The Bachelor’s degree (BHSc) and Master’s degree (MHSc) in Health Sciences in the University of Oulu are based on the Government Decree on University Degrees 794/2004. The degree programme in Health Management Science lead first to the degree of Bachelor of Health Sciences (180 ECTS cr) and further to the degree of Master of Health Sciences (120 ECTS cr). The studies are multidisciplinary in the degree programme of Bachelor of Health Sciences (first-cycle university degree), so that the curriculum of the three different degree programs (Health Management Sciences, Nursing Sciences, and Teacher Education Programme in Health Sciences) is identical to all undergraduate health science students irrespective of chosen specialization. Students selected to the degree programme in Health Management Science have health management science as their major subject. The students do their Bachelor thesis in their field of specialization. The degree of Master of Health Sciences (second-cycle university degree) is differentiated according to the chosen specialization. After completing the Master’s degree, the student is eligible for applying for further academic education (licentiate degree, doctoral degree).

Those who have completed the Degree Programmes in Health Management Science, qualify for various positions in social welfare and public health care. These include such positions in planning, development, research, teaching and management on both national and international level.

The implementation of teaching is in accordance with the decision by Oulu University (KN 17.9.2014) regarding four teaching periods during the time period 31.8.2015-13.5.2016. Additionally there is a period for examinations and for catching up 16.5-27.5.2016. Furthermore, it is possible to take a part of the courses during the summer term. A separate announcement is made of the courses offered during the summer term by the end of February.

All students of Oulu University may become exchange students if they so wish and to take a part of their courses (e. g. free choice studies, practice) in an institution of higher education abroad. The time period for studies as an exchange student is 3-12 months and a student may become an exchange student when they have finished one year of studies at Oulu University. The student and the coordinator for international affairs made a decision together regarding the time period for studies as an exchange student and for an individual study plan. In case the student is doing the practice unit of their studies as an exchange student, the student first agrees about this with the teacher responsible for the practice unit and with the person responsible for international affairs. After this the student is in contact with the student centre in order to apply for the place of practice and in order to apply for needed funding.

In the beginning of the studies, the student is linked with a tutor who acts as a small group supervisor and as a personal teacher for the student. All students draft their own personal study plan (e-HOPS).

During their studies the students are asked to give feedback for each study unit, for each academic year, in connection with small group supervision and with a nationwide BA-feedback form. The feedback is processed in the planning committee for education in the unit of health sciences and it is used for developing the quality of study units, curriculum and education.
MULTIDISCIPLINARY BACHELOR’S DEGREE PROGRAMME IN HEALTH SCIENCES (BHSc)
180 ECTS credits

The Bachelor’s degree in health sciences includes a wide range of scientific, theoretical and methodology studies, and studies grounded in expertise of professional working communities.

Learning Objectives for the Degree Programme Bachelor of Health Sciences

The learning objectives of the Degree Programme correspond to the aims of the Finnish National Framework for Qualifications and Other Learning.

Having obtained the degree of Bachelor of Health Sciences the students are able:

- to explain the foundations of health science in the changing and multicultural environment of health care and to observe and interpret the development of health care and health sciences;
- to use scientific and critical thinking, technology and scientific methods and approaches creatively in obtaining, producing and evaluating relevant research data;
- to apply gained knowledge critically and creatively in professional situations and problem solving;
- to work as an expert in one’s own field in multidisciplinary settings of social welfare and health care services in a cooperative manner;
- to make independent decisions and act independently according to the ethical principles of health sciences;
- to take responsibility for the development and evaluation of own, other individuals’ and groups’ competences;
- to have competence in communicating in one’s mother tongue, in one additional official language spoken in Finland and in at least one foreign language;
- to further qualify for a postgraduate degree and continued learning.

Structure of the Multidisciplinary Bachelor’s Degree Programme in Health Sciences

Course Structure Diagram 2015-2016

In University of Oulu Bachelor’s Degree Programme consists of following areas of competencies: Development in Academic Expertise, Language and Communication Skills, Health Sciences, Scientific Practice and Research Skills, Minor Subject and Optional Studies. The students do their Bachelor thesis in their field of specialization so that they can apply their expertise in the field.

GENERAL STUDIES 25 ECTS cr

Development in Academic Expertise 6 ECTS cr

Having completed this area of competence student will be able to operate in the community of the university and in professional networks. The student will be able to explain the relation between education and professional life in the development of expertise.

Studies included in the area of competence:

- 350041Y Academic Study and Expertise in Health Sciences, part I-III 6 ECTS cr:
- 350001Y Part I, Guidance for Study and Working Experience, Study Tutorials 1 ECTS cr
- 350042Y Part II, Development in Expertise in Health Sciences and Professional Cooperation 3 ECTS cr
Language and Communication Skills 19 ECTS cr

Having completed this area of competence the student has the needed skills in writing and presenting according to the principles for scientific communication. The student understands the properties of scientific information, understands the research process, and is able to obtain, apply, report and evaluate scientific knowledge. Additionally, the student will have the ability to communicate at a satisfactory level in the second national language and one foreign language.

Studies included in the area of competence:

901040Y Second Official Language (Swedish), Written Skills 1 ECTS cr  
901041Y Second Official Language (Swedish), Oral Skills 2 ECTS cr  
902008Y Foreign Language, English 3 ECTS cr  
900008Y Oral Communication 3 ECTS cr  
A500105 Knowledge Management and Research I 6,5 ECTS cr  
040021Y Knowledge Management and Research I: Tools 1 ECTS cr  
040022Y Knowledge Management and Research I: Written assignment 2 ECTS cr  
040023Y Knowledge Management and Research I: Basics in scientific research 2 ECTS cr  
040024Y Knowledge Management and Research I: Literature retrieval 1,5 ECTS cr  
A500105 Knowledge Management and Research II 3,5 ECTS cr  
040025Y Knowledge Management and Research II: Lessons and written examination 1,5 ECTS cr  
040026Y Knowledge Management and Research II: Small group exercises 1 ECTS cr  
040027Y Knowledge Management and Research II: Practical project 1 ECTS cr

BASIC STUDIES 25 ECTS cr and INTERMEDIATE STUDIES 45 ECST cr

Health Sciences 60 ECTS cr

The Institute of Health Sciences in the University of Oulu deals with areas of individual and communal interest in health from the perspectives of health care, education and management. Having completed this area of competence the student knows the foundations and foundational operational principles of Finnish health care and Finnish health care education. The student is able to define objects of research in nursing science and health management science in evidence based operation of health care and the student gains preliminary knowledge in theory development in health sciences.

