Opasraportti

Field of Industrial Engineering and Management (2016 - 2017)

Tutkintorakenteet

MSc (Tech) in Product Management

Tutkintorakenteen tila: published
Lukuvuosi: 2016-17
Lukuvuoden alkamispäivämäärä: 01.08.2016

ORIENTATION STUDIES (vähintään 40 op)

All the studies in this module are compulsory.

- **Course Structure and learning outcomes**
- **555301S Research Seminar in IEM** is related for preparing Master’s Thesis. It is recommended to take this course during the 2nd autumn semester of Master Studies.
- **555304S Advanced Internship** it recommended to take at least during the summer season between 1st and 2nd year of Master Studies and reporting on the 2nd autumn semester of Master Studies.
- One Finnish language course can be included in this module
- Substitute courses taken in other higher education institutes (exchange studies) can be included in this module by using the course code **555307M**

Common Studies of the Majors in other Universities /Institutes

A440150: Basic module, Product Management, 40 op

- **Compulsory**
  - 555242A: Product development, 5 op
  - 555313S: Management, 5 op
  - 555370S: Strategic Management, 5 op
  - 555350S: Technology Management, 5 op
  - 555377S: Risk Management, 5 op
  - 555314S: Management Information Systems, 5 op
  - 555371S: Human Resource Management, 5 op
  - 555391S: Advanced Course in Project Management, 5 op

MAJOR SUBJECT STUDIES (vähintään 50 op)

All the studies in this module are compulsory.
Substitute courses taken in other higher education institutes (exchange studies) can be included in this module by using the course code 555308M

Advanced Studies of the Majors in other Universities /Institutes

A440268: Major subject studies, Product Management, 50 op

Compulsory

555351S: Advanced Course in Product Development, 5 op
555343S: Product Data and product life cycle management, 5 op
555346S: Product portfolio management, 5 op
555378S: Seminar in industrial engineering and management, 5 op
555382S: Management of a project-based firm, 5 op
555301S: Research Seminar in IEM, 5 op
555304S: Advanced Internship, 5 op
555379S: Research Project in Industrial Engineering and Management, 5 op
555333S: Production Management, 5 op
555375S: Lab to Market, 5 op

THESIS (vähintään 30 op)

555300S: Master's Thesis, 30 op
555302S: Maturity Test / Master of Science in Industrial Engineering and Management, 0 op

BSc (Tech) Degree /Industrial Engineering and Management Degree Programme (3 + 2 year)

Tutkintorakenteen tila: published

Lukuvuosi: 2016-17

Lukuvuoden alkamispäivämäärä: 01.08.2016

BASIC AND INTERMEDIATE STUDIES (vähintään 120 op)

- Choose the language in which you have a long high school course curriculum.
- Choose 2nd domestic language

A440120: Basic and Intermediate Studies, Industrial Engineering and Management, 119,5 - 120 op

STUDY AND COMMUNICATION SKILLS

555203P: Study Skills, 2 op
900061A: Scientific Communication for Production Engineering and Management, 2 op
900062P: Communicative Oral Skills for Production Engineering and Management, 2 op
030005P: Information Skills, 1 op

FOREIGN LANGUAGE(choose one)

902011P: Technical English 3, 6 op
903012P: Technical German 3, 6 op

CHOOSE ONE

901044Y: Second Official Language (Swedish), Written Skills, 1 op
900081Y: Second Official Language (Finnish), Written Skills, 1 - 2 op

MATHEMATICS

031010P: Calculus I, 5 op
031078P: Matrix Algebra, 5 op
031075P: Calculus II, 5 op
031076P: Differential Equations, 5 op
031021P: Probability and Mathematical Statistics, 5 op

PHYSICS

761111P: Basic mechanics, 5 op
761113P: Electricity and magnetism, 5 op
761114P: Wave motion and optics, 5 op
ENGINEERING STUDIES (vähintään 40 op)

The modules include the technical engineering studies of the Bachelor’s degree programme. A student must choose one module of Engineering.

Medical and Wellness Technology

A440146: Module Preparing for the Major, Biomedical Engineering, 40 op

Compulsory

H440129: Module Preparing for the Major, Medical and Wellness Technology, 40 op

Compulsory

521109A: Electrical Measurement Principles, 5 op
580102P: Introduction to Medical and Wellness Technology, 5 op
764163P: Introduction to Medical Physics, 5 op

Compulsory

764163P-01: Introduction to Medical Physics (part 1), 0 op
764163P-02: Introduction to Medical Physics (part 2), 0 op
ay402961P: Basics of Anatomy and Physiology (OPEN UNI), 5 op
041201A: Basics in eHealth, 5 op
080901A: Introduction to Technology in Clinical Medicine, 5 op
521302A: Circuit Theory 1, 5 op
761116P: Radiation physics, biology and safety, 3 op

Mining Technology and Mineral Processing

A440145: Module Preparing for the Major, Mining Technology and Mineral Processing, 40 op

Compulsory

H440128: Module Preparing for the Major, Mining Technology and Mineral Processing, 40 op

Compulsory

477011P: Introduction to Process and Environmental Engineering I, 5 op
477201A: Material and Energy Balances, 5 op
477401A: Thermodynamic Equilibria, 5 op
488010P: Introduction to Process and Environmental Engineering II, 5 op
477051A: Automation Engineering, 5 op
477322A: Heat and Mass Transfer, 5 op
477304A: Separation Processes, 5 op
477052A: Fluid Mechanics, 5 op

Mechanical Engineering

A440141: Module Preparing for the Major, Mechanical Engineering, 40 op

Alternative

H440124: Module Preparing for the Major, Machinery Design, 40 op

Compulsory

464101A: Machine drawing and CAD, 5 op

Lukuvuosi: 2016-17
Lukuvuoden alkamispäivämäärä: 01.08.2016

Supplementary studies or "Bridge Studies" (enintään 60 op)
These studies are meant only for students who got admission directly to the IEM Master's programme and haven't had IEM studies in earlier studies.

From the course list will be chosen the courses which has been discussed with the study advisor. One of the courses (A-level, 5 ECTS cr) can be included in the master's degree.

A440257: Supplementary studies, Industrial Engineering and Management, 0 - 60 op

Supplementary studies of IEM
555225P: Basics of industrial engineering and management, 5 op
555285A: Project management, 5 op
555226A: Operations and supply chain management, 5 op
555264P: Managing well-being and quality of working life, 5 op
555242A: Product development, 5 op
555286A: Process and quality management, 5 op

COMMON Studies in Majors, 20 ECTS cr (vähintään 20 op)

• Course Structure and learning outcomes
• 555301S Research Seminar in IEM is related for preparing Master's Thesis. It is recommended to take this course during the 2nd autumn semester of Master Studies.
• 555304S Advanced Internship it recommended to take at least during the summer season between 1st and 2nd year of Master Studies and reporting on the 2nd autumn semester of Master Studies.
• Courses taken in other higher education institutes can be included in this module by using the course code 555307M.

A440227: Major Studies / Common Studies, Advanced Module, 20 op

Common studies
555313S: Management, 5 op
555314S: Management Information Systems, 5 op
555301S: Research Seminar in IEM, 5 op
555304S: Advanced Internship, 5 op

ADVANCED Studies in Major, 20 ECTS cr (vähintään 20 op)
Select the Major **Product Management** or **Production Management**.

**Advanced studies in Product Management**

A440228: Major Studies / Product Management, Advanced Module, 20 op  
*Obligatory studies in Product Management*  
- 555350S: Technology Management, 5 op  
- 555343S: Product Data and product life cycle management, 5 op  
- 555346S: Product portfolio management, 5 op  
- 555351S: Advanced Course in Product Development, 5 op

**Advanced studies in Production Management**

A440229: Major Studies/ Production Management, Advanced Module, 20 op  
*Obligatory studies in Production Management*  
- 555330S: Sourcing Management, 5 op  
- 555331S: Advanced Supply Chain Management, 5 op  
- 555332S: Operations Research, 5 op  
- 555333S: Production Management, 5 op

**SUPPLEMENTARY Studies of Major, 20 ECTS cr (vähintään 20 op)**

- Select at least one of three supplementary modules.  
- Courses taken in other higher education institutes can be included in this module by using the course code 555309M.

1. **Organisation and knowledge management**

A440259: Complementary Study Module of the Major/ Organization and Knowledge management, Advanced Module, 10 op  
*Obligatory studies of Organisation and knowledge management*  
- 555370S: Strategic Management, 5 op  
- 555371S: Human Resource Management, 5 op

2. **Project Management**

A440260: Complementary Study Module of the Major/ Project Management, Advanced Module, 10 op  
*Obligatory studies of Project Management*  
- 555391S: Advanced Course in Project Management, 5 op  
- 555382S: Management of a project-based firm, 5 op

3. **Process and Quality Management**

A440261: Complementary Study Module of the Major/ Process and Quality Management, Advanced Module, 15 op  
*Obligatory studies of Process and Quality Management*  
- 555390S: Process Analytics, 5 op  
- 555389S: Systematic Process Improvement, 10 op

**Advanced elective studies**

A440262: Complementary Study Module of the Major/ Elective studies, Advanced Module, 5 - 10 op  
*Advanced elective studies*  
- 555376S: Organisational development, 5 op  
- 555375S: Lab to Market, 5 op  
- 555377S: Risk Management, 5 op  
- 555378S: Seminar in industrial engineering and management, 5 op  
- 555379S: Research Project in Industrial Engineering and Management, 5 op
ENGINEERING Studies, 20 ECTS cr (vähintään 20 op)

- Choose the module according to your Bachelor studies or earlier studies. Courses (A, S) you can find in the study guides of field in Weboodi.
- Courses taken in other higher education institutes can be included in this module by using the course code 555305M.

**Medical and Wellness Technology**
A440265: Complementary Module, Biomedical Engineering, 20 - 30 op

**Mining Technology and Mineral Processing**
A440264: Complementary Module, Mining Technology and Mineral Processing, 20 - 30 op

**Mechanical Engineering**
A440255: Supplementary Module, Mechanical Engineering, 20 - 30 op

**Software Engineering**
A440266: Complementary Module, Software Engineering, 20 - 30 op

**Process Engineering**
A440249: Supplementary Module, Process Engineering, 20 - 30 op

**Civil Engineering**
A440263: Complementary Module, Civil Engineering, 20 - 30 op

**Electrical Engineering**
A440253: Supplementary Module, Electrical Engineering, 20 - 30 op

**Information Engineering**
A440267: Complementary Module, Information Engineering, 20 - 30 op

**Environmental Engineering**
A440256: Supplementary Module, Environmental Engineering, 20 - 30 op

**Other engineering module**

**ELECTIVE Studies, 0 - 10 ECTS cr (enintään 10 op)**

- Master level studies include maximum 10 ECTS elective studies. Students choose courses that supplement or deepen the competencies of Industrial Engineering and Management.
- Courses with same content cannot be included twice to the degree programmes in Industrial Engineering and Management.
- Courses taken in other higher education institutes can be included in this module by using the course code 555306M.

A440269: Special Module, 0 - 10 op

**MASTER’S THESIS and related Studies, 30 ECTS cr (30 op)**
MSc (Tech) Degree /Industrial Engineering and Management Degree Programme (3+2 year)

Tutkintorakenteen tila: archived

Lukuvuosi: 2016-17

Lukuvuoden alkamispäivämäärä: 01.08.2016

COMMON Studies in Majors, 20 ECTS cr (vähintään 20 op)

- Course Structure and learning outcomes
- 555301S Research Seminar in IEM is related for preparing Master's Thesis. It is recommended to take this course during the 2nd autumn semester of Master Studies.

Common studies
  555313S: Management, 5 op
  555314S: Management Information Systems, 5 op
  555301S: Research Seminar in IEM, 5 op
  555304S: Advanced Internship, 5 op

ADVANCED Studies in Major, 20 ECTS cr (vähintään 20 op)

- Select the Major Product Management or Production Management.
- Courses taken in other higher education institutes can be included in this module by using the course code 555308M.

Advanced studies in Product Management

A440228: Major Studies / Product Management, Advanced Module, 20 op

Obligatory studies in Product Management
  555350S: Technology Management, 5 op
  555343S: Product Data and product life cycle management, 5 op
  555346S: Product portfolio management, 5 op
  555351S: Advanced Course in Product Development, 5 op

Advanced studies in Production Management

A440229: Major Studies / Production Management, Advanced Module, 20 op

Obligatory studies in Production Management
  555330S: Sourcing Management, 5 op
  555331S: Advanced Supply Chain Management, 5 op
  555332S: Operations Research, 5 op
  555333S: Production Management, 5 op
SUPPLEMENTARY Studies of Major, 20 ECTS cr (vähintään 20 op)

- Select at least one of three supplementary modules.
- Courses taken in other higher education institutes can be included in this module by using the course code 555309M.

1. Organisation and knowledge management

A440259: Complementary Study Module of the Major/ Organization and Knowledge management, Advanced Module, 10 op

- Obligatory studies of Organisation and knowledge management
  - 555370S: Strategic Management, 5 op
  - 555371S: Human Resource Management, 5 op

2. Project Management

A440260: Complementary Study Module of the Major/ Project Management, Advanced Module, 10 op

- Obligatory studies of Project Management
  - 555391S: Advanced Course in Project Management, 5 op
  - 555382S: Management of a project-based firm, 5 op

3. Process and Quality Management

A440261: Complementary Study Module of the Major/ Process and Quality Management, Advanced Module, 15 op

- Obligatory studies of Process and Quality Management
  - 555390S: Process Analytics, 5 op
  - 555389S: Systematic Process Improvement, 10 op

Advanced elective studies

A440262: Complementary Study Module of the Major/ Elective studies, Advanced Module, 5 - 10 op

- Advanced elective studies
  - 555376S: Organisational development, 5 op
  - 555375S: Lab to Market, 5 op
  - 555377S: Risk Management, 5 op
  - 555378S: Seminar in industrial engineering and management, 5 op
  - 555379S: Research Project in Industrial Engineering and Management, 5 op

ENGINEERING Studies, 20 ECTS cr (vähintään 20 op)

- Choose the module according to your Bachelor studies or earlier studies. Courses (A, S) you can find in the study guides of field in Weboodi.
- Courses taken in other higher education institutes can be included in this module by using the course code 555305M.

Medical and Wellness Technology

A440265: Complementary Module, Biomedical Engineering, 20 - 30 op

Mining Technology and Mineral Processing

A440256: Supplementary Module, Environmental Engineering, 20 - 30 op

**Other engineering module**

**ELECTIVE Studies, 0 - 10 ECTS cr (enintään 10 op)**
- Master level studies include maximum 10 ECTS elective studies. Students choose courses that supplement or deepen the competencies of Industrial Engineering and Management.
- Courses with same content cannot be included twice to the degree programmes in Industrial Engineering and Management.
- Courses taken in other higher education institutes can be included in this module by using the course code 555306M.

A440269: Special Module, 0 - 10 op

**MASTER'S THESIS and related Studies, 30 ECTS cr (30 op)**
555300S: Master's Thesis, 30 op
555302S: Maturity Test / Master of Science in Industrial Engineering and Management, 0 op

**Tutkintorakenteisiin kuulumattomat opintokokonaisuudet ja -jaksot**

555310S: Demola Project, 5 op
555214A: Working in the university community, 5 op
555215A: Working life project, 5 op

**Opintojaksojen kuvaukset**
Tutkintorakenteisiin kuuluvien opintokohteiden kuvaukset

A440150: Basic module, Product Management, 40 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Module of the Option
Laji: Study module
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

Compulsory

555242A: Product development, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Haapasalo, Harri Jouni Olavi
Opintokohteen kielet: English
Leikkaavuudet:

ay555242A Product development (OPEN UNI) 5.0 op
555240A Basic Course in Product Development 3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 1.

Learning outcomes:
This course introduces product development and innovations management in a company environment. The course provides fundamental understanding over tools and frameworks that can be used for analysing and managing products, innovations, and technology development. The aim is to create a connection between product development and other company functions. Upon completion of the course a student is capable of explaining the role of product development as a company function. The student understands the difference between innovation activities and systematic product development, and knows the difference between different phases of product development process and its activities. Student learns how to transform customer needs into requirements for product development process and finally into product features. Additionally, the student is able to define the meaning of other company functions to product development activities.

Contents:
Meaning of products for the operations of an industrial enterprise, product development paradigm and defining relevant concepts, realising product development methodologically (U&E model, Cooper’s stage-gate model, QFD), managing innovations, and product development success factors.
Mode of delivery:
The tuition will be implemented as blended teaching.

Learning activities and teaching methods:
Lectures 20 h / exercises 6 h / group work and self-study 108 h.

Target group:
Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
555226A Operations and production.

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555225P Basics of industrial engineering and management, 555285A Project management, 555264P Managing well-being and quality of working life, and 555286A Process and quality management.

Recommended or required reading:

Assessment methods and criteria:
Assignment and final exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Harri Haapasalo.

Working life cooperation:
No.

Other information:
Substitutes course 555240A Basic Course in Product Development.

555313S: Management, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Kess, Pekka Antero
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits.

Language of instruction:
English
Timing:
Period 1.

Learning outcomes:
Upon completion of the course the student understands the key concepts of general management. After completing the course the student knows the historical developments in the management thought. The student has an understanding about the qualifications of a manager in a modern organization. The student understands the principles of the managerial decision making. The student can distinguish between the terms management and leadership. The student has an understanding about good managerial practices.

Contents:
Managers and Managing, The Evolution of Management Thought, Values, Attitudes, Emotions, and Culture: The Manager as a Person, Ethics and Social Responsibility, Managing Diverse Employees in a Multicultural Environment, Decision Making, The Manager as a Planner and Strategist, Managing Organizational Structure and Culture, Organizational Control and Change, Motivation and Performance, Leadership, Effective Groups and Teams, Promoting Effective Communication, Managing Conflict, Politics, and Negotiation.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and a supervised group work).

Learning activities and teaching methods:
Lectures 10 h, case examples 10 h, self-study 115 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
The assessment is based on the exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Pekka Kess

Working life cooperation:
No.

555370S: Strategic Management, 5 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Learning outcomes:
Upon completion of the course the student should be able to utilize strategic thinking, planning, and management. He/she can analyze and plan complex global business operations. After the course, the student can participate in strategic planning and strategy implementation in organizations. The student knows how to apply strategy analysis frameworks and analyze the implementation of the chosen strategy.

Contents:
Strategic thinking, strategic planning, strategic management, strategy analysis frameworks, strategy implementation with a simulation, analysis of the strategy implementation.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures 6 h / exercises 6 h / group work 122 h. Alternatively independent learning method: book examination 134 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:

Recommended or required reading:

Assessment methods and criteria:
This course utilizes continuous assessment. The group work includes the creation of strategic plan (10 % of the grade), business simulation (30 % of the grade), and the analysis of the strategy (60 % of the grade).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.
Other information:
Substitutes course 555320S Strategic Management.

**555350S: Technology Management, 5 op**

**Voimassaolo:** 01.08.2015 -  
**Opiskelumuoto:** Advanced Studies  
**Laji:** Course  
**Vastuuysikkö:** Field of Industrial Engineering and Management  
**Arvostelu:** 1 - 5, pass, fail  
**Opettajat:** Haapasalo, Harri Jouni Olavi  
**Opintokohteen kielet:** English  
**Leikkaavuudet:**  
- 555340S Technology Management 4.0 op

**ECTS Credits:**  
5 ECTS credits.

**Language of instruction:**  
English.

**Timing:**  
Period 2.

**Learning outcomes:**  
After finishing the course, the student will be able to differentiate product development and technology management in a company. The student will be able to piece together the development needs and cycles of technologies in an organization. In addition, the student will know how to combine technology development and technology management with strategic planning of a company.

**Contents:**  
The course consists of defining technology and its role within an enterprise and within society. During the course we study the meaning of innovation in technological competition. The lifecycles of technology including development, acquirement, and movement are also covered.

**Mode of delivery:**  
The tuition will be implemented as face-to-face teaching

**Learning activities and teaching methods:**  
Lectures 21 h / exercises, group work and self-study 113 h.

**Target group:**  
Industrial Engineering and Management and Master’s Programme in Product Management students.

**Prerequisites and co-requisites:**  
555242A Product Development.

**Recommended optional programme components:**  
-

**Recommended or required reading:**  
Lecture materials and selected articles, will be defined at the beginning of the course.
Assessment methods and criteria:
Exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Harri Haapasalo.

Working life cooperation:
No.

Other information:
Substitutes course 555340S Technology Management. Course name from 1.8.2017 is 'Research and Technology Management'

555377S: Risk Management, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Kirsi Aaltonen

Leikkaavuudet:
   555321S  Risk Management  3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English

Timing:
Period 2.

Learning outcomes:
The objective of the course is to provide a student an overall perspective to risk management in organizations. Upon completion the student can explain the key concepts of risk and uncertainty management, classify risks, conduct systematic risk analyses, apply risk management methods and tools and make informed improvement suggestions related to risk management in organizations. The student understands the role of risk management in organizations and can compare

Contents:
Definitions of risk and uncertainty, risk management standards, risk classification, systematic risk management process, methods of risk management, psychological aspects of risk management, ERM and organizing of risk management, risk management in different contexts, risk governance.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 26h, self-study 54h, group assignment 54h.
Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Lecture materials and reading materials (articles, book chapters) related to each lecture. The materials will be defined at the beginning of the course.

Assessment methods and criteria:
Group assignment, in-class case assignments, exam. Course grading is based on exam and group assignment.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Assistant Professor Kirsi Aaltonen

Working life cooperation:
No.

Other information:

555314S: Management Information Systems, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: English

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Periods 3 - 4.

Learning outcomes:
Upon completion of the course, the student can explain the key concepts of management information systems. The student is familiar with the significance of information and information management in modern business process management. The student can define the information needs of management processes and understands how information systems can meet these needs.
After completing the course, the student is aware of the current trends in management information systems technologies and practices. After the course, the student has readiness to participate for enterprise
information system designing, purchasing, and development tasks as a role of industrial engineer/process developer. During the course, the students will also develop their skills in reflective, self-directing learning. A student is able to find the relevant information sources related to MIS.

Contents:
Key concepts: what is management information systems (MIS), managerial information, different types of MIS applications.
Information systems in decision making and leadership, the effects of information technology in business processes.
Current trends in management information systems technologies and practices.
Structure of information systems, data governance models, principles of data management and IT architecture.
Special characteristics of ICT project management (procurement and implementation).
Company examples about MIS in practice.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 18 h, self-study, learning diary and group work 117 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent, 555313S Management.

Recommended optional programme components:

Recommended or required reading:
Lecture materials. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
Learning diary and project work (group assignment). The course grading is based on the learning diary and the project work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Hanna Kropsu-Vehkaperä.

Working life cooperation:
No.

Other information:
Substitutes the course 555344S Management Information Systems.

555381S    Project Leadership    5.0 op

**ECTS Credits:**

5 ECTS credits.

**Language of instruction:**

English.

**Timing:**

Period 1.

**Learning outcomes:**

After the course, the student has an in-depth understanding of the most important project management areas, competences to identify and evaluate the most applicable managerial approaches for different types of projects and capabilities to develop project management processes in an organization.

**Contents:**

Different type of projects and industry specific approaches to project management, managing large international projects, managing projects’ external environment, project governance, project risk management, project time and schedule management

**Mode of delivery:**

The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

**Learning activities and teaching methods:**

Lectures, web-based-lectures and workshops 36h, group exercises 36h, self-study 62h

**Target group:**

Industrial Engineering and Management and Master’s Programme in Product Management students.

**Prerequisites and co-requisites:**

555285A Basic course in project management.

**Recommended optional programme components:**

- 

**Recommended or required reading:**

Lecture and exercise material.

**Assessment methods and criteria:**

This course utilizes continuous assessment. The grading is based on case assignments solved in groups and discussed during the lecture (30% of the grade), group exercise presented and discussed in the workshops (30% of the grade), and exam (40% of the grade).

**Grading:**

The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Opintokohteen kielet: English
Voidaan suorittaa useasti: Kyllä

Required proficiency level:

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Periods 3-4.

Learning outcomes:
The course familiarizes students with the broad concepts of product management. After finishing the course, the student understands central principles and contents of product management and product portfolio management. Student knows the basic steps of the product portfolio management development and understands the ways to analyse and manage products and product portfolios. A student learns to see product and product portfolio management as strategic targets, performance indicators, governance models, process and product information management over horizontal and technical portfolios over product life cycle phases and product structure levels. The student can apply the learned things and methods in different industries in order to develop systematic product and product portfolio management processes.

Contents:
Basic issues in product and product portfolio management performance management, governance models, horizontal and vertical portfolios, processes, tools and product information.

Mode of delivery:
The tuition will be implemented as face-to-face learning and practical assignments.

Learning activities and teaching methods:
Will be defined at the beginning of the course.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
555242A Product development, 555350S Technology management.

Recommended optional programme components:

Opettajat: Jaakko Kujala
Opintokohteen kielet: Finnish
Voidaan suorittaa useasti: Kyllä

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 4.

Learning outcomes:
The course provides the student with the basic skills to manage a company practicing project business. Upon completion the student can explain the management areas of project business and their essential contents. The student can compare the specific features of project business in different business environments and analyse their effect on the business model of the company. The student can evaluate the significance of a single project and its management in reaching business goals.

Contents:
The specific features of project business, business models of a project company, project sales and marketing, contracting, negotiation analytic approach, project portfolio management, management of project networks.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.
Learning activities and teaching methods:
Lectures 24h, self-study 56h, group exercise 54h

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:

Recommended or required reading:
Lecture materials. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
The course utilizes continuous assessment. During the course, the students must write a learning diary for each lecture and participate actively in the lectures. 40% of the grade is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:

555301S: Research Seminar in IEM, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used.

Timing:
Periods 1-4.

Learning outcomes:
Upon completion the student knows scientific process and different research methods. The student can select an appropriate method for his/her master’s thesis work. The student can evaluate validity of research work and provide constructive criticism. The student can report research findings in the form of academic research report and participate in academic discussion.

Contents:
Research approach, qualitative and quantitative research methods, structure of research report, evaluating validity of research, constructive criticism and participation in scientific discussion.

**Mode of delivery:**
The tuition will be implemented as face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 18h, self-study 116h.

**Target group:**
Industrial Engineering and Management students.

**Prerequisites and co-requisites:**
B.Sc. in Industrial Engineering and Management or equivalent.

**Recommended optional programme components:**
Research report is based on research work student is doing for his/her master’s thesis work

**Recommended or required reading:**
Lecture material. Other materials will be defined at the beginning of the course.

**Assessment methods and criteria:**
The course includes lectures/seminars and active participation in discussion, presentation of own research work, providing constructive feedback on ongoing research work, evaluation of two completed M.Sc. thesis, and report written in article format of own master’s thesis research work.

**Grading:**
The course utilizes verbal grading “Pass/Fail”.

**Person responsible:**
Professor Jaakko Kujala.

**Working life cooperation:**
No.

**Other information:**
Seminars will include separate lectures about research approach, qualitative research methods and quantitative research methods. These lectures are recommended to be completed before starting own research work for master’s thesis. Participation in these three lectures is mandatory to participate in the course and they are lectured two times a year.

555388S Project Work in Project Management 5.0 op
555326S Research Project in Production Management 5.0 op
555348S Research Project in Technology Management 5.0 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish/English

Timing:
Periods 1-4 or as summer studies independently

Learning outcomes:
Learning outcomes depend on the project work contents.

