

Opasraportti

LuTK - Chemistry 2010-2011 (2010 - 2011)

Degree Programme in Chemistry

The Master's degree in Chemistry is carried out in one of the following specialization lines:

Specialization line	Major
Inorganic Chemistry	Inorganic Chemistry
Physical Chemistry	Physical Chemistry
Structural Chemistry	Structural Chemistry
Subject Teacher	A student chooses his/her major from the list above

The Bachelor's degree in Chemistry and The Master's degree in Chemistry

The Bachelor's degree in Chemistry

Studies for B.Sc. Degree (180 cr):

Specialization in chemistry	B.Sc.
General Studies	10
Basic Studies	25

Intermediate Studies	65
Minor Subject Studies, from which	50
- Biochemistry a minimum 5 cr	
- Physics and Mathematical Sciences <i>together</i> a minimum 25 cr	
Optional studies	30
All together a minimum	180 cr

Compulsory Studies for B.Sc. Degree

General studies/General Studies in	Cr	Code	Semester
Chemistry 10 cr			
Orientation Course for New Students (Chemistry today, tutorial, HOPS)	1	780078Y	1st autumn- 1st spring
English 1	2	902002Y	1st autumn
English 2	2	902004Y	2nd spring
Literature of Chemistry and Information Retrieval	2	780379A	2nd autumn+ 3rd autumn
Maturity test	0	780381A	3rd spring
Swedish language	2	901004Y	2nd spring
Seminar for the Degree of B.Sc.	1	780380A	3rd spring

Chemistry 90 cr			

Basic Studies 25 cr	Cr	Code	Semester
Introduction to Analytical Chemistry	4	780111P	1st spring
Introduction to Chemistry	12	780113P	1st autumn
Introduction to Organic Chemistry	6	780103P	1st autumn-1st spring
Introductory Laboratory Course	3	780122P	1st autumn

Intermediate Studies (35 cr + 15 cr + 15 cr) 65 cr	Cr	Code	Semester
Inorganic Chemistry I	6	780353A	2nd spring
Laboratory Course I in Inorganic Chemistry	7	780330A	1st spring+2nd spring
Physical Chemistry I	6	780347A	2nd autumn
Laboratory Course I in Physical Chemistry	5	780331A	2nd autumn
Chemical legislation in Finland	1	780321A	3rd autumn
Organic Chemistry I	6	780389A	2nd autumn
Laboratory Course I in Organic Chemistry	4	780329A	2nd autumn
Instrumental Analysis	5	780328A	3rd autumn
Introduction to Polymer Chemistry	2	780326A	1st spring
Structural Chemistry I	5	780317A	3rd autumn
Environmental Chemistry	3	780373A	3rd autumn
Thesis for the Degree of B.Sc.	6	780300A	3rd autumn-3rd spring
Research Training	9	780301A	3rd autumn-3rd spring

Minor Subject Studies 50 cr	Cr	Code	Semester
<i>Biochemistry a minimum 5 cr</i>			
Biomolecules	5	740148P	2nd autumn-2nd spring
<i>Physics and Mathematical Sciences together a minimum 25 cr</i>			
Johdatus matemaattiseen päättelyyn	5		1st autumn

Optional Studies 30 cr

The Master's degree in Chemistry

Studies for M.Sc.Degree (120 cr)

Chemistry 104 cr	Cr	Code	Semester
Advanced Studies 104 cr			
Inorganic Chemistry II	4	781642S	4th autumn
Physical Chemistry II	4	782631S	4th autumn
Organic Chemistry II	4	783643S	4th autumn
Seminars	4	780690S	5th spring

Research Project	12	780601S	4th autumn-4th spring
A survey of literature	9	78x605S	5th autumn-5th spring
Maturity test	0	780699S	5th spring
Master Thesis of the orientation area	38	78x601S	5th autumn-5th spring
Final examination of the orientation area	7	78x600S	5th spring
Optional Advanced Studies of Chemistry	22		

Optional Studies 16 cr

**The Bachelor's degree in Subject teacher specialization
and The Master's degree in Subject teacher specialization**

The Bachelor's degree in Chemistry (Subject teacher)

Studies for B.Sc. Degree (180 cr):

Subject Teacher Specialization	B.Sc.
General Studies	10
Basic Studies	25
Intermediate Studies	60
The other teaching Subject (Physics, Mathematical Sciences or Information technology)	40-50
Pedagogic Studies	25

Optional studies	20-10
All together a minimum	180 cr

Compulsory Studies for B.Sc. Degree

General studies/General Studies in Chemistry 10 cr	Cr	Code	Semester
Orientation Course for New Students (Chemistry today, tutorial, HOPS)	1	780078Y	1st autumn- 1st spring
English 1	2	902002Y	1st autumn
English 2	2	902004Y	2nd spring
Literature of Chemistry and Information Retrieval	2	780379A	2nd autumn+ 3rd autumn
Maturity test	0	780381A	3rd spring
Swedish language	2	901004Y	1st spring
Seminar for the Degree of B.Sc.	1	780380A	3rd spring

Chemistry 85 cr	Cr	Code	Semester
Basic Studies 25 cr			
Introduction to Analytical Chemistry	4	780111P	1st spring
Introduction to Chemistry	12	780113P	1st autumn
Introduction to Organic Chemistry	6	780103P	1st autumn-1st spring
Introductory Laboratory Course	3	780122P	1st autumn

Intermediate Studies (35 cr + 8 cr + 2 cr + 15 cr) 60 cr	Cr	Code	Semester
Inorganic Chemistry I	6	780353A	2nd spring
Laboratory Course I in Inorganic Chemistry	7	780330A	1st spring+2nd spring
Physical Chemistry I	6	780347A	2nd autumn
Laboratory Course I in Physical Chemistry	5	780331A	2nd autumn
Chemical legislation in Finland	1	780321A	3rd autumn

Maturity test	0	780699S	5th spring
Master Thesis of the orientation area	20	78x601S	5th autumn-5th spring
Final examination of the orientation area	7	78x600S	5th spring

Optional Advanced Studies of Chemistry	21		
--	----	--	--

The other Teaching Subject 20-10 cr
Physics
Mathematical Sciences
Information technology

Pedagogic Studies 35 cr

Optional Studies 5-15 cr

Chemistry as a minor subject

Chemistry 25 cr:

Subject teachers

Introduction to Chemistry (780113P), 12 cr

Introduction to Organic Chemistry (780103P), 6 cr

Introductory Laboratory Course (780122P), 3 cr

Introduction to Analytical Chemistry (780111P), 4 cr

Others

Introduction to Chemistry (780113P), 12 cr

Introduction to Organic Chemistry (780103P), 6 cr

Introduction to Analytical Chemistry (780111P), 4 cr

Environmental Chemistry (780373A), 3 cr

Chemistry 60 cr:

Basic Studies in Chemistry 25 cr (Subject Teacher) and compulsory Intermediate Studies:

Inorganic Chemistry I (780353A), 6 cr

Physical Chemistry I (780347A), 6 cr

Organic Chemistry I (780389A), 6 cr

And at least one of the followings:

Laboratory Course I in Inorganic Chemistry (780330A), 7 cr

Laboratory Course I in Physical Chemistry (780331A), 5 cr

Laboratory Course I in Organic Chemistry (780332A), 4 cr

And optional Intermediate Studies in Chemistry

Chemistry 120cr:

Chemistry 60 cr

Advanced Studies in Chemistry 60 cr

A record of Chemistry as a minor subject will be given when the amount of accepted studies is at least 15 credits.

Opintojaksojen kuvaukset

Tutkintorakenteisiin kuulumattomien opintokokonaisuuksien ja -jaksojen kuvaukset

782630S: , 3 op

Voimassaolo: - 31.07.2010

Opiskelumuoto: Advanced Studies

Laji: Course

Arvostelu: 1 - 5, pass, fail

Opettajat: Laasonen Kari

Opinto-kohteen oppimateriaali:

Atkins, Peter , , 2006

Atkins, P. W., , 1997

Opinto-kohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish or English on demand.

Timing:

4th spring.

Learning outcomes:

After this course the student is familiar with the quantum mechanics related to various types of spectroscopies

Contents:

Quantum mechanics of radiation field and matter. Quantum description of molecular rotation and vibrations. IR and Raman spectra. Fluorescence and phosphorescence.

Learning activities and teaching methods:

30 hours of lectures + 6 hours of assignment exercises, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry II (782631S).

Recommended or required reading:

P. Atkins and J. De Paula. Atkins' Physical Chemistry, 8th ed. Chapters 13-15 (also 6th ed., 1998 or 7th ed., 2002, and Atkins, P.W. ja Friedman, R.S., Molecular Quantum Mechanics, 3th ed., Oxford University Press.

Person responsible:

Prof. K. Laasonen

783633S: Adhesion Chemistry, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Hormi Osmo

Opintokohteen oppimateriaali:

Skeits, I., , 1990

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of the composition of an adhesive formulation and is also familiar with the basics of adhesion theory.

Contents:

Adhesion theory, surface treatment methods, thermoplastic block copolymers, polyurethanes, poly(vinyl acetate), acrylates, anaerobic adhesives, cyanoacrylates.

Learning activities and teaching methods:

24 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Polymer Chemistry (780326A) and Physical Chemistry of Surfaces (782620S).

Recommended or required reading:

Skeits, I.: Handbook of Adhesives, 3rd ed., Van Nostrand Reinhold, New York, 1990.

Person responsible:

Prof. O. Hormi

781625S: Aquatic Chemistry, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Leena Kaila

Opintokohteen oppimateriaali:

Stumm, Werner , , 1996

Buffle, Jacques , , 1988

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

After this course the student should understand chemistry of natural waters: chemical equilibrium and reaction rates in them. Models of natural waters, influences of pollution on them.

Contents:

Atmosphere-water-solid-interactions and regulation of the chemical composition of natural waters.

Learning activities and teaching methods:

32 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Analytical Chemistry (780111P).

Recommended or required reading:

Stumm, W. and Morgan, J.J.: Aquatic Chemistry - Chemical Equilibria and Rates in Natural Waters, 3rd ed., John Wiley & Sons, New York, 1995; Buffle, J.: Complexation Reactions In Aquatic Systems: An Analytical Approach, Ellis Horwood Limited, Chichester, 1988.

Person responsible:

Lecturer L. Kaila

782626S: Atmospheric Chemistry, 3 - 4 op

Voimassaolo: - 21.07.2010

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laasonen Kari

Opintokohteen oppimateriaali:

Seinfeld, John H., , 1998

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn. The course is lectured every other year.

Learning outcomes:

After completing this course the students should have good knowledge of the physical chemistry of several atmospheric processes including the ozone depletion, acid rain and greenhouse gases.

Contents:

The course concentrates on atmospheric phenomena, especially the physical chemistry related to atmospheric pollutions. Topics include: the chemical reaction on different parts of atmosphere (including ozone depletion, atmospheric sulphur chemistry), aerosols, formation of small droplets and their impurities, acid rain and global warming.

Learning activities and teaching methods:

30 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry I (780347A) and Physical Chemistry II (782631S) or P.W. Atkins, Physical Chemistry, part 3.

Recommended or required reading:

Material given by the lecturer (in Finnish) and Seinfeld, J.H. and Pandis, S. N.: Atmospheric Chemistry and Physics, Willey-Interscience, 1998.

Person responsible:

Prof. K. Laasonen

781637S: Atomic Spectrometric Methods, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Paavo Perämäki

Opintokohteen oppimateriaali:

Lajunen, Lauri H. J. , , 2004

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

Upon completion of the course, student should have acquired knowledge and understanding of modern AAS and ICP-OES techniques and their advantages and "weak points" in the point of view of elements and samples to be analyzed.