Basic studies included in the area of competence:

351203P Introduction to Health Sciences 5 ECTS cr  
351204P Foundations of Philosophy and Research Methods in Health Sciences 5 ECTS cr  
351205P Foundations of Health Care Education 5 ECTS cr  
351206P Health Care Systems in Finland and Inter-professional Networking 5 ECTS cr
**Scientific Practices and Research Skills 10 ECTS cr**

Having completed this area of competence the student will know the foundations of philosophy of science in health sciences and the most common methods of collecting and analyzing research data with further skills in planning, executing, and reporting health sciences research.

**Studies included in the area of competence:**

352251 Qualitative Research Methods in Health Sciences 5 ECTS cr

352252A Methods of Statistical Analysis in Health Sciences 5 ECTS cr

**MINOR SUBJECT 25 ECTS cr**

The minor subject studies for the undergraduate degree in Bachelor of Health Sciences need to include a study module of at least 25 ECTS cr. Studies completed at other universities (basic or subject studies) may be credited for the study module at least 25 ECTS cr in the minor subject.

**OPTIONAL STUDIES 60 ECTS cr**

Optional studies are basic studies, intermediate studies or advanced studies completed at the Institute of Health Sciences, at the University of Oulu and at other national/international institutions or universities. Optional studies may include single study units.

Student may start minor subject and optional studies for their later degree in Master of Health Sciences during their undergraduate studies according to their Personal Study Plan (e-PSP).

**Arrangements for Recognition of Prior Learning**

Recognition of prior learning (RPL) follows the main principles as defined by the University of Oulu. According to regulations of the University of Oulu, paragraph **Accreditation of studies taken elsewhere and recognition of prior learning** (§ 27), the principles concerning accrediting studies taken in other Finnish and foreign universities and other educational institutions are stipulated in the curriculum or other regulations, unless they have not been stipulated elsewhere. The decision for accreditation of studies by individual students is made by the head of the degree programme Professor Leena Paasivaara. [http://www.oulu.fi/english/studying/supporting-your-studies/recognition-prior-learning-rpl](http://www.oulu.fi/english/studying/supporting-your-studies/recognition-prior-learning-rpl)

Studies to be credited from a vocational upper secondary qualification, vocational college, university of applied science or Master’s degree in health care from a university of applied sciences, and other universities requires
separate application procedure. Forms of acceptance can be found in web-pages of Oulu University: http://www.oulu.fi/dokumentit/RPL_1A.pdf

Application to have credits accepted has to be submitted to the teacher responsible for the study unit and further dealt with by the chairperson of the Degree Programme. The decisions on credit transfer for language and communication Studies are made through the Languages and Communication Extension School.

**Provisions of Prior Learning Recognition at the Institute of Health Sciences**

Previously completed study modules in basic or subject studies may be recognized and accepted as the whole module. Exceptional cases are dealt with individually.

Studies, which are part of a previous degree may not be credited towards a new degree. However, through the RPL-process previously acquired knowledge may be identified and recognized.

Individual courses older than five years will not be accredited. During the implementation process of the new curriculum (2014-2017) these cases may be dealt with individually. There is no set time limit for the accreditation of study modules. Accredited studies need to correspond with university studies and be applicable to the relevant studies of the degree programme.

**Studies to be credited towards Bachelor’s Degree in Health Sciences**

*Development in Academic Expertise*

350043Y Professional Cooperation and Innovation 2 ECTS cr

The course is accepted based on prior qualification in health care from vocational upper secondary qualification, vocational college diploma and university of applied sciences.

*Language and Communication Skills*

901040Y Second Official Language (Swedish), Written Skills 1 ECTS cr

901041Y Second Official Language (Swedish), Oral Skills 2 ECTS cr

Designed for intermediate- and advanced- level students, Swedish courses at the University of Oulu are tailored to meet the language needs of the university’s academic programmes as well as those of the students’ professional fields. Consequently, Swedish language skills at a lower level are not eligible for the RPL process. Credits can be given for learning that corresponds to the learning outcomes of particular Swedish courses offered by the Extension School. If you have such skills, please consult our RPL pages for details on the RPL procedure and how to apply for RPL credits.

In case of students who have been educated in a language other than Finnish or Swedish, or a student who has been educated abroad, the university may either totally or partially exempt a students from the requisite language skills referred to Government Decree (798/2004), Language Proficiency Section 6.

902008Y Foreign Language, English 3 ECTS cr

Language and Communication study units may be accepted on the basis of upper secondary education taught in English, and/or IB- diploma, Bachelor’s or Master’s degree taught in English, or English language two exemption tests (reading comprehension and written / oral production) by the Languages and Communication Extension School, University of Oulu (RPL-process).

900008Y Oral Communication 3 ECTS cr

The course is accepted based on prior qualification in health care from vocational upper secondary qualification, vocational college diploma and university of applied sciences.
**Health Sciences**

The basic studies in Health Sciences 25 ECTS cr are accepted based on prior qualification in health care from university of applied sciences or other universities if the whole study module was previously completed. The study module may be also accepted on the basis of prior qualification in health care from vocational upper secondary qualification and vocational college diploma by completing a general subject test.

**Optional Studies**

The optional studies 60 ECTS cr towards Bachelor’s Degree in Health Sciences are accepted based on prior qualification in health care from vocational upper secondary qualification, vocational college diploma and university of applied sciences.

Based on a previous Master’s degree from a university of applied sciences and/or other universities, 25-50 ECTS credits may be accepted by the head of the degree programme. The student must submit a written statement of how the previous studies supplement the current degree studies in health sciences (RPL-process).

Learning Objectives for the Degree Programme Master of Health Sciences

The learning objectives of the Degree Programme correspond to the aims of the Finnish National Framework for Qualifications and other Learning.

Having attained the degree of Master of Health Sciences students are able:

to acquire and evaluate current information of health care critically and use it independently and innovatively from the viewpoint of proactive decision making perspective in relation to advanced studies of health science management;

to participate in research, expert tasks, management and development in health care;

to communicate orally and in writing in a clear and analytical manner;

to reflect on their own and to evaluate the activities and knowledge of the people acting in the operating environment;

to develop knowledge and preparedness of own and of the people acting in the operating environment according to the changing requirements of the health sector;

to conduct scientific research with scientific research methods and engage in postgraduate studies in health management science.

Structure of the Master’s Degree Programme in Health Sciences

Course Structure Diagram 2015-2016

The Degree Programme Master of Health Sciences consists of following areas of competencies: Health Sciences, Scientific Practices and Research Skills, Minor Subject and Optional Studies.

