Opasraportti

Open University - Natural sciences, mathematics and statistics (2018 - 2019)

Tutkintorakenteisiin kuulumattomat opintokokonaisuudet ja -jaksot

802354A: Basics in Algebra, 5 op
750124P: Basics of ecology, 5 op
740151P: Biochemical methodologies I, 10 op
750373A: Biogeography, 5 op
740148P: Biomolecules, 5 op
750121P: Cell biology, 5 op
757109P: Concepts of genetics, 5 op
ay756347A: Conservation of biodiversity (OPEN UNI), 5 op
800317A: Continuity and derivative, 5 op
792301A: Economic Geography and its Applications, 5 op
800119P: Functions and limit, 5 op
790322A: Geographical Information and Research, 5 op
790340A: Geographies of global development, 5 op
800318A: Integral, 5 op
802120P: Introduction to Matrices, 5 op
806113P: Introduction to Statistics, 5 op
802151P: Introduction to mathematical deduction, 5 op
761115P: Laboratory Exercises in Physics 1, 5 op
ay752316A: Macro fungi (OPEN UNI), 3 op
802158P: Mathematics for Economic Sciences, 7 op
761118P: Mechanics 1, 5 op

Compulsory

761118P-01: Mechanics 1, lectures and exam, 0 op
761118P-02: Mechanics 1, lab. exercises, 0 op
740149P: Metabolism I, 4 op
791635A: Physical Geography of Fennoscandia, 5 op
761108P: Physical world view, 5 op
756346A: Plant biology lectures, 5 op
790326A: Qualitative research methods, 5 op
766116P: Radiation physics, biology and safety, 5 op
790106A: Region, culture and society, 5 op
792319A: Regional politics, policy and development: Northern Europe, 5 op
790305A: Special themes in Human Geography, 5 op
790303A: Special themes in Physical Geography, 5 op
790350A: Special themes in Regional Development and Regional Policy, 5 op
790320A: Tourism planning and development, 5 op
761310A: Wave motion and optics, 5 op

Compulsory

761310A-01: Wave motion and optics, lectures and exam, 0 op
761310A-02: Wave motion and optics, lab. exercises, 0 op
790349A: World regional geography, 5 op
Opintojaksojen kuvaukset

Tutkintorakenteisiin kuulumattomien opintokokonaisuuksien ja -jaksojen kuvaukset

802354A: Basics in Algebra, 5 op

Voimassaolo: 01.08.2010 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Mathematics
Arvostelu: 1 - 5, pass, fail
Opettajat: Kari Myllylä
Opetointohteen kielet: Finnish

Leikkaavuuudet:
ay802354A Number Theory and Groups (OPEN UNI) 5.0 op
800333A Algebra I 8.0 op

ECTS Credits:
5 ECTS cr

Language of instruction:
Finnish

Timing:
1. year, 3. period

Learning outcomes:
After completing the course, student is able to
- derive and proof main results in the course
- use and apply different proof techniques
- recognize algebraic structures and the concepts
- see connections and differences between different algebraic structures

Contents:
The course includes basics in arithmetics and algebraic structures, such as, congruence, residue classes, prime numbers, Euclidean algorithm, the fundamental theorem of arithmetic, Euler-Fermat formula, groups and morphisms. The course gives an understanding of algebraic terms and concepts used in mathematics and physics.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
28 h lectures, 14 h exercises

Target group:
Major and minor students

Prerequisites and co-requisites:
802151P Introduction to mathematical deduction

Recommended optional programme components:
-

Recommended or required reading:
Lecture notes

Assessment methods and criteria:
Final exam

Grading:
1-5

Person responsible:
Kari Myllylä

Working life cooperation:
750124P: Basics of ecology, 5 op

Opiskelumuoto: Basic Studies  
Laji: Course  
Vastuuysikkö: Field of Biology  
Arvostelu: 1 - 5, pass, fail  
Opettajat: Jari-Heikki Oksanen  
Opintokohteen oppimateriaali:  
Krebs, Charles J., , 2001  
Opintokohteen kielet: Finnish

ECTS Credits:  
5 ECTS credits / 133 hours of work.  
Language of instruction:  
Finnish.  
Timing:  
B.Sc. 1 st spring.  
Learning outcomes:  
After completion of the course both biology and minor studies students understand better function of nature and the ecological phenomena in individual, population, community and ecosystem level.  
Contents:  
The course gives a student a basic idea about ecological interactions in individual-, population-, community- and ecosystem levels. In individual level the focus is on environmental demands of plants and animals. In population level the birth- and death rate of age groups and their effect on population growth is focused. In interactions between different species the emphasis is on how the competition between species leads to differentiation of niches. Predation is viewed as the regulatory effect on the population dynamics of prey populations. In community level the biodiversity and the patterns of succession are the main questions. In ecosystem level the emphasis is on energy flows and nutrient cycling. Evolution and adaptation are important in different fields of ecology.

