#### 1.2. General description of the Institute of Dentistry

The Institute of Dentistry at Oulu University is one of three Dental Schools in Finland giving both under and post-graduate dental education. Our specific mission is to educate scientifically thinking, clinically competent professional dentists, dental specialists and doctors of dental science. The website of the Institute can be found at <http://www.oulu.fi/hamm/eng1.html>

#### Head of Department

DDS, PhD, Professor of Oral development and Orthodontics, Pertti Pirttiniemi

e-mail pertti.pirttiniemi(at)oulu.fi, tel +358 (0)8 537 5491

#### Research areas

The Institute of Dentistry is divided into seven departments. All departments are headed by full professors who are in charge of the research and training in respective areas. Research is also carried out in co-ordination with several departments both within and outside the University of Oulu. For details of research projects see links to Departments:

- [Department of Community Dentistry](#) (Professor Jorma Virtanen)
- [Department of Diagnostics and Oral Medicine](#) (Professor Tuula Salo)
- [Department of Oral development and Orthodontics](#) (Professor Pertti Pirttiniemi)
- [Department of Oral and Maxillofacial Surgery](#) (Professor Kyösti Oikarinen)
- Department of Pedodontics, Cariology and Endodontology (Professor Leo Tjäderhane)
- [Department of Periodontology and Geriatric Dentistry](#) (Professor Tellervo Tervonen)
- Department of Prosthetic Dentistry (Professor Aune Raustia)

## 2. Information on Degree Programme

### 2.1. General description

The degree of Licentiate of Dentistry is 330 ECTS credits. An academic year consists of 60 credits. The studies are pre-scheduled and the average time required to complete the degree is five and a half years.

In Finland, [the National Supervisory Authority for Welfare and Health](#) is responsible for awarding legal status to dentists and for overseeing the profession. After having the dental degree, the graduate applicant can apply for restricted legal recognition from the National Supervisory Authority for Welfare and Health. Recognition is the prerequisite for working as a private practitioner and for applying for posts and duties in the field of dentistry in Finland. More information: [http://www.valvira.fi/en/licensing/professional\\_practice\\_rights](http://www.valvira.fi/en/licensing/professional_practice_rights)

Studies in dentistry consist of preclinical and clinical phases including theoretical studies, phantom courses and clinical work with patients. Students have their first contacts with patients already at the preclinical phase of the curriculum. In order to arrange teaching to cover more comprehensive themes certain subjects from different departments have been integrated and taught together.

The theoretical studies during the first two preclinical years consist of cell biology; anatomy, physiology, biochemistry and public health. After this stage the studies continue at the facilities of the Institute of Dentistry for three and a half years period. Clinical phase comprises of lectures, clinical demonstrations, teamwork and actual clinical work with patients. The work with the patients gives the students the necessary skills in clinical diagnostics and treatment procedures.

### 2.2. Qualification awarded

Licentiate of Dentistry, (Equivalent to D.D.S. degree in Anglo-American countries)

### 2.3. Admission requirements

The admission requirements for studies in dentistry comprise the Matriculation Examination Certificate and an entrance examination. All applicants have to participate in the national entrance examination, which is usually arranged in May. The entrance examination is based on Finnish or Swedish textbook and consists of integrated problems of chemistry, biology and physics. The language of the entrance examination is Finnish.

### 2.4. Educational and professional goals

The education is based on competence areas that include thorough knowledge on general medicine, oral biology, materials, society and management; good diagnostic, practical and interaction skills; ability in acquiring and assessing information as well as humanity. The competences follow the seven domains that are described by [Association for Dental Education in Europe](#) (ADEE). These have been identified to represent the broad categories of professional activity and concerns that occur in the general practice of dentistry.

- I. Professionalism
- II. Interpersonal, Communication and Social Skills
- III. Knowledge Base, Information and Information literacy
- IV. Clinical Information Gathering
- V. Diagnosis and Treatment Planning
- VI. Therapy: Establishing and Maintaining Oral Health

## VII . Prevention and Health Promotion

**2.5. Access to further studies****Specialization**

Institutes of Dentistry are also responsible for specialist training in Finland. Before entering post-graduate training, which takes from three to six years, the trainee must have worked two years in general practice. The aim of specialist training is to provide the dentists with advanced, comprehensive theoretical and practical skills which are defined as clinical dentistry, orthodontics, oral and maxillofacial surgery and health care. A national examination is arranged and must be passed by each trainee.

