at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in the basic studies in Special Education:

- 402107P Challenges of Communication (5 cr)

5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

After completion, the student knows how to

- define the difficulties in language and communication
- distinguish between the challenges of communication at different ages
- compare different means of diagnosis and evaluation and their uses
- compare individual and collaborative rehabilitation methods and other support measures

Contents:

- Delayed and abnormal development of speech and language
- Language and hearing problems in childhood, adolescence and adulthood
- Manifestation and identification of speech, language and communication problems
- Supporting communication and communication methods to support and replace speech
- Rehabilitation of verbal problems and supporting development

Mode of delivery:

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay402109P Challenges of Behaviour (OPEN UNI) 5.0 op

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

After the course student knows how to

- define central concepts of challenging behaviour and describe their features based on the pedagogical, psychological, psychiatric, neurological and communal frames of reference
- identify challenges in behaviour in the educational system from both the individual and the communal points of view
- identify the benefits offered by multiprofessionalism as regards intervention in the challenges

Contents:

- Disorders of behaviour and emotional life based on different frames of reference
- Concepts, diagnostics and interpretations of challenging behaviour
- Manifestation of disorders in attention and behaviour among children and adolescents
- Exclusion and need for support in emotional life
- Risk factors of unfavourable development, treatment and rehabilitation
- Factors of protection against behavioural disorders, ways to support favourable development

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

20 h lectures, 10 h small group sessions, 10 h visits, reports and independent work, exam or assignment

A255902: Technical Work (Oulu), 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the 25-credit studies in technical work, the student acquires a readiness to teach technical work in the lower grades of basic education. In her/his studies the student learns to apply technology to combine knowledge and skills in technical work. The main learning outcomes for each course are to be found in their descriptions.

Contents:

402258P Material and Manufacturing Technology, 7 cr

The core content of the course is to familiarise the student with the most common materials and working methods in technical work. Having completed the course, the student achieves such a level in knowledge and skills that is needed in work on technological materials, objects and components in the lower grades of basic education

402259P Robotics and Automation, 7 cr

The core content of the course is to familiarise the student with highly developed technology in the context of technical work. The student learnsto design, manufacture and evaluate various technological wholes with applications of mechatronics and information technology.

402260P Technological Design, 3 cr

The core content of the course is to familiarise the student with the design techniques and software used in technological production. The student learns to apply these design techniques and software in the lower grades of basic education.

402261P Technology and Pedagogics, 5 cr

The core content of the course is the special pedagogical knowledge related to the teaching of technical work, when the learning environment consists of a technological frame of reference. The student learns to design and produce curricular themes for the lower grades of basic education in such a way that s/he is capable of composing a technical work curriculum.

402262P Educational Dimensions of Technology, 3 cr

The core content of the course is to consider the connections of technical work with society and other basic education. By means of study visits, the student is familiarised with technological application in production life. In occupational safety and health studies, the student learns to combine the functions of technical work and production life as an ethically sustainable whole. In textile work studies, s/he learns to combine the contents of technical work and textile work as a joint activity in crafts in the teaching of the lower grades in basic education.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small group sessions. For further information see 402258P, 402259P, 402260P, 402261P, 402262P.

Target group:

Students selected for the minor of Technical Work at the Faculty of Education

Prerequisites and co-requisites:

Assessment methods and criteria:

- Examinations in lectures/course books. (Other coursework alternatives must be pre-approved)
- Written and online materials produced during the exercises are assessed, particularly in terms of contents and pedagogical aspects.
- Objects produced in the exercises are assessed numerically (0-5), with particular attention to pedagogical value, functionalism and aesthetics.
- Assessment ratio between objects/written work is 2:1.

Grading:

Mostly 0 - 5, partly pass/fail

402258P: Material and Manufacturing Technology, 8 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

7 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the course, the student knows how to

- use the most common machines, equipment and techniques needed to work on wood, plastic and metal in primary school technical work.
- choose appropriate materials for different technological themes, taking into account the economical and ecological aspects.
- teach the safe use of the most common technical work hand tools and equipment to primary school children.
- use typical finishing tools and methods.
- design, implement and evaluate theme projects from the viewpoint of technology education and apply them to primary school technical work.

Contents:

The core matter of the course is to get to know the most common materials and working methods in technical work. Having completed the course, the student achieves the theoretical and practical level needed in working on materials, blanks and components in the lower grades of basic education.