ADVANCED STUDIES 65 ECTS cr

Health Sciences 55 ECTS cr
Studies included in the area of competence:

353217S Multiprofessional Management 5 ECTS cr
353208S Reflection and Application in Management part I, 5 ECTS cr
353228S Reflection and Application in Management part II, 5 ECTS cr
353204S Research Seminars and Synthesis in Health Management Science part I, 5 ECTS cr
353234S Research Seminars and Synthesis in Health Management Science part II, 5 ECTS cr
353206S Master Thesis 30 ECTS cr
353236S Master Thesis- research plans part I, 10 ECTS cr
353237S Master Thesis part II, 20 ECTS cr
353205S Written Maturity Test 0 ECTS cr

Scientific Practices and Research Skills 10 ECTS cr

Studies included in the area of competence:

353203S The Application of Research Methods in Health Sciences 10 ECTS cr

MINOR SUBJECT 25 ECST cr

The students may adjust their studies according to their personal objectives by the choice of minor subjects and optional studies. These include national or international studies in various fields of science according to the Personal Study Plan (e-PSP) of each student.

OPTIONAL STUDIES 30 ECTS cr

Optional studies are basic studies, intermediate studies or advanced studies completed at the Institute of Health Sciences, at the University of Oulu and at other national/international institutions or universities.

Arrangements for Recognition of Prior Learning

Recognition of prior learning (RPL) follows the main principles as defined by the University of Oulu. According to regulations of the University of Oulu, paragraph Accreditation of studies taken elsewhere and recognition of prior learning (§ 27), the principles concerning accrediting studies taken in other Finnish and foreign universities and other educational institutions are stipulated in the curriculum or other regulations, unless they have not been stipulated elsewhere. The decision for accreditation of studies by individual students is made by the head of the degree programme Professor Leena Paasivaara. [http://www.oulu.fi/english/studying/supporting-your-studies/recognition-prior-learning-rpl](http://www.oulu.fi/english/studying/supporting-your-studies/recognition-prior-learning-rpl)

Studies to be credited from a vocational college, university of applied science or Master’s degree in health care from a university of applied sciences, and other universities requires separate application procedure. Forms of acceptance can be found in web-pages of Oulu University: [http://www.oulu.fi/dokumentti/RPL_1A.pdf](http://www.oulu.fi/dokumentti/RPL_1A.pdf). Application to have credits accepted has to be submitted to the teacher responsible for the study unit and further dealt with by the chairperson of the Degree Programme.
Studies to be credited towards Master’s Degree in Health Sciences

Based on a previous Master’s degree from a university of applied sciences and/or other universities, 25-50 ECTS credits may be accepted by the head of the degree programme. The student must submit a written statement of how the previous studies supplement the current degree studies in health sciences (RPL-process).

**Health Sciences Preliminary Studies (25 op)**

*Health Sciences*

351205P: Foundations of Health Care Education, 5 op
351207P: Foundations of Health Care Legislation, 5 op
351204P: Foundations of Philosophy and Research Methods in Health Sciences, 5 op
351206P: Health Care Systems in Finland and Inter-professional Networking, 5 op
351203P: Introduction to Health Sciences, 5 op

**Health Sciences Subject Studies (35 op)**

*Health sciences*

352114A: Bachelor Thesis and Written Maturity Test, 6 op
352232A: Health Administration Science, 10 op
351138A: Legal Aspects of Health Care, 3 - 5 op
352252A: Methods of Statistical Analysis in Health Sciences, 5 op
352233A: Nursing Science, 10 op
352251A: Research Methodos in Health Science, 5 op
Minor Subjects (vähintään 25 op)

At the University of Oulu or other universities, a study module has to be completed according to the Personal Study Plan (PSP). E.g.

Health Promotion 25 ECTS cr

Advanced Studies in Occupational Health Care 25 ECTS cr

Optional Studies (60 op)

Opintojaksojen kuvaukset

Tutkintorakenteisiin kuuluvien opintokohteiden kuvaukset

353206S: Master Thesis, 30 op

Opiskelumuoto: Advanced Studies
Laji: Diploma thesis
Vastuuysikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

353236S: Master Thesis Part I research plan, 10 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
10 ECTS cr
Timing:
Autumn term, possible to complete the course during summer.
Learning outcomes:
The student is able to create a scientific paper in accordance with criteria set for scientific writing of reports. The paper is aimed at a limited professional area within the field of health care. The student is able to make use of and apply knowledge gained during his/her education in an insightful way, making a scientific study in which he/she demonstrates his/her ability to solve problems.
Contents:
Scientific research completed independently or as a part of a research project. Producing a Master thesis.
Mode of delivery:
Multidimensional teaching.
Learning activities and teaching methods:
Supervision, contact teaching and group work 7h, reading and retrieving of the literature/research data 173h, writing of thesis 90h. Applying continuous evaluation. Brainstorming of ideas starts in May, which gives an opportunity to students to continue their independent work on their thesis during the summer.

Target group:
Master Degree students in health management science.

Recommended or required reading:
Relevant scientific literature.

Assessment methods and criteria:
The student writes a Master's thesis or equivalent. If the student has not written the maturity test related to the Bachelor's thesis, the written maturity test has to be written after the Master thesis. Participating in individual and group tutoring. Master thesis could be as a written scientific article, too.

Grading:
1-5/fail

Person responsible:
University lecturer

353237S: Master Thesis part II, 20 op

Opiskelumuoto: Advanced Studies
Laji: Diploma thesis
Vastuuyksikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
20 ECTS cr

Timing:
Spring term, possible to complete the course during summer.

Learning outcomes:
The student is able to create a scientific paper in accordance with criteria set for scientific writing of reports. The paper is aimed at a limited professional area within the field of health care. The student is able to make use of and apply knowledge gained during his/her education in an insightful way, making a scientific study in which he/she demonstrates his/her ability to solve problems.

Contents:
Scientific research completed independently or as a part of a research project. Producing a Master thesis.

Mode of delivery:
Multidimensional teaching.

Learning activities and teaching methods:
Supervision, contact teaching and group work 13h, reading and retrieving of the literature/research data 348h, writing of thesis 179h. Applying continuous evaluation. Brainstorming of ideas starts in May, which gives an opportunity to students to continue their independent work on their thesis during the summer.

Target group:
Master Degree students in health management science.

Recommended or required reading:
Relevant scientific literature.

Assessment methods and criteria:
The student writes a Master's thesis or equivalent. If the student has not written the maturity test related to the Bachelor's thesis, the written maturity test has to be written after the Master thesis. Participating in individual and group tutoring. Master thesis could be as a written scientific article, too.

353217S: Multiprofessional Management, 10 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuyksikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS cr
Timing:
autumn term

Learning outcomes:
The student knows, both in individual and group work exercise, to interpret, analyze and reflect on the challenging situations in multiprofessional leadership in the demanding expert tasks in social and health care. The student is able to evaluate and reflect on different possible solutions to these situations. Additionally the student is able to evaluate and to give feedback of the decisions/solutions given by others students.