Contents:

Theoretical background of the different atomic spectrometric techniques (atomic absorption spectrometry, atomic emission spectrometry employing plasma sources, plasma mass spectrometry), modern instrumentation and determination of various elements, interference effects and their correction, optimization of the determination procedures, instrument diagnostics.

Learning activities and teaching methods:

30 hours of lectures + seminar + practical exercise, one final examination.

Target group:

Chemistry, optional.

Recommended or required reading:

Lajunen, L.H.J. and Perämäki, P.: Spectrochemical Analysis by Atomic Absorption and Emission, 2nd ed., The Royal Society of Chemistry, 2004

Person responsible:

Prof. P. Perämäki

780109P: Basic Principles in Chemistry, 4 op

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Minna Tiainen

Opintokohteen oppimateriaali:

Petrucci, Ralph H. , , 2002

Opintokohteen kielet: Finnish

Leikkaavuudet:

780120P Basic Principles in Chemistry 5.0 op

ay780117P General and Inorganic Chemistry A (OPEN UNI) 5.0 op

780115P	General and Inorganic Chemistry II	6.0 op
780114P	General and Inorganic Chemistry I	6.0 op
780113P	Introduction to Chemistry	12.0 op
780101P	Introduction to Physical Chemistry	7.0 op
780101P2	Physical Chemistry I	4.0 op
780107P	Basic Course in Inorganic and Physical Chemistry	7.5 op
780152P	Inorganic and Physical Chemistry I	7.5 op
780153P	General and Inorganic Chemistry	7.5 op
780154P	Basic Inorganic Chemistry	7.5 op

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

1st autumn.

Learning outcomes:

Upon completion the student should be able to display an understanding of basic chemistry phenomenon; equilibrium of acids and bases, chemical equilibrium, redox reactions and stoichiometry.

Contents:

Introduction to chemistry, stoichiometry, redox reactions, chemical equilibrium, the equilibrium of acid and bases, buffer solutions, titration.

Learning activities and teaching methods:

36 hours of lectures, one final examination.

Target group:

Biology, Geology, Mechanical Engineering, Process Engineering, compulsory.

Geography, optional.

Recommended or required reading:

Petrucci, R.H., Harwood, W.S., and Herring, F.G.: General Chemistry: Principles and Modern Applications, Prentice Hall, 8th edition (2002) or a newer edition.

Person responsible:

Lecturer M. Tiainen

Other information:

This course is only for students who have chemistry as a minor subject.

This course has partly the same contents as the course Introduction to Chemistry (780113P) (and the course Introduction to Physical Chemistry). If a student performs also the course Introduction to Chemistry, this course will be cancelled in his/hers study register.

780372A: Basic Principles of Green Chemistry, 4 op**Opiskelumuoto:** Intermediate Studies**Laji:** Course**Vastuuyksikkö:** Department of Chemistry**Arvostelu:** 1 - 5, pass, fail**Opettajat:** Minna Tiainen, Toivo Kuokkanen**Opintokohteen oppimateriaali:****Lancaster, Mike** , , 2002**Opintokohteen kielet:** Finnish**Leikkaavuudet:**

780355A	Environmental Chemistry and Hazardous Wastes	4.0 op
780360A	Environmental Chemistry and Hazardous Wastes	5.5 op
780375A	Basic Principles of Green Chemistry	2.0 op

ECTS Credits:

4 credits

Language of instruction:

Finnish.

Timing:

Spring.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of twelve principles of green chemistry.

Contents:

Environmental friendly chemistry. The principles of green chemistry with examples of real life, classification, utilization, refining and disposal of environmentally hazardous wastes. Hazardous Waste Management of the University of Oulu.

Learning activities and teaching methods:

37 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Chemistry (780113P) or Introduction to Physical Chemistry (780101P) and Introduction to Inorganic Chemistry (780102P) or Basic Principles in Chemistry (780109P).

Recommended or required reading:

Lancaster M.: Green Chemistry: An introductory text, RSC, 2002. Material given in the lecture (hazardous wastes).

Person responsible:

Lecturer Minna Tiainen and Doc. Toivo Kuokkanen.

782625S: Basic Principles of Quantum Chemistry, 3 - 4 op

Voimassaolo: - 31.07.2010

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laasonen Kari

Opintokohteen oppimateriaali:

Cramer, Christopher J., , 2002

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn/spring. The course is lectured every other year.

Learning outcomes:

After completing this course the students should have good knowledge of basics of quantum chemical modelling.

Contents:

This course focuses on the quantum chemical modelling. The emphasis is on the many-electron methods like Hartree-Fock, configuration method and density functional theory. The computational aspects like the basis set are discussed in detail. Application to IR and Raman spectra are considered in detail. This course focuses on the theoretical aspects whereas the hands-on exercises are dealt in the course 781626S Molecular modelling workshop.

Learning activities and teaching methods:

30 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry II (782631S).

Recommended or required reading:

Material given in the lectures (in Finnish) and Cramer, C.J.: Essentials of Computational Chemistry, Willey, 2002.

Person responsible:

Prof. K. Laasonen

784637S: Biological NMR Spectroscopy, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Cavanagh, John, , 1996

Opintokohteen kielet: English

ECTS Credits:

3 credits

Language of instruction:

Finnish and English on demand.

Timing:

The course is lectured every other year.

Learning outcomes:

After this course the students are familiar with production of most common 2D, 3D and 4D double and triple resonance NMR spectra.

Contents:

During the course the students get hands on experience on setting up and acquiring multi dimensional spectra as well as processing and converting data to other formats and assigning protein backbones.

Learning activities and teaching methods:

14 hours of lectures + applications, 30 hours of exercises, one final examination.

Target group:

Chemistry, optional.

Recommended or required reading:

Cavanagh: Protein NMR Spectroscopy, Academic Press, 1995, ISBN: 0121644901.

Person responsible:

Senior assistant S. Mattila

782621S: Catalysis, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Pursiainen Jouni

Opintokohteen oppimateriaali:

Gates, Bruce C. , , 1992

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

Upon successful completion students should have a basic understanding of the theory of catalysis. Thermodynamic and kinetic background will be studied, including mechanisms of the most important catalytic reactions. Applications, preparation, characterisation and structure of homogenous, heterogeneous and enzymatic catalysts will be discussed.

Contents:

Principles of catalysis, homogeneous catalysis in solutions, polymer catalysis, zeolites, heterogeneous catalysis on surfaces.

Learning activities and teaching methods:

30 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry II (782631S).

Recommended or required reading:

Gates, B.C.: Catalytic Chemistry, John Wiley & Sons, 1992, partly. Examination based on the lectures.

Person responsible:

Prof. J. Pursiainen

782627S: Chemical Applications in Hazardous Waste Management and Environmental Technology, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Toivo Kuokkanen

Opintokohteen oppimateriaali:

Clark, J.H., , 1995

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

After completing this course, the student should have acquired knowledge and understanding of theory and practice with chemical applications in utilization and disposal of chemical wastes, especially hazardous wastes as well as with new chemical environmental technology

Contents:

Principles and activities in management of hazardous and other chemical wastes, modern treating methods of chemical wastes, new chemical methods and technologies in the utilization of chemical wastes, especially hazardous wastes

Learning activities and teaching methods:

30 hours of lectures + seminar + practical exercise, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Basic Principles in Green Chemistry (780372A).

Recommended or required reading:

Clark, J.H.: Chemistry of Waste Minimization, Blackie Academic & Professional, Glasgow 1995, partly and material handed out by the lecturer.

Person responsible:

Doc. T. Kuokkanen

780321A: Chemical Legislation in Finland, 1 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Pentti Oksman

Opintokohteen oppimateriaali:

Sundquist Anna-Liisa, Koivumäki Tapani ja Aalto Asko, , 2007

Luhänen, Raimo, , 2008

Opintokohteen kielet: Finnish

Leikkaavuudet:

780681S Chemical Legislation in Finland 1.0 op

ECTS Credits:

1 credits

Language of instruction:

Finnish

Timing:3rd autumn.**Learning outcomes:**

After completion of the course students have a basic understanding of Finnish legislation concerning chemistry and occupational health. He/she is acquainted with the limitations of the use of dangerous chemicals and is able to find updated information of them. After completion of the course students should also have a basic understanding of the main laws of pressure containers and tanks of compressed gases as well as of radiation.

Contents:

Safety at work, sanitarily and environmentally hazardous chemicals, explosive materials and combustible liquids, pressure containers and tanks of compressed gases.

Learning activities and teaching methods:

10 hours of lectures, one final examination.

Target group:

Chemistry, compulsory.

Recommended or required reading:

Työpaikan lakikirja 2008. Työpaikan kemikaalilainsäädäntö 2008.

Person responsible:

Senior Laboratory Manager P. Oksman, PhD

780395A: Chemistry for Teachers, 4 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Leena Kaila

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish

782634S: Chemistry in industrial applications, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Ulla Lassi

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with chemical applications in process and environmental technology. In particular, new applications of chemistry are considered.

Contents:

Catalytic applications in water purification, catalytic oxidation, preparation of biofuels from biomass, biomass gasification and the utilisation of biogas, chemistry and chemical reactions in mining processes etc. (visiting lecturers from the companies)

Learning activities and teaching methods:

30 hours of lectures, one final examinations.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry I (780347A) and Physical Chemistry II (782631S).

Recommended or required reading:

Material given by the lecturer, scientific review papers.

Person responsible:

Prof. U. Lassi.

781610S: Chemistry of Metal Complexes, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Leena Kaila

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

A profound understanding of concepts of coordination equilibrium, complex compounds in aqueous solutions and their solution equilibrium.

Contents:

Concepts of metal complexes in aqueous solutions, experimental methods, methods for construction and refinement of equilibrium models, applications.

Learning activities and teaching methods:

20 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended or required reading:

Material handed out by the lecturer.

Person responsible:

Lecturer L. Kaila

783627S: Chemistry of Natural Substances I, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Marja Lajunen

Opintokohteen oppimateriaali:

Davis, Benjamin G. , , 2002

Dewick, Paul M. , , 1997

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn or spring. The course is lectured every other year.

Learning outcomes:

The student knows what are natural compounds and their tasks in nature. He/she knows carbohydrates, their types, structures and reactivity, anomeric effect, mutarotation and their consequences, protection, and glycosylation. He/she knows lipids: Fatty acids, eicosanoids, prostaglandins, phospholipids, their biosynthesis, chemistry and role in life science.

Contents:

Natural products: Carbohydrates and lipids.

Learning activities and teaching methods:

20 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Organic Chemistry I (780389A) and Organic Chemistry II (783643S).

Recommended or required reading:

Material handed out by the lecturer. Davis, B.G. and Fairbanks, A.J.: Carbohydrate Chemistry, Oxford Chemistry Primers, 2002, partly; Dewick, Paul M.: Medicinal Natural Products, A Biosynthetic Approach, Wiley & Sons Ltd, 1998.

Person responsible:

Prof. M. Lajunen

783641S: Chemistry of Natural Substances II, 3 op**Opiskelumuoto:** Advanced Studies**Laji:** Course**Vastuuyksikkö:** Department of Chemistry**Arvostelu:** 1 - 5, pass, fail**Opettajat:** Marja Lajunen**Opintokohteen oppimateriaali:****Dewick, Paul M.** , , 1997**Mann, J., Davidson, R.S., Hobbs, J.B., Banthorpe, D.V. ja Harborne, J.B.** , , 1994**Opintokohteen kielet:** Finnish**ECTS Credits:**

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

The student knows types of natural products: terpenoids, steroids, and alkaloids. Their varieties, properties, biosynthetic background and occurrence.

Contents:

Natural products from secondary metabolism: Terpenoids, steroids and alkaloids.

Learning activities and teaching methods:

20 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Organic Chemistry I (780389A) and Organic Chemistry II (783643S).