**Contents:**
Project work topics and types vary. The topics are typically related to actual problems in the industry.

**Mode of delivery:**
Will be defined at the beginning of the course.

**Learning activities and teaching methods:**
The methods are agreed with the project work instructor. The work can be done individually or in a group.

**Target group:**
Industrial Engineering and Management and Master’s Programme in Product Management students.

**Prerequisites and co-requisites:**
B.Sc. in Industrial Engineering and Management or equivalent.

**Recommended optional programme components:**
- 

**Recommended or required reading:**
Will be defined at the beginning of the course.

**Assessment methods and criteria:**
The assessment is based on the project work report.

**Grading:**
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
- 

**Working life cooperation:**
- 

**Other information:**
The objective of the course is to apply the methods of industrial engineering and management in a company’s development activities. The course provides the student with an opportunity to combine and apply his/her existing knowledge in a study project. The student familiarises himself/herself with research work and reporting of the results. Substitutes courses 555326S Research Project in Production Management, 555348S Research Project in Product Management, 555367S Exercises in Work Science 555387S Research Project in Quality Management and 555388S Research Project in Project Management.

555333S: Production Management, 5 op

**Voimassaolo:** 01.08.2015 -
**Opiskelumuoto:** Advanced Studies
**Laji:** Course
**Vastuuysikkö:** Field of Industrial Engineering and Management
**Arvostelu:** 1 - 5, pass, fail
**Opettajat:** Kess, Pekka Antero
**Opintokohteen kielet:** English
**Leikkaavuudet:**

555322S Production Management 3.0 op
ECTS Credits:
5 ECTS credits.

Language of instruction:
English

Timing:
Period 2.

Learning outcomes:
Upon completion of the course the student understands the key concepts of operations and production management. The student should know the essential production strategies. The student should also understand the principles of the supply chain management, and should be able to apply JIT, Lean and TOC methods in analyzing and constructing development plans for production organizations. Upon completion of the course the student can apply the management methods also in service systems. The student also understands the principles of the sustainable development in production.

Contents:
Production strategies, sustainable development, Supply Chain Management, Just-In-Time (JIT), Theory of Constraints (TOC), Lean, Toyota Production System (TPS), management of the production of services.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and a supervised group work).

Learning activities and teaching methods:
Lectures 20 h, assignment guidance 20 h, group work 95 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:

Recommended or required reading:

Assessment methods and criteria:
The assessment is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Pekka Kess

Working life cooperation:
No.
**Other information:**
Substitutes course 555322S Production Management.

**555375S: Lab to Market, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Advanced Studies

**Laji:** Course

**Vastuuysikkö:** Field of Industrial Engineering and Management

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Jukka Majava

**Opintokohteen kielet:** English

**Leikkaavuudet:**

555327S Seminar in Production Management : Lab to Market 5.0 op

**ECTS Credits:**
5 ECTS credits.

**Language of instruction:**
English.

**Timing:**
Period 2.

**Learning outcomes:**
Upon completion of the course the student should be able to analyze an industry to identify viable business ideas and opportunities. He/she can use different frameworks including scenario planning, customer driven analysis, user needs analysis, and technology evolution analysis. The student can apply frameworks and methods to distinguish interesting and promising ideas from viable opportunities, utilize frameworks and methods to evolve the ideas into viable products and businesses, and determine what business models are most effective. The student can also present and defend own ideas, and critically examine and discuss the recommendations of others.

**Contents:**
Industry analysis, scenario planning, customer driven analysis, user needs analysis, technology evolution analysis, opportunity identification, business models.

**Mode of delivery:**
The tuition will be implemented as face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 28 h / self-study and group work 106 h.

**Target group:**
Industrial Engineering and Management and Master’s Programme in Product Management students.

**Prerequisites and co-requisites:**
B.Sc. in Industrial Engineering and Management or equivalent.

**Recommended optional programme components:**
-

**Recommended or required reading:**
Lecture materials. Other materials will be defined at the beginning of the course.

**Assessment methods and criteria:**
This course utilizes continuous assessment. During the course, there are mandatory individual assignments (75 % of the grade) and a group work (25 % of the grade).

**Grading:**
1-5.

**Person responsible:**
D.Sc. Jukka Majava.

**Working life cooperation:**
No.

**Other information:**
Substitutes course 555327S Lab to Market.

555300S: Master's Thesis, 30 op

**Voimassaolo:** 01.08.2015 -
**Opiskelumuoto:** Advanced Studies
**Laji:** Diploma thesis
**Vastuuysikkö:** Field of Industrial Engineering and Management
**Arvostelu:** 1 - 5, pass, fail
**Opettajat:** Jukka Majava
**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**
470099S  Master's Thesis in Industrial Engineering and Management  30.0 op

**ECTS Credits:**
30 ECTS credits.

**Language of instruction:**
Finnish / English.

**Timing:**
Periods 1-4.

**Learning outcomes:**
Upon completion of the course the student should be able to solve challenging problems in organizations independently. The student can create a research plan, and define a research problem and research questions. The student is able to manage his own work according to the research plan. The student can also utilize different information sources and critically evaluate the information obtained. The student can create a written report according to the instructions.

**Contents:**
The research topic is selected in co-operation with the instructor.

**Mode of delivery:**
The tuition will be implemented as self-study and face-to-face teaching.

**Learning activities and teaching methods:**
Self-study 804 h. The student defines the research topic in co-operation with the instructor. The thesis can be a theoretical

**Target group:**
Industrial Engineering and Management students and Master’s Programme in Product Management students.

**Prerequisites and co-requisites:**
B.Sc. in Industrial Engineering and Management or equivalent.

**Recommended optional programme components:**
The students will complete 555301S Research seminar in industrial engineering and management simultaneously.

**Recommended or required reading:**
-

**Assessment methods and criteria:**
This course includes writing a Master’s Thesis.

**Grading:**
1-5.

**Person responsible:**
Industrial Engineering and Management professors and doctors.

**Working life cooperation:**
Yes.

**Other information:**
Substitutes course 477991S Master’s Thesis.

900061A: Scientific Communication for Production Engineering and Management, 2 op

Voimassaolo: 01.08.2008 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Languages and Communication
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Proficiency level:
- 

Status:
Compulsory for the students undertaking the bachelor's degree in the Industrial Engineering and Management.

Required proficiency level:
- 

ECTS Credits:
2 credits

Language of instruction:
Finnish

Timing:
The course begins in the first year of studies by introductory lessons and continues during the second or the third year of studies.

Learning outcomes:
The student should have mastered the basics of scientific communication. He/she should be able to view scientific writing as a process and prepare a scientific research report (among other scientific texts).

Contents:
Practises and distinctive features of scientific communication, writing as a process, critical and analytical reading strategies, style and language of science, essential questions of language planning.

Mode of delivery:
Multimodal teaching

Learning activities and teaching methods:
Introductory lessons 2 hrs, guiding in small gorups 3 hrs, distance teaching and independent study 49 hrs.

Target group:
Students undertaking the bachelor's degree in the Industrial Engineering and Management.

Prerequisites and co-requisites:
-

Recommended optional programme components:
The course is to be taken concurrently with the course 555210A Harjoittelu offered by the Department of Industrial Engineering and Management.

Recommended or required reading:
Material in Optima

Assessment methods and criteria:
Active participation in contact and distance teaching, independent study and completion of given assignments. Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
Pass / fail

**Person responsible:**
Outi Mikkola

**Laji:** Course
**Vastuuysikkö:** Languages and Communication
**Arvostelu:** 1 - 5, pass, fail
**Opintokohteen kielet:** Finnish

**Proficiency level:**
-

**Status:**
This course is obligatory for the Students of Industrial Engineering and Management and it is integrated to the Case course 555284A.

**Required proficiency level:**
-

**ECTS Credits:**
2 ECTS

**Language of instruction:**
Finnish

**Timing:**
the Autumn term of the 3rd year of studies

**Learning outcomes:**
Upon completion of the course the student should be familiar with the central principles of work and study-related communication, both oral and written, and be able to apply this knowledge in his/her own communication. The student should be able to analyse and assess his/her own writing and the writing of his/her peers. He/she should be able to act in group communication situations in a target-oriented manner. The student should also be able to give and receive constructive criticism. The student knows how to act efficiently in situations of group communication.

**Contents:**
Presentations, preparing a presentation, presenting techniques, argumentation, non-verbal communication, negotiating skills and conventions, observation and analysis of speech communication situations.

**Mode of delivery:**
multi-modal teaching

**Learning activities and teaching methods:**
Contact teaching and independent work

**Target group:**
Students of Industrial Engineering and Management

**Prerequisites and co-requisites:**
Recommended optional programme components:
This course is integrated to the Case course 555284A.

Recommended or required reading:
the material in the Optima learning environment

Assessment methods and criteria:
Active participation in contact teaching, independent study and completion of given assignments. Read more about assessment criteria at the University of Oulu webpage.

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Faculty of Technology
Arvostelu: 1 - 5, pass, fail
Opettajat: Ursula Heinikoski, Sassali, Jani Henrik
Opintokohteen kielet: Finnish
Leikkaavuudet:
  030004P Introduction to Information Retrieval 0.0 op

ECTS Credits:
1 ECTS credit

Language of instruction:
Finnish

Timing:
2nd or 3rd year

Learning outcomes:
Students know the different phases of information retrieval process and basic techniques of scientific information retrieval. They will find the most important reference databases of their discipline and know how to evaluate information sources and retrieval results.

Contents:
Retrieval of scientific information, the retrieval process, key databases of the discipline, and evaluation of information retrieval and information sources.

Mode of delivery:
Blended teaching: classroom training, web-based learning material and exercises in Optima environment, a final assignment on a topic of the student’s own choice

Learning activities and teaching methods:
Training sessions 8h, group working 7h, self-study 12h

Target group:
Compulsory for all students of the Faculty of Technology, the Faculty of Information Technology and Electrical Engineering and the Faculty of Architecture. In the Faculty of Science compulsory for students of biology, physics, geosciences, chemistry and geography. Optional for students of biochemistry and mathematics.
Prerequisites and co-requisites:
-
Recommended optional programme components:
-
Recommended or required reading:

Assessment methods and criteria:
Passing the course requires participation in the training sessions and successful completion of the course assignments. Read more about [assessment criteria](https://wiki.oulu.fi/display/030005P) at the University of Oulu webpage.

FOREIGN LANGUAGE (choose one)

902011P: Technical English 3, 6 op

Voimassaolo: 01.08.1995 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Languages and Communication
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: English

Proficiency level:
[CEFR B2 - C1](https://en.wikipedia.org/wiki/CEFR)

Status:
This course is compulsory for the students who have chosen English as their foreign language. (See the foreign language requirements for your own degree programme.)

Required proficiency level:
English must have been the A1 or A2 language at school or equivalent English skills acquired otherwise. If you need to take English, but lack this background, please get in touch with the [Languages and Communication contact teacher](mailto:languagesandcommunication@oulu.fi) for your department to discuss individual solutions.

ECTS Credits:
6 ECTS credits (The workload is 160 hours.)
STUDENTS OF ENGINEERING: The course consists of 3 x 2-ECTS modules.
STUDENTS OF ARCHITECTURE: The course consists of 2 x 3-ECTS modules.
Students with the matriculation exam grade *Laudatur* or *Eximia cum laude approbatur* will be exempted from part of the course (2 ECTS credits).

Language of instruction:
English

Timing:
STUDENTS OF ENGINEERING:
PYO, KO, TuTa: *1st & 2nd* years of studies, beginning 1st year autumn.
SO & CSE: *2nd & 3rd* years of studies, beginning 2nd year autumn.
STUDENTS OF ARCHITECTURE:
1st & 2nd years of studies, beginning 1st year spring and continuing 2nd year autumn.

Learning outcomes:
By the end of the course, you will be able to
- demonstrate efficient strategies and methods for developing and maintaining your English proficiency
- communicate using the core vocabulary required for professional language use in your field
- apply language skills, intercultural awareness and presentation techniques necessary for working in a multicultural environment
- use language, culture and communication skills at a B2-C1 CEFR level in accordance with your own professional needs.

Contents:
In this course, you will focus on developing oral and written English language skills which enable you to follow developments in your own professional field and manage successfully in an international, intercultural working environment.

STUDENTS OF ENGINEERING:
The course consists of three modules:
1. first, Professional English for Technology (PET, 2 ECTS credits),
2. then two modules (2 ECTS credits each) from a free-choice module menu, in which each module has its own content. These modules allow you to develop further skills in specific core areas. Read the module descriptions with care so that you choose modules which match your own needs, interests and level.

TuTa students, however, take ONE module from the free-choice menu and then, in second year autumn,
the 902143Y, Company Presentations module, which is integrated with a course in their own department (555226A Operations and production).

STUDENTS OF ARCHITECTURE:
The course consists of two modules:
See the course description of each module (902011P-38 module A and 902011P-39 module B for a detailed explanation of the course content.

Mode of delivery:
STUDENTS OF ENGINEERING: The mode of delivery varies according to the modules you take. See the course descriptions for the individual modules.
STUDENTS OF ARCHITECTURE: face-to-face teaching in the premises of your own department and independent study

Learning activities and teaching methods:
STUDENTS OF ENGINEERING: The teaching methods and learning activities depend on which free-choice modules you choose. See the course descriptions for the individual modules.
STUDENTS OF ARCHITECTURE:
The classroom teaching comprises about 50% of the total student workload for the course and includes mini-lectures, group and teamwork, student presentations. The independent work component comprises online work and independent study in preparation for classroom activities.

Target group:
Students of the Faculty of Technology
- all Engineering Departments
- the Department of Architecture

Prerequisites and co-requisites:

Recommended optional programme components:

Recommended or required reading:
Materials will be provided by the teacher.

Assessment methods and criteria:
Assessment methods vary according to the individual modules taken. The assessment criteria are based on the learning outcomes of the module.
Read more about assessment criteria at the University of Oulu webpage.
Grading:
pass / fail.

Person responsible:
Each department in the Technical Faculty has its own Languages and Communication contact teacher for questions about English studies.

901044Y: Second Official Language (Swedish), Written Skills, 1 op

Voimassaolo: 01.08.2014 -
Opiskelumuoto: Language and Communication Studies
Laji: Course
Vastuuysikkö: Languages and Communication
Opintokohteen kielet: Swedish
Leikkaavuudet:

901060Y Second Official Language (Swedish), Written Skills 1.0 op

Proficiency level:
B1/B2/C1 (Common European Framework of Reference)

Status:
This course is compulsory to all students except those who have at least 60 ECTS credits of Swedish studies in their degrees. The language proficiency provided by the course unit is equivalent to the language proficiency required of a state official with an academic degree working in a bilingual municipality area (Act 424/03 and Decree 481/03).

According to the requirements of the law, the student must be able to use Swedish both orally and in writing in various professional situations. Achieving this kind of proficiency during a course unit that lasts for only one semester requires that the student has already achieved the necessary starting proficiency level prior to taking the course.

This course includes also 901045Y Second Official Language (Swedish) Oral Skills, 1 ECTS credits.

Required proficiency level:
The required starting proficiency level for students of all faculties is a grade of 7 or higher from the Swedish studies at secondary school (B-syllabus) or equivalent knowledge AND a passing grade from the proficiency test held at the beginning of the course unit. Based on this proficiency test the students are directed to brush up on their language skills if it is deemed necessary; mastering basic vocabulary and grammar is a prerequisite to achieving the necessary language proficiency for the various communication situations one faces in professional life.
If a student has not completed Swedish studies (B-language) at secondary school with a grade of 7 or higher, or his/her language skills are otherwise lacking, he/she must achieve the required proficiency level BEFORE taking this compulsory Swedish course.

**ECTS Credits:**
2 ECTS credits

**Language of instruction:**
Swedish

**Timing:**
Student of Students of Industrial Engineering and Management: autumn semester of the 2nd year of studies
Students of Process Engineering and Environmental Engineering: autumn or spring semester of the second year of studies
Mechanical Engineering: autumn or spring semester of the third year of studies

**Learning outcomes:**
Upon completion of the course unit the student should be able to read and understand texts from his/her academic field and make conclusions based on them. The student should be able to write typical professional emails and short reports. He/she should be able to carry himself/herself according to Swedish etiquette when acting as host or guest. The student should also be able to discuss current events and special field-specific matters, use the vocabulary of education and plan and give short oral presentations relating to his/her own field.

**Contents:**
Communicative oral and written exercises, which aim to develop the student's Swedish proficiency in areas relevant to his/her academic field and future professional tasks. The student practises oral presentation and pronunciation. Situational exercises done individually and in pairs and groups. Discussions in small groups. Current texts about the student's special field. Written exercises relating to the student's professional field. Practising presentation skills.

**Mode of delivery:**
Contact teaching

**Learning activities and teaching methods:**
1 x 90 minutes of contact teaching per week and self-directed study, 53 hours per course.

**Target group:**
See Timing

**Prerequisites and co-requisites:**
See Required Proficiency Level

**Recommended optional programme components:**
-

**Recommended or required reading:**
Study material will be provided by the teacher.

**Assessment methods and criteria:**
The course unit focuses on improving both oral and written language skills and requires active attendance and participation in exercises, which also require preparation time. 100% attendance is required. The course unit tests both oral and written language skills.

Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
Oral and written language proficiencies are tested separately and assessed using the so called KORU-criteria (publication of HAMK University of Applied Sciences, 2006). Separate grades will be awarded for the successful completions of both oral and written portions of the course unit: the possible passing grades are satisfactory skills and good skills (see language decree 481/03). The grades are based on continuous assessment and testing.

**Person responsible:**
See contact teachers on the Language and Communication home page http://www.oulu.fi/languagesandcommunication/student_counselling

**Working life cooperation:**

**Language of instruction:**
Finnish  
**Timing:**
Spring, period 3
Learning outcomes:
The course gives the basics of theory of series and differential and integral calculus of real and vector valued functions of several variables. After completing the course the student is able to examine the convergence of series and power series of real terms. Furthermore, the student can explain the use of power series e.g. in calculating limits and is able to solve problems related to differential and integral calculus of real and vector valued functions of several variables.

Contents:
Sequences, series, power series and Fourier series of real terms. Differential and integral calculus of real and vector valued functions of several variables.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 28 h / Group work 28 h.

031021P: Probability and Mathematical Statistics, 5 op

Opiskelumuoto: Basic Studies
**ECTS Credits:**
5

**Language of instruction:**
Finnish

**Timing:**
Spring semester, periods 4-6

**Learning outcomes:**
After completing the course the student knows the key concepts of probability and the most important random variables and is able to use them in calculating probabilities and parameters of probability distributions. In addition, the student is able to analyze statistical data by calculating interval and point estimates for the parameters. The student is also able to formulate statistical hypotheses and test them.

**Contents:**
The key concepts of probability, random variable, parameters of probability distributions, estimation of parameters, hypothesis testing.

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
Lectures 44 h/Exercises 22 h/Self-study 68 h.

**Target group:**

**Language of instruction:**
The lectures will be in Finnish. The textbook is in English and exercises are selected from the textbook. For further information, contact the responsible person of the course.

**Timing:**
Autumn

**Learning outcomes:**
The student is able to describe the basic concepts of mechanics and to apply those when solving the problems related to mechanics.

**Contents:**
We encounter many phenomena related to mechanics in our everyday life. Most engineering sciences are based on mechanics and mechanics forms the basis of many other fields of physics, including modern physics.

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
Lectures 28 h, 7 exercises (14 h), 2 laboratory exercises (8 h), self-study 83 h

**Target group:**
For the students of the University of Oulu

**Prerequisites and co-requisites:**
Knowledge of vector calculus and basics of differential and integral calculus

**Recommended optional programme components:**
No alternative course units or course units that should be completed simultaneously

**Recommended or required reading:**
Lecture material: Finnish lecture material will be available on the web page of the course.
Course material availability can be checked here.

**Assessment methods and criteria:**
Three mini examinations and end examination or final examination
Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
Numerical grading scale 0 – 5, where 0 = fail
761113P: Electricity and magnetism, 5 op

Voimassaolo: 01.01.2015 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Physics
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Leikkaavuudet:

761119P Electromagnetism 1 5.0 op
761119P-01 Electromagnetism 1, lectures and exam 0.0 op
761119P-02 Electromagnetism 1, lab. exercises 0.0 op
766319A Electromagnetism 7.0 op
761103P Electricity and Magnetism 4.0 op

ECTS Credits:
5 credits

Language of instruction:
The lectures will be in Finnish. The textbook is in English and exercises are selected from the textbook. For further information, contact the responsible person of the course.

Timing:
Spring

Learning outcomes:
The student is able to describe the basic concepts of electricity and magnetism and to apply those when solving the problems related to electromagnetism.

Contents:
Electromagnetic interaction is one of the four fundamental interactions in physics and many phenomena like light, radio waves, electric current, magnetism and formation of solid matter are based on electromagnetism. The current technological development is largely based on applications of electromagnetism in energy production and transfer, telecommunications and information technology. Contents in brief: Coulomb’s law. Electric field and potential. Gauss’s law. Capacitors and dielectrics. Electric current, resistors, electromotive force and DC circuits. Magnetic field, motion of a charged particle in electric and magnetic fields, and applications. Ampère’s law and Biot-Savart law. Electromagnetic induction and Faraday’s law. Inductance and inductors. R-L-C circuits, alternating current and AC circuits.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 30 h, 6 exercises (12 h), 2 laboratory exercises (8 h), self-study 83 h

Target group:
For the students of the University of Oulu.

Prerequisites and co-requisites:
Knowledge of vector calculus and basics of differential and integral calculus are needed.

Recommended optional programme components:
No alternative course units or course units that should be completed simultaneously
Recommended or required reading:
Lecture material: Finnish lecture material will be available on the web page of the course. Course material availability can be checked here.

Assessment methods and criteria:
Three mini examinations and end examination or final examination
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Numerical grading scale 0 – 5, where 0 = fail

761114P: Wave motion and optics, 5 op

Voimassaolo: 01.01.2015 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Physics
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:

- 761310A Wave motion and optics 5.0 op
- 761310A-01 Wave motion and optics, lectures and exam 0.0 op
- 761310A-02 Wave motion and optics, lab. exercises 0.0 op
- 761104P Wave Motion 3.0 op

ECTS Credits:
5 credits

Language of instruction:
Lectures and exercises in Finnish. Material in English.

Timing:
Spring

Learning outcomes:
The student can classify different types of wave motions and can name the characterizing quantities (wavelength, period, wave speed), can apply geometrical optics to simple mirror and lens systems, can explain the meaning of interference and diffraction and their applications, like using interference to determine wavelength of radiation.

Contents:
Basic course on wave motion, and geometric and wave optics.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 30 h, exercises 10 h, 2 laboratory exercises (8 h), self-study 85 h
Target group:
The students of the University of Oulu

Prerequisites and co-requisites:
No specific prerequisites

Recommended optional programme components:
No alternative course units or course units that should be completed simultaneously

Recommended or required reading:

Assessment methods and criteria:
Three mini examinations and one end examination or a final examination
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Numerical grading scale 0 – 5, where 0 = fail

Person responsible:
Saana-Maija Huttula

Working life cooperation:
No work placement period

**COMPUTER SCIENCE**

521141P: Elementary Programming, 5 op

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Computer Science and Engineering DP

Arvostelu: 1 - 5, pass, fail

Opettajat: Mika Rautiainen, Mika Oja

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay521141P Elementary Programming (OPEN UNI) 5.0 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:
5

Language of instruction:
Lectures and learning material are in Finnish. The course can be completed in English by self-studying from a book, completing assignments and exercises on the course learning environment, and delivering a final project.

Timing:
Fall, period 1. There is an option to extend the course to the 2nd period in cases where completing in one period doesn't fit the student's schedule.

Learning outcomes:
1. Is capable of solving problems in the computer's terms
2. Understands the basic concepts of programming
3. Knows the basics of the Python programming language
4. Is able to implement programs independently

5. Is able to use the internet to find information about programming

**Contents:**
Problem solving with programming, basic concepts of programming, writing Python code.

**Mode of delivery:**
Web-based teaching + face-to-face teaching

**Learning activities and teaching methods:**
30h of exercise groups, 105h self-studying in the web.

**Target group:**
1st year students of computer science and engineering, electrical engineering, medical and wellness technology and industrial and engineering management, 2nd year students of physics, and other students of the University of Oulu

**Prerequisites and co-requisites:**
None.

**Recommended optional programme components:**
The course provides a basis for subsequent programming courses.

**Recommended or required reading:**
Web material in an online learning environment. Address will be announced at the beginning of the course.

**Assessment methods and criteria:**
The course is completed by passing all learning assignments, programming exercises and a final exercise project. Read more about assessment criteria at the University of Oulu webpage

**Grading:**
pass/fail.

**Person responsible:**
Mika Oja

**Working life cooperation:**
-
Timing:
Period A. It is recommended that students complete the course during the first autumn semester.

Learning outcomes:
After completing the course students (i) understand the basic concepts of economics and the rudiments of economic theory, (ii) can explain the determination of resource allocation and prices in a market economy, (iii) know how the aggregate economy operates in the short and long run, and (iv) how economic policy affects the Finnish economy and also the European economy.

Contents:
The course introduces students to the tools and ideas economics uses to describe and explain economic phenomena. The topics include:
- the long-term development of the Finnish and World economy
- basic ideas and principles of economics
- opportunity cost and comparative advantage
- market equilibrium: demand and supply
- how well does market economy work?
- firms and competition in market economy
- aggregate economic activity and its measurement
- business cycles
- monetary and fiscal policy
- economic growth

Mode of delivery:
Face-to-face teaching.

Learning activities and teaching methods:
36 lectures including problem sets. Students are expected to do the problem sets on their own and familiarize themselves with the required and recommended materials (93 h). Exam (4 h).

Target group:
Major students in economics and business administration

Prerequisites and co-requisites:

Recommended optional programme components:
This course is part of “Introduction to business studies” -module

Recommended or required reading:

Assessment methods and criteria:
Final Exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Mikko Puhakka

Working life cooperation:

Other information:
The number of students is limited.

724105P: Management Accounting, 5 op

Voimassaolo: 01.08.2014 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Oulu Business School
Arvostelu: 1 - 5, pass, fail
Opettajat: Janne Järvinen
Opintokohteen kielet: Finnish
Leikkaavuudet:
   ay724105P  Management Accounting (OPEN UNI)  5.0 op
   721172P  Management Accounting  5.0 op
Voidaan suorittaa useasti: Kyllä

ECTS Credits:
5 credits / 133 hours of work

Language of instruction:
English (course is lectured separately in Finnish and in English).

Timing:
Period C

Learning outcomes:
After passing the course, the student knows the basic cost concepts and the elements of cost accounting systems. Students are also able to apply the basic cost information in the company’s decision making and explain which costs should be included in these calculations under different circumstances.

Contents:
Theoretical framework for understanding cost accounting, cost concepts, cost recording, different product costing methods, cost-volume-profit analysis, using cost accounting information in decision making.

Mode of delivery:
Contact teaching

Learning activities and teaching methods:
20 h lectures, 16 h exercises and independent reading of study materials (97 hours).

Target group:
Major students in economics and business administration

Prerequisites and co-requisites:
Earlier module (introduction to business studies)

Recommended optional programme components:
This course is part of "Business Processes" -module

Recommended or required reading:
Check the availability of course material from this link.
Check the availability of course material from this link.

Assessment methods and criteria:
Lectures and literature examination.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor in Management Accounting.

Working life cooperation:
-

Other information:
The number of students is limited.

555213A: Sales and marketing, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used.