Contents:
Theories and basic concepts in health management.

Mode of delivery:
Multidimensional teaching.

Learning activities and teaching methods:
Lectures 10 hours (includes lecture of working life expert) and independent studying 57h, ArgueGraph group 10 h and independent/ group studying 58h. Application of continues evaluation.

Target group:
Master Degree students in health management science.

Recommended or required reading:

Assessment methods and criteria:
Independent and cooperative study, practical assignment. Total grade formed 50% of group work and 50% of individual work.
Grading:
1-5 / fail

Person responsible:
Professor/ university lecturer/ doctoral candidate

353208S: Reflection and Application in Management part I, 5 op
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Learning outcomes:
The student is able to reflect on their own management competence in the area of operational social and healthcare management. The student shows one’s development and competence to apply knowledge in the professional management of social and health care and/or research and development in social and healthcare with a portfolio. Contents:
Students train in health care national or international settings according to their individual plans.
Learning activities and teaching methods:
8 hours management lectures with reflection of lectures, 6 hours group work and eLearning, 121 h practical training of management (3 weeks) and independent studying. Target group:
Master Degree students in health management science.
Recommended or required reading:
Relevant scientific literature. Assessment methods and criteria:
Presence in the management lectures, study group work and individual practical training of management in Finland or other countries and producing a portfolio. Grading:
Pass/Fail Person responsible:
Doctoral candidate and professor of health management science
Presence in the management lectures, study group work and individual practical training of management in Finland
or other countries and producing a portfolio.

Grading:
Pass/fail

Person responsible:
Doctoral candidate and professor of health management science

353204S: Research Seminars and Synthesis in Health Administration Science part I, 5 - 8 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS
Language of instruction:
Finnish
Timing:
Autumn term

Learning outcomes:
Students are able to use and evaluate scientific knowledge by producing a research plan. Students are able to
evaluate independently and in small groups the research process and its phases critically. In a limited area of health
care students are able to generate understanding of the area by utilizing the main questions in health management
science. Students are able to comment and reflect on the nature of health management science as well as apply
scientific knowledge to practice of health management. Students are able to apply information of health management
science in practice and in writing.

Contents:
Knowledge of Health management science in health care practices, education and management. Drafting a research
proposal.

Mode of delivery:
Multidimensional teaching.

Learning activities and teaching methods:
Contact teaching 10h, group work 10h and independent studying 88h.

Target group:
Master Degree students in health management science.

Recommended or required reading:
Relevant scientific literature.

Assessment methods and criteria:
Active participation in contact teaching, small group work and completion of a research idea paper is required. The
student’s reflection of things learned and argumentation will be assessed using peer evaluation and self-assessment.

Grading:
Pass/fail

Person responsible:
Professor/ university lecturer

353234S: Research Seminars and Synthesis in Health Administration Science part II, 5 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Health Sciences

353205S: Written maturity test, 0 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuyksikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Assessment methods and criteria:
Student writes an essay in his/her native language about the topic of the Master's thesis to show a good command of the language and the content of the thesis. The abstract of the Master's thesis can be accepted as a maturity test if the student has written a maturity test earlier in Bachelor's degree. If the student's native language is another than Finnish or Swedish the Faculty will define separately the requirements for the language test. Read more about assessment criteria at the University of Oulu webpage.

Grading:
Pass / Fail

Person responsible:
The essay is examined first by the supervisor of the Master's thesis and then by the teacher of the university's Language Center.

353203S: The Application of Research Methods in Health Sciences, 10 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuyksikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opettajat: Satu Elo
Opintokohteen kielet: Finnish

ECTS Credits:
10 ECTS cr
Language of instruction:
Finnish
Timing:
Spring term
Learning outcomes:
Upon completion of the course the student:
is able to define the features and methodological issues in quantitative and qualitative research in depth by connecting previous knowledge with advanced knowledge of the course;
is able to choose and apply types and designs for nursing research in his / her own research has a good command of the research process;
is able to assess questions of reliability and validity and apply them in planning and implementing his / her own research;
is able to assess main ethical questions and issues in research;
is able to write a research proposal and a research report.
Contents:
Methodological issues in quantitative and qualitative research, types / designs for nursing research, phases of research process, assessment of reliability and validity, ethical issues. Writing a research proposal and research report.
Mode of delivery:
Multidimensional teaching.
Learning activities and teaching methods:
Lectures and guided exercises 50h, individual and group studying 220h.
Target group:
Master Degree students in health management science, in nursing science and in teacher education programme.
Recommended or required reading:
Relevant scientific literature.
Assessment methods and criteria:
Lectures and active participation in practical training/exercises and group work, written assignment and exam.
Grading:
1-5/fail
Person responsible:
University lecturers of nursing and health management sciences
Opintokohteen kielet: Finnish

ECTS Credits:
1 ECTS cr

Language of instruction:
Finnish

Timing:
Autumn terms

Learning outcomes:
The student will be able to operate in the community of the university and in multi-professional networks. The students learn to plan their learning and career, and to evaluate themselves and their actions as learners and as future professionals. Students develop a clear vision of their future studies and continual learning.

Contents:
Student is introduced to the learning environment of the research group of Nursing Science and Health Management Science at the University of Oulu. This includes knowledge about student status, rights, obligations and organizational guidance for students. The study module comprises of the degree programme presentation, planning and assessment of one’s own personal study style, study plan, and tutorials with one’s teacher. Additionally the study module includes planning of career goals, recognition of one’s own professional strengths/weaknesses, and readiness development for professional contexts and orientation with the help of degree studies.

Mode of delivery:
Multidimensional teaching methods

Learning activities and teaching methods:
Tutorials with one’s teacher 3h, contact teaching 10h including small group counselling, info-meetings. Participation and planning of events of research group 10h including learning development day and alumni meetings. Independent studying 4h.

Target group:
Undergraduate health science students.

Prerequisites and co-requisites:
No

Recommended optional programme components:
No

Recommended or required reading:
Relevant scientific literature.

Assessment methods and criteria:
This course unit utilizes continuous assessment. Active participation in contact teaching and events, planning of the Personal Study Plan (e-PSP) and its evaluation.

Grading:
Pass / fail

Person responsible:
University teacher/ doctoral candidate

Working life cooperation:
No

350042Y: Academic Study and Expertise in Health Sciences, part II: Development in Expertise in Health Sciences and Professional Cooperation, 3 op

Opiskelumuoto: General Studies

Laji: Course

Vastuuysikkö: Health Sciences

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:
3 ECTS cr

Timing:
Spring term

Learning outcomes:
The student identifies aspects of expertise and understands the foundations for professional career planning. The student can explain and evaluate the relation between education and professional situations in the development of their expertise. The student is able to plan one’s own career and practical training, recruitment and the obtaining of
employment. Additionally, the student is able to discuss working life demands, challenges and cooperative employment possibilities in health care education and leadership areas.