Course consist of three sections:

- Exam (2 cr)
- Practical work 1 (3 cr)
- Practical work 2 (2 cr)

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 16 h, small group sessions 75 h

Target group:

Students selected for the minor of Technical Work at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

A255902 Craft, technical work, technology:

- 402259P Robotics and Automation, 7 cr

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Nykänen, Jaakko Juhani

Opintokohteen kielet: Finnish

ECTS Credits:

7 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the course, the student knows how to

- explain the principles of open and closed-loop control systems and present examples of automation systems in everyday life.
- program simple open-loop control system robots designed for use in primary school.
- apply the basics of mechanics, electronics and programming to the context of robotics and automation.
- design, build and program a simple closed-loop control system robot or automation system.
- apply the basics of robotics and automation to primary school technical work.

Contents:

The core content of the course is to familiarise the student with advanced technology in the context of technical work. The student learns to design, manufacture and evaluate various technological wholes applying mechatronics and information technology.

Course consist of three sections:

- Exam (2 cr)
- Programming exercises (2 cr)
- Practical work (3 cr)

Mode of delivery:

Ei opintojaksokuvauksia.

402261P: Technology and pedagogics, 5 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Nykänen, Jaakko Juhani

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the course, the student knows how to

- apply his/her pedagogical skills in planning, implementing and evaluating technical work and technology teaching in primary school.
- evaluate pupils' technological theme projects implemented in primary school technical work context.
- prepare a technical work curriculum for primary school.

Contents:

The core content of the course is the special pedagogical knowledge related to the teaching of technical work, with the technological frame of reference as the learning environment. The students learns to

design and produce themes and thematic wholes for primary school in such a way that s/he is able to produce a technical work curriculum. The course includes a teaching practice period.

The course consists of three sections:

- Exam (2 cr)
- Practical work and teaching practice (3 cr)

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 20 h, small group sessions 35 h and teaching practice 10 h

Target group:

Students selected for the minor of Technical Work at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

A255902 Craft, technical work, technology:

- 402258P Materials and Manufacturing Technology, 7 cr
- 402259P Robotics and Automation, 7 cr
- 402260P Technological Design, 3 cr
- 402262P Educational Dimensions of Technology, 3 cr

Recommended or required reading:

Literature to be agreed on at the beginning of the course.

Assessment methods and criteria:

Active participation in contact teaching, practical exercises and teaching practice, written outputs and exam.

Grading:

0 - 5, partly pass/fail

Person responsible:

Jaakko Nykänen, Matti Lindh

Working life cooperation:

Yes, teaching practice 10 h.

Compulsory

402261P-02: Assignments, 2 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Nykänen, Jaakko Juhani

Opintokohteen kielet: Finnish

ECTS Credits:

3 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the course the student knows how to

- combine technical and textile work contents as a collaborative craft activity in primary school.
- link and combine a study visit to a technology company as part of teaching.
- put into practice and apply the key factors of work safety in a primary school.

Contents:

The main goal of the course is to examine the connections of technical work to society and other subjects in primary school. The students familiarise themselves with technological applications in industrial life through study visits. Studies in work safety combine the functions of technical work and industrial life in an ethically sustainable whole. Studies in textile work enable joint handicrafts activities at the primary school level.

The course consists of three sections:

1. Textile work (1 cr)
2. Study visit (1 cr)
3. Work safety (1 cr)

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

The course work is divided as follows:

1. Textile work: small group sessions 13 h
2. Study visit: 13 h
3. Work safety: lectures 8 h, small group sessions 5 h

Target group:

Students selected for the minor of Technical Work at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

A255902 Craft, technical work, technology:

- 402258P Materials and Manufacturing Technology, 7 cr

A256002: Textile Work (Oulu), 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA256002 Textile Work (Oulu) (OPEN UNI) 25.0 op

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The student

- knows how to apply relevant methods to the solution of problems related to the manufacture of products
- knows how to expound the nature of crafts, art and technology education and its basis in learning theory
- knows how to design, produce and evaluate the operating model of an entire craft process
- knows how to work collaboratively in a student and school community

Contents:

The scientific foundation for these studies is provided by craft science and crafts, art and technology education. Handicrafts, especially textile work and technology, are examined as a part culture and the environment in such a way that problems related to products and ways of working are solvable through active and experiential interaction between thinking and action. Both ethical and aesthetic sensitivities are fostered in user-centred design in relation to ecological, social, cultural and economic factors. The pedagogical and didactic objective of the course is for the future the teacher to be able to offer guidance in solving problems related to the material world in a contextually appropriate manner. This minor subject gives student teachers the capacity to teach textile work and to develop the handicrafts curriculum in grades 0-6 of basic education.