Timing:
Periods 1-2.

Learning outcomes:
Upon completion of the course the student should be able to understand and apply basic terminology of sales and marketing and the fundamentals of customer oriented approach. He/she can recognize modern sales and marketing process phases, plan product and service offerings for a particular customer segment, and create sales and marketing plan. The student can explain the following concepts: sales pipeline, segmentation, marketing mix, value proposition and branding. He/she is able to listen and develop a customer’s need, and present and defend one’s own value proposition.

Contents:
Customer’s buying behavior, planning product and service offerings, communicating value, basics of sales and marketing, digital marketing, customer oriented approach, sales and marketing processes and plans, sales pipeline, segmentation, value proposition, marketing mix and branding.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures and exercises 18 h / group work 79 h / self-study 37 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
555225P Basics of industrial engineering and management, 724105P Management accounting or similar knowledge.

Recommended optional programme components:
-

Recommended or required reading:
Assessment methods and criteria:
This course utilizes continuous assessment. During the course, there are lecture and home assignments (50 % of the grade) and a group work (50 % of the grade).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:

IEM STUDIES

555225P: Basics of industrial engineering and management, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: Finnish
Leikkaavuudet:
  ay555225P   Basics of industrial engineering and management (OPEN UNI)   5.0 op
  555221P   Introduction to Production   2.0 op
  555220P   Basic Course in Industrial Engineering and Management   3.0 op

Language of instruction:
Finnish. English material is also used.

Timing:
Periods 1-2.

Learning outcomes:
Upon completion of the course the student should be able to describe what operations management means. The student can explain the core concepts of business operations and utilize these concepts in describing and analyzing organizational operations. In addition, he/she can explain in general terms the factors that affect economic performance of organizations. The student is able to utilize the terminology used in operations management, describe the financial processes of companies and based on this describe the use of cost accounting in organizational decision-making. The student can also calculate unit costs in various simplified settings, calculate various alternatives, as well as perform planning and goal oriented calculations based on given data, and draw conclusions based on the calculation results.

Contents:
Operations and productivity, operations strategy, forecasting, cost accounting, investments, sustainability, capacity management, location decisions, layout strategies, human resources management, supply chain management, subcontracting, inventory management, production planning, MRP & ERP, production scheduling, Just-in-Time & Lean operations, maintenance.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).
Learning activities and teaching methods:
Web-based lectures 20 h / exercises 18 h / self-study 96 h.

Target group:
: Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
No prerequisites exist.

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555285A Project management, 555242A Product development, 555264P Managing well-being and quality of working life, and 555286A Process and quality management.

Recommended or required reading:

Assessment methods and criteria:
This course utilizes continuous assessment. During the course, there are nine mandatory weekly assignments. At least half of the assignments must be passed.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes courses 555220P Basic Course in Industrial Engineering and Management 3 ECTS cr and 555221P Introduction to Production 2 ECTS cr.

555285A: Project management, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Kirsi Aaltonen
Opintokohteen kielet: Finnish
Leikkaavuudet:
   555288A    Project Management      5.0 op
   ay555285A  Project management (OPEN UNI)  5.0 op
   555282A    Project Management      4.0 op
   555280P    Basic Course of Project Management 2.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material may also be used.

Timing:
Period 1.
Learning outcomes:
The objective of the course is to familiarise the student with the basics and the basic methods of project management. Upon completion the student can explain the essential concepts related to project management. He/she can present the main features of a project plan and can use different methods of partitioning a project. The student can also schedule a project and estimate its costs. The student can explain the terms related to Earned value method and can apply the method on simple tasks. Upon completion the student recognizes the essential tasks of project risk management.

Contents:
Defining project management, project planning, organising and scope management, schedule management, cost management, earned value calculation and project risk management, project stakeholder management.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures or web-based lectures 16h, self-study 118h

Target group:
Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
No prerequisites exist.

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555225P Basics of industrial engineering and management, 555242A Product development, 555264P Managing well-being and quality of working life, and 555286A Process and quality management.

Recommended or required reading:
Lecture material, exercise book, Artto, Martinsuo & Kujala 2006. Projektiliiketoiminta. WSOY

Assessment methods and criteria:
The course includes three mandatory assignments, exercise book and exam. The course grading is based on the exam. Well completed assignments and exercise book may raise grading.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Jaakko Kujala.

Working life cooperation:
No.

Other information:
Substitutes courses 555280P Basic Course of Project Management + 555282A Project Management.

555265P: Occupational Safety and Health Management, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Basic Studies
**Course**

**Vastuuysikkö:** Field of Industrial Engineering and Management

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Henri Jounila

**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**

- 555263A Technology, Society and Work  2.0 op
- 555260P Basic Course in Occupational Safety and Wellbeing at Work  3.0 op

**Required proficiency level:**

**ECTS Credits:**
5,0 ECTS credits.

**Language of instruction:**
Finnish. English material is also used.

**Timing:**
Periods 3-4.

**Learning outcomes:**
After the course the student is capable of explaining basic terms of occupational safety and health. He/she is able to assess the importance of occupational safety, health and well-being at work. In addition, he/she is able to assess the significance of occupational safety in the improving of productivity and quality. He/she can apply different safety analysis. Upon completion of the course the student is familiar with the core issues of occupational safety and health management.

**Contents:**
Occupational safety and health, safety management, safety culture, laws and standards, hazards and risks, occupational diseases and work accidents, safety analysis, occupational safety at shared industrial work sites, occupational safety card, HSEQ-assessment procedure, other current issues.

**Mode of delivery:**
The tuition will be implemented as face-to-face teaching.

**Learning activities and teaching methods:**
Lectures and assignments 26 h / group work 40 h / self-study 68 h.

**Target group:**
Industrial Engineering and Management, Mechanical Engineering, Process Engineering and Environmental Engineering students.

**Prerequisites and co-requisites:**
-

**Recommended optional programme components:**
-

**Recommended or required reading:**
Lecture materials. Other materials will be defined during the course.

**Assessment methods and criteria:**
The grading is based on the exam (50 % of the grade) and exercises (50 % of the grade).

**Grading:**
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
Henri Jounila

**Working life cooperation:**
No.

**Other information:**
Substitutes courses 555260P Basic Course in Occupational Safety and Wellbeing at Work + 555263A Technology, Society and Work.

**555226A: Operations and supply chain management, 5 op**

- **Voimassaolo:** 01.08.2015
- **Opiskelumuoto:** Intermediate Studies
- **Laji:** Course
- **Vastuuysikkö:** Field of Industrial Engineering and Management
- **Arvostelu:** 1 - 5, pass, fail
- **Opettajat:** Jukka Majava
- **Opintokohteen kielet:** English

**Leikkaavuudet:**
- 555222A Demonstration in Industrial Engineering and Management 2.0 op
- 555223A Introduction to Production Control 3.0 op

**ECTS Credits:**
5 ECTS credits

**Language of instruction:**
English

**Timing:**
Periods 1-2.

**Learning outcomes:**
Upon completion of the course the student should be able to describe different production types. He/she can apply different forecasting methods, plan needed production capacity, and apply location and transportation decisions related methods. The student can master common inventory management methods and aggregated and short-term scheduling. The student can also create a sales and operations plan for a company.

**Contents:**
Production types, forecasting methods, capacity planning and queuing models, location and transportation decisions, inventory management systems, aggregate scheduling, MRP & ERP, short-term scheduling, linear programming.

**Mode of delivery:**
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

**Learning activities and teaching methods:**
Lectures 20 h / self-study (web-based exercises) 60 h / group work 54 h.

**Target group:**
Industrial Engineering and Management and Master’s Programme in Product Management students.

**Prerequisites and co-requisites:**
555225P Basics of industrial engineering and management or similar knowledge.

**Recommended optional programme components:**
Industrial Engineering and Management students will complete 902143Y English course simultaneously.
Recommended or required reading:

Assessment methods and criteria:
This course utilizes continuous assessment. During the course, there are mandatory weekly assignments. At least half of the assignments must be passed. 40 % of the grade is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes course 555222A Demonstration in Industrial Engineering and Management 2 ECTS cr and 555223A Introduction to Production Control 3 ECTS cr.

555264P: Managing well-being and quality of working life, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
ay555264P Managing well-being and quality of working life (OPEN UNI) 5.0 op
555261A Basic Course in Occupational Psychology 3.0 op
555262A Usability and Safety in Product Development 3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish.

Timing:
Periods 3-4.

Learning outcomes:
After the course the student is capable of using the central concepts related to well-being at work, can set targets for it, and is able to choose appropriate methods from the management and personal career point of views. Furthermore, the student is able to develop well-being at work in the contexts of labour legislation, good practices, productivity, occupational safety expertise, management and human resources. The student can utilise basic knowledge, search for more information and knows the key players in the field. Also, the student knows the key sources of information, typical goal-setting and management practices and the methods for assessing the performance of an individual employee, supervisor, company and entrepreneur. The student can assess the impact of well-being at work from the economic perspective, especially in cases of work ability, occupational health, job satisfaction, occupational safety, productivity and the overall quality of working life. The student knows essential national and international regulation and
strategic goal setting practices, good practices of the case companies, current trends, and methods in research. In brief, the focus of the course is to learn key factors for guaranteeing successful contribution of humans in issues of production.

Contents:
The course gives the student a vision of building sustainable, productive and satisfactory career for the work community he/she leads - and for himself/herself as an employee or a supervisor. The contents cover the whole area of basic quality issues of working life analysing them in the following framework "Well-being at work means safe, healthy, and productive work in a well-led organisation by competent workers and work communities who see their job as meaningful and rewarding, and see work as a factor that supports their life management".

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures 22 h / self-study 100 h / group work & exercises 12 h.

Target group:
Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
No prerequisites exist.

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial Engineering and Management that also includes 555225P Basics of industrial engineering and management, 555285P Project Management, 555242A Product development, and 555286A Process and quality management.

Recommended or required reading:
Essential background information can is available from Arnold, J. et al. (2010), Work Psychology: Understanding Human Behaviour in the Workplace. 5th Edition. Financial Times/Prentice Hall. Other literature will be informed during the course.

Assessment methods and criteria:
This course utilizes continuous assessment including exercises during the lectures (weight 20 %), seminar work (weight 30 %) and examination (weight 50 %).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Seppo Väyrynen

Working life cooperation:
No.

Other information:
Lecturers: Seppo Väyrynen and Henri Jounila along with visiting lecturers and exercise supervisors. Substitutes courses 555261A Basic Course in Occupational Psychology + 555262A Usability and Safety in Product Development.

555286A: Process and quality management, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Osmo Kauppila
Opintokohteen kielet: Finnish
Leikkaavuudet:
  ay555286A  Process and quality management (OPEN UNI)  5.0 op
  555281A  Basic Course of Quality Management  5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish.

Timing:
Period 4.

Learning outcomes:
Upon completion the student is able to explain the role of process and quality management in a business organization. The student is capable of developing business processes based on the principles of quality management and appropriate tools.

Contents:
Foundations of total quality management, planning of quality, performance measurement, process management, people management in relation to quality management, implantation of total quality management.

Mode of delivery:
The tuition will be implemented as face-to-face teaching (integrated classroom lectures and exercises).

Learning activities and teaching methods:
20 h lectures, 114 h independent study including tutored group work.

Target group:
Industrial Engineering and Management students and other students studying Industrial Engineering and Management as minor.

Prerequisites and co-requisites:

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555225P Basics of industrial engineering and management, 555285A Project management, 555242A Product development, and 555264P Managing well-being and quality of working life.

Recommended or required reading:

Assessment methods and criteria:
To pass the course, the student must pass the course exam and complete the classroom exercises and the group work. The course grade is calculated based on the exam and group work grades.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.
Person responsible:
Osmo Kauppila.

Working life cooperation:
No.

Other information:
Substitutes course 555281A Basic Course of Quality Management.

555204A: Internship, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Practical training
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Eija Forsberg
Opintokohteen kielet: Finnish

Leikkaavuudet:
   555210A Practice 3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish.

Timing:
Periods 1-4.

Learning outcomes:
The objective is to familiarise students to industrial engineering and management in practical work life. During the course, students learn to observe his/her working environment from theoretical viewpoints of Industrial Engineering and Management (IEM). From the working environment, the student is able to identify IEM themes and classify them. The student is able to select theoretical references relevant for the topic and is able to evaluate the working environment based on the theoretical references. The student is able to draw up a report based on given instructions.

Contents:
To be defined by the student.

Mode of delivery:
Students will write a report concerning summer job. The length of the summer job has to be 2 months minimum.

Learning activities and teaching methods:
Students will write a report concerning summer job. Student's personal Omaope will review and grade the report.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
-

Recommended optional programme components:
Writing the written report is integrated with the course 900061A Scientific Communication for Production Engineering and Management.

Recommended or required reading:
-
Assessment methods and criteria:
The Report.

Grading:
Fail/Pass

Person responsible:
Tutor teacher.

Working life cooperation:
Yes

Other information:
Substitutes course 555210A Practice.

555242A: Product development, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Haapasalo, Harri Jouni Olavi
Opintokohde: English
Leikkaavuudet:
  ay555242A  Product development (OPEN UNI)  5.0 op
  555240A  Basic Course in Product Development  3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 1.

Learning outcomes:
This course introduces product development and innovations management in a company environment. The course provides fundamental understanding over tools and frameworks that can be used for analysing and managing products, innovations, and technology development. The aim is to create a connection between product development and other company functions. Upon completion of the course a student is capable of explaining the role of product development as a company function. The student understands the difference between innovation activities and systematic product development, and knows the difference between different phases of product development process and its activities. Student learns how to transform customer needs into requirements for product development process and finally into product features. Additionally, the student is able to define the meaning of other company functions to product development activities.

Contents:
Meaning of products for the operations of an industrial enterprise, product development paradigm and defining relevant concepts, realising product development methodologically (U&E model, Cooper's stage-gate model, QFD), managing innovations, and product development success factors.

Mode of delivery:
The tuition will be implemented as blended teaching.
Learning activities and teaching methods:
Lectures 20 h / exercises 6 h / group work and self-study 108 h.

Target group:
Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
555226A Operations and production.

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555225P Basics of industrial engineering and management, 555285A Project management, 555264P Managing well-being and quality of working life, and 555286A Process and quality management.

Recommended or required reading:

Assessment methods and criteria:
Assignment and final exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Harri Haapasalo.

Working life cooperation:
No.

Other information:
Substitutes course 555240A Basic Course in Product Development.

555287A: Problem Solving in Business Cases, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
      555284A  Problem Solving in Business Cases  3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used.

Timing:
Periods 1-2.

**Learning outcomes:**
Upon completion the student can systematically analyse the challenges related to a company’s business as a part of a group, apply problem solving tools and processes to develop and present alternative solutions to business challenges related to strategy or operations. The student is able to analyse and develop the functioning of a group. The student is able to evaluate and improve his/her presentation skills.

**Contents:**
- problem solving tools and processes, team work, presentations skills, topical challenges related to business strategy and operations.

**Mode of delivery:**
The tuition will be implemented as face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 36h, self-study 36h, group exercise 62h.

**Target group:**
Industrial Engineering and Management students.

**Prerequisites and co-requisites:**

**Recommended optional programme components:**
The students will complete 900062P Tuotantotalouden suullinen viestintä course simultaneously.

**Recommended or required reading:**
Lecture material. Other materials will be defined at the beginning of the course.

**Assessment methods and criteria:**
This course utilizes continuous assessment. Learning diary and participation in lectures, each group exercise in case solving and designing a case will be evaluated. 70% of the grade is based on group exercises.

**Grading:**
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
Professor Jaakko Kujala.

**Working life cooperation:**
No.

**Other information:**
Substitutes course 555284A roblem Solving in Business Cases.

**A440146: Module Preparing for the Major, Biomedical Engineering, 40 op**

**Voimassaolo:** 01.08.2015 -
**Opiskelumuoto:** Module Preparing for the Option
**Laji:** Study module
**Vastuuyksikkö:** Field of Industrial Engineering and Management  
**Arvostelu:** 1 - 5, pass, fail  
**Opintokohteen kielet:** Finnish

Ei opintojaksokuvauksia.

**Compulsory**

**H440129: Module Preparing for the Major, Medical and Wellness Technology, 40 op**

**Voimassaolo:** 01.08.2015 -  
**Opiskelumuoto:** Module Preparing for the Option  
**Laji:** Study module  
**Vastuuyksikkö:** Field of Industrial Engineering and Management  
**Arvostelu:** 1 - 5, pass, fail  
**Opintokohteen kielet:** Finnish

Ei opintojaksokuvauksia.

**Compulsory**

**521109A: Electrical Measurement Principles, 5 op**

**Opiskelumuoto:** Intermediate Studies  
**Laji:** Course  
**Vastuuyksikkö:** Electrical Engineering DP  
**Arvostelu:** 1 - 5, pass, fail  
**Opettajat:** Juha Saarela  
**Opintokohteen kielet:** Finnish

**ECTS Credits:**
5 ECTS credits / 136h

**Language of instruction:**
Course is lectured in Finnish. Lecture notes are available in English. Laboratory exercises and the exam can be done in English.

**Timing:**
Periods 1-2.

**Learning outcomes:**
1. is able to measure basic measurements with a multimeter,  
2. is able to measure basic measurements with an oscilloscope,  
3. is able to operate signal and function generators.  
4. is able to estimate the validity of their measurements.

**Contents:**
Units of measures, standards of measures, analysis of errors, most commonly used analog and digital measuring methods, equipment and electrical safety regulations.

**Mode of delivery:**
Pure face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 20h, laboratory exercises 16 h and self-study 100h.

**Target group:**
Course is compulsory for electrical engineering, information engineering and wellness technology students. Course is open for all students in University of Oulu.

**Prerequisites and co-requisites:**
None.

**Recommended optional programme components:**
None.

**Recommended or required reading:**
Course material is in English and Finnish and can be found in Optima.

**Assessment methods and criteria:**
Exam and passed lab exercises.
Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
Grade is based on exam and grade is on numerical scale 1-5.

**Person responsible:**
Juha Saarela

**Working life cooperation:**
None.

**580102P: Introduction to Medical and Wellbeing Technology, 5 op**

**Opiskelumuoto:** General Studies  
**Laji:** Course  
**Vastuuysikkö:** Health Sciences  
**Arvostelu:** 1 - 5, pass, fail  
**Opettajat:** Jämsä, Timo Jaakko  
**Opintokohteen kielet:** Finnish

**ECTS Credits:**
5 ECTS credit points / 135 hours of work

**Language of instruction:**
Finnish

**Timing:**
1st year 2nd and 3rd periods

**Learning outcomes:**
The student can define areas of medical technology and can list technological innovations used in these fields. The student can describe milestones in medical technology from history to present time.

**Contents:**
Practical examples of medical and wellness technology, introducing terms. Group work based on the material given and presenting the results. Includes also material introduced during theme day.

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
Lectures, demonstrations and excursions 30h / Group work and theme day 30h / Self-study 75h. 
Final exam or assignment.

**Target group:**
1st year students of Medical and Wellness Technology, minor subject students

**Recommended or required reading:**
Material given during the lectures

**Assessment methods and criteria:**
Participating in the contact teaching, group work and theme day. Final exam or assignment.

**Grading:**
The course utilizes grading: pass or fail

**Person responsible:**
Professor Timo Jämsä

**764163P: Introduction to Biomedical Physics, 5 op**

- **Voimassaolo:** 01.01.2015 -
- **Opiskelumuoto:** Basic Studies
- **Laji:** Course
- **Vastuuyksikkö:** Field of Physics
- **Arvostelu:** 1 - 5, pass, fail
- **Opintokohteen kielet:** Finnish

**Leikkaavuudet:**
- 764163P-01 Basic biophysics (part 1): Introduction to biophysics 0.0 op
- 764163P-02 Basic biophysics (part 2) 0.0 op
- 764103P Introduction to biophysics 2.0 op
- 764162P Introduction to biophysics 3.0 op

**ECTS Credits:**
5 credits *(part 1, Introduction to biophysics 2 credits and part 2, Basic biophysics 3 credits)*

**Language of instruction:**
Finnish

**Timing:**
*Part 1:* 1st autumn
*Part 2:* 1st spring

**Learning outcomes:**
Student can describe and explain some basics and concepts of certain areas of biophysics and knows central targets of biophysical research.

**Contents:**
The course introduces some basic biological processes from biophysics point of view, and describes so called systems thinking, biophysics and its methods, models and system analysis; for example basics of cellular and molecular biophysics, fluid flow phenomena, biomechanics and some other special issues.

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
*Part 1:* Lectures 14 h, self-study 39 h
*Part 2:* Lectures 20 h, final exam, 46 h of independent studies

**Target group:**
Mainly students in Physics B.Sc. program. Also for the other students of the University of Oulu.

**Prerequisites and co-requisites:**
No specific prerequisites

**Recommended optional programme components:**
No alternative course units or course units that should be completed simultaneously

**Recommended or required reading:**
*Part 1:* Lectures and lecture notes
*Part 2:* Lectures, lecture notes.

**Assessment methods and criteria:**
Both parts of the course have their own separate examinations. The final grade of the course is the weighted average of the grades of part 1 (2 cp) and part 2 (3 cp). Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
Numerical grading scale 0 – 5, where 0 = fail

**Person responsible:**
Kyösti Heimonen

**Working life cooperation:**
No work placement period

- **Voimassaolo:** 01.08.2012 -
- **Opiskelumuoto:** Basic Studies
- **Laji:** Course
- **Vastuuyksikkö:** Open University, Oulu
Arvostelu: 1 - 5, pass, fail
Opetus suunnattu: Open University, Oulu
Opintokohteen kielet: Finnish
Leikkaavuudet:
402961P Basics of Anatomy and Physiology 5.0 op

ECTS Credits:
6 credits
Language of instruction:
Finnish
Learning outcomes:
Having completed the course, the student knows how to
- explain the structure and operation of eukaryotic cells
- explain the construction of tissue from different types of cell and matrix
- explain the structure and cooperation of different organ systems

Contents:
- structure of cells and tissue
- liquid states and electrolytes of the organism
- nervous system and sense organs
- hormones
- sensor and motor activity
- respiration
- blood circulation
- nutrition
- metabolism

Mode of delivery:
Online studies
Target group:
Minor subject student in all faculties
Prerequisites and co-requisites:
none
Recommended optional programme components:
Other courses in Health Education
Recommended or required reading:
OR
You can check for the availability of course books here.

Assessment methods and criteria:
Participation in teaching and independent written assignment
Read more about assessment criteria at the University of Oulu webpage.
Grading:
0-5
Person responsible:
Johanna Veijola
Working life cooperation:
None
Other information:
Biology subject teacher students who have passed Basics of Anatomy and Physiology course as a base for the qualifying studies for the biology subject teacher studies should take course ay402965P Special Course in Health Sciences instead (Open University).
041201A: Basics in eHealth, 5 op

Voimassaolo: 01.08.2011 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Jarmo Reponen
Opintokohteen kielet: English
Leikkaavuudet: ay041201A Basics in eHealth (OPEN UNI) 5.0 op

ECTS Credits:
5 ECTS credit points / 135 hours of work

Language of instruction:
English

Timing:
2nd period

Learning outcomes:
The student can define central information and communication technological terms and solutions in healthcare, and can list respective applications in healthcare services and training.
The student can evaluate the societal and economic significance of information and communication technology in healthcare

Contents:
- terms and concepts
- societal dimensions
- delivery of health services
- electronic patient records
- data transfer within the health care system
- data transfer between the health care professionals and the patients
- citizens providing their own health data, mHealth-solutions
- national healthcare information exchange in Finland- remote consultations, radiology-psychiatry, teleradiology, telepsychiatry
- economical and functional assessment
- remote education
- future visions of health care information systems

Mode of delivery:
Web-based teaching

Learning activities and teaching methods:
Interactivity takes place in virtual learning environment Optima. The course consists of video-taped lectures, power point-presentations and links to other material available in the web. Performance of duties includes an essay, exam, participating in discussions on the grounds of the lectures.
Web lectures 15h / Web exam 40h / Written essay 40h / Self-study and participation to web discussion 40h

Target group:
Students of Medical Technology (medical and wellness technology, biomedical engineering, biophysics, other degree programs), Students of Health Sciences and information technology and everyone who is interested

Recommended or required reading:
All recommended or required reading are offered in Optima virtual learning environment

Assessment methods and criteria:
Web tasks, an essay and final exam

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**080901A: Introduction to Technology in Clinical Medicine, 5 op**

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuysikkö:** Health Sciences

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Jämsä, Timo Jaakko

**Opintokohteen kielet:** Finnish

**ECTS Credits:**
5 ECTS credit points / 135 hours of work

**Language of instruction:**
Finnish

**Timing:**
1st and 2nd periods

**Learning outcomes:**
The student can identify technologies in different fields of medical technology, can describe the principles behind these technologies and evaluate the advantages and limitations of the technologies.

**Contents:**
Course introduction lectures. Specialists from different clinical areas give lectures and demonstrations, in which main themes and terms of the field are introduced and technical equipment and methods are presented. Expert lecturers on other current topics related to the course.

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
Initial exam. Lectures 35 h / Demonstrations 10 h / Course assignment and self-study 90 h. Final exam which is based on lectures and all given materials.

**Target group:**
Bachelor students interested in Biomedical Engineering (medical technology, information technology, electrical engineering, physics, other related degree programs).

**Recommended or required reading:**
Available as an e-print: [http://www.terveysportti.fi/dtk/aho/koti](http://www.terveysportti.fi/dtk/aho/koti)
The material addressed during the lectures.

**Assessment methods and criteria:**
Initial exam with multiple-choice questions (literature for the initial exam: T. Sora, P. Antikainen, M. Laisalmi, S. Vierula: Sairaanhoidon teknologia, WSOY 2002). Taking part in the lectures and demos. Learning assignment. Final exam with essay-type questions. In order to participate in the final exam the student must have passed initial exam and learning assignment.
Read more about [assessment criteria](http://www.terveysportti.fi/dtk/aho/koti) at the University of Oulu webpage.

**Grading:**
The course utilizes a numerical grading scale 1-5 or fail. Grading is based on the grade of the final exam.

**Person responsible:**
Professor Timo Jämsä

**Working life cooperation:**
The course will be mainly organized in the hospital, and lectures are given by clinical specialists.

**521302A: Circuit Theory 1, 5 op**

- **Opiskelumuoto:** Intermediate Studies
- **Laji:** Course
- **Vastuuysikkö:** Electrical Engineering DP
- **Arvostelu:** 1 - 5, pass, fail
- **Opettajat:** Rahkonen, Timo Erkki
- **Opintokohteen kielet:** Finnish

**ECTS Credits:**
5

**Language of instruction:**
Finnish. Exams can be arranged in English on demand.

**Timing:**
Spring, period 4

**Learning outcomes:**
After the course the student can

1. write and solve the equations describing the operation of a given electrical circuit
2. solve the sinusoidal steady-state solution using complex phasor arithmetics
3. solve time responses of electric circuits
4. simplify electrical circuits e.g. using equivalent circuits
5. simulate simple circuits and choose an appropriate circuit simulation method

**Contents:**

**Mode of delivery:**
Classroom.

**Learning activities and teaching methods:**
30h lectures, 22h exercises, and a simulation exercise.

**Target group:**
Finnish BSc students.

**Prerequisites and co-requisites:**
Matrix algebra, complex arithmetics, differential equations.

**Recommended optional programme components:**
Background to all analog electronics courses.

**Recommended or required reading:**

**Assessment methods and criteria:**
Final exam. Also the simulation exercise must be passed. Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
1-5

**Person responsible:**
Prof. Timo Rahkonen

**Leikkaavuudet:**

- **470219A** Introduction to Process Engineering 3.5 op

**ECTS Credits:**

- 5 ECTS /133 hours of work

**Language of instruction:**

- Finnish

**Timing:**

- Implementation during periods 1-2 on the autumn term

**Learning outcomes:**

The objective of this course is to give insight to the whole perspective of process and environmental engineering and to familiarise the students with the terminology involved. In addition, the objective is also to outline the connections between process and environmental engineering and other fields closely related to them.