**Contents:**
Academic expertise and career planning, student’s own expertise profile/portfolio. Professional networks and development plan.

**Mode of delivery:**
Multidimensional teaching.

**Learning activities and teaching methods:**
PBL-working 18h, lectures by experts 8h, and independent studying 59h (includes examining literature, study visits and working on a portfolio on expertise).

**Target group:**
Undergraduate health science students.

**Recommended or required reading:**
Relevant scientific literature and research.

**Assessment methods and criteria:**
The study unit includes continual assessment. Assessment includes self-assessment, peer-assessment and teacher’s assessment. Active participation is required in contact teaching and PBL-work (80%). Additionally the student continues to work on one’s own expertise profile until the completion of a Bachelor’s degree. The study unit includes continuous self-evaluation, peer-evaluation and teacher’s evaluation.

**Grading:**
Pass/fail

**Person responsible:**
University teacher/ university lecturer

---

**350043Y: Academic Study and Expertise in Health Sciences, part III: Professional cooperation and Innovation, 2 op**

**Opiskelumuoto:** General Studies

**Laji:** Course

**Vastuuyksikkö:** Health Sciences

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kiele:** Finnish

**ECTS Credits:**
2 ECTS cr

**Timing:**
Autumn term

**Learning outcomes:**
The student is able to plan one’s own professional network and social innovation for the purpose of use in real working environment. The student is able to use opportunities when observing in a real working environment and complete the observation by completing a self-assessment and report of one’s learning process. The student is able to recognize and plan one’s own continual learning and professional development.

**Contents:**
Professional networks and social innovations.

**Mode of delivery:**
Multidimensional teaching.

**Learning activities and teaching methods:**
Contact teaching 2h, observation of expertise in real working environment 8h, active online learning 20h, and independent learning with production of a plan and an observational report 24h.

**Target group:**
Undergraduate health science students.

**Recommended or required reading:**
Relevant scientific literature and research.

**Assessment methods and criteria:**
The study unit includes continual assessment. Assessment of the plan and observational report includes self-assessment, peer-assessment and teacher’s assessment.

**Grading:**
Pass/fail

**Person responsible:**
University teacher/ university lecturer
902008Y: Academic English, 3 op

Voimassaolo: 01.08.1995 -
Opiskelumuoto: Language and Communication Studies
Laji: Course
Vastuuysikkö: Negotiated Education
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: English
Leikkaavuudet: ay902008Y Academic English (OPEN UNI) 3.0 op

Proficiency level:
B2/C1
Status:
Compulsory course
Required proficiency level:
Students are expected to have had English as their A1 or A2 language at school or have acquired equivalent skills.
ECTS Credits:
3 ECTS credits
Language of instruction:
English
Timing:
1st year spring term
Learning outcomes:
Having completed the course, students will be able to
- understand and summarize academic/scientific texts of in health sciences
- use appropriate academic/scientific vocabulary of their own field in writing short text types (bio, cover letter, questionnaire, survey, summary/abstract),
- use English to communicate knowledge and express opinions in conversations related to their profession,
- respond appropriately and convincingly to the contribution of other speakers in a professional or academic conversation, meeting and/or conference,
- give a presentation on a professional or academic topic related to their field

Contents:
-
Mode of delivery:
Contact and online teaching
Learning activities and teaching methods:
-
Target group:
Students in the degree programs of Health Sciences (nursing science, teacher education program in health sciences and health management science).
Prerequisites and co-requisites:
-
Recommended optional programme components:
-
Recommended or required reading:
Specific texts and material prepared by the teacher. Information will be provided at the beginning of the course. Material will be available in Optima during the course.
Assessment methods and criteria:
The course requirements include active participation in classroom work (24 hrs) and completion of home assignments (Reading journal and glossary: 20 hrs), presentation of self-selected literature (16 hrs), writing task (20 hrs). Alternatively, an end-of-course examination may be offered. Some course work can be completed online. Read more about assessment criteria at the University of Oulu webpage.
Grading:
pass/fail
Person responsible:
Eva Braidwood
Working life cooperation:

Other information:
Language and Communication study units may be accepted on the basis of upper secondary education taught in English, and/or IB- diploma, Bachelor’s or Master’s degree taught in English, or two English language exemption
tests (reading comprehension and written/oral production) in accordance with the recognition of prior learning (AHOT 1B) process. In line with the recognition of prior learning regulations in place at the university (see: http://www.oulu.fi/kielikoulutus/ahot), other language courses completed in a higher educational institution will be accepted provided they cover the relevant field and level of communication (B2 on the CEFR scale). Students who wish to be exempted from attendance can take an exemption test in reading field-related academic texts and give an academic presentation. In this way students can obtain the credits without attendance. The exemption exam is voluntary and can be taken only once. Students sign up for the exam in WebOodi by 15th January. The exemption test and presentation of oral production will be organised in February. Students not exempted in the above ways are required to participate in the course.

Information on the time and place of the classes is provided on the home pages of the Department of Health Sciences.

Opettajat: Pentti Nieminen
Opintokohteen kielet: Finnish
Leikkaavuudet:
  ay040024Y Knowledge and research II, Literature retrieval (OPEN UNI) 4.0 op

ECTS Credits:
4 ECTS
Timing:
1st year
Learning outcomes:
The student is familiar with the research process and with the characteristics of scientific information including an ability to obtain and process scientific information, and to report and apply the results especially in the fields of medicine, dentistry and health sciences.
The student knows the role of scientific publications, can use and evaluate information sources critically.
The student will be able to search research articles using basic literature retrieval methods and to use bibliographic databases available at the Medical Faculty.
The student knows basic principles in research ethics and good scientific practice.

Contents:
Scientific communication:
Scientific journals, research articles, critical evaluation of research findings, ethics in scientific publication and bibliometrics.
Literature retrieval:
Library information systems, medical and dental publications, scientific online journals, Medline, Medic, Scopus, Cochrane Library, electronic books, reference management software.

Mode of delivery:
Blended teaching.

Learning activities and teaching methods:
040024Y (4 op) Knowledge Management and Research, Literature retrieval assignment

Target group:
Medical, dental and medical wellness technology students

Prerequisites and co-requisites:
None.

Recommended optional programme components:
Knowledge Management and Research II
040105Y Basics in Epidemiology
041001Y Evidence Based Medicine
902006Y Reading for Academic Purposes
902007Y Scientific Communication
Recommended or required reading:
Material in lessons small group lessons.