**Doctor of Dental Science (Equivalent to Ph.D. degree in Anglo-American countries)**

Dental graduates may continue their studies to Doctor of Dental Science. This includes preparing a dissertation and completing other doctorate studies. In order to obtain the degree, a doctoral candidate must participate in theoretical research training, the extent of which is 20 ECTS credits. The training includes prescribed courses in general postgraduate training (5 credits) and special training (15 credits) according to the topic. The candidate must also conduct research, write and publish a doctoral dissertation and defend it in a public debate. Generally the minimum time needed to obtain a doctorate corresponds to 3 to 4 years of full-time work.

**2.6. Course structure diagram (with ECTS credits)****Structure of the Degree Programme**

The degree programme is divided into six sections:

General studies (G) 12,5 ECTS

Language studies (L) 6 ECTS

Basic- (B), Subject- (S) and Advanced studies (A) 241,5 ECTS

Practical training (T) 40 + 30 ECTS

	<b>Year 3</b> <b>(1st Clinical year)</b>	<b>Year 4</b> <b>(2nd Clinical year)</b>	<b>Year 5</b> <b>(3rd Clinical year)</b>	<b>Year 6</b> <b>(4rd Clinical year)</b>
General studies (G)	0	0	0	0
Language studies (L)	1,5	3	0	0
Basic studies (B)	0	0	0	0
Subject- (S) and Advanced (A) studies	52,0	34,6	52,4	0
Practical training (T)	9	21	10	30
<b>ECTS credits</b>	62,5	60,3	62,4	30

The preclinical phase lasts for two years and mostly consists of basic and biomedical studies and subject studies. The completion of clinical phase takes three and a half years.

## 2.7. Final examination

To obtain the degree final examination has to be completed in following courses:

- 090302A Oral Pathology
- 090501A Pedodontics, Cariology and Endodontics
- 090502A Oral Surgery
- 090503A Prosthetic Dentistry
- 090504A Stomatognathic Physiology
- 090505A Parodontology and Geriatric Dentistry
- 090506A Oral Radiology
- 090510A Community Dentistry
- 090601A Oral Development and Orthodontics

In advanced studies the student concentrates on some specific topic, which has scientific relevance in the work of dentist. Advanced studies include thesis work (20 ECTS credits).

## 2.8. Examination and Assessment Regulations

Assessment is based on examinations, exercises, essays, field work, clinical work, reports or any other method determined pedagogically appropriate for the particular course. All the exams can be retaken. Additional information is given from the organizing department. Clinical work is assessed biannually.

Grades used for assessment of the courses are: 5 (excellent; ECTS A), 4 (very good; ECTS B), 3 (good; ECTS C), 2 (satisfactory; ECTS D), 1 (sufficient; ECTS E); fail.

## 090601A-01: Basic Orthodontic Skills, 2 - 6,7 op

**Opiskelumuoto:** Intermediate Studies

**Laji:** Partial credit

**Vastuuyksikkö:** Institute of Dentistry

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Pirttiniemi, Pertti Mikael

**Opintokohteen kielet:** Finnish

### **ECTS Credits:**

6,7 ECTS credits

### **Language of instruction:**

Finnish

### **Timing:**

3rd study year, Autumn - Spring term. The preclinical studies have to be passed before the course.

### **Learning outcomes:**

The student is able to estimate the incidence and implication of abnormal occlusion and consider the function in orthodontic treatment need evaluation. He is able to make a diagnosis on most common occlusal abnormalities and is able to define the degree of difficulty and the demand of treatment. The student knows the protocol and methods of orthodontic examination and uses radiology in diagnosis. He understands the options for treatment methods and the importance of timing in treatment. The student is able to make most common orthodontic appliances and understands the overall care and advice for the patient. He knows the orthodontic first aid.