After the course, the student can analyse the process and environmental engineering aspects of an industrial process. He/She can, for example, divide the process into unit processes, analyze the process or a chain of processes based on the material balances, identify and evaluate the significance of essential mechanical, chemical and transport phenomena, analyse the control and process design aspects of a process etc. He/She can also evaluate the significance of different aspects of process and environmental engineering to the overall production system when these aspects are further examined in forthcoming courses.

**Contents:**

- The course is divided into the next eight separate themes: 1. Unit processes and material balances.

**Mode of delivery:**

- Group work and contact lectures supporting those
Learning activities and teaching methods:
Assignments (8 altogether) carried out in small groups and contact lectures supporting them (16 hours)

Target group:
Bachelor's degree students in the study fields of process and environmental engineering

Prerequisites and co-requisites:
None

Recommended optional programme components:
The course serves as an introduction to the studies in process and environmental engineering

Recommended or required reading:
The material is provided during the contact lectures and through the course webpages. It is also expected that the students seek material for completing the assignments independently.

Assessment methods and criteria:
The assignments (altogether 8) covering the course themes carried out in small groups. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilises a numerical grading scale 1-5 and fail.

Person responsible:
Dr Aki Sorsa

Working life cooperation:
No

Other information:
The assessment method utilized requires the active attendance to the group work and contact lectures from the beginning of the course

477201A: Material and Energy Balances, 5 op

Voimassaolo: 01.08.2005 - 31.12.2019
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Tiina Leiviskä
Opintokohteen kielet: Finnish
Leikkaavuudet:
477221A Material and Energy Balances 5.0 op
470220A Fundamentals of Chemical Process Engineering 5.0 op

ECTS Credits:
5 ECTS /133 hours of work

Language of instruction:
Finnish. The course can be completed in English as a book examination.

Timing:
Autumn period 1

Learning outcomes:
The student is able to formulate material and energy balances for a process by taking into account the restrictions set by reaction stoichiometry. The student knows how the created mathematical formulation can be exploited in process consideration.

Contents:
Formulation of material and energy balances by taking into account the effects of chemical reactions.
Mode of delivery:
Lectures and group exercise

Learning activities and teaching methods:
Lectures 40h, group work 10h and self-study 80h

Target group:
Bachelor students in of Process or Environmental Engineering

Prerequisites and co-requisites:
Basics from the course Introduction to Process Engineering

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
During the course, there are two intermediate exams and both of them must be passed. Alternatively student can participate in final exam after the course. In addition to this, the students will be making a group exercise, which will be evaluated.

Read more about the course assessment and grading systems of the University of Oulu at www.oulu.fi/english/studying/assessment

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Dr Tiina Leiviskä

Working life cooperation:
No

Other information:
-

477401A: Thermodynamic Equilibria, 5 op

Voimassaolo: 01.08.2005 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Eetu-Pekka Heikkinen
Opintokohteen kielet: Finnish
Leikkaavuudet:
  470611A Metallurgy Processes 7.0 op

ECTS Credits:
5 cr / 135 hours of work

Language of instruction:
Available only in Finnish

Timing:
The course is given in the autumn semester, during period II. It is recommended to complete the course at the 2nd year of Bachelor's studies.

Learning outcomes:
Student is capable of defining chemical equilibria of the systems that are related to industrial processes and understands the relevance of equilibria (and their computational determination) as a part of process analysis, planning and control. Additionally, (s)he can define a meaningful system to
be considered in computation thermodynamics; i.e. (s)he can create a computationally solvable problem based on technical problem that in itself is not solvable computationally.

**Contents:**
Concepts of enthalpy (H), entropy (S) and Gibbs free energy (G). The effect of temperature and pressure on H, S and G. Chemical and phase equilibria. Activity and activity coefficient. Calculation of thermodynamic equilibria using equilibrium constant as well as Gibbs free energy minimisation.

**Mode of delivery:**
Classroom education

**Learning activities and teaching methods:**
Lectures, software exercise as well as other exercises. Available only in Finnish.

**Target group:**
Students of process and environmental engineering

**Prerequisites and co-requisites:**
'Basic Principles in Chemistry' and 'Material and Energy Balances' as prerequisites

**Recommended optional programme components:**
This is one of the courses in which physical chemistry is used in the applications of process and environmental engineering. It is part of a education that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.

**Recommended or required reading:**
Material will be distributed during lectures and exercises.

**Assessment methods and criteria:**
Students are required to make a portfolio consisting of a learning diary and exercises. Please note that the course is organised only in Finnish. Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
University Lecturer Eetu-Pekka Heikkinen

**Working life cooperation:**
No

**Other information:**
It is highly recommended that the students are present already in the first lecture, since it is not possible to come along after the course has already begun. Course webpage (in Finnish): [http://www.oulu.fi/pyomet/477401a](http://www.oulu.fi/pyomet/477401a).

488010P: Introduction to Process and Environmental Engineering II, 5 op

**Voimassaolo:** 01.08.2013 -

**Opiskelumuoto:** Basic Studies

**Laji:** Course

**Vastuuysikkö:** Field of Process and Environmental Engineering

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Fabritius, Timo Matti Juhani, Jukka Käräjäoja

**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**
- 488011P Introduction to Environmental Engineering 5.0 op
- 477012P Introduction to Automation Engineering 5.0 op

**ECTS Credits:**
5 cr / 135 hours of work
Language of instruction:
Available only in Finnish

Timing:
The course is given in the spring semester, during periods III and IV. It is recommended to complete the course at the 1st spring semester.

Learning outcomes:
Students can examine industrial processes using the methods and perspectives of process and environmental engineering (e.g. material management, phenomenon-based considerations and automation) and they recognize the role of different areas of the process and environmental engineering, when these areas are considered in the forthcoming courses.

Contents:

Mode of delivery:
Classroom education

Learning activities and teaching methods:
Group exercises and contact-education (14 h) that supports these exercises. Available only in Finnish.

Target group:
Students of process and environmental engineering

Prerequisites and co-requisites:
None

Recommended optional programme components:
This course is an introduction to the other courses of process and environmental engineering

Recommended or required reading:
Material will be distributed during lectures and via course www-site

Assessment methods and criteria:
Group exercises. Please note that the course is not available in English, but only in Finnish. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Timo Fabritius

Working life cooperation:
No

Other information:
It is highly recommended that the students are present already in the first lecture, since it is not possible to come along after the course has already begun.

477051A: Automation Engineering, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Aki Sorsa, Hiltunen, Jukka Antero
Opintokohteen kielet: Finnish
Leikkaavuudet:

477601A Process Automation Systems 4.0 op
ECTS Credits:
5 ECTS /133 h of work

Language of instruction:
Finnish

Timing:
Autumn, period 1

Learning outcomes:
Students learn how to use PI diagrams, field instruments, automation systems and PLCs in design, implementation and commissioning projects. Students can configure and program the basic automation functions in DCSs and PLCs.

Contents:
The operational and structural descriptions and concepts of process automation, automation commissioning projects, PI diagrams and field devices, configuration tools for automation functions, logic programming, telecommunication technology in automation, field buses, examples of commercial DCSs, PLCs and field bus systems.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures, demonstrations, configuration and logic programming exercises, excursion to a neighbouring industrial plant.

Target group:
B.Sc. students in process and environmental engineering

Prerequisites and co-requisites:
477011P Introduction to process and environmental engineering I and 448010P Introduction to process and environmental engineering II are recommended

Recommended optional programme components:

Recommended or required reading:
Lecture notes and handouts, manuals/handbooks

Assessment methods and criteria:
Learning diary or examination

Grading:
Numerical grading scale 1-5 or fail

Person responsible:
Jukka Hiltunen and Aki Sorsa

Working life cooperation:
No

Other information:

477322A: Heat and Mass Transfer, 5 op

Voimassaolo: 01.08.2015 - 31.07.2019
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Ainassaari, Kaisu Maritta
Opintokohteen kielet: Finnish
Leikkaavuudet:
Mass and Heat Transfer  5.0 op
Heat Transfer  3.0 op
Mass Transfer  3.0 op

ECTS Credits:
5 ECTS / 133 hours of work

Language of instruction:
Finnish, can be completed in English as a book examination

Timing:
Implementation in autumn semester during 1st period. It is recommended to complete the course at the third (Bachelor's) autumn semester.

Learning outcomes:
After passing the course the student knows what happens when heat is transferred by conduction, convection and radiation. The student can describe energy transfer with differential energy balances connected with momentum balances: In macro scale the student is able to solve practical heat transfer problems by correlating heat transfer coefficients to dimensionless flow and material characteristics; With the help of these transfer coefficients the student is capable of estimating the size of heat transfer equipment, especially heat exchangers and select the most suitable and profitable types; and to Sketch large heat nets and to diminish the costs of the equipments. The student is able to use the pinch method which optimises the number of heat exchangers and total energy consumption. He/she is also able to apply the exergy principle to make work from thermal energy. With the aid of this principle he/she will be able to divide the costs of the used energy in right proportion based on the processing stage. He/she student is able to explain diffusion as a phenomenon and the factors affecting it. He/she is able to model mass transfer in simple systems by using the theory of Fick. The student is capable of modeling diffusion by differential mass balances. He/she recognises the special features of mass transfer in turbulent systems and the role of different transport phenomena in mass transfer equipment. He/she has rudimentary practical skills applicable to the scale-up of the equipment used for absorption.

Contents:

Mode of delivery:
Face-to-face teaching in Finnish. Book examination possible in English.

Learning activities and teaching methods:
Lectures 45 h, homework 15 h and self-study 73 h. For foreign students written examination based on given literature.

Target group:
Bachelor's degree students of process and environmental engineering.

Prerequisites and co-requisites:
Knowledge of solving differential equations.

Recommended optional programme components:
The course is part of a stream that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.

Recommended or required reading:
(Will be announced later)

Assessment methods and criteria:
This course utilizes continuous assessment. During the course there are 5 intermediate exams. The course can also be completed by final examination.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.
Person responsible:
University teacher Kaisu Ainassaari

Working life cooperation:
No

477304A: Separation Processes, 5 op

Voimassaolo: 01.08.2005 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Ainassaari, Kaisu Maritta, Muurinen, Esa Ilmari
Opintokohteen kielet: Finnish
Leikkaavuudet:
   470323A Separation Processes  5.0 op

ECTS Credits:
5 ECTS / 133 hours of work.

Language of instruction:
Finnish, can be completed in English as a book examination.

Timing:
Implementation in autumn semester during 2nd periods. It is recommended to complete the course on the third (Bachelor's) autumn semester.

Learning outcomes:
After the course the student is able to define the position of separation processes based on mass transfer in process and environmental engineering. He/she is capable of solving phase equilibrium problems in multistage separations for binary mixtures. The student is able to explain the phenomena behind the following separation processes: distillation, absorption, stripping, liquid-liquid extraction, supercritical extraction, crystallisation, adsorption, chromatography separation, membrane separations, and reactive separations. He/she recognises the equipment used for these processes and is able to compare the methods to each other with heuristic rules.

Contents:
Separation processes based on mass transfer in process and environmental engineering. Phase equilibrium problems in multistage separations for binary mixtures. Phenomena behind the following separation processes: distillation, absorption, stripping, liquid-liquid extraction, supercritical extraction, crystallisation, adsorption, chromatography separation, membrane separations, and reactive separations. Equipment used for these processes and is able to compare the methods to each other with heuristic rules, etc.

Mode of delivery:
Face-to-face teaching in Finnish. Book examination possible in English.

Learning activities and teaching methods:
Lectures 40 h, exercises 20 h, homework 15 h and self-study 58 h. For foreign students written examination based on given literature and homework.

Target group:
Bachelor's degree students of process and environmental engineering.

Prerequisites and co-requisites:
Courses 477301A Momentum Transfer, 477302A Heat Transfer and 477303A Mass Transfer or 477052A Fluid Mechanics and 477312A Heat and Mass Transfer are recommended beforehand.

Recommended optional programme components:
This is one of the courses in which physical chemistry is used in the applications of process and environmental engineering. It is part of a stream that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.

**Recommended or required reading:**

**Assessment methods and criteria:**
Homework assignments affect the course grade. Examination. The course can be completed with two intermediate exams or one final exam. Homework assignments affect the course grade. Read more about the course assessment and grading systems of the University of Oulu at [www.oulu.fi/english/studying/assessment](http://www.oulu.fi/english/studying/assessment)

**Grading:**
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
Laboratory manager Dr Esa Muurinen

- 477301A Momentum Transfer 3.0 op

**ECTS Credits:**
5 ECTS / 133 hours of work.

**Language of instruction:**
Finnish, can be completed in English as a book examination.

**Timing:**
Implementation in spring semester during 3rd period. It is recommended to complete the course at the second (Bachelor's) spring semester.

**Learning outcomes:**
After the course the student is able to determine the viscosity of pure substances and mixtures and to estimate the effect of temperature and pressure on viscosity. The student is able to recognise the interactions between a solid body and flowing fluid and to distinguish the forces, their directions and to calculate their magnitudes. The student is able to formulate momentum balance equations and to solve these in order to calculate velocity distribution, flow rate and pressure drop. The student is able to distinguish laminar and turbulent flow regimes from others and is able to use the correct equations according to flow regime. After the course the student is able to design pipelines and other simple flow mechanical process equipment.

A440147: Module Preparing for the Major, Software Engineering, 40 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Module Preparing for the Option
Laji: Study module
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

Compulsory

H440130: Module Preparing for the Major, Software Engineering, 40 op
**Compulsory**

**521145A: Human-Computer Interaction, 5 op**

- **Voimassaolo:** 01.08.2012 -
- **Opiskelumuoto:** Intermediate Studies
- **Laji:** Course
- **Vastuuysikkö:** Computer Science and Engineering DP
- **Arvostelu:** 1 - 5, pass, fail
- **Opintokohteen kielet:** English

**ECTS Credits:**
5

**Language of instruction:**
In English.

**Timing:**
Autumn, periods 2

**Learning outcomes:**
1. Knowledge of the Human Computer Interaction (HCI) fundamentals
2. Knowledge of evaluation techniques
3. Knowledge of prototyping techniques
4. Knowledge of how HCI can be incorporated in the software development process

**Contents:**
Human and computer fundamentals, design and prototyping, evaluation techniques, data collection and analysis.

**Mode of delivery:**
Face to face teaching.

**Learning activities and teaching methods:**
Lectures (20 h), exercises (20 h), and practical work (95 h). The course is passed with an approved practical work. The implementation is fully English.

**Target group:**
Computer Science and Engineering students and other Students of the University of Oulu.

**Prerequisites and co-requisites:**
While no specific courses are not required, elementary programming and design skills are desired.

**Recommended optional programme components:**
The course is an independent entity and does not require additional studies carried out at the same time. The course involves some basic programming.

**Recommended or required reading:**
All necessary material will be provided by the instructor.

**Assessment methods and criteria:**
The assessment is project-based. Students have to complete 4 individual exercises throughout the semester: 1: Using questionnaires; 2: Grouping & clustering; 3: Fitts' law; 4: Advanced evaluation & visualisations. Passing criteria: all 4 exercises must be completed, each receiving more than 50% of the available points. Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

811312A: Data Structures and Algorithms, 5 op

**Voimassaolo:** 01.08.2010 -
**Opiskelumuoto:** Intermediate Studies
**Laji:** Course
**Vastuuyksikkö:** Information Processing Science DP
**Arvostelu:** 1 - 5, pass, fail
**Opettajat:** Ari Vesanen
**Opintokohteen kielet:** Finnish
**Leikkaavuudet:**
521144A Algorithms and Data Structures 6.0 op

**ECTS Credits:**
5 ECTS credits / 133 hours of work.

**Language of instruction:**
Finnish. One English exercise group will be arranged.

**Timing:**
The course is held in the autumn semester, during period 2. It is recommended to complete the course in the 2nd study year.

**Learning outcomes:**
After completing the course, the student can describe the concept of algorithm and explain what correctness and time complexity of algorithms mean. Furthermore, the student is able to explain the design paradigms presented in the course and to describe the complexity classes of relevant sorting algorithms. The student can analyse simple algorithms, i.e. to prove their correctness and evaluate their time complexity. Moreover, the student is able to describe the basic data structures and apply essential graph algorithms. Finally, the student can construct suitable data structures and algorithms for given problems; the student can also justify the choice of a data structure or an algorithm for an application.

**Contents:**
The concept and analysis of algorithms, sorting and searching algorithms and their complexity, algorithm design paradigms, the concept of data structure and basic data structures, hash tables, binary search trees, graphs and their algorithms.

**Mode of delivery:**
Face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 48h, exercises 21h, assignment (27), independent work 39h.

**Target group:**
BSc students.

**Prerequisites and co-requisites:**
Mastery of subject matter of the course “Discrete Structures” is required.

**Recommended optional programme components:**

**Recommended or required reading:**
From this edition chapters 1–4, 6–13, 15–16, 22–24, Appendix A and B are covered.

**Assessment methods and criteria:**
Exam and assignment. Exam will be graded 1-5 if accepted. Assignment graded accepted/failed. Final grade will be the same as exam's grade.

**Grading:**
Numerical scale 1-5 or fail.

**Person responsible:**
Ari Vesanen

**Working life cooperation:**

**521150A: Introduction to Internet, 5 op**

**Voimassaolo:** 01.08.2012 -
**Opiskelumuoto:** Intermediate Studies
**Laji:** Course
**Vastuuysikkö:** Electrical Engineering DP
**Arvostelu:** 1 - 5, pass, fail
**Opettajat:** Timo Koskela
**Opintokohteen kielet:** Finnish

**ECTS Credits:**
5

**Language of instruction:**
All materials are in English, lectures are given in Finnish.

**Timing:**
Spring, period 4.

**Learning outcomes:**
1. is able to explain the design principles, architecture, functionality and challenges of the public internet
2. understands data link layer's role and most important access network technologies
3. is able to explain the structure and most important protocols of the TCP/IP protocol stack
4. knows most important internet applications and their protocols
5. understands the principles of internet security and multimedia applications
6. is able to solve simple internet related problems
7. is able to program a small internet application

**Contents:**
Internet's design principles and architecture, data link layer and most important access network technologies, TCP/IP protocol stack and its most important protocols, most important Internet applications, principles of Internet security and multimedia, internet's challenges and Future Internet.

**Mode of delivery:**
Face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 32 h / problem solving exercises 14 h / laboratory exercises 12 h / course work 25 h / self-study 52 h. Problem solving exercises, laboratory exercises and course work are completed as group work.

**Target group:**
Computer Science and Engineering students, Information Processing Science students, other students of the University of Oulu.

**Prerequisites and co-requisites:**
None.

**Recommended optional programme components:**
-

**Recommended or required reading:**
Announced at the beginning of the course.

**Assessment methods and criteria:**
The course uses continuous assessment so that there are 3 intermediate exams. Alternatively, the course can also be passed with a final exam. The course includes a mandatory course work.

Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
The course uses numerical grading scale 1-5.

ay811167P Introduction to Information Systems Design (OPEN UNI) 5.0 op

**ECTS Credits:**
5 ECTS credits / 133 hours of work.

**Language of instruction:**
finnish

**Timing:**
The course is held in the spring semester, during period 3. It is recommended to complete the course in the 2nd spring semester.
The course is held in the spring semester, during period 3. It is recommended to complete the course in the 1st study year.

**Learning outcomes:**
After completing the course, the student will be able to Explain the main areas of the information system design on technical level, main design process models for the information system design, basics of the requirement gathering, basics of the information system initialization, and basics of how to evaluate information systems.; Produce use-case descriptions, use-case diagrams and other types of diagrams and descriptions needed to model the operational environment of the information system.

**Contents:**

**Mode of delivery:**
Face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 27 h, exercises 21 h, assignment 85 h, exam 3 h.

Lectures (27h), Exercises (21h), Assignment (85h), Exam (3h).

**Target group:**
BSc students.

**Recommended or required reading:**
Assessment methods and criteria:
Exam and mandatory assignment.

Grading:
Numerical scale 1-5 or fail.

Person responsible:
Mikko Rajanen

521286A: Computer Systems, 8 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Computer Science and Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Teemu Leppänen
Opintokohteen kielet: Finnish
Leikkaavuudet:
521142A Embedded Systems Programming 5.0 op

ECTS Credits:
8

Language of instruction:
Lecturing in Finnish, course and exercise material available in English.

Timing:
Autumn, periods 1-2.

Learning outcomes:
1. Student understands the basic computer architecture and organization.
2. Student understands CPU operation and datapath in general.
3. Student knows different number systems and data representations in computers.
4. Student is familiar of I/O operation with peripheral devices in general.
5. Student is able to implement small programs with the C programming language for general-purpose computers for embedded systems.
6. Student recognizes how embedded systems programming is different from programming general-purpose computers.

Contents:
Yleinen tietokoneen organisaatio ja arkkitehtuuri, keskusyksikkö, muistihierarkia ja muistinhallinta, tietotyypit, laiterekisterit ja I/O, yleinen tietokoneen ohjelmointi ja laiteläheisen ohjelmointi, C-kielen perusteet.

Mode of delivery:
Web-based and face-to-face teaching.

Learning activities and teaching methods:
Lectures (40h), course exercises (20h), laboratory exercise (3h) and course projects in groups.

Target group:
2nd year students of computer science and engineering and 3rd year students of electrical engineering.

**Prerequisites and co-requisites:**
Elementary programming 521141P.

**Recommended optional programme components:**
The course is an independent entity and does not require additional studies carried out at the same time.

**Recommended or required reading:**
Course material will be announced at the beginning of the course.

**Assessment methods and criteria:**
Students complete the course exercises after lectures, participate to the laboratory exercise and complete the course projects in groups. Assessment is based on the exercises and the course projects. More detailed information on assessment will be announced at the beginning of the course. Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
Teemu Leppänen, Mika Rautiainen.

**Working life cooperation:**
No.

**521457A: Software Engineering, 5 op**

**Opiskelumuoto:** Intermediate Studies  
**Laji:** Course  
**Vastuuysikkö:** Computer Science and Engineering DP  
**Arvostelu:** 1 - 5, pass, fail  
**Opettajat:** Juha Röning  
**Opintokohteen kielet:** English

**Leikkaavuudet:**
- ay521457A  Software Engineering (OPEN UNI)  5.0 op

**ECTS Credits:**
5

**Language of instruction:**
Finnish. Material available in English.

**Timing:**
Spring, periods 3.

**Learning outcomes:**
After finishing the course, the student knows the basic concepts of software and real-time systems, the different areas of project management, the phases of software development and the goals and tasks of them, is able to use structural methods for defining systems and knows the principles of object-oriented design and analysis. After the course, the student has basic knowledge of utilizing software tools for structural analysis and design.

**Contents:**
Problematics of software development and the special features of real-time systems in this regard. Software development is viewed in regard to project management and actual implementation: 1. process models, 2. requirements specification, 3. project management basics: design, metrics, risk
management, resource management, follow up, quality control, product control, 4. software testing methods and strategies, 5. introduction to object-oriented analysis and design. 6. Agile software development.

**Mode of delivery:**
Face-to-face.

**Learning activities and teaching methods:**
The course consists of lectures and a laboratory design exercise. The course is completed by a final exam and a successfully completed exercise. Lectures 30 h, laboratory design (in period 3) 12 h, the rest of the self-study.

**Target group:**
Computer Science and Engineering students and other Students of the University of Oulu.

**Prerequisites and co-requisites:**

**Recommended optional programme components:**
The course is an independent entity and does not require additional studies carried out at the same time.

**Recommended or required reading:**

**Assessment methods and criteria:**
Final exam and accepted laboratory exercise. Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
Juha Röning

811379A: Basics of Human Computer Interaction, 5 op

**Opiskelumuoto:** Intermediate Studies  
**Laji:** Course  
**Vastuuysikkö:** Information Processing Science DP  
**Arvostelu:** 1 - 5, pass, fail  
**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**
- ay811379A Basics of Human Computer Interaction (OPEN UNI) 5.0 op  
- 812327A Introduction to HCI design 4.0 op

**ECTS Credits:**
5 ECTS credits/133 hours of student’s work

**Language of instruction:**
Finnish

**Timing:**
2nd year, period 3, bachelor level.

**Learning outcomes:**
Upon completion of the course, the student will be able to define basic concepts of user interface design, introduce basic design process with design and evaluation methods and tasks, and apply graphical user interface design from the viewpoint of a certain user group and system.
Contents:
Basic concepts of user interface design and usability evaluation; user-centred design process; gathering of user data, analysis, expert evaluation and design by prototyping, user-based evaluation; universal design and user support; user interface description.

Mode of delivery:
Face-to-face teaching, self-study.

Learning activities and teaching methods:
Lectures (20 h), guided group assignment tasks in exercises (21 h) and without guidance in assignment groups (58 h); seminar (3h) individual tasks (31 h).

Target group:
2nd year, bachelor level students.

Prerequisites and co-requisites:
Humans as Users and Developers of Information Technology (811177P) -course or related knowledge.

Recommended optional programme components:

Recommended or required reading:
Dix et al. (2004, third or later edition) *Human-Computer Interaction* and lecture and assignment materials.

Assessment methods and criteria:
During the course, the students will be compiling the group assignments and integration tasks on their implementation. These will be assessed based on the learning outcomes of the course. The assessment criteria and the requirements will be explained in detail during the opening lecture of the course.

Grading:
1–5, fail

Person responsible:
Anna-Liisa Syrjänen

811395A: Basics of Databases, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Information Processing Science DP
Arvostelu: 1 - 5, pass, fail
Opettajat: lisakka, Juha Veikko
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits / 133 hours of work.

Language of instruction:
Finnish. If at least four non-Finnish students take the course, an English exercise group will be organised.

**Timing:**
The course is held in the spring semester, during period 3. It is recommended to complete the course in the 1st spring semester.

**Learning outcomes:**
In addition, they have knowledge of modern non-relational database solutions (such as data warehouses and NoSQL-databases) and they have commanding knowledge of making use of those non-relational databases (such as data mining and Big data techniques).

**Contents:**
Conceptual modelling (ER- and EER-diagrams), relational model (theory, databases, query techniques and normalization), transactions.

**Mode of delivery:**
Face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 45 h, compulsory exercises 24 h, reading 20 h, exams 21 h and self-studying 23 h.

**Target group:**
Bachelor students

**Prerequisites and co-requisites:**
The student knows basics of programming.

**Recommended or required reading:**

**Assessment methods and criteria:**
The course is divided to five parts. All parts must be passed in a year. Students must show they achieve at least half of required knowledge of each part.

**Grading:**
fail, 1-5

**Person responsible:**
Jua Iisakka

477201A: Material and Energy Balances, 5 op

Voimassaolo: 01.08.2005 - 31.12.2019
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Tiina Leiviskä
Opintokohteen kielet: Finnish
Leikkaavuudet:
   477221A Material and Energy Balances 5.0 op
   470220A Fundamentals of Chemical Process Engineering 5.0 op

ECTS Credits:
5 ECTS /133 hours of work

Language of instruction:
Finnish. The course can be completed in English as a book examination.