Recommended or required reading:

Material handed out by the lecturer and Mann, J., Davidson, R.S., Hobbs, J.B., Banthorpe, D.V. ja Harborne, J.B.: Natural Products, Their Chemistry and Biological Significance, Longman Scientific & Technical, 1995. Dewick, Paul M.: Medicinal Natural Products, A Biosynthetic Approach, Wiley & Sons Ltd, 1998.

Person responsible:

Prof. M. Lajunen

781621S: Chemistry of Non-Metals, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Raija Oilunkaniemi

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

This course will give the student an overview of the development of chemistry of non-metals by examining the current literature of the field.

Contents:

New methods in the synthesis of non-metallic compounds, structural chemistry, and chemical properties of non-metallic compounds.

Learning activities and teaching methods:

18 hours of lectures + seminar, one final examination, attendance at the lectures.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A).

Recommended or required reading:

Material handed out by the lecturer.

Person responsible:

Doc. R. Oilunkaniemi

783635S: Chemistry of Paints and Surface Coatings, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Hormi Osmo

Opintokohteen oppimateriaali:

Paul, Swaraj , , 1985

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of the chemical composition of paints and coatings and modern technologies used in the preparation of paint / coating formulations.

Contents:

Most important polymers used as binders in paints / coatings, introduction to colour theory, new technologies used in the preparation of paints / coatings.

Learning activities and teaching methods:

24 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Polymer Chemistry (780326A).

Recommended or required reading:

Paul, S.: Surface Coatings Science and Technology, John Wiley & Sons, New York, 1986.

Person responsible:

Prof. O. Hormi

781613S: Chemistry of Rare Earth Elements, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laitinen Risto

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish or English

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

This course will familiarize students with the properties and applications of rare earths.

Contents:

Occurrence and separation properties of rare earths, chemical and physical characteristics (especially spectroscopic), coordination chemistry, and most important applications.

Learning activities and teaching methods:

18 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A) and Inorganic Chemistry II (781642S).

Recommended or required reading:

Material handed out by the lecturer.

Person responsible:

Prof. R. Laitinen

781645S: Chemistry of Solid Fuels Ashes, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Minna Tiainen

Opintokohteen oppimateriaali:

Raiko, R., Saastamoinen, J., Hupa, M. & Kurki-Suonio, I., , 2002

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of chemistry of combustion process, formation mechanisms of ashes and ash related problems.

Contents:

Solid fuels, ash forming material, combustion techniques, heterogeneous combustion, ash formation mechanisms, ash related problems in boiler, analytical methods (SEM-EDS).

Learning activities and teaching methods:

20 hours of lectures, problem based learning, portfolio, attendance is compulsory.

Target group:

Chemistry, optional.

Recommended optional programme components:

780353A Inorganic Chemistry I.

Recommended or required reading:

Raiko, R., Saastamoinen, J., Hupa, M. ja Kurki-Suonio, I., Poltto ja palaminen, Gummerus Oy, Jyväskylä (in Finnish).

Assessment methods and criteria:

Problem based learning, portfolio.

Person responsible:

Lecturer M. Tiainen

781644S: Computational Inorganic Chemistry, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laitinen Risto

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English

Timing:

4th or 5th year. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with review of computational methods in quantum inorganic chemistry.

Contents:

Review of computational methods in quantum chemistry (molecular mechanics, semiempirical methods, ab initio methods, DFT methods), basis sets, computation of molecular properties, transition states, spectroscopic properties. The application of the methods in inorganic chemistry will be illustrated by examples from current literature.

Learning activities and teaching methods:

28 hours of lectures, 14 hours of exercises.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A), Inorganic Chemistry II (781642S) and Quantum Mechanics and Spectroscopy (782630S).

Recommended or required reading:

Recommended reading: Young, D.: Computational Chemistry: A Practical Guide for Applying Techniques to Real World Problems, Wiley-Interscience, 2001; Hinchliffe, A.: Molecular Modelling for Beginners, John Wiley & Sons Ltd, 2003.

Person responsible:

Doc. H. Tuononen (University of Jyväskylä) and Prof. R. Laitinen

784626S: Computer Analysis of NMR Spectra, 2 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Günther, Harald , , 1995

Opintokohteen kielet: Finnish

ECTS Credits:

2 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with computer aided NMR spectral processing and production, and assignment tools.

Contents:

The basic theory for analysing NMR spectra; the structure, function and use of simulating and iterating analysis programs.

Learning activities and teaching methods:

8 hours of lectures + 28 hours of exercises, one final examination.

Target group:

Chemistry, optional.

Recommended or required reading:

Günther, H.: NMR Spectroscopy, 2nd ed., Wiley, 1995, partly. Laatikainen, R. ja Niemitz, M.: Perch, An Integrated software for Analysis of NMR spectra on PC, University of Kuopio, 1994.

Person responsible:

Senior assistant S. Mattila

780396A: Demonstrations in Physics and Chemistry, 2 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Leena Kaila

Opintokohteen kielet: Finnish

Leikkaavuudet:

766309A Demonstrations in Physics and Chemistry 2.0 op

ECTS Credits:

2 credits

781632S: Determination of Trace Elements, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Paavo Perämäki

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of special tasks that must be taken into account when very low element concentrations are measured.

Contents:

Sampling and sample preparation in trace and ultra trace elemental analysis, systematic errors (losses and contamination), clean rooms, separation and preconcentration techniques, hyphenated techniques.

Learning activities and teaching methods:

24 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Sampling and Sample Preparation (781640S).

Recommended or required reading:

Material handed out by the lecturer.

Person responsible:

Prof. P. Perämäki

780373A: Environmental Chemistry, 3 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Minna Tiainen

Opintokohteen oppimateriaali:

VanLoon, Gary W. , , 2000

Opintokohteen kielet: Finnish

Leikkaavuudet:

780359A	Environmental Chemistry	4.0 op	
780355A	Environmental Chemistry and Hazardous Wastes	4.0 op	
780316A	Environmental Chemistry	2.0 op	
780360A	Environmental Chemistry and Hazardous Wastes	5.5 op	

ECTS Credits:

3 credits

Language of instruction:

Finnish

Timing:

3rd autumn.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of chemistry of atmosphere, hydrosphere and terrestrial environment.

Contents:

Fundamentals of environmental chemistry; chemistry of the soil, natural and waste waters and atmosphere, circulation of chemical compounds in the nature, chemical releases, environmentally toxic and other noxious compounds, environmental analytics and basics of physical measurements.

Learning activities and teaching methods:

30 hours of lectures, essay, one final examination.

Grading: 70% final examination, 30% essay.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Introduction to Chemistry (780113P) or Introduction to Physical Chemistry (780101P) and Introduction to Inorganic Chemistry (780102P) or Basic Principles in Chemistry (780109P).

Recommended or required reading:

van Loon, G.W. & Duffy, S.J.: Environmental Chemistry, A Global Perspective, Oxford, 2000.

Person responsible:

Lecturer M. Tiainen.

4 credits

Language of instruction:

Finnish

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

After this course student becomes aware of importance experimental design and is able to apply most common experimental designs in the field of chemistry.

Contents:

Factorial designs, mixture designs, D-optimal designs, response surface methodology. Computer programmes are applied during the course in the design and analysis of experiments.

Learning activities and teaching methods:

30 hours of lectures, exercises: computer aided analysis of experimental data, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Statistical Methods in Analytical Chemistry (781631S).

Recommended or required reading:

Massart, D.L., Vandeginste, B.G.M., Buydens, L.M.C., De Jong, S., Lewi, P.J. and Smeyers-Verbeke, J.: Handbook of Chemometrics and Qualimetrics: Part A, Elsevier, 1997.

782618S: High Pressure Kinetics, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Toivo Kuokkanen

Opintokohteen oppimateriaali:

Porter G., , 1970

Van Eldik, R., , 1986

Reichardt, Christian , , 2003

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish

Timing:

4th or 5th year. The course is lectured every other year.

Learning outcomes:

After completing this course, the student should have acquired knowledge and understanding of different effects of pressure on various chemical reactions, especially on reaction rates.

Contents:

Chemical applications of high pressure, determination and calculation of activation volumes, activation volumes of different reaction classes, reaction kinetics by UV/Vis spectrometric methods, especially organic host-guest reactions

Learning activities and teaching methods:

20 hours of lectures + two home works, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry I (780347A) and Physical Chemistry II (782631S).

Recommended or required reading:

Material given in the lecture and partly: Porter, G.: Progress in Reaction Kinetics, Pergamon Press, Oxford, 1970., van Eldik, R.: Inorganic High Pressure Chemistry, Elsevier, New York 1986 and Reichardt, C.: Solvents and Solvent Effects in Organic Chemistry, 3th ed., Wiley-VCH Verlag GmbH, Weinheim 2003

781638S: ICP-MS Workshop, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Paavo Perämäki

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

Upon completion of the course, student should have acquired knowledge and understanding of modern ICP-MS techniques and various applications of these techniques.

Contents:

ICP as an ion source, instrumentation (e.g. mass analyzers) and their properties, matrix and other interference effects and their elimination, special sample introduction techniques.

Learning activities and teaching methods:

20 hours of lectures and demonstrations + seminar presentation, and practical exercise, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Instrumental Analysis (780328A).

Recommended or required reading:

Material handed out by lecturer.

Person responsible:

Prof. P. Perämäki

780341A: Industrial Training I, 2 op

8 credits

Timing:

2nd or 3rd year.

Target group:

Chemistry, optional.

780353A: Inorganic Chemistry I, 6 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen oppimateriaali:

Atkins, P., Overton, T., Rourke, J., Weller, M. ja Armstrong, F., , 2006

Opintokohteen kielet: Finnish

Leikkaavuudet:

780356A Inorganic Chemistry 9.0 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

6 credits

Language of instruction:

Finnish

Timing:

2nd spring.

Learning outcomes:

After this course the student is familiar with most important basic principles of modern inorganic chemistry.

Contents:

Atomic structure, chemical bond and molecular structure, solid state chemistry, acid-base theories, oxidation-reduction reactions, overview of main group chemistry.

Learning activities and teaching methods:

40 hours of lectures + 16 hours of exercises, (8 home assignments), one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Introduction to Chemistry (780113P) or Introduction to Physical Chemistry (780101P) and Introduction to Inorganic Chemistry(780102P) or Basic Principles in Chemistry (780109P).

Recommended or required reading:

Atkins, P., Overton, T., Rourke, J., Weller, M., and Armstrong, F., Inorganic Chemistry, 5th ed., Oxford University Press, 2009.

Person responsible:

Prof. R. Laitinen

781642S: Inorganic Chemistry II, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen oppimateriaali:

Atkins, P., Overton, T., Rourke, J., Weller, M. ja Armstrong, F., , 2006

Opintokohteen kielet: Finnish

Leikkaavuudet:

780391A Inorganic Chemistry II 4.0 op

780361A Inorganic Chemistry II 4.0 op

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn.

Learning outcomes:

After this course the student is familiar with basic concepts of coordination chemistry of transition metal complexes.

Contents:

Structure and bonding of complexes of transition metals and their chemical and spectroscopic properties, organometallic chemistry, catalysis.

Learning activities and teaching methods:

22 hours of lectures + 16 hours of exercises, (8 home assignments), one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Inorganic Chemistry I (780353A).

Recommended or required reading:

Atkins, P., Overton, T., Rourke, J., Weller, M., and Armstrong, F., Inorganic Chemistry, 5th ed., Oxford University Press, 2009.

Person responsible:

Doc. R. Oilunkaniemi.

780328A: Instrumental Analysis, 4 - 5 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Paavo Perämäki

Opintokohteen oppimateriaali:

Skoog, Douglas A. , , 1992

Opintokohteen kielet: Finnish

Leikkaavuudet:

780324A Analytical Chemistry II 4.0 op

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

3rd autumn.

Learning outcomes:

After completing this course, the student should be able to understand the principles of most common instrumental methods of analysis that are used, for example, in industry and research.