Mode of delivery:

Blended teaching

Learning activities and teaching methods:

Small-group and class teaching, online study, independent study. It is possible to complete a part of the contact teaching and independent study in workshops. Both theoretical and practical studies are documented in portfolios, partly in digital form and partly in 3-D form. The students work on their teaching portfolio throughout the basic studies module. Theoretical sections can also be completed by sitting exams. A part of the pedagogical studies is implemented jointly with the technical work programme.

Courses:

- 402306P Introduction to Crafts Science (2 cr)
- 402307P Crafts Culture - Arts and Technology (3 cr)
- 402308P Materials Technology (3 cr)
- 402309P Basics of Product Design and Project Work (3 cr)
- 402310P Clothing Technology (3 cr)
- 402311P Textile Plane Structures (5 cr)
- 402312P Issues in Crafts and Technology Education (3 cr)
- 402313P An Integrative Project: Technological Product in Its Context of Use (3 cr)

For more information see the respective course descriptions section in the minor studies handbook

Target group:

Students selected for the minor of Textile Work at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

None

Recommended or required reading:

To be announced for each course separately

Assessment methods and criteria:

Active participation is required.

Assessment is carried out collaboratively and through peer, self and teacher assessment. Exercises are registered on a "pass" basis. Final assignments and portfolios are assessed according to set criteria (0-5).

Grading:

0 - 5

- 402307P-01, 2nd period
- 402307P-02, 3rd period
- 402307P-03, 3rd period

Learning outcomes:

The student studies crafts and the problem-solving notion behind concrete crafts products and how they function as a part of aesthetic and technological culture.

Contents:

The course consists of the following:

- The course explores crafts and textiles as a social phenomenon in the past, present and future through various exercises.
- Study visits complement the course content.

Mode of delivery:

Blended teaching

Learning activities and teaching methods:

Lectures 10 h, small-group teaching 32 h, and online supervision. (a part of the contact teaching and independent work can be completed online).

The study period consists of three parts:

3 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year, 3rd period

Learning outcomes:

The student knows how to apply and report on special pedagogical issues related to handicrafts/technology teaching in the context of both textile work and technical work.

Contents:

The course consists of the following:

- Technological problem-solving in crafts
- Collaborative and experiential learning in innovative project work
- Challenges of evaluation and assessment
- Curriculum development
- Some of the studies are joint studies in crafts with technical work.
- The pedagogical/didactic section is completed in the minor subject portfolio.

Mode of delivery:

Blended teaching

Learning activities and teaching methods:

Lectures 4 h, small group sessions 26 h and online tutorials depending on set assignment.

Target group:

Students selected for the minor of Textile Work at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in the Textile Work study module:

- 402306P Introduction to Crafts Science (2 cr)
- 402307P Crafts Culture - Arts and Technology (3 cr)
- 402308P Materials Technology (3 cr)
- 402309P Basics of Product Design and Project Work (3 cr)
- 402310P Clothing Technology (3 cr)
- 402311P Textile Plane Structures (5 cr)

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

- 402313P-01 Exercises, 1st period
- 402313P-02 Product project, 4th period

Learning outcomes:

The student applies and puts into use the contents of previous studies in the integrative project.

Contents:

The contents of the studies are integrated by designing and manufacturing an innovative, technologically functional product or family of products, in which the central themes are the environment, northernness, equality, multiculturalism or a theme based on the student's own starting-points. The design, manufacture and further development of the prototype are documented by means of multimedia.

Mode of delivery:

Flexible teaching

Learning activities and teaching methods:

Lectures 6 h, small group sessions 24 h, and online tutorials.

The course consists of two parts:

- 402313P-01 Exercises (1 cr)
- 402313P-02 Product project (2 cr)

Target group:

Students selected for the minor of Textile Work at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in the Textile Work study module:

A212901: Women's and Gender Studies, Basic Studies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

1st to 5th year

Learning outcomes:

A student who has completed the basic studies module knows how to

- identify and specify different theoretical approaches to women's and gender studies as well as their historical, cultural and methodological background assumptions
- analyse different courses of events, interaction etc. making use of the theories and concepts of women's and gender studies
- also include intersectionality in her/his considerations
- plan practical activities to promote equality between the genders and to

Students study women's and gender research content areas and the subject's multi-disciplinary and interdisciplinary research approach. Research areas include sector-specific as well as recent social, cultural, and interactive phenomena, in the description and critical examination of which gender is a vital factor.

Contents:

In the basic studies in women's and gender studies, the students are familiarised with the theories and conceptualisations of the field of science and with discussions in this field based on the theories and conceptualisations women's studies, men's and masculinity studies and queer studies.