Timing:
Autumn period 1

Learning outcomes:
The student is able to formulate material and energy balances for a process by taking into account the restrictions set by reaction stoichiometry. The student knows how the created mathematical formulation can be exploited in process consideration.

Contents:
Formulation of material and energy balances by taking into account the effects of chemical reactions.

Mode of delivery:
Lectures and group exercise

Learning activities and teaching methods:
Lectures 40h, group work 10h and self-study 80h

Target group:
Bachelor students in of Process or Environmental Engineering

Prerequisites and co-requisites:
Basics from the course Introduction to Process Engineering

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
During the course, there are two intermediate exams and both of them must be passed. Alternatively student can participate in final exam after the course. In addition to this, the students will be making a group exercise, which will be evaluated. Read more about the course assessment and grading systems of the University of Oulu at www.oulu.fi/english/studying/assessment
Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:

477401A: Thermodynamic Equilibria, 5 op

Voimassaolo: 01.08.2005 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Eetu-Pekka Heikkinen
Opintokohteen kielet: Finnish
Leikkaavuudet:
  470611A Metallurgy Processes 7.0 op

ECTS Credits:
5 cr / 135 hours of work

Language of instruction:
Available only in Finnish

Timing:
The course is given in the autumn semester, during period II. It is recommended to complete the course at the 2nd year of Bachelor's studies.

Learning outcomes:
Student is capable of defining chemical equilibria of the systems that are related to industrial processes and understands the relevance of equilibria (and their computational determination) as a part of process analysis, planning and control. Additionally, (s)he can define a meaningful system to be considered in computation thermodynamics; i.e. (s)he can create a computationally solvable problem based on technical problem that in itself is not solvable computationally.

Contents:
Concepts of entalphy (H), entropy (S) and Gibbs free energy (G). The effect of temperature and pressure on H, S and G. Chemical and phase equilibria. Activity and activity coefficient. Calculation of thermodynamic equilibria using equilibrium constant as well as Gibbs free energy minimisation.

Mode of delivery:
Classroom education

Learning activities and teaching methods:
Lectures, software exercise as well as other exercises. Available only in Finnish.

Target group:
Students of process and environmental engineering

Prerequisites and co-requisites:
'Basic Principles in Chemistry’ and 'Material and Energy Balances’ as prerequisites

Recommended optional programme components:
This is one of the courses in which physical chemistry is used in the applications of process and environmental engineering. It is part of a education that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.
Recommended or required reading:
Material will be distributed during lectures and exercises.

Assessment methods and criteria:
Students are required to make a portfolio consisting of a learning diary and exercises. Please note that the course is organised only in Finnish. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
University Lecturer Eetu-Pekka Heikkinen

Working life cooperation:
No

Other information:
It is highly recommended that the students are present already in the first lecture, since it is not possible to come along after the course has already begun. Course webpage (in Finnish): http://www.oulu.fi/pyomet/477401a.

477051A: Automation Engineering, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Aki Sorsa, Hiltunen, Jukka Antero
Opintokohteen kielet: Finnish
Leikkaavuudet:

ECTS Credits:
5 ECTS /133 h of work

Language of instruction:
Finnish

Timing:
Autumn, period 1

Learning outcomes:
Students learn how to use PI diagrams, field instruments, automation systems and PLCs in design, implementation and commissioning projects. Students can configure and program the basic automation functions in DCSs and PLCs

Contents:
The operational and structural descriptions and concepts of process automation, automation commissioning projects, PI diagrams and field devices, configuration tools for automation functions, logic programming, telecommunication technology in automation, field buses, examples of commercial DCSs, PLCs and field bus systems

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures, demonstrations, configuration and logic programming exercises, excursion to a neighbouring industrial plant

Target group:
B.Sc. students in process and environmental engineering
Prerequisites and co-requisites:
477011P Introduction to process and environmental engineering I and 448010P Introduction to process and environmental engineering II are recommended

Recommended optional programme components:
-

Recommended or required reading:
Lecture notes and handouts, manuals/handbooks

Assessment methods and criteria:
Learning diary or examination

Grading:
Numerical grading scale 1-5 or fail

Person responsible:
Jukka Hiltunen and Aki Sorsa

Working life cooperation:
No

477322A: Heat and Mass Transfer, 5 op

Voimassaolo: 01.08.2015 - 31.07.2019
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Ainassaari, Kaisu Maritta
Opintokohteen kielet: Finnish
Leikkaavuudet:
  477323A  Mass and Heat Transfer  5.0 op
  477302A  Heat Transfer  3.0 op
  477303A  Mass Transfer  3.0 op

ECTS Credits:
5 ECTS / 133 hours of work

Language of instruction:
Finnish, can be completed in English as a book examination

Timing:
Implementation in autumn semester during 1st period. It is recommended to complete the course at the third (Bachelor's) autumn semester.

Learning outcomes:
After passing the course the student knows what happens when heat is transferred by conduction, convection and radiation. The student can describe energy transfer with differential energy balances connected with momentum balances; In macro scale the student is able to solve practical heat transfer problems by correlating heat transfer coefficients to dimensionless flow and material characteristics; With the help of these transfer coefficients the student is capable of estimating the size of heat transfer equipment, especially heat exchangers and select the most suitable and profitable types; and to Sketch large heat nets and to diminish the costs of the equipments. The student is able to use the pinch method which optimises the number of heat exchangers and total energy consumption. He/she is also able to apply the exergy principle to make work from thermal energy. With the aid of this principle he/she will be able to divide the costs of the used energy in right proportion based on the processing stage. He/she student is able to explain diffusion as a phenomenon and the factors affecting it. He/she is able to model mass mass transfer in simple...
systems by using the theory of Fick. The student is capable of modeling diffusion by differential mass balances. He/she recognizes the special features of mass transfer in turbulent systems and the role of different transport phenomena in mass transfer equipment. He/she has rudimentary practical skills applicable to the scale-up of the equipment used for absorption.

Contents:

Mode of delivery:
Face-to-face teaching in Finnish. Book examination possible in English.

Learning activities and teaching methods:
Lectures 45 h, homework 15 h and self-study 73 h. For foreign students written examination based on given literature.

Target group:
Bachelor's degree students of process and environmental engineering.

Prerequisites and co-requisites:
Knowledge of solving differential equations.

Recommended optional programme components:
The course is part of a stream that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.

Recommended or required reading:
(Will be announced later)

Assessment methods and criteria:
This course utilizes continuous assessment. During the course there are 5 intermediate exams. The course can also be completed by final examination.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
University teacher Kaisu Ainassaari

477304A: Separation Processes, 5 op

Voimassaolo: 01.08.2005 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Ainassaari, Kaisu Maritta, Muurinen, Esa Ilmari
Opintokohteen kielet: Finnish
Leikkaavuudet:

ECTS Credits:
5 ECTS / 133 hours of work.

Language of instruction:
Finnish, can be completed in English as a book examination.

Timing:
Implementation in autumn semester during 2nd periods. It is recommended to complete the course on the third (Bachelor’s) autumn semester.

Learning outcomes:
After the course the student is able to define the position of separation processes based on mass transfer in process and environmental engineering. He/she is capable of solving phase equilibrium problems in multistage separations for binary mixtures. The student is able to explain the phenomena behind the following separation processes: distillation, absorption, stripping, liquid-liquid extraction, supercritical extraction, crystallisation, adsorption, chromatography separation, membrane separations, and reactive separations. He/she recognises the equipment used for these processes and is able to compare the methods to each other with heuristic rules.

Contents:
Separation processes based on mass transfer in process and environmental engineering. Phase equilibrium problems in multistage separations for binary mixtures. Phenomena behind the following separation processes: distillation, absorption, stripping, liquid-liquid extraction, supercritical extraction, crystallisation, adsorption, chromatography separation, membrane separations, and reactive separations. Equipment used for these processes and is able to compare the methods to each other with heuristic rules, etc.

Mode of delivery:
Face-to-face teaching in Finnish. Book examination possible in English.

Learning activities and teaching methods:
Lectures 40 h, exercises 20 h, homework 15 h and self-study 58 h. For foreign students written examination based on given literature and homework.

Target group:
Bachelor’s degree students of process and environmental engineering.

Prerequisites and co-requisites:
Courses 477301A Momentum Transfer, 477302A Heat Transfer and 477303A Mass Transfer or 477052A Fluid Mechanics and 477312A Heat and Mass Transfer are recommended beforehand.

Recommended optional programme components:
This is one of the courses in which physical chemistry is used in the applications of process and environmental engineering. It is part of a stream that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.

Recommended or required reading:

Assessment methods and criteria:
Homework assignments affect the course grade. Examination. The course can be completed with two intermediate exams or one final exam. Homework assignments affect the course grade. Read more about the course assessment and grading systems of the University of Oulu at www.oulu.fi /english/studying/assessment

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Other information:

477052A: Fluid Mechanics, 5 op
ECTS Credits:
5 ECTS / 133 hours of work.
Language of instruction:
Finnish, can be completed in English as a book examination.
Timing:
Implementation in spring semester during 3rd period. It is recommended to complete the course at the second (Bachelor’s) spring semester.
Learning outcomes:
After the course the student is able to determine the viscosity of pure substances and mixtures and to estimate the effect of temperature and pressure on viscosity. The student is able to recognise the interactions between a solid body and flowing fluid and to distinguish the forces, their directions and to calculate their magnitudes. The student is able to formulate momentum balance equations and to solve these in order to calculate velocity distribution, flow rate and pressure drop. The student is able to distinguish laminar and turbulent flow regimes from others and is able to use the correct equations according to flow regime. After the course the student is able to design pipelines and other simple flow mechanical process equipment.
Contents:
Mode of delivery:
Face-to-face teaching in Finnish. Book examination in English.
Learning activities and teaching methods:
Lectures 45 h, homework 15 h and self-study 73 h. For foreign students written examination based on given literature.
Target group:
Bachelor’s degree students of process and environmental engineering.
Prerequisites and co-requisites:
Knowledge of solving differential equations.
Recommended optional programme components:
The course is part of a stream that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.
Recommended or required reading:
Assessment methods and criteria:
This course utilizes continuous assessment. During the course there are 5 intermediate exams. The course can also be completed by final examination. Read more about the course assessment and grading systems of the University of Oulu at www.oulu.fi/english/studying/assessment.
Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

521109A: Electrical Measurement Principles, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Electrical Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Juha Saarela
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits / 136h

Language of instruction:
Course is lectured in Finnish. Lecture notes are available in English. Laboratory exercises and the exam can be done in English.

Timing:
Periods 1-2.

Learning outcomes:
1. is able to measure basic measurements with a multimeter,
2. is able to measure basic measurements with an oscilloscope,
3. is able to operate signal and function generators.
4. is able to estimate the validity of their measurements.

**Contents:**
Units of measures, standards of measures, analysis of errors, most commonly used analog and digital measuring methods, equipment and electrical safety regulations.

**Mode of delivery:**
Pure face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 20h, laboratory exercises 16 h and self-study 100h.

**Target group:**
Course is compulsory for electrical engineering, information engineering and wellness technology students. Course is open for all students in University of Oulu.

**Prerequisites and co-requisites:**
None.

**Recommended optional programme components:**
None.

**Recommended or required reading:**
Course material is in English and Finnish and can be found in Optima.

**Assessment methods and criteria:**
Exam and passed lab exercises.

**521077P: Introduction to Electronics, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuysikkö:** Electrical Engineering DP

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Jari Hannu

**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**
- ay521077P  Introduction to Electronics (OPEN UNI)  5.0 op
- 521209A  Electronics Components and Materials  2.0 op

**ECTS Credits:**
5 ECTS credits / 132,5 hours of work

**Language of instruction:**
Finnish

**Timing:**
The course is held in the 2nd period. It is recommended to complete the course at the 1st autumn semester.

**Learning outcomes:**
1. Student understands the block structures of electronic devices and their signal processing paths.
2. Student can identify the interfaces of analog and digital electronics and the software operations.

3. Student is able to identify and classify electronics components and compare their properties.

4. Students can describe electric conductivity and apply the phenomenon on designing and choosing resistors.

5. Student is able to estimate the difference between dielectric materials and how they affect the properties of a capacitor.

6. Student can compare properties of magnetic materials and how identify they effect on inductive components.

7. Student can identify semiconductivity and is able to list typical semiconductor components.

8. Student can classify different circuit board techniques and is able to choose proper coupling techniques.

9. Student can identify the future technologies of electronics materials.

Contents:

Mode of delivery:
Face-to-face teaching and independent work.

Learning activities and teaching methods:
The implementation methods of the course vary. The course will be arranged utilizing activating teaching methods agreed on together with the students. There will be 48 hours of guided teaching events and 84.5 hours of teaching without guidance either privately or in a group.

Target group:
First year electrical engineering students.

Prerequisites and co-requisites:
No prerequisites.

Recommended optional programme components:
-

Recommended or required reading:
Lecture material; Materials science and engineering: an introduction / William D. Callister, chapters 1, 18 and 20; Electronic components and technology / S. J. Sangwine. Chapters 1, 2, 3, 5 and 7.

Assessment methods and criteria:
This course utilizes continuous assessment. During the course, there are two intermediate exams. In addition students will make course work which are graded. The assessment of the course is based on the learning outcomes of the course. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Jari Hannu

Working life cooperation:
No

521301A: Digital Techniques 1, 8 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Learning outcomes:

1. After the course, students are able to use the binary number system and Boolean algebra in the form of switching algebra to the design and functional analysis of simple digital circuits.
2. In addition, they are also able to use in their designs graphical symbols specified in the dependency notation standard (SFS4612 and IEEE/ANSI Std.91-1991) and different descriptions of function and structure of state machines.
3. Based on this knowledge, students are able to implement and analyze digital devices consisting of ordinary simple digital components.
4. After having assimilated the basic knowledge of digital technique, students are able to understand also the function and structure of micro controllers and micro processors.

Contents:

The principles of digital devices, Boolean algebra, numeral systems, operating principle, analysis and synthesis of combinational logic, flip-flops, operating principle, analysis and synthesis of sequential logic (state machines), physical characteristics of CMOS technology, registers and register transfers, computer memory, instruction set architecture, computer design basics, interfaces and data transmission.

Mode of delivery:

Classroom

Learning activities and teaching methods:
Lessons 40 h, guidance of the project work 20 h.

Target group:

Primarily 1st year electrical engineering and computer science and engineering BSc students. The course can be taken by the students of the University of Oulu.

Prerequisites and co-requisites:

- Recommended optional programme components:
The course is an independent entity and does not require additional studies carried out at the same time.

- Recommended or required reading:
Text books, MIT OpenCourseWare and exercise literature.

Assessment methods and criteria:

Project work, home assignment and exam. Partial exams are recommended. Read more about assessment criteria at the University of Oulu webpage.

Grading:

Project work pass/fail. Numerical grading 1-5 for exam. Final grading is based on exam.

Person responsible:
521302A: Circuit Theory 1, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Electrical Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Rahkonen, Timo Erkki
Opintokohteen kielet: Finnish

ECTS Credits:
5

Language of instruction:
Finnish. Exams can be arranged in English on demand.

Timing:
Spring, period 4

Learning outcomes:
After the course the student can

1. write and solve the equations describing the operation of a given electrical circuit
2. solve the sinusoidal steady-state solution using complex phasor arithmetics
3. solve time responses of electric circuits
4. simplify electrical circuits e.g. using equivalent circuits
5. simulate simple circuits and choose an appropriate circuit simulation method

Contents:

Mode of delivery:
Classroom.

Learning activities and teaching methods:
30h lectures, 22h exercises, and a simulation exercise.

Target group:
Finnish BSc students.

Prerequisites and co-requisites:
Matrix algebra, complex arithmetics, differential equations.

Recommended optional programme components:
Background to all analog electronics courses.

Recommended or required reading:

Assessment methods and criteria:
Final exam. Also the simulation exercise must be passed.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5

521329A: Hands-on Course in Wireless Communication, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Electrical Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Kari Heikki Antero Kärkkäinen
Opintokohteen kielet: Finnish
Leikkaavuudet:

521316A Broadband Communications Systems 4.0 op

ECTS Credits:
5

Language of instruction:
Finnish

Timing:
The course is held in the autumn semester, during first period. It is recommended to complete the course at the 2nd autumn semester.

Learning outcomes:
1. has become acquainted with wireless communication technologies with the aid of small laboratory measurement works, which do not require prior courses on telecommunication engineering.

2. has observed and learned the operation principles, properties and limitations of existing wireless communication systems.

3. has learned how to use measurement techniques and methods with the aid of modern measurement instruments in laboratory environment.

4. knows how to approach different kinds of wireless communication problems by utilizing hands-on engineering work practices.

Contents:
Students are introduced to the wireless communication systems and corresponding phenomena with the aid of guided laboratory exercises. The course utilizes within reasonable limits various existing wireless communication systems, in order to create simple connections between various equipments and modules in a laboratory environment.

Mode of delivery:
Face-to-face teaching and guided laboratory exercises. Self-studying at home between work themes. Writing of final report.

Learning activities and teaching methods:
Course consist of few small separate measurement problems dealing with wireless transmission. Before each work theme relevant theory and work instructions needed to complete the work are given. Students will participate in briefing lectures (appr. 2 h/theme) which introduce the theory needed to conduct each laboratory work problem. In addition, instructions to perform the work are given. After each lecture students will move to a measurement laboratory, and will study a given problem with the aid of measuring instruments in a laboratory environment under teacher's guidance. Work subjects are done within a group of several students, and measurement results are summarized in a written final report. Course contains face-to-face teaching and guided laboratory work among themes, and self-study between work themes. For the end, students perform discussion and reporting of results. Final exam is not arranged.
Target group:
Second year bachelor level electrical engineering students.

Prerequisites and co-requisites:
No prerequisites.

Recommended optional programme components:
The course is an independent entity and does not require additional studies carried out at the same time.

Recommended or required reading:
No course book. Lecture slides, and problem assignments together with work instruction available. Materials will be placed into TTK-OPTIMA environment during the course.

Assessment methods and criteria:
All students of a group will participate in introductory face-to-face teaching and will prepare a final report according teacher’s instructions. Participation in all introductory lectures and laboratory exercises is mandatory for all members of a group. In addition, final report has to be in form required by a course teacher, and the content has to be satisfying from acceptance standpoint. Read more about assessment criteria at the University of Oulu webpage.

Grading:
Work grading accepted/rejected. No numerical grading.

Person responsible:
Kari Kärkkäinen

Working life cooperation:
No

521303A: Circuit Theory 2, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Electrical Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Rahkonen, Timo Erkki
Opintokohteen kielet: Finnish
Leikkaavuudet:

ECTS Credits:
5

Language of instruction:
Finnish

Timing:
Autumn, period 2

Learning outcomes:
After the course the student can:
1. use Laplace transform for solving time and frequency response of electric circuits;
2. derive continuous-time transfer functions;
3. solve their poles and zeros and understand the meaning of those; 
4. draw the pole-zero map and Bode plots of any given transfer function;
5. construct 2-port parameter models of a given circuit

Contents:
Use of Laplace transform in network analysis. Properties of network functions, poles and zeros, Boden magnitude and phase plots. 2-port parameter models.

Mode of delivery:
Classroom

**Learning activities and teaching methods:**
30h lectures, 22 h exercises, and simulation exercises.

**Target group:**
Finnish BSc students

**Prerequisites and co-requisites:**
Basics of circuit theory, differential equations.

**Recommended optional programme components:**
Continuation for Circuit theory 1. Needed in most analog electronics courses.

**Recommended or required reading:**

**Assessment methods and criteria:**
Course is examined by a final exam. Obligatory simulation exercise must be passed. Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
Numerical 1-5

**Opiskelumuoto:** Basic Studies

**Laji:** Course

**Vastuuysikkö:** Electrical Engineering DP

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Juha Hagberg

**Opintokohteen kielet:** Finnish

**ECTS Credits:**
5 ECTS credits / 132.5 hours of work

**Language of instruction:**
Finnish.

**Timing:**

Spring semester period 3

**Learning outcomes:**

1. is able to explain the principal solid state crystal structures

2. can explain how propagating waves and electrons in a crystal lattice can be presented

3. can explain the free electron model of metals and the formation of the energy band structure in crystals and their significance to the electrical properties of materials

4. is able to explain the basic phenomena related to semiconductors and is able to calculate the charge carrier concentrations in them

**Contents:**

**Mode of delivery:**
Will be notified in the beginning of lectures
Learning activities and teaching methods:
Will be notified in the beginning of lectures

Target group:
Second year electrical engineering students

Prerequisites and co-requisites:
Basic physics and mathematics.

Recommended optional programme components:
Basic course for 521071A Principles of Semiconductor Devices.

Recommended or required reading:

Assessment methods and criteria:
Will be notified in the beginning of lectures. Read more about assessment criteria at the University of Oulu webpage.

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Electrical Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Juha Häkkinen
Opintokohteen kielet: Finnish

ECTS Credits:
5

Language of instruction:
Finnish.

Timing:
Spring, period 4

Learning outcomes:
1. should be able to analyze and design such electronic building blocks as rectifiers, clamping circuits, amplifiers and CMOS logic elements using diodes, operational amplifiers and MOS and bipolar junction transistors.

Contents:
Analogue and digital circuits, basic amplifier related concepts, operational amplifier, diodes and diode circuits, single stage bipolar and MOS transistor amplifiers, small signal modeling and analyzing ac properties of amplifiers, internal structures of digital circuits (mainly CMOS), MOS /CMOS switch.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 30 h and exercises 20 h.
**Target group:**
Students of Electrical engineering. Other students of the University of Oulu may also participate.

**Prerequisites and co-requisites:**
Circuit Theory I

**Recommended optional programme components:**
Recommended course Principles of Semiconductor Devices.

**Recommended or required reading:**

**Assessment methods and criteria:**
Final or 2 mid-term exams.

521145A: Human-Computer Interaction, 5 op

Voimassaolo: 01.08.2012 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Computer Science and Engineering DP
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: English
ECTS Credits:
5

Language of instruction:
In English.

Timing:
Autumn, periods 2

Learning outcomes:
1. Knowledge of the Human Computer Interaction (HCI) fundamentals
2. Knowledge of evaluation techniques
3. Knowledge of prototyping techniques
4. Knowledge of how HCI can be incorporated in the software development process

Contents:
Human and computer fundamentals, design and prototyping, evaluation techniques, data collection and analysis.

Mode of delivery:
Face to face teaching.

Learning activities and teaching methods:
Lectures (20 h), exercises (20 h), and practical work (95 h). The course is passed with an approved practical work. The implementation is fully English.

Target group:
Computer Science and Engineering students and other Students of the University of Oulu.

Prerequisites and co-requisites:
While no specific courses are not required, elementary programming and design skills are desired.

Recommended optional programme components:
The course is an independent entity and does not require additional studies carried out at the same time. The course involves some basic programming.

Recommended or required reading:
All necessary material will be provided by the instructor.

Assessment methods and criteria:
The assessment is project-based. Students have to complete 4 individual exercises throughout the semester: 1: Using questionnaires; 2: Grouping & clustering; 3: Fitts' law; 4: Advanced evaluation & visualisations. Passing criteria: all 4 exercises must be completed, each receiving more than 50% of the available points.

Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Jorge Goncalves
Vassilis Kostakos

Working life cooperation:
-
Opettajat: Timo Koskela
Opintokohteen kielet: Finnish

ECTS Credits:
5

Language of instruction:
All materials are in English, lectures are given in Finnish.

Timing:
Spring, period 4.

Learning outcomes:
1. is able to explain the design principles, architecture, functionality and challenges of the public internet
2. understands data link layer's role and most important access network technologies
3. is able to explain the structure and most important protocols of the TCP/IP protocol stack
4. knows most important internet applications and their protocols
5. understands the principles of internet security and multimedia applications
6. is able to solve simple internet related problems
7. is able to program a small internet application

Contents:
Internet's design principles and architecture, data link layer and most important access network technologies, TCP/IP protocol stack and its most important protocols, most important Internet applications, principles of Internet security and multimedia, internet's challenges and Future Internet.

Mode of delivery:
Face-to-face teaching.

Learning activities and teaching methods:
Lectures 32 h / problem solving exercises 14 h / laboratory exercises 12 h / course work 25 h / self-study 52 h. Problem solving exercises, laboratory exercises and course work are completed as group work.

Target group:
Computer Science and Engineering students, Information Processing Science students, other students of the University of Oulu.

Prerequisites and co-requisites:
None.

Recommended optional programme components:
-

Recommended or required reading:
Announced at the beginning of the course.

Assessment methods and criteria:
The course uses continuous assessment so that there are 3 intermediate exams. Alternatively, the course can also be passed with a final exam. The course includes a mandatory course work.

Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course uses numerical grading scale 1-5.

Person responsible:
Dr. Timo Koskela.

Working life cooperation:
521301A: Digital Techniques 1, 8 op

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuysikkö:** Electrical Engineering DP

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Antti Mäntyniemi

**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**
- 521412A-02 Digital Techniques 1, Exercise Work 0.0 op
- 521412A Digital Techniques 1 6.0 op
- 521412A-01 Digital Techniques, Exam 0.0 op

**ECTS Credits:**
8

**Language of instruction:**
Finnish

**Timing:**
Periods 3-4

**Learning outcomes:**
1. After the course, students are able to ably binary number system and Boolean algebra in the form of switching algebra to the design and functional analyze of simple digital circuits.
2. In addition, they are also able to use in their designs graphical symbols specified in the dependency notation standard (SFS4612 ja IEEE/ANSI Std.91-1991) and different descriptions of function and structure of state machines.
3. Based on this knowledge, students are able to implement and analyze digital devices consisting of ordinary simple digital components.
4. After having assimilated the basic knowledge of digital technique, students are able to understand also the function and structure of micro controllers and micro processors.

**Contents:**
The principles of digital devices, Boolean algebra, numeral systems, operating principle, analysis and synthesis of combinational logic, flip-flops, operating principle, analysis and synthesis of sequential logic (state machines), physical characteristics of CMOS technology, registers and register transfers, computer memory, instruction set architecture, computer design basics, interfaces and data transmission.

**Mode of delivery:**
Classroom

**Learning activities and teaching methods:**
Lessons 40 h, guidance of the project work 20 h.

**Target group:**
Primarily 1st year electrical engineering and computer science and engineering BSc students. The course can be taken by the students of the university of Oulu.

**Prerequisites and co-requisites:**
-

**Recommended optional programme components:**
The course is an independent entity and does not require additional studies carried out at the same time.

**Recommended or required reading:**
Text books, MIT OpenCourseWare and excercise literature.
Assessment methods and criteria:
Project work, home assignment and exam. Partial exams are recommended. Read more about assessment criteria at the University of Oulu webpage.

Grading:
Project work pass/fail. Numerical grading 1-5 for exam. Final grading is based on exam.

Person responsible:
Antti Mäntyniemi

521286A: Computer Systems, 8 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Computer Science and Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Teemu Leppänen
Opintokohteen kielet: Finnish
Leikkaavuudet:
  521142A Embedded Systems Programming  5.0 op

ECTS Credits:
8

Language of instruction:
Lecturing in Finnish, course and exercise material available in English.

Timing:
Autumn, periods 1-2.

Learning outcomes:
1. Student understands the basic computer architecture and organization.

2. Student understands CPU operation and datapath in general.

3. Student knows different number systems and data representations in computers.

4. Student is familiar of I/O operation with peripheral devices in general.

5. Student is able to implement small programs with the C programming language for general-purpose computers for embedded systems.