Assessment methods and criteria:
Regular and active participation in the small group lessons and completion of practical projects.

Grading:
Pass/fail

Person responsible:
Senior lecturer Pentti Nieminen

Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Pentti Nieminen
Opintokohteen kielet: Finnish

ECTS Credits:
0,5 ECTS

Timing:
1st year.

Learning outcomes:
By the end of the course the student has practiced the following skills: using information and communication technology resources in the University of Oulu, using workstations available in the Medical Faculty, applying basic software necessary in the studies. The student knows basics in scientific writing.

Contents:
Information and communication technology:
Workstations, information security and confidentiality, networks, and office software.
Guidelines for written assignments and word processing:
Structure of assignments and thesis, reporting of findings, tables and figures, citing and references.

Mode of delivery:
Blended teaching.

Learning activities and teaching methods:
040021Y (0,5 ECTS) Knowledge Management and Research, Tools

Target group:
Medical, dental and medical wellness technology students

Ei opintojaksokuvauksia.

040024Y: Knowledge and research II, Literature retrieval, 4 op

Voimassaolo: 01.08.2014 -
Opiskelumuoto: General Studies
Laji: Course
Knowledge and research II, Literature retrieval (OPEN UNI) 4.0 op

ECTS Credits:
4 ECTS
Timing:
1st year
Learning outcomes:
The student is familiar with the research process and with the characteristics of scientific information including an ability to obtain and process scientific information, and to report and apply the results especially in the fields of medicine, dentistry and health sciences.
The student knows the role of scientific publications, can use and evaluate information sources critically. The student will be able to search research articles using basic literature retrieval methods and to use bibliographic databases available at the Medical Faculty.
The student knows basic principles in research ethics and good scientific practice.

Contents:
Scientific communication:
Scientific journals, research articles, critical evaluation of research findings, ethics in scientific publication and bibliometrics.
Literature retrieval:
Library information systems, medical and dental publications, scientific online journals, Medline, Medic, Scopus, Cochrane Library, electronic books, reference management software.

Mode of delivery:
Blended teaching.
Learning activities and teaching methods:
040024Y (4 op) Knowledge Management and Research, Literature retrieval assignment
Target group:
Medical, dental and medical wellness technology students
Prerequisites and co-requisites:
None.
Recommended optional programme components:
Knowledge Management and Research II
040105Y Basics in Epidemiology
041001Y Evidence Based Medicine
902006Y Reading for Academic Purposes
902007Y Scientific Communication
Recommended or required reading:
Material in lessons small group lessons.
Assessment methods and criteria:
Regular and active participation in the small group lessons and completion of practical projects.
Grading:
Pass/fail
Person responsible:
Senior lecturer Pentti Nieminen
ECTS Credits: 0.5 ECTS

Timing: 1st year.

Learning outcomes:
The student is familiar with the research process and with the characteristics of scientific information including an ability to obtain and process scientific information, and to report and apply the results especially in the fields of medicine, dentistry and health sciences.
The student knows the role of scientific publications, can use and evaluate information sources critically. The student will be able to search research articles using basic literature retrieval methods and to use bibliographic databases available at the Medical Faculty.
The student knows basic principles in research ethics and good scientific practice.

Contents:
Information and communication technology:
Workstations, information security and confidentiality, networks, and office software.
Guidelines for written assignments and word processing:
Structure of assignments and thesis, reporting of findings, tables and figures, citing and references.
Scientific information:
Principles of scientific research, ethics in research, research methods in the main disciplines (clinical medicine, epidemiology, biomedicine and health sciences).
Scientific communication:
Scientific journals, research articles, critical evaluation of research findings, ethics in scientific publication and bibliometrics.
Special issues in medical research:
Ethics in research, regulations in clinical research and use of animals in scientific research, research groups.

Mode of delivery:
Blended teaching.

Learning activities and teaching methods:
040023Y (0.5 ECTS) Knowledge Management and Research, Basics in scientific research

Target group:
Medical, dental and medical wellness technology students

Prerequisites and co-requisites:
None.

Recommended optional programme components:
Knowledge Management and Research II

351205P: Foundations of Health Care Education, 5 op

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuyksikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
   ay351205P  Foundations of Health Care Education (OPEN UNI)  5.0 op

ECTS Credits:
5 ECTS cr
Timing:
Autumn term

Learning outcomes:
Student is able to define and describe the general principles of Finnish social and healthcare education (ISKED-classification) and the programmes of the Finnish National Board of Education. The student is able to recognize the main goals and strategies of the Finnish Ministry of Education and Culture, internationalism and co-operation. The student is able to justify their understanding of the subject in their learning diary and in their own learning evaluation.

Contents:
Social and health care education system. Objectives and programmes of Finnish Education. Internationalization in Finnish higher education institutions. Legislation of Finnish higher education.

Mode of delivery:
Teaching in the e-learning environment Optima.

Learning activities and teaching methods:
Independent studying in the e-learning environment and reading of literature 60h, peer evaluation of learning diary 17h, evaluating received information and writing assignment 58h.

**Target group:**
Health science students.

**Recommended or required reading:**
Independent studying in the e-learning environment and reading of literature 60h, peer evaluation of learning diary 17h, evaluating received information and writing assignment 58h.

**Assessment methods and criteria:**
Active and independent studying is required in the e-learning environment. Students actively read literature and complete written assignments. This course unit utilizes continuous assessment.

**Grading:**
Pass/fail

**Person responsible:**
Doctoral candidate (nursing science)

---

351207P: Foundations of Health Care Legislation, 5 op

**Opiskelumuoto:** Basic Studies

**Laji:** Course

**Vastuuysikkö:** Health Sciences

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**
- ay351207P Foundations of Health Care Legislation (OPEN UNI) 5.0 op

**ECTS Credits:**
5 ECTS cr

**Timing:**
Autumn term

**Learning outcomes:**
Student is able to define general foundations of Finnish health care legislation. Student is able to describe and critically evaluate foundational knowledge for health care management.

**Contents:**
Legislation in the promotion of welfare, social and health services, working life and gender equality. Legislation in health care management, preliminary skills and legislative grounds of management in social and health care fields.

**Mode of delivery:**
Teaching in the e-learning environment Optima.

**Learning activities and teaching methods:**
Independent studying in the e-learning environment, reading of literature 77h, evaluating received information and writing assignment 58h.

**Target group:**
Health science students.

**Recommended or required reading:**
Materials/reports of Parliament of Finland, Ministry of Social Affairs and Health, Statistics of Finland, Ministry of Justice in Finland, Finnish legislation of health care and other relevant national and international scientific literature.

**Assessment methods and criteria:**
Active and independent studying is required in the e-learning environment. Students actively read literature and complete the writing assignment. This course unit utilizes final assessment based on a written assignment.