The discussion focuses on social, cultural and interactional phenomena, both current and relevant to the field of science, in the description and critical consideration of which gender has a major role.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Teaching methods: The basic studies consist of compulsory courses (7 credits), elective study orientations (3-12 credits) and optional courses (3-15 credits). Contact teaching is organised in the compulsory courses. The elective study orientations and optional courses are mainly completed through familiarisation with literature, and face-to-face teaching is organised as far as possible.

Compulsory courses

417113P Basic course in women's studies, 4 credits

417114P Knowledge, power and experience, 3 credits

Study orientations, 3-15 credits

The student chooses 1-2 orientations which s/he studies mainly by taking literature examinations. Persons specifically appointed for each exam are in charge of these exams. The basic literature has been indicated in the description of each course. Lists of additional materials and alternative books can be found on the women's studies website or in the women's studies library (see additional literature). Contact teaching will be organized whenever possible, and information of any contact courses will be given each term.

417121P Orientation 1: Culture and media studies, 3-9 credits

417122P Orientation 2: Gender equality and demolition of segregation, 3-9 credits

417123P Orientation 3: Gender sensitive research of violence, 3-9 credits

417124P Orientation 4: Northern periphery and global issues, 3-9 credits

417125P Orientation 5: Power, standardisation and ethical issues, 3-9 credits

417126P Orientation 6: Education, training and feminist pedagogy, 3-9 credits

Optional courses

417116P Sexuality and corporeality, 3 credits

417127P Gender equality in education and working life, 3 credits

417118P Critical men's studies, 3 credits

417128P Family and parenthood in change, 3 credits

417129P Ecofeminism, 3 credits

417130P Northern environment and relationship to nature, 3 credits

417131P Religion and spirituality, 3 credits

Target group:

Students studying woman's and gender studies as a minor subject

Prerequisites and co-requisites:

417126P: Study route 6: Education, schooling and feminist pedagogy, 3 - 9 op

Voimassaolo: 01.08.2008 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3 - 9 cr

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

Having completed the studies the student is able to reflect on and analyse the mechanisms of gendering in education from the viewpoints of the construction of the identities of individuals and communities, learning, spans of education and educational institutions.

Contents:

The following topics are covered

- An examination of the gendering process in terms of the span of education and educational institutions
- The starting points, practices and goals of feminist and gender sensitive teaching
- Viewpoint of intersectionality
- Secularisation and multiple discrimination

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Book exam, other written work

Target group:

all students

Prerequisites and co-requisites:

none

Recommended optional programme components:

none

Recommended or required reading:

Feminist and gender-sensitive pedagogy and gender equality in education and schooling (an intersectional study perspective), 3 cr

Learning materials:

- Selection of articles in Gender & Education
- Hooks, B (2007) Vapauttava kasvatus

- Sunnari, V. (2010) "I cannot speak about it".

Other literature as agreed

Responsible person: Vappu Sunnari

Gendering mechanisms in basic education and early childhood education 3 cr

417211A: Connection, unity and tensions between theory and practice in action, 5 - 10 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

5 - 10 cr

Language of instruction:

Finnish

Timing:

2nd to 5th year

Learning outcomes:

The student knows how to plan, implement and evaluate a small-scale project which at the same time tests the connections, unities and tensions between the theories of women's studies and everyday life. The project can be oriented either to a) popular writing of scientific text and b) gender/equality issues in studies /at work or arrangements of an event involving a feminist perspective.

Contents:

The following topics are covered

- Creation, implementation and evaluation of a gender-aware project
- The application of knowledge from women's and gender studies to institutional and everyday practices

Mode of delivery:

Face-to-face-teaching

Learning activities and teaching methods:

Lectures 8 h, seminar and workshop sessions 16 h, project in a third-sector organization, independent study.

Target group:

All students

Prerequisites and co-requisites:

Basic studies

Recommended optional programme components:

None

Recommended or required reading:

To be announced at the beginning of the course

Assessment methods and criteria:**a) scientific article**

The students first familiarize themselves with a topic of their own choice and give a presentation (ca. 20 min) in which they critically analyse relevant research material and literature. Presentations are followed by group discussion. Based on this work, the students prepare a scientific popular article, which they attempt to publish.

b) organising an event

in this project the student s reflect critically on studying and working life practices. They work for e.g. producing statistics for monitoring equality in the working community, awareness of the current conditions in equality, or planning and realizing an educational entity on an agreed theme.

Grading:

1-5

Person responsible:

Vappu Sunnari

Working life cooperation:

Yes. Practice is tailored individually based on the needs of each student.