6. Student recognizes how embedded systems programming is different from programming general-purpose computers.

Contents:
Yleinen tietokoneen organisaatio ja arkkitehtuuri, keskusyksikkö, muistihierarkia ja muistinhallinta, tietotyypit, laiterekisterit ja I/O, yleinen tietokoneen ohjelmointi ja laiteläheisen ohjelmointi, C-kielen perusteet.

Mode of delivery:
Web-based and face-to-face teaching.

Learning activities and teaching methods:
Lectures (40h), course exercises (20h), laboratory exercise (3h) and course projects in groups.
Target group:
2nd year students of computer science and engineering and 3rd year students of electrical engineering.

Prerequisites and co-requisites:
Elementary programming 521141P.

Recommended optional programme components:
The course is an independent entity and does not require additional studies carried out at the same time.

Recommended or required reading:
Course material will be announced at the beginning of the course.

Assessment methods and criteria:
Students complete the course exercises after lectures, participate to the laboratory exercise and complete the course projects in groups. Assessment is based on the exercises and the course projects. More detailed information on assessment will be announced at the beginning of the course. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

521329A: Hands-on Course in Wireless Communication, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Electrical Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Kari Heikki Antero Kärkkäinen
Opintokohteen kielet: Finnish
Leikkaavuudet:

521316A  Broadband Communications Systems  4.0 op

ECTS Credits:
5

Language of instruction:
Finnish

Timing:
The course is held in the autumn semester, during first period. It is recommended to complete the course at the 2nd autumn semester.

Learning outcomes:
1. has become acquainted with wireless communication technologies with the aid of small laboratory measurement works, which do not require prior courses on telecommunication engineering.

2. has observed and learned the operation principles, properties and limitations of existing wireless communication systems.

3. has learned how to use measurement techniques and methods with the aid of modern measurement instruments in laboratory environment.
4. knows how to approach different kinds of wireless communication problems by utilizing hands-on engineering work practices.

Contents:
Students are introduced to the wireless communication systems and corresponding phenomena with the aid of guided laboratory exercises. The course utilizes within reasonable limits various existing wireless communication systems, in order to create simple connections between various equipments and modules in a laboratory environment.

Mode of delivery:
Face-to-face teaching and guided laboratory exercises. Self-studying at home between work themes. Writing of final report.

Learning activities and teaching methods:
Course consist of few small separate measurement problems dealing with wireless transmission. Before each work theme relevant theory and work instructions needed to complete the work are given. Students will participate in briefing lectures (appr. 2 h/theme) which introduce the theory needed to conduct each laboratory work problem. In addition, instructions to perform the work are given. After each lecture students will move to a measurement laboratory, and will study a given problem with the aid of measuring instruments in a laboratory environment under teacher's guidance. Work subjects are done within a group of several students, and measurement results are summarized in a written final report. Course contains face-to-face teaching and guided laboratory work among themes, and self-study between work themes. For the end, students perform discussion and reporting of results. Final exam is not arranged.

Target group:
Second year bachelor level electrical engineering students.

Prerequisites and co-requisites:
No prerequisites.

Recommended optional programme components:
The course is an independent entity and does not require additional studies carried out at the same time.

Recommended or required reading:
No course book. Lecture slides, and problem assignments together with work instruction available. Materials will be placed into TTK-OPTIMA environment during the course.

Assessment methods and criteria:
All students of a group will participate in introductory face-to-face teaching and will prepare a final report according teacher’s instructions. Participation in all introductory lectures and laboratory exercises is mandatory for all members of a group. In addition, final report has to be in form required by a course teacher, and the content has to be satisfying from acceptance standpoint. Read more about assessment criteria at the University of Oulu webpage.

Grading:
Work grading accepted/rejected. No numerical grading.

Person responsible:
Kari Kärkkäinen

Working life cooperation:
No

521457A: Software Engineering, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Computer Science and Engineering DP
Arvostelu: 1 - 5, pass, fail
Opettajat: Juha Röning
Opintokohteen kielet: English
Leikkaavuudet:
ECTS Credits:
5

Language of instruction:
Finnish. Material available in English.

Timing:
Spring, periods 3.

Learning outcomes:
After finishing the course, the student knows the basic concepts of software and real-time systems, the different areas of project management, the phases of software development and the goals and tasks of them,
is able to use structural methods for defining systems and knows the principles of object-oriented
design and analysis.
After the course, the student has basic knowledge of utilizing software tools for structural analysis
and design.

Contents:
Problematics of software development and the special features of real-time systems in this regard.
Software development is viewed in regard to project management and actual implementation: 1.
process models, 2. requirements specification, 3. project management basics: design, metrics, risk
management, resource management, follow up, quality control, product control, 4. software testing
methods and strategies, 5. introduction to object-oriented analysis and design. 6. Agile software
development.

Mode of delivery:
Face-to-face.

Learning activities and teaching methods:
The course consists of lectures and a laboratory design exercise. The course is completed by a final
exam and a successfully completed exercise. Lectures 30 h, laboratory design (in period 3) 12 h, the
rest of the self-study.

Target group:
Computer Science and Engineering students and other Students of the University of Oulu.

Prerequisites and co-requisites:
521141P Elementary Programming, 521286A Computer Systems or 521142A Embedded Systems
Programming.

Recommended optional programme components:
The course is an independent entity and does not require additional studies carried out at the same
time.

Recommended or required reading:
chapters 1-11, 13-14 and 21-27. Older editions (4th and 5th) can also be used as a reference. In this
case the lectures are based on chapters 1-20.

Assessment methods and criteria:
Final exam and accepted laboratory exercise.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Juha Röning

Electives

H440127: Module Preparing for the Major, Environmental Engineering, 40 op

Compulsory

477011P: Introduction to Process and Environmental Engineering I, 5 op

Learning outcomes:
The objective of this course is to give insight to the whole perspective of process and environmental engineering and to familiarise the students with the terminology involved. In addition, the objective is also to outline the connections between process and environmental engineering and other fields closely related to them.

After the course, the student can analyse the process and environmental engineering aspects of an industrial process. He/She can, for example, divide the process into unit processes, analyse the process or a chain of processes based on the material balances, identify and evaluate the significance of essential mechanical, chemical and transport phenomena, analyse the control and process design aspects of a process etc. He/She can also evaluate the significance of different aspects of process and environmental engineering to the overall production system when these aspects are further examined in forthcoming courses.
Contents:

Mode of delivery:
Group work and contact lectures supporting those

Learning activities and teaching methods:
Assignments (8 altogether) carried out in small groups and contact lectures supporting them (16 hours)

Target group:
Bachelor’s degree students in the study fields of process and environmental engineering

Prerequisites and co-requisites:
None

Recommended optional programme components:
The course serves as an introduction to the studies in process and environmental engineering

Recommended or required reading:
The material is provided during the contact lectures and through the course webpages. It is also expected that the students seek material for completing the assignments independently.

Assessment methods and criteria:
The assignments (altogether 8) covering the course themes carried out in small groups. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilises a numerical grading scale 1-5 and fail.

Person responsible:
Dr Aki Sorsa

Working life cooperation:
No

Other information:
The assessment method utilized requires the active attendance to the group work and contact lectures from the beginning of the course

477201A: Material and Energy Balances, 5 op

Voimassaolo: 01.08.2005 - 31.12.2019
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Tiina Leiviskä
Opintokohteen kielet: Finnish
Leikkaavuudet:

ECTS Credits:
5 ECTS /133 hours of work

Language of instruction:
Finnish. The course can be completed in English as a book examination.

Timing:
Autumn period 1
Learning outcomes:
The student is able to formulate material and energy balances for a process by taking into account the restrictions set by reaction stoichiometry. The student knows how the created mathematical formulation can be exploited in process consideration.

Contents:
Formulation of material and energy balances by taking into account the effects of chemical reactions.

Mode of delivery:
Lectures and group exercise

Learning activities and teaching methods:
Lectures 40h, group work 10h and self-study 80h

Target group:
Bachelor students in of Process or Environmental Engineering

Prerequisites and co-requisites:
Basics from the course Introduction to Process Engineering

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
During the course, there are two intermediate exams and both of them must be passed. Alternatively student can participate in final exam after the course. In addition to this, the students will be making a group exercise, which will be evaluated.
Read more about the course assessment and grading systems of the University of Oulu at www.oulu.fi/english/studying/assessment

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Dr Tiina Leiviskä

Working life cooperation:

Other information:
-

477401A: Thermodynamic Equilibria, 5 op

Voimassaolo: 01.08.2005 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysiksikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Eetu-Pekka Heikkinen
Opintokohteen kielet: Finnish
Leikkaavuudet:
  470611A  Metallurgy Processes  7.0 op

ECTS Credits:
5 cr / 135 hours of work

Language of instruction:
Available only in Finnish
Timing:
The course is given in the autumn semester, during period II. It is recommended to complete the course at the 2nd year of Bachelor's studies.

Learning outcomes:
Student is capable of defining chemical equilibria of the systems that are related to industrial processes and understands the relevance of equilibria (and their computational determination) as a part of process analysis, planning and control. Additionally, (s)he can define a meaningful system to be considered in computation thermodynamics; i.e. (s)he can create a computationally solvable problem based on technical problem that in itself is not solvable computationally.

Contents:
Concepts of enthalpy (H), entropy (S) and Gibbs free energy (G). The effect of temperature and pressure on H, S and G. Chemical and phase equilibria. Activity and activity coefficient. Calculation of thermodynamic equilibria using equilibrium constant as well as Gibbs free energy minimisation.

Mode of delivery:
Classroom education

Learning activities and teaching methods:
Lectures, software exercise as well as other exercises. Available only in Finnish.

Target group:
Students of process and environmental engineering

Prerequisites and co-requisites:
'Basic Principles in Chemistry' and 'Material and Energy Balances' as prerequisites

Recommended optional programme components:
This is one of the courses in which physical chemistry is used in the applications of process and environmental engineering. It is part of a education that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.

Recommended or required reading:
Material will be distributed during lectures and exercises.

Assessment methods and criteria:
Students are required to make a portfolio consisting of a learning diary and exercises. Please note that the course is organised only in Finnish. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
University Lecturer Eetu-Pekka Heikkinen

Working life cooperation:
No

Other information:
It is highly recommended that the students are present already in the first lecture, since it is not possible to come along after the course has already begun. Course webpage (in Finnish): http://www.oulu.fi/pyomet/477401a.
Leikkaavuudet:
488011P Introduction to Environmental Engineering 5.0 op
477012P Introduction to Automation Engineering 5.0 op

ECTS Credits:
5 cr / 135 hours of work

Language of instruction:
Available only in Finnish

Timing:
The course is given in the spring semester, during periods III and IV. It is recommended to complete the course at the 1st spring semester.

Learning outcomes:
Students can examine industrial processes using the methods and perspectives of process and environmental engineering (e.g. material management, phenomenon-based considerations and automation) and they recognize the role of different areas of the process and environmental engineering, when these areas are considered in the forthcoming courses.

Contents:

Mode of delivery:
Classroom education

Learning activities and teaching methods:
Group exercises and contact-education (14 h) that supports these exercises. Available only in Finnish.

Target group:
Students of process and environmental engineering

Prerequisites and co-requisites:
None

Recommended optional programme components:
This course is an introduction to the other courses of process and environmental engineering

Recommended or required reading:
Material will be distributed during lectures and via course www-site

Assessment methods and criteria:
Group exercises. Please note that the course is not available in English, but only in Finnish. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Timo Fabritius

Working life cooperation:
No

Other information:
It is highly recommended that the students are present already in the first lecture, since it is not possible to come along after the course has already begun.

477051A: Automation Engineering, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Aki Sorsa, Hiltunen, Jukka Antero
Opintokohteen kielet: Finnish
Leikkaavuudet:

ECTS Credits:
5 ECTS /133 h of work
Language of instruction:
Finnish
Timing:
Autumn, period 1
Learning outcomes:
Students learn how to use PI diagrams, field instruments, automation systems and PLCs in design, implementation and commissioning projects. Students can configure and program the basic automation functions in DCSs and PLCs.
Contents:
The operational and structural descriptions and concepts of process automation, automation commissioning projects, PI diagrams and field devices, configuration tools for automation functions, logic programming, telecommunication technology in automation, field buses, examples of commercial DCSs, PLCs and field bus systems.
Mode of delivery:
Face-to-face teaching
Learning activities and teaching methods:
Lectures, demonstrations, configuration and logic programming exercises, excursion to a neighbouring industrial plant
Target group:
B.Sc. students in process and environmental engineering
Prerequisites and co-requisites:
477011P Introduction to process and environmental engineering I and 448010P Introduction to process and environmental engineering II are recommended
Recommended optional programme components:
-
Recommended or required reading:
Lecture notes and handouts, manuals/handbooks
Assessment methods and criteria:
Learning diary or examination
Grading:
Numerical grading scale 1-5 or fail
Person responsible:
Jukka Hiltunen and Aki Sorsa

ECTS Credits:
5 ECTS / 133 hours of work

Language of instruction:
Finnish, can be completed in English as a book examination

Timing:
Implementation in autumn semester during 1st period. It is recommended to complete the course at the third (Bachelor's) autumn semester.

Learning outcomes:
After passing the course the student knows what happens when heat is transferred by conduction, convection and radiation. The student can describe energy transfer with differential energy balances connected with momentum balances; In macro scale the student is able to solve practical heat transfer problems by correlating heat transfer coefficients to dimensionless flow and material characteristics; With the help of these transfer coefficients the student is capable of estimating the size of heat transfer equipment, especially heat exchangers and select the most suitable and profitable types; and to Sketch large heat nets and to diminish the costs of the equipments. The student is able to use the pinch method which optimises the number of heat exchangers and total energy consumption. He/she is also able to apply the exergy principle to make work from thermal energy. With the aid of this principle he/she will be able to divide the costs of the used energy in right proportion based on the processing stage. He/she student is able to explain diffusion as a phenomenon and the factors affecting it. He/she is able to model mass transfer in simple systems by using the theory of Fick. The student is capable of modeling diffusion by differential mass balances. He/she recognises the special features of mass transfer in turbulent systems and the role of different transport phenomena in mass transfer equipment. He/she has rudimentary practical skills applicable to the scale-up of the equipment used for absorption.

Contents:

Mode of delivery:
Face-to-face teaching in Finnish. Book examination possible in English.

Learning activities and teaching methods:
Lectures 45 h, homework 15 h and self-study 73 h. For foreign students written examination based on given literature.

Target group:
Bachelor's degree students of process and environmental engineering.

Prerequisites and co-requisites:
Knowledge of solving differential equations.

Recommended optional programme components:
The course is part of a stream that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.
Recommended or required reading:
(Will be announced later)

Assessment methods and criteria:
This course utilizes continuous assessment. During the course there are 5 intermediate exams. The course can also be completed by final examination.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
University teacher Kaisu Ainasssaari

477304A: Separation Processes, 5 op

Voimassaolo: 01.08.2005 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Process and Environmental Engineering
Arvostelu: 1 - 5, pass, fail
Opettajat: Ainasssaari, Kaisu Maritta, Muurinen, Esa Ilmari
Opintokohteen kielet: Finnish
Leikkaavuudet: 470323A Separation Processes 5.0 op

ECTS Credits:
5 ECTS / 133 hours of work.

Language of instruction:
Finnish, can be completed in English as a book examination.

Timing:
Implementation in autumn semester during 2nd periods. It is recommended to complete the course on the third (Bachelor's) autumn semester.

Learning outcomes:
After the course the student is able to define the position of separation processes based on mass transfer in process and environmental engineering. He/she is capable of solving phase equilibrium problems in multistage separations for binary mixtures. The student is able to explain the phenomena behind the following separation processes: distillation, absorption, stripping, liquid-liquid extraction, supercritical extraction, crystallisation, adsorption, chromatography separation, membrane separations, and reactive separations. He/she recognises the equipment used for these processes and is able to compare the methods to each other with heuristic rules.

Contents:
Separation processes based on mass transfer in process and environmental engineering. Phase equilibrium problems in multistage separations for binary mixtures. Phenomena behind the following separation processes: distillation, absorption, stripping, liquid-liquid extraction, supercritical extraction, crystallisation, adsorption, chromatography separation, membrane separations, and reactive separations. Equipment used for these processes and is able to compare the methods to each other with heuristic rules, etc.

Mode of delivery:
Face-to-face teaching in Finnish. Book examination possible in English.

Learning activities and teaching methods:
Lectures 40 h, exercises 20 h, homework 15 h and self-study 58 h. For foreign students written examination based on given literature and homework.

**Target group:**
Bachelor's degree students of process and environmental engineering.

**Prerequisites and co-requisites:**
Courses 477301A Momentum Transfer, 477302A Heat Transfer and 477303A Mass Transfer or 477052A Fluid Mechanics and 477312A Heat and Mass Transfer are recommended beforehand.

**Recommended optional programme components:**
This is one of the courses in which physical chemistry is used in the applications of process and environmental engineering. It is part of a stream that aims at skills needed in the phenomenon-based modelling and planning of industrial processes.

**Recommended or required reading:**

**Assessment methods and criteria:**
Homework assignments affect the course grade. Examination. The course can be completed with two intermediate exams or one final exam. Homework assignments affect the course grade. **Timing:**
Implementation in spring semester during 3rd period. It is recommended to complete the course at the second (Bachelor's) spring semester.

**Learning outcomes:**
After the course the student is able to determine the viscosity of pure substances and mixtures and to estimate the effect of temperature and pressure on viscosity. The student is able to recognise the interactions between a solid body and flowing fluid and to distinguish the forces, their directions and to calculate their magnitudes. The student is able to formulate momentum balance equations and to
solve these in order to calculate velocity distribution, flow rate and pressure drop. The student is able to distinguish laminar and turbulent flow regimes from others and is able to use the correct equations according to flow regime. After the course the student is able to design pipelines and other simple flow mechanical process equipment.

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: Finnish

ECTS Credits:
8 ECTS credits.

Language of instruction:
Finnish. The thesis can also be written in English.

Timing:
Periods 1-4.

Learning outcomes:
Upon completion of the course the student should be able to solve small problems in organizations independently. The student can create a research plan, and define a research problem and research questions. The student is able to manage his own work according to the research plan. The student can also utilize different information sources and critically evaluate the information obtained. The student can create a written report according to the instructions.

Contents:
The research topics are presented in the bachelor’s thesis seminar.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Self-study 216 h. The student defines the research topic in co-operation with the instructor. The thesis can be a theoretical or empirical study.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
900061A Scientific Communication for Industrial Engineering and Management, 555201A Internship.

Recommended optional programme components:
The students will complete 555203A Bachelor’s thesis seminar simultaneously.

Recommended or required reading:
-

Assessment methods and criteria:
This course includes writing a 25-page thesis.

Grading:
Pass-Fail

Person responsible:
Tutor teachers.
555201A: Bachelor’s Thesis Seminar, 2 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Hanna Kropsu-Vehkaperä
Opintokohteen kielet: Finnish

ECTS Credits: 2 ECTS credits.

Language of instruction: Finnish. English material is also used.

Timing:
The course is organized in the autumn and spring semester.

Learning outcomes:
Upon completion of the seminar, student is able to set and define research problem and objectives, conduct a minor empirical research through selected research methods or conduct a literature review and write an academic report. Student is also able to evaluate and review academic reports and act as an opponent.

Contents:
Information retrieval for the research, conduct research in practice, scientific writing, acting as an opponent

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 12 h, self-study 42 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
900061A Scientific Communication for Industrial Engineering and Management, 555201A Internship.

Recommended optional programme components:
The students will complete 030005P Information Skills and 555200A Bachelor’s Thesis simultaneously.

Recommended or required reading:
The materials will be defined at the beginning of the course.

Assessment methods and criteria:
Active participation in the seminar, presenting one’s own bachelor’s thesis, and acting as an opponent in the seminar.

Grading:
Pass-Fail.

Person responsible:
MSc. Harri Kaikkonen

Working life cooperation:
No.

555225P: Basics of industrial engineering and management, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: Finnish
Leikkaavuudet:

ay555225P Basics of industrial engineering and management (OPEN UNI) 5.0 op
555221P Introduction to Production 2.0 op
555220P Basic Course in Industrial Engineering and Management 3.0 op

Language of instruction:
Finnish. English material is also used.

Timing:
Periods 1-2.

Learning outcomes:
Upon completion of the course the student should be able to describe what operations management means. The student can explain the core concepts of business operations and utilize these concepts in describing and analyzing organizational operations. In addition, he/she can explain in general terms the factors that affect economic performance of organizations. The student is able to utilize the terminology
used in operations management, describe the financial processes of companies and based on this describe the use of cost accounting in organizational decision-making. The student can also calculate unit costs in various simplified settings, calculate various alternatives, as well as perform planning and goal oriented calculations based on given data, and draw conclusions based on the calculation results.

Contents:
Operations and productivity, operations strategy, forecasting, cost accounting, investments, sustainability, capacity management, location decisions, layout strategies, human resources management, supply chain management, subcontracting, inventory management, production planning, MRP & ERP, production scheduling, Just-in-Time & Lean operations, maintenance.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Web-based lectures 20 h / exercises 18 h / self-study 96 h.

Target group:
: Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
No prerequisites exist.

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555285A Project management, 555242A Product development, 555264P Managing well-being and quality of working life, and 555286A Process and quality management.

Recommended or required reading:

Assessment methods and criteria:
This course utilizes continuous assessment. During the course, there are nine mandatory weekly assignments. At least half of the assignments must be passed.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes courses 555220P Basic Course in Industrial Engineering and Management 3 ECTS cr and 555221P Introduction to Production 2 ECTS cr.

555285A: Project management, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Kirsi Aaltonen
Opintokohteen kielet: Finnish
Leikkaavuudet:

555288A Project Management 5.0 op
ay555285A Project management (OPEN UNI) 5.0 op
555282A Project Management 4.0 op
555280P Basic Course of Project Management 2.0 op
ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material may also be used.

Timing:
Period 1.

Learning outcomes:
The objective of the course is to familiarise the student with the basics and the basic methods of project management. Upon completion the student can explain the essential concepts related to project management. He/she can present the main features of a project plan and can use different methods of partitioning a project. The student can also schedule a project and estimate its costs. The student can explain the terms related to Earned value method and can apply the method on simple tasks. Upon completion the student recognizes the essential tasks of project risk management.

Contents:
Defining project management, project planning, organising and scope management, schedule management, cost management, earned value calculation and project risk management, project stakeholder management.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures or web-based lectures 16h, self-study 118h

Target group:
Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
No prerequisites exist.

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555225P Basics of industrial engineering and management, 555242A Product development, 555264P Managing well-being and quality of working life, and 555286A Process and quality management.

Recommended or required reading:
Lecture material, exercise book, Artto, Martinsuo & Kujala 2006. Projektiliiketoiminta. WSOY

Assessment methods and criteria:
The course includes three mandatory assignments, exercise book and exam. The course grading is based on the exam. Well completed assignments and exercise book may raise grading.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Jaakko Kujala.
Working life cooperation:
No.

Other information:
Substitutes courses 555280P Basic Course of Project Management + 555282A Project Management.

555226A: Operations and supply chain management, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: English
Leikkaavuudet:
555222A Demonstration in Industrial Engineering and Management 2.0 op
555223A Introduction to Production Control 3.0 op

ECTS Credits:
5 ECTS credits

Language of instruction:
English.

Timing:
Periods 1-2.

Learning outcomes:
Upon completion of the course the student should be able to describe different production types. He/she can apply different forecasting methods, plan needed production capacity, and apply location and transportation decisions related methods. The student can master common inventory management methods and aggregated and short-term scheduling. The student can also create a sales and operations plan for a company.

Contents:
Production types, forecasting methods, capacity planning and queuing models, location and transportation decisions, inventory management systems, aggregate scheduling, MRP & ERP, short-term scheduling, linear programming.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures 20 h / self-study (web-based exercises) 60 h / group work 54 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
555225P Basics of industrial engineering and management or similar knowledge.

Recommended optional programme components:
Industrial Engineering and Management students will complete 902143Y English course simultaneously.

Recommended or required reading:
Assessment methods and criteria:
This course utilizes continuous assessment. During the course, there are mandatory weekly assignments. At least half of the assignments must be passed. 40 % of the grade is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes course 555222A Demonstration in Industrial Engineering and Management 2 ECTS cr and 555223A Introduction to Production Control 3 ECTS cr.
Course name from 1.8.2017 is 'Operations and Supply Chain Management'.

555264P: Managing well-being and quality of working life, 5 op

Voimassaolo: 01.01.2014 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuyksikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Leikkaavuudet:
ay555264P  Managing well-being and quality of working life (OPEN UNI)  5.0 op
555261A  Basic Course in Occupational Psychology  3.0 op
555262A  Usability and Safety in Product Development  3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish.

Timing:
Periods 3-4.

Learning outcomes:
After the course the student is capable of using the central concepts related to well-being at work, can set targets for it, and is able to choose appropriate methods from the management and personal career point of views. Furthermore, the student is able to develop well-being at work in the contexts of labour legislation, good practices, productivity, occupational safety expertise, management and human resources. The student can utilise basic knowledge, search for more information and knows the key players in the field. Also, the student knows the key sources of information, typical goal-setting and management practices and the methods for assessing the performance of an individual employee, supervisor, company and entrepreneur. The student can assess the impact of well-being at work from the economic perspective, especially in cases of work ability, occupational health, job satisfaction, occupational safety, productivity and the overall quality of working life. The student knows essential national and international regulation and strategic goal setting practices, good practices of the case companies, current trends, and methods in research. In brief, the focus of the course is to learn key factors for guaranteeing successful contribution of humans in issues of production.

Contents:
The course gives the student a vision of building sustainable, productive and satisfactory career for the work community he/she leads - and for himself/herself as an employee or a supervisor. The contents cover
the whole area of basic quality issues of working life analysing them in the following framework "Well-being at work means safe, healthy, and productive work in a well-led organisation by competent workers and work communities who see their job as meaningful and rewarding, and see work as a factor that supports their life management".

**Mode of delivery:**
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

**Learning activities and teaching methods:**
- Lectures 22 h / self-study 100 h / group work & exercises 12 h.

**Target group:**
Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

**Prerequisites and co-requisites:**
No prerequisites exist.

**Recommended optional programme components:**
This course is part of the 25 ECTS module of Industrial Engineering and Management that also includes 555225P Basics of industrial engineering and management, 555285P Project Management, 555242A Product development, and 555286A Process and quality management.

**Recommended or required reading:**
Essential background information can is available from Arnold, J. et al. (2010), Work Psychology; Understanding Human Behaviour in the Workplace. 5th Edition. Financial Times/Prentice Hall. Other literature will be informed during the course.

**Assessment methods and criteria:**
This course utilizes continuous assessment including exercises during the lectures (weight 20 %), seminar work (weight 30 %) and examination (weight 50 %).

**Grading:**
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
Professor Seppo Väyrynen

**Working life cooperation:**
No.

**Other information:**
Lecturers: Seppo Väyrynen and Henri Jounila along with visiting lecturers and exercise supervisors. Substitutes courses 555261A Basic Course in Occupational Psychology + 555262A Usability and Safety in Product Development.

**555242A: Product development, 5 op**

- **Opintokohteen kielet:** English
- **Leikkaavuudet:**
ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 1.