**Grading:**
Pass/fail

**Person responsible:**
Doctoral candidate (health management science)

---

351204P: Foundations of Philosophy and Research Methods in Health Sciences, 5 op

**Opiskelumuoto:** Basic Studies

**Laji:** Course

**Vastuuysikkö:** Health Sciences

**Arvostelu:** 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
  ay351204P  Foundations of Philosophy and Research Methods in Health Sciences (OPEN UNI)  5.0 op

ECTS Credits:
5 ECTS cr
Timing:
Autumn term
Learning outcomes:
The student is able to define the philosophy, ethics and fundamental values of health care services. The student is able to identify the norms and ethical principles underlying the operation of health care, to recognize the central ethical issues in health care, is able to compare the effect of the norms and regulations arising from different cultural backgrounds on health care and patient care. The student is able to critically evaluate ethical decision making in the operational environment of health care. Student is able to define Evidence Based Practice by linking research with practice. Student is able to define the general process of research planning and choosing of a research method. Student identifies the differences between qualitative and quantitative studies. Student recognizes the main principles of good scientific writing, and learns the necessary abilities in referencing.

Contents:

Mode of delivery:
Teaching in the e-learning environment Optima.

Learning activities and teaching methods:
Independent studying and reading in e-learning environment 80h, evaluating the received information and writing of the assignment 40h., preparation for exam and exam 15h.

Target group:
Health science students.

Recommended or required reading:
Materials/reports of National Advisory Board on Social Welfare and Health Care Ethics ETENE, Ethical grounds for the social and health care field (2011), and other relevant national and international scientific literature provided in Optima.

Assessment methods and criteria:
Active and independent studying is required in the e-learning environment. Students actively read literature and complete the writing assignment. This course unit utilizes assessment based on written assignment and exam including self-evaluation and teacher’s evaluation.

Grading:
Pass/fail

Person responsible:
Doctoral candidate (nursing science)

351206P: Health Care Systems in Finland and Inter-professional Networking, 5 op

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
  ay351206P  Health Care Systems in Finland and Inter-professional Networking (OPEN UNI)  5.0 op

ECTS Credits:
5 op
Timing:
Autumn term
Learning outcomes:
Student is able to define the general principles of the Finnish health care system and public health programs of prevention by comparing their principles and programs to those of the World Health Organization. The student is able to distinguish the main functions of inter-professional networking. The student is able to plan, classify and critically justify their new health prevention program with the right ethical focus of health science and patients’ wellness.
Contents:
Ministry of social affairs and health state, its goals and duties, strategies and programmes. Department for the promotion of welfare and health in Finland, Finnish health care policy, Finnish social and health care services, organization of these services and social protection. World Health Organization. Planning of Inter-professional Health and Wellbeing Promotion and Prevention. Inter-professional co-operation and support for the client.

Mode of delivery:
Teaching in the e-learning environment Optima.

Learning activities and teaching methods:
Independent active studying in the e-learning environment, in the first part of the course: reading of literature 78h and exam 3h in the e-learning environment, in the second part of the course: reading of literature 40h and writing of an assignment and designing a health promotion leaflet 20h.

Target group:
Health science students.

Recommended or required reading:

Assessment methods and criteria:
Active and independent studying is required in the e-learning environment. In the first part the students actively read literature and prepare for the online exam. In the second part the student completes a home assignment including an argumentation with the goal of creating a health promotion leaflet. This course unit utilizes continuous assessment based on self-assessment and teacher’s assessment.

Grading:
Pass/fail

Person responsible:
Doctoral candidate (health management science)

351203P: Introduction to Health Sciences, 5 op

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
   ay351203P Introduction to Health Sciences (OPEN UNI) 5.0 op

ECTS Credits:
5 ECTS cr

Timing:
Autumn term

Learning outcomes:
Student is able to use the online learning environment, study independently, and critically evaluate their own learning philosophy and learning style and process in health sciences. The student is able to define science and the various fields of science. The student is able to further explain the position of health sciences among the different fields of science. The student is capable of identifying current issues of research in health sciences in Finland and internationally, in health care management/ in nursing science/ in health science teaching.

Contents:
E-learning environment Optima, personal learning philosophy and style in health sciences. Identifying different areas of science and the position of health sciences among the different fields of science, current issues of research in health sciences and health care management.

Mode of delivery:
Teaching in the e-learning environment Optima.

Learning activities and teaching methods:
Independent studying, learning to manage the e-learning environment Optima 8h, reading literature and producing a mind map 19h, making a search of scientific literature and reading 85h, preparation for exam 20h and exam 3h.

Target group:
Health science students.

Recommended or required reading:
E-learning environment provides materials for reading, relevant national and international scientific literature.

Assessment methods and criteria:
Active and independent study is required in the e-learning environment. Students actively read literature and produce a mind map, make a literature search and read scientific articles, e-learning exam. This course unit utilizes continuous assessment including self-evaluation and teacher’s evaluation.

Grading:
Pass/fail

Person responsible:
Doctoral candidate (health management science)

352114A: Bachelor Thesis and Written Maturity Test, 6 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Health Sciences
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
ay352114A Bachelor Thesis 6.0 op

Required proficiency level:
Student has to have completed the courses:
352251 Qualitative Research Methods in Health Sciences 4 ECTS cr,
352252A-01 Methods of Statistical Analysis in Health Sciences Part I 3,5 ECTS cr,
352252A-02 Methods of Statistical Analysis in Health Sciences Part II 3,5 ECTS cr.

ECTS Credits:
10 ECTS

Language of instruction:
Finnish

Timing:
Autumn term

Learning outcomes:
Upon completion of the course the student is able to compile a Bachelor thesis based on scientific literature or empirical data according to the principles of scientific writing and research where they demonstrate their skills in scientific communication. Student is able to explain and discuss one’s own research. The student is given a possibility to choose a topic for the Bachelor Thesis from the chosen area of expertise in a professional working environment.

According to regulations in Government Decree on University Degrees (794/2004), Section 10, the student must demonstrate that he/she has attained the objectives set for the degree, studies and thesis and the language proficiency. The student must write a maturity essay which demonstrates mastery of the topic of the thesis and skills in the use of Finnish or Swedish.

Contents:
The planning of the research process, carrying out of the research and evaluation. Writing of a Bachelor thesis based on scientific literature and/or empirical data according to scientific principles. The students make their Bachelor thesis in their major subject / field of specialization. Written maturity test.

Mode of delivery:
Contact teaching

Learning activities and teaching methods:
Supervision, seminars and group work 16h, acting as an opponent to another student 4h, reading and retrieving of literature 100h, writing of thesis 138h, preparation for the test and maturity test 12h.