Contents:

Atomic absorption and emission spectrometry, X-ray fluorescence spectrometry, molecular fluorescence, phosphorescence and chemiluminescence, NMR spectrometry, Mass spectrometry, Electroanalytical methods, Thermal analysis.

Learning activities and teaching methods:

40 hours of lectures + 6 hours of exercises, two intermediate examinations or one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Introduction to Analytical Chemistry (780111P).

Recommended or required reading:

Skoog, D.A., Holler, F.J., Crouch, S.R.: Principles of Instrumental Analysis, 6th ed., Thomson Brooks/Cole, 2007, partly.

Person responsible:

Prof. P. Perämäki

782629S: Interactions between Molecules, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Pursiainen Jouni

Opintokohteen oppimateriaali:

Atkins, P. W. , , 1998

Reichardt, Christian , , 1988

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish or English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

Upon successful completion students should have a basic understanding of the principles and applications of intermolecular interactions. Non-covalent intermolecular interactions have fundamental effects in practically all the applications of modern chemistry, including solvent interactions, surface chemistry, catalysis and supramolecular chemistry.

Contents:

Principles and applications of intermolecular interactions. Electrostatic, van der Waals and pi-pi bonding. Host-guest interactions. Solvent effects and Huges-Ingold rules. Applications to solvent interactions, surface chemistry, catalysis and supramolecular chemistry.

Learning activities and teaching methods:

40 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry I (780347A) and Physical Chemistry II (782631S).

Recommended or required reading:

Atkins, P.W.: Physical Chemistry, Oxford University Press, Oxford, 6th ed.(1998) or 7th ed. (2002), Chapters 21-22. Reichart, C.: Solvents and Solvent Effects in Organic Chemistry, 2nd ed., VCH, 1990, partly.

Person responsible:

Prof. K. Laasonen and Prof. J. Pursiainen.

780111P: Introduction to Analytical Chemistry, 4 op

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Paavo Perämäki

Opintokohteen oppimateriaali:

Saarinen, Heikki (1) , , 2004

Kellner, R., Mermet, J.-M., Otto, M., , 2004

Opintokohteen kielet: Finnish

Leikkaavuudet:

780110P Analytical Chemistry I 5.5 op

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

1st Spring.

Learning outcomes:

Upon completion of the course, student should have acquired knowledge and understanding of basic concepts of quantitative chemical analysis employing classical methods of analysis.

Contents:

Steps in quantitative analysis, statistical evaluation of analytical data, chemical equilibrium in aqueous solutions, gravimetry, titrimetry, spectrophotometry.

Learning activities and teaching methods:

30 hours of lectures plus 10 hours of exercises, two intermediate examinations or one final examination.

Target group:

Biochemistry, Chemistry, compulsory.

Mathematical Sciences, Physical Sciences, optional.

Recommended optional programme components:

Introduction to Chemistry (780113P) or 780101P Introduction to Physical Chemistry and 780102P Introduction to Inorganic Chemistry or Basic Principles in Chemistry (780109P).

Recommended or required reading:

Kellner, R., Mermet, J.-M., Otto, M., Valcárcel, M. and Widmer, H.M.: Analytical Chemistry, 2nd ed., Wiley-VCH 2004, partly.

Person responsible:

Prof. Paavo Perämäki

780113P: Introduction to Chemistry, 12 op

Voimassaolo: 01.08.2009 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Leena Kaila

Opintokohteen oppimateriaali:

Petrucci, R.H., Harwood, W.S., Herring, F.G. ja Madura, J.D., , 2007

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay780118P	General and Inorganic Chemistry B (OPEN UNI)	5.0 op
780101P	Introduction to Physical Chemistry	7.0 op
780102P	Introduction to Inorganic Chemistry	5.0 op
780109P	Basic Principles in Chemistry	4.0 op

ECTS Credits:

12 credits

Language of instruction:

Finnish

Timing:

1st autumn.

Learning outcomes:

After this course the student should understand basic concepts of chemistry as described in international general chemistry curriculum.

Contents:

Basic concepts of chemistry, chemical formula, chemical reaction, chemical equation, oxidation-reduction reactions, stoichiometry, gases, thermodynamics, electrons in atoms, periodic table, chemical bond, phase equilibrium, reaction kinetics, chemical equilibrium, acid-base equilibrium, equilibrium in water solutions of slightly soluble salts.

Learning activities and teaching methods:

70 hours of lectures and applications plus 50 hours of exercises, three intermediate examinations or one final examination.

Target group:

Biochemistry, Chemistry, compulsory.

Physical sciences, Mathematical sciences, optional.

Recommended optional programme components:

Upper secondary school chemistry.

Recommended or required reading:

Petrucci, R.H., Harwood, W.S., Herring, F.G. ja Madura, J.D.: General Chemistry: Principles and Modern Applications, 9th ed. (or 7th and 8th ed.), Pearson Prentice Hall, New Jersey, 2007.

Person responsible:

Lecturer L. Kaila

783638S: Introduction to Fiber Chemistry of Polysaccharides, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Hormi Osmo

Opintokohteen oppimateriaali:

Eklund, Dan , , 1991

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of the most important chemicals used in papermaking.

Contents:

The fibre and its behaviour during papermaking, dry strength, wet strength, colloidal stability, retention and dewatering, water penetration and sizing, fillers and pigments, dyes, foam control, slime control.

Learning activities and teaching methods:

24 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Polymer Chemistry (780326A).

Recommended or required reading:

Eklund, D. ja Lindström, T.: Paper Chemistry, An Introduction, DT Paper Science Publication, Grankulla, 1991.

Person responsible:

Prof. O. Hormi

6 credits

Language of instruction:

Finnish

Timing:

1st autumn and 1st spring.

Learning outcomes:

Upon completion of the course, student should have acquired knowledge and understanding of fundamentals of organic chemistry: structures and properties of organic compounds, basic reactions and basic types of mechanisms.

Contents:

Basic reactions of organic compounds, basic principles of stereochemistry and reaction mechanisms: Addition, eliminations, substitutions, including aromatic electrophilic one, reactions of carbonyl group. Applications.

Learning activities and teaching methods:

52 hours of lectures and applications plus 6 hours of exercises, three intermediate examinations or one final examination.

Target group:

Biochemistry, Chemistry, compulsory.

Physical Sciences, Mathematical Sciences, optional.

Recommended optional programme components:

Upper secondary school chemistry.

Recommended or required reading:

Hart, H., Hart, D.J. and Craine, L.E.: Organic Chemistry: A Short Course, 10th ed. or the newer edition, Houghton Mifflin Boston, 1999; Hart, H., Hart, D.J. and Craine, L.E.: Study Guide & Solutions Book, Organic Chemistry: A Short Course, 10th ed. or the newer edition, Houghton Mifflin Boston, 1999.

783650S	Introduction to Chemistry	2.0 op
---------	---------------------------	--------

ECTS Credits:

2 credits

Language of instruction:

Finnish

Timing:1st spring.**Learning outcomes:**

At the end of the course, the students should have acquired an understanding of the basic chemistry of polymeric materials with emphasis on commodity plastics.

Contents:

Different classifications of polymeric materials, most important terms in polymer chemistry, basics in the nomenclature of polymers, most important molecular weights of polymers, additives, glass transition temperature, the chemistry involved in the preparation of commodity plastics.

Learning activities and teaching methods:

20 hours of lectures, one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Introduction to Organic Chemistry (780103P or 780112P).

780122P: Introductory Laboratory Course in Chemistry, 3 op

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Language of instruction:

Finnish.

Timing:

1st autumn or spring.

Learning outcomes:

After this course the student is familiar with safety aspects in laboratory, can safely handle and use basic laboratory equipments in experiments. The student knows micro and semi-micro inorganic, analytical methods, is familiar with inorganic or organic synthesis and can determine the yield and purity.

Contents:

Laboratory safety, bunsen burner, balances, volumetric measures, gravimetric determination, acid-base titration, pH, titration curves, acid-base indicators, buffer solutions, synthesis and analysis of Fe(II)oxalate, spectrophotometric determination, synthesis of acetyl salicylic acid, TLC.

Learning activities and teaching methods:

40 hours of laboratory work + demonstrations, one final examination.

Target group:

Biochemistry, Biology, Chemistry, Process Engineering, compulsory. Physical Sciences, Geology, Mathematical Sciences, optional.

Recommended optional programme components:

The course Basic Principles in Chemistry (780109P) passed or Biochemistry, Chemistry and teacher education students of Mathematics and Physics: simultaneous participation in the course Introduction to Chemistry (780113P).

Recommended or required reading:

Instruction Book (in Finnish): Kemian perustyöt

Assessment methods and criteria:

Laboratory works and final examination has to be completed within next two terms.

Grading:

Pass/fail

Person responsible:

Prof. M. Lajunen and teaching assistants.

780697S: Laboratory Course (Teachers), 20 op

Voimassaolo: - 31.07.2010

Opiskelumuoto: Advanced Studies

Laji: Course

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

780330A: Laboratory Course I in Inorganic Chemistry, 7 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Leena Kaila

Opintokohteen kielet: Finnish

ECTS Credits:

7 credits

Timing:

Part 1 (780330A-01): 1st spring.

Part 2 (780330A-02): 2nd spring.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of basic qualitative inorganic chemistry, classical quantitative inorganic chemistry and basic inorganic synthetic chemistry.

Contents:

Part 1: Introduction to inorganic ion reactions and a qualitative analysis

Part 2: Water analysis, neutralization, synthesis and characterization of two complex compounds

Learning activities and teaching methods:

Part 1: 45 hours of laboratory work, 10 hours of work reports + final examination.

Part 2: 80 hours of laboratory work, 45 hours of work reports + final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Part 1.: Introduction to Chemistry (780113p) or Introduction to Physical Chemistry (780101P9 and Introduction to Inorganic Chemistry (780102P). Introductory Laboratory Course in Chemistry (780122P).

Part 2.: Introduction to Chemistry (780113P) or Introduction to Physical Chemistry (780101P) and Introduction to Inorganic Chemistry (780102P), Introduction to Organic Chemistry (780103P or 780112P). Introductory Laboratory Course in Chemistry (780122P) and the first part of this laboratory course completed.

Recommended or required reading:

Material handed out in the laboratory.

Grading:

75 % laboratory work 25 % final examination.

Person responsible:

Lecturer L. Kaila, Lecturer M. Tiainen and teaching assistants

780329A: Laboratory Course I in Organic Chemistry, 4 op**Opiskelumuoto:** Intermediate Studies**Laji:** Course**Vastuuyksikkö:** Department of Chemistry**Arvostelu:** 1 - 5, pass, fail**Opintokohteen kielet:** Finnish**ECTS Credits:**

4 credits

Language of instruction:

Finnish/English on demand, material in English (partly).

Timing:2nd autumn.**Learning outcomes:**

At the end of the course, the students should have acquired an understanding of basic techniques of organic chemistry such as distillation, extraction, crystallization, TLC, as well as safety issues, glassware and equipment, laboratory notebooks and written reporting of laboratory experiments. A student familiarises with practical laboratory work by carrying out reactions in aromatic substitution with protective group strategy, organometallic chemistry, Aldol condensation, elimination and disproportionation.

Contents:

Review of methods in organic chemistry and TLC analysis. Producing of spectra, and GC analysis, Aldol condensation, Cannizzaro reaction, preparation of benzoic acid, preparation of cyclohexene, and preparation of 2-nitroresorcinol.

Learning activities and teaching methods:

22 h/week laboratory works.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Introduction to Chemistry (780113P) or 780101P Introduction to Physical Chemistry and 780102P Introduction to Inorganic Chemistry or Basic Principles in Chemistry (780109P). Courses 780103P and 780122P passed. Simultaneous participation in the lecture course 780389A.