Learning outcomes:
This course introduces product development and innovations management in a company environment. The course provides fundamental understanding over tools and frameworks that can be used for analysing and managing products, innovations, and technology development. The aim is to create a connection between product development and other company functions. Upon completion of the course a student is capable of explaining the role of product development as a company function. The student understands the difference between innovation activities and systematic product development, and knows the difference between different phases of product development process and its activities. Student learns how to transform customer needs into requirements for product development process and finally into product features. Additionally, the student is able to define the meaning of other company functions to product development activities.

Contents:
Meaning of products for the operations of an industrial enterprise, product development paradigm and defining relevant concepts, realising product development methodologically (U&E model, Cooper's stage-gate model, QFD), managing innovations, and product development success factors.

Mode of delivery:
The tuition will be implemented as blended teaching.

Learning activities and teaching methods:
Lectures 20 h / exercises 6 h / group work and self-study 108 h.

Target group:
Industrial Engineering and Management students and other students taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
555226A Operations and production.

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555225P Basics of industrial engineering and management, 555285A Project management, 555264P Managing well-being and quality of working life, and 555286A Process and quality management.

Recommended or required reading:

Assessment methods and criteria:
Assignment and final exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail..

Person responsible:
Professor Harri Haapasalo.

Working life cooperation:
No.

Other information:
Substitutes course 555240A Basic Course in Product Development.

555286A: Process and quality management, 5 op

Voimassaolo: 01.01.2014 -

555281A Basic Course of Quality Management 5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish.

Timing:
Period 4.

Learning outcomes:
Upon completion the student is able to explain the role of process and quality management in a business organization. The student is capable of developing business processes based on the principles of quality management and appropriate tools.

Contents:
Foundations of total quality management, planning of quality, performance measurement, process management, people management in relation to quality management, implantation of total quality management.

Mode of delivery:
The tuition will be implemented as face-to-face teaching (integrated classroom lectures and exercises).

Learning activities and teaching methods:
20 h lectures, 114 h independent study including tutored group work.

Target group:
Industrial Engineering and Management students and other students studying Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
-

Recommended optional programme components:
This course is part of the 25 ECTS module of Industrial engineering and management that also includes 555225P Basics of industrial engineering and management, 555285A Project management, 555242A Product development, and 555264P Managing well-being and quality of working life.

**Recommended or required reading:**

**Assessment methods and criteria:**
To pass the course, the student must pass the course exam and complete the classroom exercises and the group work. The course grade is calculated based on the exam and group work grades.

**Grading:**
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Person responsible:**
Osmo Kauppila.

**Working life cooperation:**
No.

**ECTS Credits:**
5 ECTS credits.

**Language of instruction:**
English
Timing:
Period 1.

Learning outcomes:
Upon completion of the course the student understands the key concepts of general management. After completing the course the student knows the historical developments in the management thought. The student has an understanding about the qualifications of a manager in a modern organization. The student understands the principles of the managerial decision making. The student can distinguish between the terms management and leadership. The student has an understanding about good managerial practices.

Contents:
Managers and Managing, The Evolution of Management Thought, Values, Attitudes, Emotions, and Culture: The Manager as a Person, Ethics and Social Responsibility, Managing Diverse Employees in a Multicultural Environment, Decision Making, The Manager as a Planner and Strategist, Managing Organizational Structure and Culture, Organizational Control and Change, Motivation and Performance, Leadership, Effective Groups and Teams, Promoting Effective Communication, Managing Conflict, Politics, and Negotiation.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and a supervised group work).

Learning activities and teaching methods:
Lectures 10 h, case examples 10 h, self-study 115 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
The assessment is based on the exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Pekka Kess

Working life cooperation:

555314S: Management Information Systems, 5 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: English

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Periods 3 - 4.

Learning outcomes:
Upon completion of the course, the student can explain the key concepts of management information systems. The student is familiar with the significance of information and information management in modern business process management. The student can define the information needs of management processes and understands how information systems can meet these needs. After completing the course, the student is aware of the current trends in management information systems technologies and practices. After the course, the student has readiness to participate for enterprise information system designing, purchasing, and development tasks as a role of industrial engineer/process developer. During the course, the students will also develop their skills in reflective, self-directing learning. A student is able to find the relevant information sources related to MIS.

Contents:
Key concepts: what is management information systems (MIS), managerial information, different types of MIS applications.
Information systems in decision making and leadership, the effects of information technology in business processes.
Current trends in management information systems technologies and practices.
Structure of information systems, data governance models, principles of data management and IT architecture.
Special characteristics of ICT project management (procurement and implementation).
Company examples about MIS in practice.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 18 h, self-study, learning diary and group work 117 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent, 555313S Management.

Recommended optional programme components:
-

Recommended or required reading:
Lecture materials. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
Learning diary and project work (group assignment). The course grading is based on the learning diary and the project work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Hanna Kropsu-Vehkaperä.

Working life cooperation:
No.

Other information:
Substitutes the course 555344S Management Information Systems.

Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used.

Timing:
Periods 1-4.

Learning outcomes:
Upon completion the student knows scientific process and different research methods. The student can select an appropriate method for his/her master's thesis work. The student can evaluate validity of research work and provide constructive criticism. The student can report research findings in the form of academic research report and participate in academic discussion.

Contents:
Research approach, qualitative and quantitative research methods, structure of research report, evaluating validity of research, constructive criticism and participation in scientific discussion.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 18h, self-study 116h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
Research report is based on research work student is doing for his/her master’s thesis work

Recommended or required reading:
Lecture material. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
The course includes lectures/seminars and active participation in discussion, presentation of own research work, providing constructive feedback on ongoing research work, evaluation of two completed M.Sc. thesis, and report written in article format of own master’s thesis research work.

Grading:
The course utilizes verbal grading “Pass/Fail”.

**Person responsible:**
Professor Jaakko Kujala.

**Working life cooperation:**
No.

**Other information:**
Seminars will include separate lectures about research approach, qualitative research methods and quantitative research methods. These lectures are recommended to be completed before starting own research work for master’s thesis. Participation in these three lectures is mandatory to participate in the course and they are lectured two times a year.

Assessment methods and criteria:
Exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Harri Haapasalo.

Working life cooperation:
No.

Other information:
Substitutes course 555340S Technology Management.
Course name from 1.8.2017 is 'Research and Technology Management'

555343S: Product Data and product life cycle management, 5 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuyksikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Arto Tolonen
Opintokohteen kielet: English
Voidaan suorittaa useasti: Kyllä

Status:
5 ECTS credits.

ECTS Credits:
English.

Language of instruction:
Period 3-4.

Timing:
The course familiarizes a student with the product processes of an enterprise and specifically the meaning of product data in different stages of product process. After finishing the course, a student knows what product data is and how it can be used for business purpose. A student is familiar with the basic concepts of product data management (PDM) and is aware of the basic tools used for PDM. After finishing the course, a student will be able to analyze existing and future products from product structure viewpoint. Students will be able to analyze the company's product data management as a whole and to give suggestions based their analysis.

Learning outcomes:
Product information management concepts, its history and challenges, PDM-processes: managing product models, managing documents and configurations as well as tracing information, PDM-system and its functions, PDM-project and implementation of the system.

Contents:
The tuition will be implemented as face-to-face teaching.

Mode of delivery:
Lectures 16 h / group work and self-study 118 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
555242 Product development.

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
Group work report and exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Harri Haapasalo.

Working life cooperation:
No.

Other information:
Course name from 1.8.2017 is 'Product Data and Product Life Cycle Management'

555346S: Product portfolio management, 5 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Arto Tolonen
Opintokohteen kielet: English
Voidaan suorittaa useasti: Kyllä

Required proficiency level:

ECTS Credits:
5 ECTS credits.
Language of instruction:
English.

Timing:
Periods 3-4.

Learning outcomes:
The course familiarizes students with the broad concepts of product management. After finishing the course, the student understands central principles and contents of product management and product portfolio management. Student knows the basic steps of the product portfolio management development and understands the ways to analyse and manage products and product portfolios. A student learns to see product and product portfolio management as strategic targets, performance indicators, governance models, process and product information management over horizontal and technical portfolios over product life cycle phases and product structure levels. The student can apply the learned things and methods in different industries in order to develop systematic product and product portfolio management processes.

Contents:
Basic issues in product and product portfolio management performance management, governance models, horizontal and vertical portfolios, processes, tools and product information.

Mode of delivery:
The tuition will be implemented as face-to-face learning and practical assignments.

Learning activities and teaching methods:
Will be defined at the beginning of the course.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
555242A Product development, 555350S Technology management.

Recommended optional programme components:
-

Recommended or required reading:
Will be defined at the beginning of the course.

Assessment methods and criteria:
Will be defined at the beginning of the course.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Dr Arto Tolonen.

Working life cooperation:
No.

Other information:
Course name from 1.8.2017 is ‘Product Portfolio Management’

Leikkaavuudet:

555345S Advanced Course in Product Development 6.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 2.

Learning outcomes:
Upon completion of the course the student understands the objectives of requirements engineering in order to develop sustainable products. The course familiarizes the student to requirements engineering process and its key activities. After finishing the course, the student will be able to analyze requirements engineering in product development processes. The student knows Design for Excellence (DfX) practice. The student can recognize different stakeholder specific requirements and their diversity.

Contents:
The concepts of requirements management, requirements engineering process, requirement prioritization and valuation, Design for Excellence (DfX), different stakeholders and their requirements for product development.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 20 h / group work and self-study 114 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
555242A Product development, 555350S Technology management.

Recommended optional programme components:
-

Recommended or required reading:
Will be defined at the beginning of the course.

Assessment methods and criteria:
Group work, exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail..

Person responsible:

</table>

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material will also be used.

Timing:
Period 2

Learning outcomes:
The course familiarizes a student with the overall concept of sourcing management. After completing the course student knows the key concepts of sourcing and purchase management and can explain these. The student can describe the structures of sourcing and purchasing organizations and can explain the meaning of sourcing management in the performance of operations. The student can analyze the purchasing activities in a company and can produce improvement proposals based on the analysis. After the course the student can take part in the sourcing development in the role of an expert.

Contents:
Purchasing operations in a manufacturing company, the principles of the sourcing and purchasing strategy and practices, suppliers and products, IT systems for sourcing and purchase.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and a supervised group work).

Learning activities and teaching methods:
Lectures 10 h, assignment guidance 10 h, group work 115 hrs.

Target group:
Industrial Engineering Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Lecture notes. Other material will be defined at the beginning of the course.

Assessment methods and criteria:
The assessment is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Pekka Kess

Working life cooperation:
No.

Other information:
Substitutes course 555323S Sourcing Management.

555331S: Advanced Supply Chain Management, 5 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: Finnish
Leikkaavuudet:
  555324S  Advanced Supply Chain Management  3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used.

Timing:
Periods 3-4.
Learning outcomes:
Upon completion of the course the student should be able to define supply chain management concepts, describe supply chain structures, and explain the importance of effective supply chain management. He/she can analyze supply chain operations and propose development areas based on the analysis. After the course, the student can act in an expert role in supply chain development.

Contents:
Supply chain management concepts, supply chain structures, effectiveness of supply chain, supply chain analysis and development.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures 8 h / exercises 4 h / group work 68 h / self-study 54 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Sakki, J. (2009) Tilaus-toimitusketjun hallinta. Jouni Sakki Oy. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
The grade will be based on the group work (60 % of the grade) and book examination (40 % of the grade).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes course 555324S Advanced Supply Chain Management.

555332S: Operations Research, 5 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Osmo Kauppila
Opintokohteen kielet: Finnish
Leikkaavuudet:
555342S  Operations Research  5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used.

Timing:
Period 4.

Learning outcomes:
Upon completion of the course the student knows the basic concepts of operations research and its applications in operations and production activities and decision-making in companies. The student is capable of applying quantitative methods typical to the field of operations research in practical problem solving.

Contents:
What is operations research, linear and dynamic programming, network and transportation algorithms, decision analysis, inventory models, queueing systems, simulation modeling.

Mode of delivery:
The tuition will be implemented as face-to-face teaching (lectures, classroom exercises and group work).

Learning activities and teaching methods:
Lectures 20 h / classroom exercises 20 h / independent study and group work 94 h.

Target group:
Industrial engineering and management students.

Prerequisites and co-requisites:
Bachelor in industrial engineering and management or equivalent.

Recommended optional programme components:

Recommended or required reading:

Assessment methods and criteria:
To pass the course, the student must complete the required coursework consisting of the exercises handed out during the classroom study and a supporting analytic exercise.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Pekka Kess, Osmo Kauppila.

Working life cooperation:

Leikkaavuudet:

555322S Production Management 3.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English

Timing:
Period 2.

Learning outcomes:
Upon completion of the course the student understands the key concepts of operations and production management. The student should know the essential production strategies. The student should also understand the principles of the supply chain management, and should be able to apply JIT, Lean and TOC methods in analyzing and constructing development plans for production organizations. Upon completion of the course the student can apply the management methods also in service systems. The student also understands the principles of the sustainable development in production.

Contents:
Production strategies, sustainable development, Supply Chain Management, Just-In-Time (JIT), Theory of Constraints (TOC), Lean, Toyota Production System (TPS), management of the production of services.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and a supervised group work).

Learning activities and teaching methods:
Lectures 20 h, assignment guidance 20 h, group work 95 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
- 

Recommended or required reading:
Assessment methods and criteria:
The assessment is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

5 ECTS credits.

Language of instruction:
English.

Timing:
Period 1.
Learning outcomes:
Upon completion of the course the student should be able to utilize strategic thinking, planning, and management. He/she can analyze and plan complex global business operations. After the course, the student can participate in strategic planning and strategy implementation in organizations. The student knows how to apply strategy analysis frameworks and analyze the implementation of the chosen strategy.

Contents:
Strategic thinking, strategic planning, strategic management, strategy analysis frameworks, strategy implementation with a simulation, analysis of the strategy implementation.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures 6 h / exercises 6 h / group work 122 h. Alternatively independent learning method: book examination 134 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:

Recommended or required reading:

Assessment methods and criteria:
This course utilizes continuous assessment. The group work includes the creation of strategic plan (10 % of the grade), business simulation (30 % of the grade), and the analysis of the strategy (60 % of the grade).

Arvostelu: 1 - 5, pass, fail
Opettajat: Jaakko Kujala
Opintokohteen kielet: Finnish
Voidaan suorittaa useasti: Kyllä

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 4.

Learning outcomes:
The course provides the student with the basic skills to manage a company practicing project business. Upon completion the student can explain the management areas of project business and their essential contents. The student can compare the specific features of project business in different business environments and analyse their effect on the business model of the company. The student can evaluate the significance of a single project and its management in reaching business goals.
Contents:
The specific features of project business, business models of a project company, project sales and marketing, contracting, negotiation analytic approach, project portfolio management, management of project networks.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 24h, self-study 56h, group exercise 54h

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Lecture materials. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
The course utilizes continuous assessment. During the course, the students must write a learning diary for each lecture and participate actively in the lectures. 40% of the grade is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Jaakko Kujala

Working life cooperation:

Leikkaavuudet:
  555380S  Quality Management  5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish.

Timing:
Period 1.

Learning outcomes:
Upon completion the student can analyze and improve the processes of an organization with the help of statistical tools. The student is able to disseminate the applicability of various statistical tools and methods in different kinds of organizational environments.

Contents:
Processes in an organization from a statistical viewpoint, tools and methods of statistical process control, process improvement using numeric data, stages, challenges and implementation of data analysis, the role of statistical methods in various management philosophies.

Mode of delivery:
The tuition will be implemented as face-to-face teaching (integrated classroom lectures and exercises).

Learning activities and teaching methods:
28 h lectures, 105 h independent study on course exercises.

Target group:
Industrial Engineering and Management students and other students studying taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
555286A Process and Quality Management

Recommended optional programme components:
-

Recommended or required reading:
The study materials will be announced at the beginning of the course.

Assessment methods and criteria:
To pass the course, the student must complete the course exercises and an accompanying course assignment. The course grade is calculated based on the grades of these two course components.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Working life cooperation:
No.

Other information:
Substitutes course 555380S Quality Management.

555389S: Systematic Process Improvement, 10 op

Voimassaolo: 01.08.2013 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Osmo Kauppila
Opintokohteen kielet: Finnish

ECTS Credits:
10 ECTS credits.

Language of instruction:
Finnish

Timing:
Periods 1 - 2

Learning outcomes:
Upon completion the student can manage the improvement and problem solving in a process using quality management tools. The student can explain the steps of the DMAIC problem solving model and apply the correct tools for each step. The student is able to apply quality tools into real life process data with the help of MINITAB software and to analyse the results. The student increases his/her understanding of the process type studied in the course exercise.

Contents:
Problem solving using DMAIC, the Six Sigma body of knowledge quality tools, use of MINITAB software, process improvement in practice.

Mode of delivery:
The tuition will be implemented as blended teaching.

Learning activities and teaching methods:
Lectures and related exercises, site visit, a large group exercise related to a process operating in practice.

Target group:
Industrial Engineering and Management students, other students taking Industrial Engineering and Management as minor, postgraduate students.

Prerequisites and co-requisites:
Bachelor in Industrial Engineering and Management or equivalent. Basic knowledge of statistical process control.

Recommended optional programme components:
Recommended or required reading:

Assessment methods and criteria:
To pass the course, the student must complete the group work as an active team member, take part in the course lectures and return the related exercises.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Osmo Kauppila.

Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:

555360S Administration, Organization and Education in Working Life 5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used (the course can be completed in English as a book examination).

Timing:
Period 1.

Learning outcomes:
After completing the course student is able to explain the general models regarding organisational development and is able to adapt the most central ones to the work organisations. Student can also choose the most suitable models for different situations and can interpret the results gained from different approaches. The student is able to explain the most important quantitative and qualitative variables that are either preconditions or results of the operation of the organisation. He is able to identify development needs and opportunities in companies and other organisations. The student also knows the basics of applying new research results in practical settings.

Contents:
The development of organisation is examined through e.g. the following concepts: productivity, well-being at work, quality control, quality of working life, security, and responsibility. Different types of indicators and applications will be discussed, such as occurrence, frequency indicators, economic indicators, and scales. Various concepts will be discussed, for example, in relation with change processes (e.g. strategy, owner, partnerships, sizes of operations and personnel), implementation, participation, intervention, action research, and learning organization.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and web-based teaching).

Learning activities and teaching methods:
Lectures 22 h / self-study 100 h / group work & exercises 12 h.

Target group:
Industrial Engineering and Management and Master’s Program in Product Management students.

Prerequisites and co-requisites:
555265P Occupational safety and health management, 555264P Managing well-being and quality of working life, 555371S Human resource management.

Recommended optional programme components:
Human resource management, 555370S Strategic management, 555377S Risk Management. Research project in industrial engineering and management related to Organisation and knowledge management topic and Faculty of Education’s Organisational psychology course can be conducted to complement this course.

Recommended or required reading:

Assessment methods and criteria:
This course utilizes continuous assessment including exercises during the lectures (weight 20 %), seminar work (weight 30 %) and examination (50 % weight).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Seppo Väyrynen

Working life cooperation:
No.

Other information:
Substitutes course 555360S Administration, Organization and Education in Working Life.

Leikkaavuudet: 555327S

Seminar in Production Management : Lab to Market 5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 2.

Learning outcomes:
Upon completion of the course the student should be able to analyze an industry to identify viable business ideas and opportunities. He/she can use different frameworks including scenario planning, customer driven analysis, user needs analysis, and technology evolution analysis. The student can apply frameworks and methods to distinguish interesting and promising ideas from viable opportunities, utilize frameworks and methods to evolve the ideas into viable products and businesses, and determine what business models are most effective. The student can also present and defend own ideas, and critically examine and discuss the recommendations of others.

Contents:
Industry analysis, scenario planning, customer driven analysis, user needs analysis, technology evolution analysis, opportunity identification, business models.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 28 h / self-study and group work 106 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:

Recommended or required reading:
Lecture materials. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
This course utilizes continuous assessment. During the course, there are mandatory individual assignments (75 % of the grade) and a group work (25 % of the grade).
Grading:
1-5.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes course 555327S Lab to Market.

555377S: Risk Management, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Kirsi Aaltonen
Opintokohteen kielet: English
Leikkaavuudet:

ECTS Credits:
5 ECTS credits.

Language of instruction:
English

Timing:
Period 2.

Learning outcomes:
The objective of the course is to provide a student an overall perspective to risk management in organizations. Upon completion the student can explain the key concepts of risk and uncertainty management, classify risks, conduct systematic risk analyses, apply risk management methods and tools and make informed improvement suggestions related to risk management in organizations. The student understands the role of risk management in organizations and can compare

Contents:
Definitions of risk and uncertainty, risk management standards, risk classification, systematic risk management process, methods of risk management, psychological aspects of risk management, ERM and organizing of risk management, risk management in different contexts, risk governance.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 26h, self-study 54h, group assignment 54h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.
Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:

Recommended or required reading:
Lecture materials and reading materials (articles, book chapters) related to each lecture. The materials will be defined at the beginning of the course.

Assessment methods and criteria:
Group assignment, in-class case assignments, exam. Course grading is based on exam and group assignment.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Assistant Professor Kirsi Aaltonen

Working life cooperation:
No.

Other information:
Substitutes course 555321S Risk Management.

555378S: Seminar in industrial engineering and management, 5 op

Voimassaolo: 01.08.2015 -

Leikkaavuudet:
555385S Advanced Course in Quality Management 5.0 op
555386S Advanced Course in Project Management 5.0 op
555347S Seminar in Technology Management 5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish/English.

Timing:
Periods 1-4.

Learning outcomes:
Learning outcomes depend on the content of each seminar. The seminar topics are related to production management, product management, organization and knowledge management, project management, and process and quality management.
Contents:
Will be defined at the beginning of the course.

Mode of delivery:
Will be defined at the beginning of the course.

Learning activities and teaching methods:
Will be defined at the beginning of the course.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:

Recommended or required reading:
Will be defined at the beginning of the course.

Assessment methods and criteria:
Will be defined at the beginning of the course.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: Finnish
Leikkaavuudet:

- 555367S Exercises in Work Science 6.0 op
- 555387S Project Work in Quality Management 5.0 op
- 555388S Project Work in Project Management 5.0 op
- 555326S Research Project in Production Management 5.0 op
Voidaan suorittaa useasti: Kyllä

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish/English

Timing:
Periods 1-4 or as summer studies independently

Learning outcomes:
Learning outcomes depend on the project work contents.

Contents:
Project work topics and types vary. The topics are typically related to actual problems in the industry.

Mode of delivery:
Will be defined at the beginning of the course.

Learning activities and teaching methods:
The methods are agreed with the project work instructor. The work can be done individually or in a group.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Will be defined at the beginning of the course.

Assessment methods and criteria:
The assessment is based on the project work report.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
-

Working life cooperation:
-

Other information:
The objective of the course is to apply the methods of industrial engineering and management in a company’s development activities. The course provides the student with an opportunity to combine and apply his/her existing knowledge in a study project. The student familiarises himself/herself with research work and reporting of the results. Substitutes courses 555326S Research Project in Production Management, 555348S Research Project in Product Management, 555367S Exercises in Work Science 555387S Research Project in Quality Management and 555388S Research Project in Project Management.

**A440269: Special Module, 0 - 10 op**
Learning outcomes:

Upon completion of the course the student should be able to solve challenging problems in organizations independently. The student can create a research plan, and define a research problem and research questions. The student is able to manage his own work according to the research plan. The student can also utilize different information sources and critically evaluate the information obtained. The student can create a written report according to the instructions.

Contents:
The research topic is selected in co-operation with the instructor.

Mode of delivery:
The tuition will be implemented as self-study and face-to-face teaching.

Learning activities and teaching methods:
Self-study 804 h. The student defines the research topic in co-operation with the instructor. The thesis can be a theoretical

Target group:
Industrial Engineering and Management students and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
The students will complete 555301S Research seminar in industrial engineering and management simultaneously.

Recommended or required reading:

Assessment methods and criteria:
This course includes writing a Master’s Thesis.
Grading:
1-5.

Person responsible:
Industrial Engineering and Management professors and doctors.

Working life cooperation:
Yes.

Other information:
Substitutes course 477991S Master’s Thesis.

555302S: Maturity Test / Master of Science in Industrial Engineering and Management, 0 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies

Common studies

555313S: Management, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Kess, Pekka Antero
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits.

Language of instruction:
English
Timing:
Period 1.

Learning outcomes:
Upon completion of the course the student understands the key concepts of general management. After completing the course the student knows the historical developments in the management thought. The student has an understanding about the qualifications of a manager in a modern organization. The student understands the principles of the managerial decision making. The student can distinguish between the terms management and leadership. The student has an understanding about good managerial practices.

Contents:
Managers and Managing, The Evolution of Management Thought, Values, Attitudes, Emotions, and Culture: The Manager as a Person, Ethics and Social Responsibility, Managing Diverse Employees in a Multicultural Environment, Decision Making, The Manager as a Planner and Strategist, Managing Organizational Structure and Culture, Organizational Control and Change, Motivation and Performance, Leadership, Effective Groups and Teams, Promoting Effective Communication, Managing Conflict, Politics, and Negotiation.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and a supervised group work).

Learning activities and teaching methods:
Lectures 10 h, case examples 10 h, self-study 115 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
- 

Recommended or required reading:

Assessment methods and criteria:
The assessment is based on the exam.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Pekka Kess

Working life cooperation:
No.

555314S: Management Information Systems, 5 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Learning outcomes:
Upon completion of the course, the student can explain the key concepts of management information systems. The student is familiar with the significance of information and information management in modern business process management. The student can define the information needs of management processes and understands how information systems can meet these needs. After completing the course, the student is aware of the current trends in management information systems technologies and practices. After the course, the student has readiness to participate for enterprise information system designing, purchasing, and development tasks as a role of industrial engineer/process developer. During the course, the students will also develop their skills in reflective, self-directing learning. A student is able to find the relevant information sources related to MIS.

Contents:
Key concepts: what is management information systems (MIS), managerial information, different types of MIS applications. Information systems in decision making and leadership, the effects of information technology in business processes. Current trends in management information systems technologies and practices. Structure of information systems, data governance models, principles of data management and IT architecture. Special characteristics of ICT project management (procurement and implementation). Company examples about MIS in practice.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 18 h, self-study, learning diary and group work 117 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent, 555313S Management.

Recommended optional programme components:
-

Recommended or required reading:
Lecture materials. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
Learning diary and project work (group assignment). The course grading is based on the learning diary and the project work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Hanna Kropsu-Vehkaperä.

Working life cooperation:
No.

Other information:
Substitutes the course 555344S Management Information Systems.
555301S: Research Seminar in IEM, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used.

Timing:
Periods 1-4.

Learning outcomes:
Upon completion the student knows scientific process and different research methods. The student can select an appropriate method for his/her master’s thesis work. The student can evaluate validity of research work and provide constructive criticism. The student can report research findings in the form of academic research report and participate in academic discussion.

Contents:
Research approach, qualitative and quantitative research methods, structure of research report, evaluating validity of research, constructive criticism and participation in scientific discussion.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 18h, self-study 116h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
Research report is based on research work student is doing for his/her master’s thesis work

Recommended or required reading:
Lecture material. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
The course includes lectures/seminars and active participation in discussion, presentation of own research work, providing constructive feedback on ongoing research work, evaluation of two completed M.Sc. thesis, and report written in article format of own master’s thesis research work.

Grading:
The course utilizes verbal grading “Pass/Fail”.