### **Contents:**

The basic concepts in orthodontics and documentation in the examination of occlusion; understand the possibilities of treatment methods in different stages of the developing dentition; treatment methods, appliances and mechanics in preference to growth guidance; basic knowledge to make the diagnosis, treatment planning and timing in orthodontic treatment. Patient information to clarify home care in Orthodontics. First aid in Orthodontics. Orthodontic equipment and materials will be introduced, Orthodontic examination including anamnesis, occlusal status, biologic developmental stage of the dentition, occlusal function, cephalometric analysis, photography of the face and dentition and making dental casts including alginate copy and wax index of the dentition. How to make Orthodontic appliances will be introduced e.g. orthodontic ring, brackets, arch wire and how to fix them., remove fixed appliances and how to make retention appliances and fix them., the mechanics of expanding appliance, how to make extraoral traction and early cross-bite treatment. The student learns to bend an ideal orthodontic arch wire, retention wire and the wire for extraoral traction. Practical exercises in pairs and teaching videos will instruct the basics of patient care in Orthodontics.

After passing the course, the student understands the concepts the normal growth of the craniofacial region and expands the understanding towards growth deviations. The student understand hoe the tooth develops and erupts and the occlusion is formed. Furthermore the student is aware of the possibilities and limitations in modifying occlusal development. A part of the education takes place during pre-clinical years and it is described earlier.

### **Contents:**

Normal and abnormal development in craniofacial region.

Normal dental and occlusal development (see Anatomy C1).

The pathogenesis of malocclusions and the most usual orthodontic treatment of them is brought up especially from the viewpoint of growth.

The retention of orthodontic treatment and growth.

Screening in orthodontics.

The course includes the pathogenesis of the most frequent syndromes and developmental aberrations in the orofacial area and the orthodontics in cleft children.

In dental genetics the subjects are: tooth size and morphology and the characteristics od dental pulp, occlusion and oral characteristics and special features in chromosomally aberrant subjects: autosomal and sex-chromosome related aberrations.

1.4 ECTS credits / 37 hours of work

**Language of instruction:**

**Finnish**

**Timing:**

The course unit is held in five half day seminars.

Seminar 1 is held in the autumn semester, fourth year.

Seminars 2 and 3 are held in the spring semester, fourth year.

Seminar 4 is held in the autumn semester, fifth year.

Seminar 5 is held in the spring semester, fifth year.

**Learning outcomes:**

After the seminar student can assess the meaning of the variation of the occlusion and the screening of the treatment need. He is also able to assess between different treatment options and in that the timing of treatment. Student is able to look for new knowledge and assess it critically.

**Contents:**

Tutorial teaching deepens the knowledge on the variation and treatment options of abnormal occlusion by student's seminar presentations of the treatment goals, procedures and result with their orthodontic patients (DC7-1, DC8-3, DC10-5). In a theoretical seminar student makes presentations of given methods and timing on the treatment of abnormal occlusion (DC8-2, DC9-4). After each seminar (1-5) student gives a structured reflection of the learning experience in OPTIMA-learning environment and gets written tutorial feed-back and the score.

**Mode of delivery:**

The delivery for the course unit is blended teaching (independent learning + face-to-face teaching + web-based teaching)

**Learning activities and teaching methods:**

Independently prepared presentation (software e.g. Power Point) to the Seminar 1-5 (á 3 hours), patient and theoretical seminar presentations in the given group (1-5, á 4 hours) and given reflection in OPTIMA learning environment after the seminar (1-5, á 0.4 hours).

**Target group:**

4th and 5th study year (DC7-DC10), to deepen the knowledge in Orthodontic treatment

**Prerequisites and co-requisites:**

You should have passed 090601A-01 Basic Orthodontic Skills before entering yourself for the course.

**Recommended optional programme components:**

It is recommended that the course 090601A-02 Growth and Development of Craniofacial Structures and Occlusion and Oral-facial genetics is passed before the Seminars 4-5.

**Recommended or required reading:**

The documentation of the orthodontic patients in clinical teaching. Independent work with references from Medline and PubMed to make a presentation for the theoretical seminars at an appointed title.

**Assessment methods and criteria:**

Self-made presentation in seminar (1-5) and activity in discussions. After the seminar structured reflection in OPTIMA learning environment. The teacher gives written comments and the score for each seminar (1-5).

Each seminar is separate entity, the order is advisory.

**Grading:**

The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail. All the seminars 1-5 will be assessed numerically and the final score is the mean in the scale 1-5.

Each seminar 1-5 has to be passed independently.