Recommended or required reading:

Clayden, J., Greeves, N., Warren, S. and Wothers, P.: Organic Chemistry, Oxford University Press, 2001. Laboratory Course Manual.

Grading:

Laboratory works and reporting 2/3 and exam 1/3.

Person responsible:

Senior Assistant Dr. J. Koskela.

Learning activities and teaching methods:

22 h/week laboratory works.

Target group:

Biochemistry, compulsory.

Recommended optional programme components:

Courses 780113P or 780101P and 780102P or 780109P, 780103P, and 780122P passed.

Recommended or required reading:

Clayden, J., Greeves, N., Warren, S. and Wothers, P.: Organic Chemistry, Oxford University Press, 2001. Laboratory Course Manual.

Person responsible:

Senior assistant Dr. J. Koskela.

780331A: Laboratory Course I in Physical Chemistry, 5 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Toivo Kuokkanen

Opintokohteen kielet: Finnish

ECTS Credits:

5 credits

Language of instruction:

Finnish, material in Finnish, English on demand.

Timing:2nd autumn.**Learning outcomes:**

After completing this course, the student should have acquired knowledge and understanding of the experimental methods of the theory learned in course 780347A Physical Chemistry I.

Contents:

Calorimetric studies, distribution law, vapour pressure of solvent, partial mole volume, distillation of a mixture of liquids, crystallization of a liquid mixture, potentiometric acid-base titration, absorption, and electromotive force

Learning activities and teaching methods:

2 hours of lectures of safety at work, 80 hours (7 weeks) of laboratory experiments and 45 hours of reports, one preliminary exam.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Courses 780122P, 780113P or 780101P or and a preliminary test of the Laboratory course passed.

Simultaneous participation in the course 780347A Physical Chemistry I.

Recommended or required reading:

Practical work handout; Atkins, P. W.: Physical Chemistry, 7th ed., Oxford University Press, 2002, partly.

Assessment methods and criteria:

Experiments and reports passed.

Person responsible:

Doc. T. Kuokkanen and assistants

780382A: Laboratory Course in Physical Chemistry (TECH), 2 op

Voimassaolo: - 31.07.2010

Opiskelumuoto: Intermediate Studies

Laji: Course

Arvostelu: 1 - 5, pass, fail

Opettajat: Toivo Kuokkanen

Opintokohteen kielet: Finnish

ECTS Credits:

2 credits

Language of instruction:

Finnish.

Timing:

Autumn term.

Learning outcomes:

After this course the student is familiar with the practise of the theory learned in course 780347A Physical Chemistry I.

Contents:

Four experiments of the following topics: Calorimetric studies, determination of equilibrium constant by UV-Vis spectrometry, vapour pressure of solvent, distillation of a mixture of liquids, crystallization of a liquid mixture, adsorption in solution.

Learning activities and teaching methods:

4 laboratory works.

Target group:

Process Engineering.

Recommended optional programme components:

Courses 780109P, 780122P and a preliminary test of the Laboratory course passed. Simultaneous participation in the course 780347A Physical Chemistry I.

Recommended or required reading:

Practical work handout; Atkins, P. W.: Physical Chemistry, 7th ed. 2002, Oxford University Press, partly.

Assessment methods and criteria:

Experiments and reports.

Person responsible:

Doc. Toivo Kuokkanen and Assistants.

Arvostelu: 1 - 5, pass, fail

Opettajat: Laitinen Risto

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring.

Learning outcomes:

After this course the student is familiar with most important advanced techniques in modern inorganic synthetic chemistry.

Contents:

One selected multistage synthesis. The intermediate and end products will be fully characterized.

Learning activities and teaching methods:

6 hours of lectures, 60 hours of laboratory courses, written report, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Laboratory courses in Inorganic Chemistry, Physical Chemistry and Organic Chemistry, Structural Chemistry I (780317A).

Person responsible:

Prof. R. Laitinen and Doc. R. Oilunkaniemi

783605S: Literature Survey in Organic Chemistry, 9 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

9 credits

Language of instruction:

Finnish, English on demand.

Timing:

5th autumn, beginning.

Learning outcomes:

After finishing the Survey of Literature the student has got practice for the scientific reasoning and communication, information retrieval and its critical evaluation.

Contents:

The survey can be, but does not necessarily have to be, on the same topic as the research project. The length of the survey should be about 40-60 pages with approximately 50 references.

Target group:

Chemistry, compulsory.

Grading:

1 - 5.

Person responsible:

Professors, Docents, Dr level Senior Assistants and Lectures of the Chemistry Department.

780379A: Literature of Chemistry and Communication Skills, 2 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2 credits

Language of instruction:

Finnish

Timing:

2nd autumn and 3rd autumn.

Learning outcomes:

After this course the student has an overview of types of chemistry literature and information. He/she can use services of science library, perform information retrieval, knows principles of scientific writing, a preparation and presentation of a poster or a seminar talk and ethical principles in science. He/she has participated in a group work.

Contents:

Types of chemistry literature: Periodicals, patents, reference works, reviews and series, numerical data compilations and textbooks, Information retrieval (SciFinder, MDL CrossFire Commander), word processing and chemical drawing etc. and their use in the preparation of the thesis. Ethical principles related to research. Preparation of a treatise or seminar talk. Preparation or presentation of a poster.

Learning activities and teaching methods:

2nd autumn 4 hours and 3rd autumn 18 hours of lectures and exercises, poster.

Target group:

Chemistry, compulsory.

Assessment methods and criteria:

Preparation and presentation of a poster. Compulsory attendance at the lecture.

Person responsible:

Prof. M. Lajunen and Science and Technology Library Tellus.

781627S: Main Group Chemistry, 5 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laitinen Risto

Opintokohteen oppimateriaali:

Atkins, P., Overton, T., Rourke, J., Weller, M. ja Armstrong, F., , 2006

Opintokohteen kielet: Finnish

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with recent progress in modern main group chemistry.

Contents:

Periodic system, hydrogen, alkali and alkaline earth metals, half- and non-metals.

Learning activities and teaching methods:

28 hours of lectures, 14 hours of exercises, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A).

Recommended or required reading:

Atkins, P., Overton, T., Rourke, J., Weller, M. ja Armstrong, F.: Inorganic Chemistry, 5th ed., Oxford University Press, Oxford 2009.

Person responsible:

Prof. R. Laitinen

781601S: Master's Thesis in Inorganic Chemistry, 38 op

Opiskelumuoto: Advanced Studies

Laji: Diploma thesis

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

38 credits

Language of instruction:

Finnish, English on demand.

Timing:

5th autumn, beginning.

Learning outcomes:

After finishing the Thesis the student has got practice for the scientific reasoning and communication, information retrieval and its critical evaluation. The student can use research methods typical for his/her field and is familiar with the theoretical subject matter of his/her field.

Contents:

The Theses for the degree of M.Sc. consists of two parts: a research project (Master's Thesis) with a written report and survey of literature. The completion of the laboratory work and the research report is expected to take approximately four months of full-time work. Together, they are worth 38 ECTS credits. In addition, the student is required to write a survey of literature on a topic which will be decided together with the student's advisor. The survey can be, but does not necessarily have to be, on the same topic as the research project. The length of the survey should be about 40-60 pages with approximately 50 references. It is worth of 9 ECTS credits. The completion of the whole thesis (47 ECTS credits altogether) requires about six months of full-time work.

Target group:

Chemistry, compulsory.

Assessment methods and criteria:

A research project (Master's Thesis) with a written report and a survey of literature.

Grading:

1-5

Person responsible:

Professors, Docents, Dr level Senior Assistants and Lectures of the Chemistry Department.

781602S: Master's Thesis in Inorganic Chemistry, 20 op

Opiskelumuoto: Advanced Studies

Laji: Diploma thesis

Vastuuyksikkö: Department of Chemistry

Arvostelu: A,B,N,C,M,EX,L

Opintokohteen kielet: Finnish

ECTS Credits:

20 credits

Language of instruction:

Finnish, English on demand

Timing:

5th autumn, beginning.

Learning outcomes:

After finishing the Literature Survey the student has got practice for the scientific reasoning and communication, information retrieval and its critical evaluation.

Contents:

The student is required to write a survey of literature on a topic which will be decided together with the student's advisor. The length of the survey should be about 40-60 pages with approximately 50 references.

Target group:

Teachers.

Assessment methods and criteria:

-

Grading:

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

0 credits

Language of instruction:

Finnish, Swedish or English

Timing:

5th year.

Learning outcomes:

By the essay-type maturity test the student has shown that he/she has knowledge of the topic of the research area written with good language.

Contents:

Maturity test will be agreed with the responsible person of a survey of literature. Maturity test is a written essay type test, which shows students knowledge of the topic of the research area written with good language.

Target group:

Chemistry.

Person responsible:

Professors, Docents, Doctor level Senior Assistants and Lectures of the Chemistry Department.

780381A: Maturity test, 0 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

0 credits

Language of instruction:

Finnish

Timing:

3rd spring.

Target group:

Chemistry, compulsory.

Person responsible:

Professors, Docents, Doctor level Senior Assistants and Lectures of the Chemistry Department.

782624S: Molecular Modelling, 3 - 4 op

Voimassaolo: - 31.07.2010

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laasonen Kari

Opintokohteen oppimateriaali:

Leach, Andrew R. , , 1996

Leach, Andrew R. , , 2001

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn/spring. The course is lectured every other year.

Learning outcomes:

After completing this course the students should have good knowledge of molecular modelling using empirical and ab initio molecular modelling methods.

Contents:

Principles of molecular dynamics and the statistical mechanics related to molecular modelling. Reasoning of the empirical force fields used in molecular mechanics. Ab initio molecular dynamics. Several examples of molecular dynamics studies. This course focuses on the theoretical aspects whereas the practical aspects will be dealt in the course 781626S Molecular modelling workshop.

Learning activities and teaching methods:

30 hours of lectures + 8 hours of exercises, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry II (782631S) and Basic Principles of Quantum Chemistry (782625S).

Recommended or required reading:

Material given by the lecturer (in Finnish) and Leach, A.R.: Molecular Modelling, Longman, 1996 or 2nd ed.

Person responsible:

Prof. K. Laasonen

781626S: Molecular Modelling Workshop, 3 - 4 op

Voimassaolo: - 31.07.2010

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laasonen Kari

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

Upon successful completion of this course students should have a understanding of the state-of-the-art molecular modelling programs like Gaussian or Gromacs and their use.

Contents:

Practical workshop where students learn to use some state-of-the-art molecular modelling program like Gaussian or Gromacs. If possible student's own problem is tried to solve using molecular modelling tools. A report of the work is done.

Learning activities and teaching methods:

8 hours of lectures, demonstration, practical exercise.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry II (782631S), Molecular Modelling (782624S), Basic Principles of Quantum Chemistry (782625S).

Recommended or required reading:

Material handed out by the lecturer, Gaussian or Gromacs Manuals.

Assessment methods and criteria:

Report of practical exercise.

Person responsible:

Prof. K. Laasonen

781639S: Molecular Symmetry and Spectroscopy, 5 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Raija Oilunkaniemi

Opintokohteen kielet: Finnish

Leikkaavuudet:

780327A Structural Chemistry II 5.5 op

ECTS Credits:

5 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th spring.

Learning outcomes:

After this course the student is familiar with molecular symmetry and application of molecular symmetry in vibration spectroscopy and electronic absorption spectroscopy.

Contents:

Molecular symmetry, group theory, vibrational spectroscopy, electronic absorption spectroscopy.

Learning activities and teaching methods:

34 h lectures, 3 home assignments, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A) and Inorganic Chemistry II (781642S).

Recommended or required reading:

Material handed out by lecturer.

Person responsible:

Doc. R. Oilunkaniemi

784617S: Multinuclear NMR Spectroscopy in Structure Elucidation, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Mason, J. (ed), , 1987

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with the NMR characteristics and use of various magnetic isotopes.