**Person responsible:**
Professor Jaakko Kujala.

**Working life cooperation:**
No.

**Other information:**
Seminars will include separate lectures about research approach, qualitative research methods and quantitative research methods. These lectures are recommended to be completed before starting own research work for master’s thesis. Participation in these three lectures is mandatory to participate in the course and they are lectured two times a year.

555340S Technology Management 4.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 2.

Learning outcomes:
After finishing the course, the student will be able to differentiate product development and technology management in a company. The student will be able to piece together the development needs and cycles of technologies in an organization. In addition, the student will know how to combine technology development and technology management with strategic planning of a company.

Contents:
The course consists of defining technology and its role within an enterprise and within society. During the course we study the meaning of innovation in technological competition. The lifecycles of technology including development, acquisition, and movement are also covered.

Mode of delivery:
The tuition will be implemented as face-to-face teaching

Learning activities and teaching methods:
Lectures 21 h / exercises, group work and self-study 113 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
555242A Product Development.
Recommended optional programme components:

Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Arto Tolonen
Opintokohteen kielet: English
Voidaan suorittaa useasti: Kyllä

Status:
5 ECTS credits.

ECTS Credits:
English.

Language of instruction:
Period 3-4.

Timing:
The course familiarizes a student with the product processes of an enterprise and specifically the meaning of product data in different stages of product process. After finishing the course, a student knows what product data is and how it can be used for business purpose. A student is familiar with the basic concepts of product data management (PDM) and is aware of the basic tools used for PDM. After finishing the course, a student will be able to analyze existing and future products from product structure viewpoint. Students will be able to analyze the company's product data management as a whole and to give suggestions based their analysis.

Learning outcomes:
Product information management concepts, its history and challenges, PDM-processes: managing product models, managing documents and configurations as well as tracing information, PDM-system and its functions, PDM-project and implementation of the system.

**Contents:**
The tuition will be implemented as face-to-face teaching.

**Mode of delivery:**
Lectures 16 h / group work and self-study 118 h.

**Target group:**
Industrial Engineering and Management and Master’s Programme in Product Management students.

**Prerequisites and co-requisites:**
555242 Product development.

**Recommended optional programme components:**
-

**Recommended or required reading:**

**Assessment methods and criteria:**
Group work report and exam.

**Grading:**
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

**Voidaan suorittaa useasti:** Kyllä

**Required proficiency level:**

**ECTS Credits:**
5 ECTS credits.
Language of instruction:
English.

Timing:
Periods 3-4.

Learning outcomes:
The course familiarizes students with the broad concepts of product management. After finishing the course, the student understands central principles and contents of product management and product portfolio management. Student knows the basic steps of the product portfolio management development and understands the ways to analyse and manage products and product portfolios. A student learns to see product and product portfolio management as strategic targets, performance indicators, governance models, process and product information management over horizontal and technical portfolios over product life cycle phases and product structure levels. The student can apply the learned things and methods in different industries in order to develop systematic product and product portfolio management processes.

Contents:
Basic issues in product and product portfolio management performance management, governance models, horizontal and vertical portfolios, processes, tools and product information.

Mode of delivery:
The tuition will be implemented as face-to-face learning and practical assignments.

Learning activities and teaching methods:
Will be defined at the beginning of the course.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
555242A Product development, 555350S Technology management.

Recommended optional programme components:
-

Recommended or required reading:
Will be defined at the beginning of the course.

Assessment methods and criteria:
Will be defined at the beginning of the course.

Language of instruction:
Finnish. English material will also be used.

Timing:
Period 2

Learning outcomes:
The course familiarizes a student with the overall concept of sourcing management. After completing the course student knows the key concepts of sourcing and purchase management and can explain these. The student can describe the structures of sourcing and purchasing organizations and can explain the meaning of sourcing management in the performance of operations. The student can analyze the purchasing activities in a company and can produce improvement proposals based on the analysis. After the course the student can take part in the sourcing development in the role of an expert.

Contents:
Purchasing operations in a manufacturing company, the principles of the sourcing and purchasing strategy and practices, suppliers and products, IT systems for sourcing and purchase.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and a supervised group work).

**Learning activities and teaching methods:**
Lectures 10 h, assignment guidance 10 h, group work 115 hrs.

555324S  Advanced Supply Chain Management  3.0 op

**ECTS Credits:**
5 ECTS credits.

**Language of instruction:**
Finnish. English material is also used.

**Timing:**
Periods 3-4.
Learning outcomes:
Upon completion of the course the student should be able to define supply chain management concepts, describe supply chain structures, and explain the importance of effective supply chain management. He/she can analyze supply chain operations and propose development areas based on the analysis. After the course, the student can act in an expert role in supply chain development.

Contents:
Supply chain management concepts, supply chain structures, effectiveness of supply chain, supply chain analysis and development.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures 8 h / exercises 4 h / group work 68 h / self-study 54 h.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Sakki, J. (2009) Tilaus-toimitusketjun hallinta. Jouni Sakki Oy. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
The grade will be based on the group work (60 % of the grade) and book examination (40 % of the grade).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes course 555324S Advanced Supply Chain Management.

555332S: Operations Research, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Osmo Kauppira
Opintokohteen kielet: Finnish
Learning outcomes:
Upon completion of the course the student knows the basic concepts of operations research and its applications in operations and production activities and decision-making in companies. The student is capable of applying quantitative methods typical to the field of operations research in practical problem solving.

Contents:
What is operations research, linear and dynamic programming, network and transportation algorithms, decision analysis, inventory models, queueing systems, simulation modeling.

Mode of delivery:
The tuition will be implemented as face-to-face teaching (lectures, classroom exercises and group work).

Learning activities and teaching methods:
Lectures 20 h / classroom exercises 20 h / independent study and group work 94 h.

Target group:
Industrial engineering and management students.

Prerequisites and co-requisites:
Bachelor in industrial engineering and management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
To pass the course, the student must complete the required coursework consisting of the exercises handed out during the classroom study and a supporting analytic exercise.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Pekka Kess, Osmo Kauppila.

Working life cooperation:
No.
**Other information:**
Substitutes course 555342S Operations Research.

**555333S: Production Management, 5 op**

**Voimassaolo:** 01.08.2015 -
**Opiskelumuoto:** Advanced Studies
**Laji:** Course
**Vastuuysikkö:** Field of Industrial Engineering and Management
**Arvostelu:** 1 - 5, pass, fail
**Opettajat:** Kess, Pekka Antero
**Opintokohteen kielet:** English
**Leikkaavuudet:**

555322S  Production Management  3.0 op

**ECTS Credits:**
5 ECTS credits.

**Language of instruction:**
English

**Timing:**
Period 2.

**Learning outcomes:**
Upon completion of the course the student understands the key concepts of operations and production management. The student should know the essential production strategies. The student should also understand the principles of the supply chain management, and should be able to apply JIT, Lean and TOC methods in analyzing and constructing development plans for production organizations. Upon completion of the course the student can apply the management methods also in service systems. The student also understands the principles of the sustainable development in production.

**Contents:**
Production strategies, sustainable development, Supply Chain Management, Just-In-Time (JIT), Theory of Constraints (TOC), Lean, Toyota Production System (TPS), management of the production of services.

**Mode of delivery:**
The tuition will be implemented as blended teaching (face-to-face teaching and a supervised group work).

**Learning activities and teaching methods:**
Lectures 20 h, assignment guidance 20 h, group work 95 h.

**Target group:**
Industrial Engineering and Management and Master’s Programme in Product Management students.

**Prerequisites and co-requisites:**
B.Sc. in Industrial Engineering and Management or equivalent.

**Recommended optional programme components:**
-

**Recommended or required reading:**
Assessment methods and criteria:
The assessment is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Pekka Kess

Working life cooperation:
No.

Other information:
Substitutes course 555322S Production Management.

A440259: Complementary Study Module of the Major/ Organization and Knowledge management, Advanced Module, 10 op

Voimassaolo: 01.08.2015 -

Opintokohteen kielet: English
Leikkaavuudet:

555320S Strategic Management 5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 1.
Learning outcomes:
Upon completion of the course the student should be able to utilize strategic thinking, planning, and management. He/she can analyze and plan complex global business operations. After the course, the student can participate in strategic planning and strategy implementation in organizations. The student knows how to apply strategy analysis frameworks and analyze the implementation of the chosen strategy.

Contents:
Strategic thinking, strategic planning, strategic management, strategy analysis frameworks, strategy implementation with a simulation, analysis of the strategy implementation.

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures 6 h / exercises 6 h / group work 122 h. Alternatively independent learning method: book examination 134 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:

Recommended or required reading:

Assessment methods and criteria:
This course utilizes continuous assessment. The group work includes the creation of strategic plan (10 % of the grade), business simulation (30 % of the grade), and the analysis of the strategy (60 % of the grade).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes course 555320S Strategic Management.

Obligatory studies of Project Management

555391S: Advanced Course in Project Management, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Kirsi Aaltonen
Opintokohteen kielet: English
Leikkaavuudet: 555381S Project Leadership 5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 1.

Learning outcomes:
After the course, the student has an in-depth understanding of the most important project management areas, competences to identify and evaluate the most applicable managerial approaches for different types of projects and capabilities to develop project management processes in an organization.

Contents:
different type of projects and industry specific approaches to project management, managing large international projects, managing projects’ external environment, project governance, project risk management, project time and schedule management

Mode of delivery:
The tuition will be implemented as blended teaching (web-based teaching and face-to-face teaching).

Learning activities and teaching methods:
Lectures, web-based-lectures and workshops 36h, group exercises 36h, self-study 62h

Target group:
Prerequisites and co-requisites:
555285A Basic course in project management.

Recommended optional programme components:
-  

Recommended or required reading:
Lecture and exercise material.

Assessment methods and criteria:
This course utilizes continuous assessment. The grading is based on case assignments solved in groups and discussed during the lecture (30% of the grade), group exercise presented and discussed in the workshops (30% of the grade), and exam (40% of the grade).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Assistant professor Kirsi Aaltonen

Working life cooperation:

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jaakko Kujala
Opintokohteen kielet: Finnish
Voidaan suorittaa useasti: Kyllä

ECTS Credits:
5 ECTS credits.

Language of instruction:
English.

Timing:
Period 4.

Learning outcomes:
The course provides the student with the basic skills to manage a company practicing project business. Upon completion the student can explain the management areas of project business and their essential contents. The student can compare the specific features of project business in different business environments and analyse their effect on the business model of the company. The student can evaluate the significance of a single project and its management in reaching business goals.
Contents:
The specific features of project business, business models of a project company, project sales and marketing, contracting, negotiation analytic approach, project portfolio management, management of project networks.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 24h, self-study 56h, group exercise 54h

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Lecture materials. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
The course utilizes continuous assessment. During the course, the students must write a learning diary for each lecture and participate actively in the lectures. 40% of the grade is based on the group work.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Jaakko Kujala

Working life cooperation:
No.

Other information:
Course name from 1.8.2017 is 'Management of a Project-based Firm'

A440261: Complementary Study Module of the Major/ Process and Quality Management, Advanced Module, 15 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Module
Laji: Study module
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Ei opintojaksojoukkoa.

Obligatory studies of Process and Quality Management

555390S: Process Analytics, 5 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Osmo Kauppila
Opintokohteen kielet: Finnish
Leikkaavuudet: 555380S Quality Management 5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish.

Timing:
Period 1.

Learning outcomes:
Upon completion the student can analyze and improve the processes of an organization with the help of statistical tools. The student is able to disseminate the applicability of various statistical tools and methods in different kinds of organizational environments.

Contents:
Processes in an organization from a statistical viewpoint, tools and methods of statistical process control, process improvement using numeric data, stages, challenges and implementation of data analysis, the role of statistical methods in various management philosophies.

Mode of delivery:
The tuition will be implemented as face-to-face teaching (integrated classroom lectures and exercises).

Learning activities and teaching methods:
28 h lectures, 105 h independent study on course exercises.

Target group:
Industrial Engineering and Management students and other students studying taking Industrial Engineering and Management as minor.

Prerequisites and co-requisites:
555286A Process and Quality Management

Recommended optional programme components:
-

Recommended or required reading:
The study materials will be announced at the beginning of the course.

Assessment methods and criteria:
To pass the course, the student must complete the course exercises and an accompanying course assignment. The course grade is calculated based on the grades of these two course components.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Osmo Kauppila.

**Working life cooperation:**
No.

**Other information:**
Substitutes course 555380S Quality Management.

---

**555389S: Systematic Process Improvement, 10 op**

**Voimassaolo:** 01.08.2013 -
**Opiskelumuoto:** Advanced Studies
**Laji:** Course
**Vastuuysikkö:** Field of Industrial Engineering and Management
**Arvostelu:** 1 - 5, pass, fail
**Opettajat:** Osmo Kauppila
**Opintokohteen kielet:** Finnish

**ECTS Credits:**
10 ECTS credits.

**Language of instruction:**
Finnish

**Timing:**
Periods 1 - 2

**Learning outcomes:**
Upon completion the student can manage the improvement and problem solving in a process using quality management tools. The student can explain the steps of the DMAIC problem solving model and apply the correct tools for each step. The student is able to apply quality tools into real life process data with the help of MINITAB software and to analyse the results. The student increases his/her understanding of the process type studied in the course exercise.

**Contents:**
Problem solving using DMAIC, the Six Sigma body of knowledge quality tools, use of MINITAB software, process improvement in practice.

**Mode of delivery:**
The tuition will be implemented as blended teaching.

**Learning activities and teaching methods:**
Lectures and related exercises, site visit, a large group exercise related to a process operating in practice.

**Target group:**
Industrial Engineering and Management students, other students taking Industrial Engineering and Management as minor, postgraduate students.

**Prerequisites and co-requisites:**
Bachelor in Industrial Engineering and Management or equivalent. Basic knowledge of statistical process control.

**Recommended optional programme components:**
-
Recommended or required reading:

Assessment methods and criteria:
To pass the course, the student must complete the group work as an active team member, take part in the course lectures and return the related exercises.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Osmo Kauppila.

Working life cooperation:
-

Other information:
-

A440262: Complementary Study Module of the Major/ Elective studies, Advanced Module, 5 - 10 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Module
Laji: Study module
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

Advanced elective studies

555376S: Organisational development, 5 op
Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
555360S Administration, Organization and Education in Working Life 5.0 op

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish. English material is also used (the course can be completed in English as a book examination).

Timing:
Period 1.

Learning outcomes:
After completing the course student is able to explain the general models regarding organisational development and is able to adapt the most central ones to the work organisations. Student can also choose the most suitable models for different situations and can interpret the results gained from different approaches. The student is able to explain the most important quantitative and qualitative variables that are either preconditions or results of the operation of the organisation. He is able to identify development needs and opportunities in companies and other organisations. The student also knows the basics of applying new research results in practical settings.

Contents:
The development of organisation is examined through e.g. the following concepts: productivity, well-being at work, quality control, quality of working life, security, and responsibility. Different types of indicators and applications will be discussed, such as occurrence, frequency indicators, economic indicators, and scales. Various concepts will be discussed, for example, in relation with change processes (e.g. strategy, owner, partnerships, sizes of operations and personnel), implementation, participation, intervention, action research, and learning organization.

Mode of delivery:
The tuition will be implemented as blended teaching (face-to-face teaching and web-based teaching).

Learning activities and teaching methods:
Lectures 22 h / self-study 100 h / group work & exercises 12 h.

Target group:
Industrial Engineering and Management and Master’s Program in Product Management students.

Prerequisites and co-requisites:
555265P Occupational safety and health management, 555264P Managing well-being and quality of working life, 555371S Human resource management.

Recommended optional programme components:
Human resource management, 555370S Strategic management, 555377S Risk Management. Research project in industrial engineering and management related to Organisation and knowledge management topic and Faculty of Education’s Organisational psychology course can be conducted to complement this course.

Recommended or required reading:

Assessment methods and criteria:
This course utilizes continuous assessment including exercises during the lectures (weight 20 %), seminar work (weight 30 %) and examination (50 % weight).

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Seppo Väyrynen

Working life cooperation:
No.

Other information:
Substitutes course 555360S Administration, Organization and Education in Working Life.

555375S: Lab to Market, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: English
Leikkaavuudet: 555327S Seminar in Production Management : Lab to Market 5.0 op

ECTS Credits: 5 ECTS credits.

Language of instruction: English.

Timing:
Period 2.

Learning outcomes:
Upon completion of the course the student should be able to analyze an industry to identify viable business ideas and opportunities. He/she can use different frameworks including scenario planning, customer driven analysis, user needs analysis, and technology evolution analysis. The student can apply frameworks and methods to distinguish interesting and promising ideas from viable opportunities, utilize frameworks and methods to evolve the ideas into viable products and businesses, and determine what business models are most effective. The student can also present and defend own ideas, and critically examine and discuss the recommendations of others.

Contents:
Industry analysis, scenario planning, customer driven analysis, user needs analysis, technology evolution analysis, opportunity identification, business models.

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 28 h / self-study and group work 106 h.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Lecture materials. Other materials will be defined at the beginning of the course.

Assessment methods and criteria:
This course utilizes continuous assessment. During the course, there are mandatory individual assignments (75 % of the grade) and a group work (25 % of the grade).
Grading:
1-5.

Person responsible:
D.Sc. Jukka Majava.

Working life cooperation:
No.

Other information:
Substitutes course 555327S Lab to Market.

**555377S: Risk Management, 5 op**

**Voimassaolo:** 01.08.2015 -
**Opiskelumuoto:** Advanced Studies
**Laji:** Course
**Vastuuysikkö:** Field of Industrial Engineering and Management
**Arvostelu:** 1 - 5, pass, fail
**Opettajat:** Kirsi Aaltonen

**Leikkaavuudet:**
555321S Risk Management 3.0 op

**ECTS Credits:**
5 ECTS credits.

**Language of instruction:**
English

**Timing:**
Period 2.

**Learning outcomes:**
The objective of the course is to provide a student an overall perspective to risk management in organizations. Upon completion the student can explain the key concepts of risk and uncertainty management, classify risks, conduct systematic risk analyses, apply risk management methods and tools and make informed improvement suggestions related to risk management in organizations. The student understands the role of risk management in organizations and can compare

**Contents:**
Definitions of risk and uncertainty, risk management standards, risk classification, systematic risk management process, methods of risk management, psychological aspects of risk management, ERM and organizing of risk management, risk management in different contexts, risk governance.

**Mode of delivery:**
The tuition will be implemented as face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 26h, self-study 54h, group assignment 54h.

**Target group:**
Industrial Engineering and Management and Master’s Programme in Product Management students.
Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Lecture materials and reading materials (articles, book chapters) related to each lecture. The materials will be defined at the beginning of the course.

Assessment methods and criteria:
Group assignment, in-class case assignments, exam. Course grading is based on exam and group assignment.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

VOIDAAN SUORITTAJA USEASTI: Kyllä

ECTS Credits:
5 ECTS credits.

Language of instruction:
Finnish/English

Timing:
Periods 1-4 or as summer studies independently

Learning outcomes:
Learning outcomes depend on the project work contents.

Contents:
Project work topics and types vary. The topics are typically related to actual problems in the industry.

Mode of delivery:
Will be defined at the beginning of the course.

Learning activities and teaching methods:
The methods are agreed with the project work instructor. The work can be done individually or in a group.

Target group:
Industrial Engineering and Management and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
-

Recommended or required reading:
Will be defined at the beginning of the course.

Assessment methods and criteria:
The assessment is based on the project work report.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
-

Working life cooperation:
-

Other information:
The objective of the course is to apply the methods of industrial engineering and management in a company’s development activities. The course provides the student with an opportunity to combine and apply his/her existing knowledge in a study project. The student familiarises himself/herself with research work and reporting of the results. Substitutes courses 555326S Research Project in Production Management, 555348S Research Project in Product Management, 555367S Exercises in Work Science 555387S Research Project in Quality Management and 555388S Research Project in Project Management.

**Arvostelu:** 1 - 5, pass, fail  
**Opintokohteen kielet:** Finnish  
Ei opintojaksokuvauksia.

**A440253: Supplementary Module, Electrical Engineering, 20 - 30 op**  
**Voimassaolo:** 01.08.2005 -  
**Opiskelumuoto:** Supplementary Module  
**Laji:** Study module  
**Vastuuysikkö:** Field of Industrial Engineering and Management  
**Arvostelu:** 1 - 5, pass, fail  
**Opintokohteen kielet:** Finnish  
Ei opintojaksokuvauksia.

**A440267: Complementary Module, Information Engineering, 20 - 30 op**  
**Voimassaolo:** 01.08.2015 -  
**Opiskelumuoto:** Supplementary Module  
**Laji:** Study module  
**Vastuuysikkö:** Field of Industrial Engineering and Management  
**Arvostelu:** 1 - 5, pass, fail  
**Opintokohteen kielet:** Finnish  
Ei opintojaksokuvauksia.

**A440256: Supplementary Module, Environmental Engineering, 20 - 30 op**  
**Voimassaolo:** 01.08.2013 -  
**Opiskelumuoto:** Supplementary Module  
**Laji:** Study module  
**Vastuuysikkö:** Field of Industrial Engineering and Management  
**Arvostelu:** 1 - 5, pass, fail  
**Opintokohteen kielet:** Finnish  
Ei opintojaksokuvauksia.

**A440269: Special Module, 0 - 10 op**
555300S: Master's Thesis, 30 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Diploma thesis
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: Finnish

Leikkaavuudet:
470099S Master's Thesis in Industrial Engineering and Management 30.0 op

ECTS Credits:
30 ECTS credits.

Language of instruction:
Finnish / English.

Timing:
Periods 1-4.

Learning outcomes:
Upon completion of the course the student should be able to solve challenging problems in organizations independently. The student can create a research plan, and define a research problem and research questions. The student is able to manage his own work according to the research plan. The student can also utilize different information sources and critically evaluate the information obtained. The student can create a written report according to the instructions.

Contents:
The research topic is selected in co-operation with the instructor.

Mode of delivery:
The tuition will be implemented as self-study and face-to-face teaching.

Learning activities and teaching methods:
Self-study 804 h. The student defines the research topic in co-operation with the instructor. The thesis can be a theoretical

Target group:
Industrial Engineering and Management students and Master’s Programme in Product Management students.

Prerequisites and co-requisites:
B.Sc. in Industrial Engineering and Management or equivalent.

Recommended optional programme components:
The students will complete 555301S Research seminar in industrial engineering and management simultaneously.

Recommended or required reading:
-

Assessment methods and criteria:
This course includes writing a Master’s Thesis.
Grading:
1-5.

Person responsible:
Industrial Engineering and Management professors and doctors.

Working life cooperation:
Yes.

Other information:
Substitutes course 477991S Master’s Thesis.

555302S: Maturity Test / Master of Science in Industrial Engineering and Management, 0 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opettajat: Jukka Majava
Opintokohteen kielet: Finnish

555312S: Maturity Test / Industrial Engineering and Management
0.0 op

Tutkintorakenteisiin kuulumattomien opintokonaisuuksien ja -jaksojen kuvaukset

555310S: Demola Project, 5 op

Voimassaolo: 01.01.2017 -
Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Field of Industrial Engineering and Management
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS cr
Language of instruction:
English
Timing:
Fall and Spring
Learning outcomes:
Upon completion of the course, the student is able to apply and use the core competencies of his/ her studies in a real life problem solving context. The student will learn skills that will allow him/ her to participate in a professional role in a project team that uses lean development methods to validate ideas and to create a demo or a prototype of a product, service, or other innovation. The course provides the student with experience in project work and improves the student’s team working skills as the course assignments are carried out by a multidisciplinary and international teams comprising of students with different backgrounds and skill sets. The course will also improve student’s communication and oral presentation skills as the student will need to summarize, rationalize, and present findings and ideas throughout the project.

Contents:
The entrepreneurial field project is organized within the international Demola network and the project comprises facilitated and supported real-life problem definition, data collection, problem solving, implementation and communication.

**Mode of delivery:**
Facilitated and supported project. Demola projects will be arranged two times per year; one season in the springtime (starting from January/February) and one in the autumn (starting from August/September). Dates can be checked from Weboodi.

**Learning activities and teaching methods:**
Learning takes place during the project as team learning and problem solving, with feedback from the responsible teachers and problem owning company or organization.

**Target group:**
Open to all. Students have to submit their application to Demola facilitators at oulu.demola.net when the season starts (either in January or August).

**Prerequisites and co-requisites:**
It is recommended that before starting Demola, the student has acquired some theoretical knowledge through his/her degree studies. Otherwise, there are no prerequisite knowledge requirements.

**Recommended optional programme components:**
The course is an independent entity and does not require additional studies carried out at the same time.

**Recommended or required reading:**
Materials vary according to the assignment.

**Assessment methods and criteria:**
Active participation in the entire process, delivery of the required documents, presentations and a demo or a prototype.

**Grading:**
The course utilizes verbal grading scale “pass/fail”

**Person responsible:**
Simo Kekäläinen

**Working life cooperation:**
A group of students will carry out a development project to create a solution for the company’s genuine and existing challenges. The project team reports to a supervising teacher and a company representative(s).

**Other information:**
The number of students is restricted.

---

555214A: Working in the university community, 5 op

**Voimassaolo:** 01.01.2017 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuysikkö:** Field of Industrial Engineering and Management

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Jukka Majava

**Opintokohteen kielet:** Finnish

**ECTS Credits:**
5 ECTS credits

**Language of instruction:**
Finnish / English

**Timing:**
Periods 1-4

**Learning outcomes:**
Upon completion of the course, the student will be able to:

- apply the skills required for the tasks in the university community (communication, co-operation, creativity, problem solving, project management, learning, technical skills, international skills, commercial and financial skills)
- take responsibility for the tasks in a responsible manner
- analyse and find development targets related to the tasks

**Contents:**
Communication, collaboration, creativity, problem solving, project management, learning, technical skills, international skills, commercial and financial skills.

**Mode of delivery:**
The tuition will not be organised.
Learning activities and teaching methods:
Students complete tasks with their own activities to support the university community and their own professional growth.

Target group:
Industrial Engineering and Management students.

Prerequisites and co-requisites:
555225P Basics of industrial engineering and management, 555285A Project management, 555242A Product development, 555264P Managing well-being and quality of working life, and 555286A Process and quality management or similar knowledge.

Recommended optional programme components:
-

Recommended or required reading:
-

Assessment methods and criteria:
The course can include several tasks as follows: Student Union 2 years 2 ECTS, University Board 1 year 2 ECTS, University Collegial Body 2 years 2 ECTS, Education Council 1 year 2 ECTS, Education Management Team 1 year 2 years, Faculty Management Team 1 year 2 ECTS, Faculty Board 2 years 2 ECTS, Faculty Education Council 2 years 2op, Student Union Board 1 year 1-3 ECTS, National Student Organisation 1 year 1-5 ECTS, Other major education policy and / or teaching development tasks 1-3 ECTS credits, Student Tutor or Teaching Assistant 2 ECTS cr.
The student writes a report on conducting the tasks, which includes the following: 1) In which positions did the student work, how long and how actively he/she participated? (0.5 pages). 2) What does the student think he/she has learned from the duties and how can the experience be utilized in the future? In particular, these skills should be considered: communication, co-operation, creativity, problem-solving, project management, learning, technical skills, international skills, commercial and financial skills and the development of self-knowledge (1 page). 3) How would the student think that the activity could be developed by the methods of industrial engineering and management? (1.5 pages). A report and a certificate on the tasks will be returned to the teacher tutor (at the Master's level to the study advisor), who determines the number of credits to be awarded. The length of the report is 3 pages.

Grading:
pass / fail

Person responsible:
Adjunct professor Jukka Majava