Target group:
Undergraduate health science students.

Recommended or required reading:
Scientific literature relevant to the Bachelor thesis.

Assessment methods and criteria:
: Independent studying, supervision taking place in small groups and seminars, writing of the Bachelor thesis, presenting/discussing the thesis and a written maturity test.

Grading:
Pass / Fail

Person responsible:
Doctoral candidate

Working life cooperation:
No
352232A: Health Administration Science, 10 op

Opiskelumuoto: Intermediate Studies  
Laji: Course  
Vastuuyksikkö: Health Sciences  
Arvostelu: 1 - 5, pass, fail  
Opintokohteen kielet: Finnish  
Leikkaavuudet: ay352232A  
Health Administration Science (OPEN UNI)  
ECTS Credits: 10.0 ECTS cr  
Timing: Autumn term  
Learning outcomes:  
The students are able to analyze and critically evaluate research relating to health management, its development and history so that they can formulate an essay based on their multiprofessional group work. The student is able to build the framework of national and international health politics in the theme discussion.  
Contents:  
Health administration science as a research and study subject and the central concepts and approaches. The historical development of health care administration.  
Mode of delivery:  
Contact teaching.  
Learning activities and teaching methods:  
Lectures 8h, independent studying 53h and essay 60h; theme discussion groups 10h and independent studying 139h.  
Target group:  
Undergraduate health science students.  
Recommended or required reading:  
Relevant scientific literature, and literature on social and health care politics  
Assessment methods and criteria:  
An essay synthesizing foundational issues and a theme discussion carried out by students in groups. Essay 50% and theme discussions 50%.  
Grading:  
1-5/fail  
Person responsible:  
Professor of health management science

351138A: Legal Aspects of Health Care, 3 - 5 op

Opiskelumuoto: Intermediate Studies  
Laji: Course  
Vastuuyksikkö: Health Sciences  
Arvostelu: 1 - 5, pass, fail  
Opintokohteen kielet: Finnish  
Leikkaavuudet: ay351138A  
Legal Aspects of Health Care (OPEN UNI)  
ECTS Credits: 5.0 ECTS cr  
Timing: Autumn term  
Learning outcomes:  
Students are able to define the legislation that regulates the production of health services and know the main focus of content. Students know the judicial basics of the status of health care professionals as well as their rights and obligations. Students are also familiar with patients’ rights and understand their significance from the viewpoint of legal assessment and responsibility for professional activity in health care services. Students are able to identify the means of legal protection available to the patient and are able to apply knowledge of legislation in problem solving.  
Contents:
Production of health care services, obligations of health care professionals, control and responsibility, patient’s status, rights and legal protection.

**Mode of delivery:**
Contact teaching and e-learning.

**Learning activities and teaching methods:**
Lectures 10h, independent studying 34h and e-learning environment 51h, preparation for exam and exam 40h.

**Target group:**
Undergraduate health science students.

**Recommended or required reading:**

Following legislation with applied changes during the period of time:
Decree on Health Care Professionals (564/1994)
Act on the Status and Rights of Patients (785/1992)
Potilasvahinkolaki (585/1986) – currently there is no translation of this document
Sosiaali- ja terveysministeriön asetus potilasasiakirjoista (298/2009) – currently there is no translation of this document
Health Care Act (1326/2010
Mental Health Act (1116/1990)
Laki yksityisestä terveydenhuollosta (152/1990) - currently there is no translation of this document

**352252A: Methods of Statistical Analysis in Health Sciences, 5 op**

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuysikkö:** Health Sciences

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**
- ay352252A Methods of Statistical Analysis in Health Sciences (OPEN UNI) 5.0 op

**ECTS Credits:**
5 ECTS cr

**Timing:**
Autumn term

**Learning outcomes:**
Upon the completion of the studies the students are able to plan the collection of data, to transfer the data into a form which can be processed with a computer and are able to use statistical software. The students are able to apply basic statistical methods in analyzing research questions in the field of health sciences. Additionally, the students are able to report research results and to recognize the issues which are important in interpreting the results. The students are aware of the advanced statistical methods applied in analyzing research data in health sciences. The students are able to apply multivariable methods, especially regression models. The students are able to report empirical results of multivariable methods used in international health science publications and recognize the issues involved in interpreting the results.

**Contents:**
Mode of delivery: Contact teaching and group exercise.

Learning activities and teaching methods: Lectures 28h, group exercise 21h and home assignment.

Target group: Undergraduate health science students.

Assessment methods and criteria: Final examination, accepted written assignments and participation in group exercises

Grading: Pass/fail

Person responsible: Associato Professor Pentti Nieminen

352233A: Nursing Science, 10 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuysikkö: Health Sciences

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ECTS Credits: 10 ECTS cr

Timing: Autumn term

Learning outcomes: The student is aware of the fundamentals of the philosophy of science and ethics, is able to describe the development of health sciences, schools of thought and various emphases within health sciences, and research areas. The student is able to define evidence based practice and to discuss the importance of evidence in health sciences in the development of health care.

Mode of delivery: Multidimensional teaching methods.

Learning activities and teaching methods: Lectures 20h, expert group work 20h, independent studying 115h and cooperative written assignment 115h.

Target group: Undergraduate health science students.

Other relevant national and international scientific literature.

Assessment methods and criteria: Active participation in lectures and expert group work (min. 80% of required participation). Cooperative written assignment. Self-evaluation.

Grading: 1-5/ fail

Person responsible: Professor of nursing science/ university lecturer
352251A: Research Methods in Health Science, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Health Sciences
Arvostelu: 1-5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
   ay352251A Qualitative Research Methods in Health Sciences (OPEN UNI) 5.0 op

ECTS Credits:
5 ECTS cr
Timing:
Spring term

Learning outcomes:
Student is able to choose critically evaluated and relevant research methods for the subject of research in multidisciplinary small group work; is aware of the requirements of good scientific writing; is able to evaluate basic ethical issues relating to research and researchers, is able to evaluate and define trustworthiness of qualitative studies. Student is able to write a research plan and develop previously learned research methods in practical exercise tasks.

Contents:
Collecting qualitative research data and analyzing the data, trustworthiness in qualitative research, principles of research ethics, writing of a research plan and a research report.

Mode of delivery:
Multidimensional teaching.

Learning activities and teaching methods:
The course utilizes continuous evaluation. Lectures and exercises 25h, independent studying and group work 110h. 80% of required participation in contact teaching.

Target group:
Undergraduate health science students.

Prerequisites and co-requisites:

Recommended or required reading:
Relevant scientific literature.

Assessment methods and criteria:
Active participation in exercises and group work.

Grading:
1-5/fail

Person responsible:
University lecturers of nursing and health management sciences