Contents:

The correlation of structural factors to spin-spin coupling constants and relaxation times of the nuclei in ^{14}N , ^{15}N , ^{17}O , ^{19}F , ^{29}Si , ^{31}P , ^{77}Se and ^{195}Pt . A practical exercise and a report.

Learning activities and teaching methods:

20 hours of lectures + applications + demonstrations, one final examination.

Target group:

Chemistry, optional.

Recommended or required reading:

Mason, J. (ed.): Multinuclear NMR, Plenum Press, New York, 1987.

Person responsible:

Senior assistant S. Mattila

784610S: NMR Spectroscopy in Organic Chemistry, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Breitmaier, Eberhard , , 1993

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with the principles, methods, techniques and practise of structure elucidation of organic compounds by NMR spectroscopy.

Contents:

Modern multidimensional NMR techniques. Spectral runs, analysis and report of an unknown compound.

Learning activities and teaching methods:

14 hours of lectures + applications, 60 hours of exercises, one final examinations.

Target group:

Chemistry, optional.

Recommended or required reading:

Breitmaier, E.: Structure Elucidation by NMR in Organic Chemistry, A Practical Guide, Wiley, 1993.

Person responsible:

Senior assistant S. Mattila

784636S: NMR Spectroscopy of Polymers, 4 op

Voimassaolo: - 31.07.2011

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Väänänen, Taito Lauri Johannes

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish, English on demand.

Timing:

The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with basic principles of NMR spectroscopy of polymers.

Contents:

Preparation of liquid and solid state sample, the effect of concentration and temperature. Chemical shift and nit's anitropy. Dipole-dipole interaction, relaxation time and crosspolarisation and their connection to microstructure of polymers. Identification and quantification. A practical exercise and a report.

Learning activities and teaching methods:

20 hours of lectures + demonstrations + practical exercise + one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

NMR Spectroscopy of Organic Chemistry (784610S) and NMR workshop I (784623S).

Recommended or required reading:

Alan E. Tonelli: NMR spectroscopy and polymer microstructure: The conformational connection, VCH, New York (1989). Richard A. Komoroski (ed.): High Resolution NMR Spectroscopy of Synthetic Polymers in Bulk, Methods in Stereochemical Analysis vol. 7, VCH, Florida (1986). P. Diehl et al. (ed.): NMR Basic Principles and Progress 29, Springer-Verlag, Berlin (1993). Colin A. Fyfe: Solid State NMR for Chemists, C.F.C. Press, Guelph (1983). S. Braun et al.: 150 and More Basic NMR experiments: A Practical Course - Second Expanded Edition, VCH, Weinheim (1998).

Person responsible:

Doc. Taito Väänänen.

784623S: NMR Workshop I, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Derome, Andrew E. , , 1987

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn or spring. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with the common 1D and 2D NMR methods and their principles.

Contents:

1D, 2D NMR techniques. Optimization of NMR measurement parameters: Theory and practice. NMR data processing.

Learning activities and teaching methods:

20 hours of lectures + demonstrations, 80 hours of exercises, one final examination.

Target group:

Chemistry, optional.

Recommended or required reading:

Derome, A. E., Modern NMR Techniques for Chemistry Research, Pergamon Press, partly.

Person responsible:

Senior assistant S. Mattila

784624S: NMR Workshop II, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Derome, Andrew E. , , 1987

Levitt, Malcolm H. , , 2001

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th spring. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with the advanced 1D and 2D NMR methods and has detailed understanding of pulse sequences in NMR.

Contents:

Product Operator Formalism. Pulse sequences: Design and programming. Use and programming of automatized spectrometer workflows.

Learning activities and teaching methods:

20 hours of lectures + demonstrations, 80 hours of exercises, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

NMR-workshop I (784623S).

Recommended or required reading:

Levitt, M.: Spin Dynamics: Basics of Nuclear Magnetic Resonance, John Wiley & Sons, 2001, partly, Derome, A. E., Modern NMR Techniques for Chemistry Research, Pergamon Press, partly.

Person responsible:
Senior Assistant S. Mattila

784638S: NMR Workshop III, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Derome, Andrew E. , , 1987

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th spring. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with the techniques commonly used in elucidation of organic compounds and natural products.

Contents:

Sample preparation. Spetrometer setup. Use of automatized workflows of recording series of 1-3D NMR experiments. Spectral processing. Assignment of NMR data.

Learning activities and teaching methods:

20 hours of lectures + demonstrations, 80 hours of exercises, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

NMR workshop I (784623S).

Recommended or required reading:

Derome, A. E., Modern NMR Techniques for Chemistry Research, Pergamon Press, partly.

Person responsible:

Senior assistant S. Mattila

784639S: NMR Workshop IV, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Levitt, Malcolm H. , , 2001

Cavanagh, John, , 1996

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th spring. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with the 2-4D techniques commonly used in biomacromolecular NMR analysis.

Contents:

Protein backbone and sidechain 3D experiments. Other multidimensional methods. Magnetization transfer functions. Resolution and S/N. Processing of multidimensional NMR data.

Learning activities and teaching methods:

20 hours of lectures + demonstrations, 80 hours of exercises, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

NMR workshop I (784623S).

Recommended or required reading:

Levitt, M.: Spin Dynamics: Basics of Nuclear Magnetic Resonance, John Wiley & Sons, 2001, partly and Cavanagh: Protein NMR Spectroscopy, Academic Press, 1995, ISBN: 0121644901.

Person responsible:

Senior assistant S. Mattila

780389A: Organic Chemistry I, 6 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Hormi Osmo

Opintokohteen oppimateriaali:

Clayden, J., Greeves, N., Warren, S. ja Wothers, P., , 2001

Opintokohteen kielet: Finnish

Leikkaavuudet:

780385A Organic Chemistry I 9.0 op

ECTS Credits:

6 credits

Language of instruction:

Finnish, English on demand.

Timing:

2nd autumn.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of molecular orbitals in simple organic compounds such as ethane, basics in physical organic chemistry especially Hammet plot, details in nucleophilic substitution, conformation and stereochemistry in organic compounds.

Contents:

Molecular orbitals in organic compounds, conformation theory, Hammett plot, nucleophilic substitution and stereochemistry.

Learning activities and teaching methods:

50 hours of lectures, two intermediate examinations or one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Introduction to Organic Chemistry (780103P) and Introduction to Chemistry (780113P) or Introduction to Physical Chemistry (780101P).

Recommended or required reading:

Clayden, J., Greeves, N., Warren, S. and Wothers, P.: Organic Chemistry, Oxford University Press, 2001. Chapters 1-4, 7, 16-18, 34 ja 42 and pages 1090-1100.

Person responsible:

Prof. O. Hormi.

783643S: Organic Chemistry II, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Marja Lajunen

Opintokohteen oppimateriaali:

Clayden, J., Greeves, N., Warren, S. ja Wothers, P., , 2001

Opintokohteen kielet: Finnish

Leikkaavuudet:

780393A Organic Chemistry II 4.0 op

780390A Organic Chemistry II 4.0 op

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn.

Learning outcomes:

The student has a profound knowledge of mechanisms of polar additions and eliminations, carbonyl compounds as nucleophilic reagents, properties and reactions of aromatic heterocyclics. The student can evaluate the reaction mechanism of the reaction on the basis of given data, predict results of these reactions and apply data in practice.

Contents:

Polar additions and eliminations, enolates and their alkylation, aldol reaction, aromatic heterocyclics, their reactivity and reactions.

Learning activities and teaching methods:

35 hours of lectures + 7 hours of exercises, one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Organic Chemistry I (780389A).

Recommended or required reading:

Clayden, J., Greeves, N., Warren, S. ja Wothers, P.: Organic Chemistry, Oxford University Press, 2001. Chapters 19, 20, 21, 26, 27, 43.

Person responsible:

Prof. M. Lajunen

783639S: Organic Chemistry III, 5 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Hormi Osmo

Opintokohteen oppimateriaali:

Corey, E. J. , , 1989

Opintokohteen kielet: Finnish

ECTS Credits:

5 credits

Language of instruction:

Finnish/English on demand.

Timing:

5th autumn.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of the way of thinking in modern synthetic organic chemistry. The student can also give a detailed presentation of the synthesis of a challenging goal molecule.

Contents:

Detailed examination of reactions used in the synthesis of complicated organic compounds such as Retigeranic Acid.

Learning activities and teaching methods:

26 hours of lectures + seminar.

Target group:

Chemistry.

Recommended optional programme components:

Organic Chemistry I (780389A) and Organic Chemistry II (783643S).

Recommended or required reading:

Corey, E.J. ja Chen, X-M.: The Logic of Chemical Synthesis, John Wiley & Sons, New York, 1989, p. 1 - 100.

Assessment methods and criteria:

Written report on the synthesis of a complex target molecule and an oral presentation of the synthesis.

Person responsible:

Prof. O. Hormi

783614S: Organic Chemistry of Drug Compounds, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Marja Lajunen

Opintokohteen oppimateriaali:

Patrick, Graham L. , , 2001

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Learning outcomes:

After this course the student is familiar with basic principles and techniques of medicinal chemistry, tactics and tools used in drug design and development.

Contents:

Drug discovery and drug development, QSAR, combinatorial synthesis, computers in medicinal chemistry, drug action at enzymes and receptors, drugs interacting with DNA, drug metabolism, prodrugs and their activation.

Learning activities and teaching methods:

20 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Organic Chemistry I (780389A) and Organic Chemistry II (783643S).

Recommended or required reading:

Patrick, G.L.: An Introduction to Medicinal Chemistry, Oxford University Press, 2001, partly.

Person responsible:

Prof. M. Lajunen

783640S: Organometallic Chemistry, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Marja Lajunen

Opintokohteen oppimateriaali:

Clayden, J., Greeves, N., Warren, S. ja Wothers, P., , 2001

Jenkins, Paul R. , , 1992

Thomas, Susan E. , , 1991

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn. The course is lectured every other year.

Learning outcomes:

The student knows properties and preparation of essential organometallic compounds and can use them in synthetic applications.

Contents:

Chemistry of Li, Mg, Cu, B, or Si in asymmetric reaction design and practical synthesis.

Learning activities and teaching methods:

24 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Organic Chemistry II (783643S).

Recommended or required reading:

Clayden, J., Greeves, N., Warren, S., and Wothers, P., Organic Chemistry, Oxford University Press, 2001 (partly);

Jenkins, P.: Organometallic Reagents in Synthesis, Oxford Science Publications, 1997, partly. Thomas, S.E.:

Organic Synthesis, The Role of Boron and Silicon, Oxford Science Publications, 1997, partly.

Person responsible:

Prof. M. Lajunen

780078Y: Orientation Course for New Students, 1 op

Opiskelumuoto: General Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Kopsa-Moilanen, Vieno Maria

Opintokohteen kielet: Finnish

ECTS Credits:

1 credits

Language of instruction:

Finnish

Timing:

1st autumn and 1st spring.

Learning outcomes:

After this course the student is familiar with the learning environment, the Department of Chemistry and the University, trends of present-day chemistry, and planning his/her studies.

Contents:

The course comprises of three modules: Orientation in small groups, Programme of orientation week , and PSP (Personal Study Plan).

Learning activities and teaching methods:

Orientation in small groups: autumn term, 10-15 hours of visits and discussions with the group tutor. PSP (Personal Study Plan): spring term, 2 hours of lectures, planning of PSP.

Target group:

Chemistry, compulsory

Assessment methods and criteria:

Participation in programme of the orietation week, small group meetings and making a Personal Study Plan for B. Sc. Degree (and M.Sc. Degree).

Person responsible:

Professor Marja Lajunen, Lecturer L. Kaila, Amanuensis, and Small group tutors.

Other information:

The course is completed when all the three parts are passed.

783645S: Pericyclic chemistry, 3 op

Voimassaolo: 01.01.2008 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Marja Lajunen

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish.

Timing:

4th or 5th spring.

Learning outcomes:

After this course unit the student is familiar with a nature and types of pericyclic reactions. He/she understands the occurrence of separate pericyclic reactions, basics of click chemistry and synthetic uses of pericyclic reactions.

Contents:

Pericyclic reaction types: cycloadditions, sigmatropic rearrangements, group transfer and electrocyclic reactions. The Woodward-Hoffman rules, thermal, photochemical, 1,3-dipolar cycloaddition and basics of click chemistry alike.

Learning activities and teaching methods:

20 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

780389A Orgaaninen kemia I and 783643S Organic Chemistry II.

Recommended or required reading:

Fleming, I.: Pericyclic Reactions, Oxford University Press, 2002 and Clayden, J., Greeves, N., Warren, S. ja Wothers, P.: Organic Chemistry, Oxford University Press, 2001, partly.

Person responsible:

Prof. Marja Lajunen.

780347A: Physical Chemistry I, 6 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Pursiainen Jouni

Opintokohteen oppimateriaali:

Atkins, P.W., , 2002

Atkins, P. W. , , 1998

Opintokohteen kielet: Finnish

Leikkaavuudet:

780318A Physical Chemistry II 6.5 op

ECTS Credits:

6 credits

Language of instruction:

Finnish, material in Finnish, material in English (partly).

Timing:

2nd autumn.

Learning outcomes:

Upon completion the student should be able to display an understanding of the main topics of chemical thermodynamics and kinetics. During the course such concepts are introduced that are needed for the discussion of equilibria in chemistry. Much emphasis is in enthalpy, entropy and Gibbs energy. A unified view of equilibrium and the directions of spontaneous change are obtained in terms of chemical potentials of substances. Chemical kinetics shows how the systems can reach equilibrium.

Contents:

Properties of gases, the first and second laws of thermodynamics, physical transformations of pure substances, properties of simple mixtures, chemical equilibrium.

Learning activities and teaching methods:

56 hours of lectures + applications + 14 hours of exercises, weekly examinations or one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Introduction to Chemistry (780113P) or Introduction to Physical Chemistry (780101P) and Introduction to Inorganic Chemistry (780102P); or Basic Principles in Chemistry(780109P). Laboratory Course I in Physical Chemistry (780331A) has to be taken simultaneously with this course.

Recommended or required reading:

Atkins, P.W.: Physical Chemistry, Oxford University Press, Oxford, 6 Ed. (1998) or Atkins, P.W.: Physical Chemistry, 7th ed., 2002.

Person responsible:

Prof. J. Pursiainen

782631S: Physical Chemistry II, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen oppimateriaali:

Atkins, Peter , , 2006

Opintokohteen kielet: Finnish

Leikkaavuudet:

780392A	Physical Chemistry II	4.0 op
780349A	Physical Chemistry II	4.0 op

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

4th autumn.

Learning outcomes:

After completing this course the students should have good knowledge of the basics of quantum mechanics and statistical mechanics and their role in physical chemistry.

Contents:

Basic of quantum mechanics, particle-in-box, hydrogen atoms, LCAO model for molecules. Basics of statistical mechanics, partition function and how to derive statistical properties from it. Ideal and real gases. Diffusion and electrical conductivity.

Learning activities and teaching methods:

36 hours of lectures + 8 hours of assingment exercises, one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Physical Chemistry I (780347A).

Recommended or required reading:

P.W. Atkins and J. de Paula, Atkins Physical Chemistry, 8th ed., 2006 (or 7th ed., 2002), Oxford University Press, Chapters 8-11, 16-17, 21.

Person responsible:

Prof. K. Laasonen

783620S: Polymer Chemistry, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Hormi Osmo

Opintokohteen oppimateriaali:

Elias, Hans-Georg , , 1993

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn. The course is lectured every other year.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of the most important technical quantities of polymeric materials including the mathematical background of the quantities.

Contents:

Polymer molecular weights, conformation of polymers, the visco-elastic behaviour of polymers, the conduction of heat and electricity in polymers.

Learning activities and teaching methods:

28 hours of lectures, one final examination.

Target group:

Chemistry.

Recommended optional programme components:

Introduction to polymer chemistry (780326A).

Recommended or required reading:

Elias, H-G: An Introduction to Plastics, VCH, Weinheim, 1993.

Person responsible:

Prof. O. Hormi

783636S: Polymer Chemistry in Materials Sciences, 3 - 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Hormi Osmo

Opintokohteen oppimateriaali:

Fawcett, A.H. (toim.), , 1991

Metals Park, , 1988

Joseph N. Epel. (et al.), , 1988

Flinn, Richard A. , , 1990

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of technical characteristics such as strength, modulus and heat deflection temperature of the most important polymeric materials.

Contents:

Commodity plastics, engineering polymers, carbon fibre, aramid fibres, liquid crystalline polymers, heat stable polymers, epoxy resins.

Learning activities and teaching methods:

24 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Polymer Chemistry (780326A) (recommended).

Recommended or required reading:

Flinn, R.A. and Trojan, P.K., Engineering Materials and Their Applications, International Student Edition, Houghton Mifflin Comp., 4th ed., Boston 1990 (partly); Fawcett, A.H. (Editor): High Value Polymers, The Royal Society of Chemistry, Redwood Press Ltd., Melksham, 1991; Engineered Materials handbook, Part 1 and Part 2, ASM International, Metals Park, OH, 1993 (Part 1) and 1988 (Part 2).

Person responsible:

Prof. O. Hormi

781623S: Reaction Mechanisms in Inorganic Chemistry, 3 op

Voimassaolo: - 31.07.2012

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laitinen Risto

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish, English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with present state of inorganic reaction mechanisms.

Contents:

Mechanistic implications of reaction kinetics, collision theory, transition state theory, study of reaction mechanisms, molecular structure and mechanisms, orbital symmetry, substitution reactions, electron transfer reactions, catalysis, photochemical reactions.

Learning activities and teaching methods:

24 hours of lectures + 2 home assignments, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A) and Inorganic Chemistry II (781642S).

Recommended or required reading:

Tobe, M. L. and Burgess, J.: Inorganic Reaction Mechanisms, Longman, New York, 1999.

Person responsible:

Prof. R. Laitinen

780601S: Research Project, 12 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

12 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th autumn-spring.

Learning outcomes:

After the laboratory project the student knows a research work and methods of his/her field and has readiness to perform the Pro Gradu Thesis.

Contents:

Laboratory work and written report.

Learning activities and teaching methods:

240 h laboratory works.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

B.Sc. studies and Research Training (780301A).

Recommended or required reading:

Material given by teachers.

Person responsible:

Professors, Docents, Doctor level Senior Assistants and Lectures of the Chemistry Department.

783634S: Research Seminar in Organic Chemistry, 2 op

Voimassaolo: 01.08.2012 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish.

Timing:

Autumn + spring.

Learning outcomes:

After taking part in weekly seminars the students should have acquired an understanding of scientific reporting and oral presentation of scientific results.

Contents:

Design and following of projects in organic chemistry.

Target group:

Chemistry.

Person responsible:

Prof. Osmo Hormi and Prof. Marja Lajunen.

787602J: Research Seminar in Organic and Polymer Chemistry, 3 op

Voimassaolo: - 31.07.2012

Opiskelumuoto: Post-graduate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish, English on demand.

Timing:

Autumn + spring.

Learning outcomes:

After this course the student should have acquired an understanding of current projects in the research laboratory of organic, polymer or wood chemistry and can present own research results in English.

Contents:

Compulsory attendance and oral presentation of own projects during a period of one year.

Learning activities and teaching methods:

30 hours.

Target group:

Chemistry.

Recommended optional programme components:

All required advanced courses in organic chemistry and polymer chemistry.

Person responsible:

Prof. O. Hormi and Prof. M. Lajunen

780301A: Research Training, 9 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Leena Kaila, Toivo Kuokkanen

Opintokohteen kielet: Finnish

ECTS Credits:

9 credits

Language of instruction:

Finnish, English on demand, materials in English (partly).

Timing:

3rd autumn-spring.

Learning outcomes:

After completing this course, the student should be able to work independently in the laboratory and ability to write a scientific report and in Organic Chemistry after this course the student can perform a reaction sequence, is familiar with a chemical resolution and reduction, can solve qualitative multicomponent analysis by chemical separation and using IR, NMR, UV and MS analysis.

Contents:

Laboratory works in Inorganic Chemistry: Three laboratory projects on different fields of inorganic chemistry: ICP-OES-analysis, protonation constant, synthesis of an air sensitive compound

in Physical Chemistry: NIR-spectrophotometric study of hydrogen bonding, conductivity of an electrolytic solution, molecule modeling, adsorption, and surface tension

in Organic Chemistry: Preparation of UV- and IR samples, preparation of enamine, acylation of enamine, reduction of trans-cinnamaldehyde, chemical resolution of α -phenyl ethyl amine and qualitative analysis of three compounds.

Additionally, written laboratory reports, one per practical.

Learning activities and teaching methods:

240 hours of laboratory works (80 h/laboratory).

Target group:

Chemistry, compulsory.

Recommended optional programme components:

In Inorganic Chemistry: The compulsory courses of chemistry in the first and second year and in Physical Chemistry: Simultaneous participating in the course 782631S Physical Chemistry II and in Organic Chemistry: Courses 780389A and 780329A passed. Simultaneous participation in the lecture course 783643S.

Recommended or required reading:

In Inorganic Chemistry: Material handed out in the laboratory, in Physical Chemistry: Practical work handout. Atkins, P.W. Physical Chemistry, 7th ed. 2002, Oxford University Press, partly and in Organic Chemistry: Clayden, J., Greeves, N., Warren, S. and Wothers, P.: Organic Chemistry, Oxford University Press, 2001., Department of Chemistry. Practical Organic Chemistry, 780332, 780389 and 780390. Laboratory Course Manual.

Assessment methods and criteria:

Laboratory works and reports.

Person responsible:

Lecturer L. Kaila, Doc. T. Kuokkanen, Senior Assistant Dr. J. Koskela.

780301A-01: Research Training, 3 op

Voimassaolo: 01.08.2006 -

781640S: Sampling and Sample Preparation, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Paavo Perämäki

Opintokohteen oppimateriaali:

Dean, John R. , , 2003

Opintokohteen kielet: Finnish

Leikkaavuudet:

781335A Sampling and Sample Preparation 4.0 op

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

After this course student becomes aware of the importance of correct sampling. The student also gets knowledge how to i) sample and ii) prepare samples for various types of inorganic and organic analysis.

Contents:

Sampling errors and representative sampling, overview of sampling and sample preparation in the context of environmental analysis (both inorganic and organic analysis).

Learning activities and teaching methods:

24 hours of lectures + seminar presentation, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Analytical Chemistry (780111P)

Recommended or required reading:

Dean, J.R.: Methods for Environmental Trace Analysis, Wiley, 2003 and material handed out by the lecturers.

Person responsible:

Prof. P. Perämäki

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

Upon completion of the course, student should have acquired knowledge and understanding of terminology of microscopy, function of SEM-EDS and applications of SEM-EDS.

Contents:

Basic terminology, Scanning electron microscope and EDS, image formation and processing, applications.

Learning activities and teaching methods:

20 hours of lectures, problem based learning, portfolio, attendance is compulsory.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A).

Recommended or required reading:

Goodhew P.J.: Humphreys J. and Beanland R., Electron Microscopy and Analysis, 3rd ed., Taylor & Francis, 2000.

Person responsible:

Lecturer M. Tiainen

780690S: Seminar, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish, English on demand.

Timing:

5th spring.

Contents:

The student gives two presentations (20 min/each) on given scientific subjects related to the pro gradu (M.Sc.) thesis and distributes an abstract to the audience.

Target group:

Chemistry, compulsory.

Grading:

1-5/fail

Person responsible:

Lecturer Sampo Mattila, Lecturer Minna Tiainen

780380A: Seminar for the Degree of B.Sc., 1 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

1 credits

Language of instruction:

Finnish

Timing:

3rd spring.

Learning outcomes:

Improving oral/aural skills connected to the student's academic field as well as in everyday conversational situations.

Contents:

The student gives one presentation on a given scientific subject related to B.Sc. thesis (20 min.) and distributes an abstract to the audience.

Learning activities and teaching methods:

Students register for the course in the beginning of autumn or spring term. Compulsory attendance.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Thesis for the degree of B.Sc. (780300A).

Grading:

1-5/fail

Person responsible:

Lecturer Sampo Mattila, Lecturer Minna Tiainen

781630S: Seminar in Inorganic Chemistry, 2 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Paavo Perämäki, Laitinen Risto

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish, English on demand.

Timing:

4th and 5th year.

Learning outcomes:

Upon completion of the course, student should have acquired knowledge and understanding of recent development in inorganic chemistry and inorganic analytical chemistry. The student will be familiarized with the practices in international conferences.

Contents:

The attendance is compulsory. The student gives one presentation of 20 min on a topic taken from chemical literature.

Learning activities and teaching methods:

Instruction period, preparation of the presentation, a symposium of 1-2 days.

Target group:

Chemistry, optional.

Person responsible:

Prof. R. Laitinen and Prof. P. Perämäki

782623S: Seminar in Physical Chemistry, 2 op

Voimassaolo: 01.08.2012 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

4 credits

Language of instruction:

Finnish, English on demand.

Contents:

Designing and following projects in Physical Chemistry.

Person responsible:

Prof. K. Laasonen and J. Pursiainen

788602S: Seminar in Structural Chemistry, 2 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen kielet: Finnish

ECTS Credits:

2 credits

Language of instruction:

Finnish, English on demand.

Timing:

Spring and autumn.

Contents:

Student gives two presentations on a given scientific subject and distributes an abstract to the audience.

Learning activities and teaching methods:

20 hours of seminars.

Target group:

Chemistry, optional.

Person responsible:

Senior assistants S. Mattila

781611S: Solid State Chemistry, 4 op

Voimassaolo: - 31.07.2015

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laitinen Risto

Opintokohteen oppimateriaali:

West, Anthony R. , , 1988

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

Knowledge of synthesis, structures, spectroscopic properties, reactions, and applications of solid materials.

Contents:

Preparation of solid materials, structures of solids, crystal defects, thermodynamics and reaction kinetics, the effect of outer conditions on some reactions, phase diagrams and their applications, optical, magnetic and electric properties of solid materials, and industrial applications.

Learning activities and teaching methods:

28 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry I (780347A) and Inorganic Chemistry I (780353A).

Recommended or required reading:

West, A. R.: Basic Solid State Chemistry, 2nd Ed., John Wiley & Sons, Norwich, 1989.

Person responsible:

Prof. R. Laitinen.

781631S: Statistical Methods in Analytical Chemistry, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Paavo Perämäki

Opintokohteen oppimateriaali:

Massart, D.L., Vandeginste, B.G.M., Buydens, L.M.C., De Jong, S., Lewi, P.J. ja Smeyers-Verbeke, J., , 1997
Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

Upon completion of the course, student should have acquired knowledge and understanding of most common statistical techniques that are applied in validation of analytical methods and in quality control in analytical laboratories.

Contents:

Significance tests, analysis of variance, regression methods, measurement uncertainty, validation and optimization of methods.

Learning activities and teaching methods:

30 hours of lectures + 10 hours of exercises and practical exercise, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Analytical Chemistry (780111P).

Recommended or required reading:

Massart, D. L., Vandeginste, B.G.M., Buydens, L.M.C., De Jong, S., Lewi, P.J. and Smeyers-Verbeke, J.: Handbook of Chemometrics and Qualimetrics: Part A, Elsevier, 1997.

Person responsible:

Prof. P. Perämäki

780317A: Structural Chemistry I, 5 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Mattila, Sampo Antero

Opintokohteen oppimateriaali:

Williams, Dudley H. , , 1995

Opintokohteen kielet: Finnish

Leikkaavuudet:

784640S Structural Chemistry I 5.0 op

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

3rd autumn.

Learning outcomes:

After this course the student is familiar with the basics of interpretation of IR, NMR and mass spectra.

Contents:

Principles of chromatography, the interpretation of IR, NMR and mass spectra and methods of problem solving with the aid of IR, NMR and mass spectra.

Learning activities and teaching methods:

40 hours of lectures, 20 hours of demonstrations and exercises, one final examination.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

Physical Chemistry I (780347A) and Introduction to Analytical Chemistry (780111P).

Recommended or required reading:

Williams, D.H. & Fleming, I.: Spectroscopic Methods in Organic Chemistry, 5th ed., McGraw-Hill, Avon, 1995.

Person responsible:

Senior Assistant S. Mattila

781614S: Structural Methods in Inorganic Chemistry, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Raija Oilunkaniemi

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish, English on demand.

Timing:

4th or 5th year. The course is lectured every other year.

Learning outcomes:

This course will give the student an overview of the application of multinuclear NMR spectroscopy as one of the instrumental methods for identification and structural characterization of inorganic compounds.

Contents:

Applications of NMR Spectroscopy in inorganic chemistry.

Learning activities and teaching methods:

20 hours of lectures + seminar, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A), Structural Chemistry I (780317A).

Recommended or required reading:

Material handed out by the lecturer.

Person responsible:

Doc. R. Oilunkaniemi

782620S: Surface Chemistry I, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opintokohteen oppimateriaali:

Adamson, Arthur W. , , 1997

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn. The course is lectured every other year.

Learning outcomes:

After completing this course the students should have good knowledge of properties of liquid surfaces and interfaces. The role of surfactants is emphasised.

Contents:

This course focuses on properties of soft surfaces. A detailed view of liquid-gas, liquid-liquid interfaces are given. The roles of surfactant and liquid mixtures are studied in detail. A wide range of applications are discussed, for example emulsion, foams, flotation, nucleation, soaps on molecular level.

Learning activities and teaching methods:

30 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry II (782631S).

Recommended or required reading:

Adamson, A.W.: Physical Chemistry of Surfaces, 6th ed., John Wiley & Sons, New York, 1997, partly. Examination based on the lectures.

Person responsible:

Prof. K. Laasonen

782633S: Surface chemistry II, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Ulla Lassi

Opintokohteen oppimateriaali:

Adamson, Arthur W. , , 1997

Somorjai, Gabor A. , , 1994

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

After the course the student is familiar with interfaces (solid-gas, solid-liquid), properties of surfaces and surface phenomena. Student knows the most important surface structures and methods used in surface science studies. Surface phenomena are significant in several industrial applications, and those applications are theoretically studied during the course.

Contents:

Properties of solid-gas and solid-liquid interfaces, Surface structures, Surface phenomena and Surface analytical methods. Heterogeneous catalysis at solid surfaces is studied as an application.

Learning activities and teaching methods:

30 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Physical Chemistry I (780347A) and Physical Chemistry II (2631S).

Recommended or required reading:

Adamson, A.W. : Physical Chemistry of Surfaces, 6th edition, John Wiley and Sons, New York, 1997 (to the appropriate extent); Somorjai, G.A. : Introduction to Surface Chemistry and Catalysis, John Wiley and Sons, New York, 1994 (to the appropriate extent). Lecture notes (in English).

Person responsible:

Prof. U. Lassi

783642S: Synthetic Methods in Green Chemistry, 4 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Marja Lajunen

Opintokohteen kielet: Finnish**ECTS Credits:**

4 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn or spring. The course is lectured every other year.

Learning outcomes:

The student is familiar with the principles of green chemistry, knows basics of alternative solvents: Ionic liquids, water, supercritical liquids or fluoruous, two-phase systems and their uses in synthetic applications. He/she knows fundamentals of microwave technique.

Contents:

Ionic liquids and their properties and use in synthetic applications. Introduction to microwave technique and microwave-assisted organic synthesis. Organic reactions in water. Supercritical liquids as solvents. Syntheses in fluoruous, two-phase systems.

Learning activities and teaching methods:

20 hours of lectures, 2 hours of demonstrations, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Organic Chemistry I (780389A) and Organic Chemistry II (783643S).

Recommended or required reading:

Material given by the lecturer.

Person responsible:

Prof. M. Lajunen

780300A: Thesis for the Degree of B.Sc., 6 op**Opiskelumuoto:** Intermediate Studies**Laji:** Course**Vastuuyksikkö:** Department of Chemistry**Arvostelu:** 1 - 5, pass, fail**Opintokohteen kielet:** Finnish**ECTS Credits:**

6 credits

Language of instruction:

Finnish, English on demand.

Timing:3rd autumn (beginning).**Learning outcomes:**

After the writing the Thesis the student is be able to show a good knowledge of the subject of his/her Thesis and can write a perfect command of either Finnish or Swedish on the basis of existing scientific data.

Contents:

A thesis of approximately 20-40 pages including about 30 references. In addition, the student takes a maturity examination on the subject of the B.Sc. thesis.

Target group:

Chemistry, compulsory.

Recommended optional programme components:

The first and second year courses in chemistry.

Grading:

Pass/fail.

Person responsible:

Professors, Docents, Doctor level Senior Assistants and Lectures of the Chemistry Department.

780079Y: Tutoring, 1 op**Opiskelumuoto:** General Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Kopsa-Moilanen, Vieno Maria

Opintokohteen kielet: Finnish

ECTS Credits:

1 credits

Language of instruction:

Finnish

Timing:

2nd autumn or 3rd autumn.

Learning outcomes:

After this course the student has work experience as a group leader and a tutor for new students.

Target group:

Chemistry.

Person responsible:

Amanuensis and Student Services

783619S: Wood Chemistry, 3 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Hormi Osmo

Opintokohteen oppimateriaali:

Sjöström, Eero , , 1981

Opintokohteen kielet: Finnish

ECTS Credits:

3 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th autumn or spring. The course is lectured every other year.

Learning outcomes:

At the end of the course, the students should have acquired an understanding of the chemical composition of wood and the chemistry involved in chemical pulping of wood.

Contents:

The structure of wood, chemistry of carbohydrates, polysaccharides of wood, lignin, extractives, bark, pulping chemistry, bleaching.

Learning activities and teaching methods:

24 hours of lectures, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Introduction to Organic Chemistry (780103P).

Recommended or required reading:

Sjöström, E.: Wood Chemistry: Fundamentals and Applications, Academic Press, New York 1981.

Person responsible:

Prof. O. Hormi

781646S: X-Ray Crystallography, 6 op

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Department of Chemistry

Arvostelu: 1 - 5, pass, fail

Opettajat: Laitinen Risto

Opintokohteen kielet: Finnish

ECTS Credits:

6 credits

Language of instruction:

Finnish/English on demand.

Timing:

4th or 5th spring. The course is lectured every other year.

Learning outcomes:

After this course the student is familiar with basic concepts of crystal symmetry, the fundamentals of crystal structure determination, and has some hands-on experience in the structure determination.

Contents:

Crystal classes, crystal symmetry, scattering of X-rays in crystalline material, determination of the crystal structure from single crystals.

Learning activities and teaching methods:

36 hours of lectures + 8 hours of demonstrations + practical exercise with a written report, one final examination.

Target group:

Chemistry, optional.

Recommended optional programme components:

Inorganic Chemistry I (780353A) and Molecular Symmetry and Spectroscopy (781639S).

Recommended or required reading:

Material handed out by the lecturer.

Person responsible:

Prof. J. Valkonen (University of Jyväskylä) and Prof. R. Laitinen.