Mode of delivery:  
Face-to-face teaching.  
Learning activities and teaching methods:  
The course is divided into three parts which follow the course book Krebs, C. J. 2009: Ecology (6 th edition). 1 st part: 24 hours of lectures based mainly on parts 1-2 of the course book. 2 nd part: 24 hours of lectures are based on part 3 of the course book. 3 rd part: students read the part 4 from the course book. In the course exam, there will be three questions, one from each part and all the questions have to be passed.  
Target group:  
Compulsory biology students.  
Prerequisites and co-requisites:  
No.  
Recommended optional programme components:  
-  
Recommended or required reading:  
The availability of the literature can be checked from this link.  
Assessment methods and criteria:  
Exam.

740151P: Biochemical methodologies I, 10 op
ECTS Credits: 10 credits
Language of instruction: Finnish
Timing: B.Sc. yr1 autumn (lectures), yr1 spring (laboratory practicals)
Learning outcomes: Upon successful completion students are able to:
- use basic methods used in biochemical research laboratory
- Use laboratory equipment and work safely
- Prepare solutions used in the lab
- document and present experiments and results in the laboratory and other works

Contents: This module covers the basic methodologies used in practical biochemistry. The following topics will be addressed: safety in the laboratory, qualitative and quantitative observations, the calculations of concentrations and dilution factors (includes a workshop), pipette cleaning and calibration, identification and quantification of biological molecules, principals and practice of the use of centrifuges, spectrophotometry, SDS-PAGE, agarose gel electrophoresis, thin-layer and paper chromatography, basics of protein purification, extraction of chromosomal DNA from bacteria, mini-prep extraction of plasmid DNA, extraction of RNA from mammalian tissue, extraction of lipids from nutmeg, sterile technique, basic microbial growth, dialysis, filtration and pH measurement. In addition transferable skills like word processing (Microsoft Word) and spreadsheet (Microsoft Excel), drawing of curve charts, the basics of oral presentation, ethics in scientific research and good scientific practice are involved.

Mode of delivery: Face to face teaching
Learning activities and teaching methods:
34 h lectures and exercises, 120 h lab. Laboratory work is compulsory. It is possible to complete lecture part only (3.5 ECTS).
Target group: Major students
Prerequisites and co-requisites: Biomolecules, Biomolecules for Biochemists tai Biomolecules for Bioscientists
Recommended optional programme components: -
You can check the availability of the course books via this link
Assessment methods and criteria: Continuous assessment (home works, lab reports), final exam
Grading: 1-5/fail
Person responsible: Sakari Kellokumpu
Working life cooperation: No
Other information:
Location of instruction: lectures (in Finnish) at Linnanmaa campus, laboratory practicals at Kontinkangas campus

750373A: Biogeography, 5 op

Voimassaolo: 01.08.2015 - 31.07.2019
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Biology
Arvostelu: 1 - 5, pass, fail
Opettajat: Kvist, Laura Irmeli, Jari-Heikki Oksanen
Opintokohteen kielet: Finnish

Leikkaavuudet:
750173P Biogeography 5.0 op
750363A Biogeography 4.0 op

ECTS Credits:
5 ECTS credits / 133 hours of work.

Language of instruction:
Finnish.

Timing:
B.Sc. 1st autumn.

Learning outcomes:
The course introduces students to basic concepts of biogeography, patterns of distribution and historical and present factors affecting the distribution. Plant biogeography introduces students to modern and historical factors controlling the plant cover, and to the special methods of vegetation science.

Contents:
The course consists of general part and optional part on plant biogeography and vegetation science. The general part introduces basic models and theories of distribution of organisms in the environment. Historical, evolutionary, geographical, climatic and ecological explanations. Research methods used in biogeography. The part on plant biogeography and vegetation science introduces methods on factors controlling the structure and composition of vegetation, and describes major vegetation types in Finland and principal biomes in the World. Methods of vegetation science are briefly surveyed.

Mode of delivery:
Face-to-face teaching.

Learning activities and teaching methods:
General biogeography: 24 h lectures, independent work (3 cr), Plant biogeography: 24 h lectures (2 cr); two exams.

Target group:
Compulsory for biology students.

Prerequisites and co-requisites:
No.

Recommended optional programme components:
Other recommended courses related to the field: Basics of Ecology (750124P), Evolution and systematics of organisms (750372A), Evolution, systematics and morphology of organisms, practicals (750374A), Biodiversity in human changed environments (755631S).

Recommended or required reading:
The availability of the literature can be checked from this link.

Assessment methods and criteria:
Two exams.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5 / Fail. Final grade is average value of the two exams.

Person responsible:
Doc. Laura Kvist and Prof. Jari Oksanen.

Working life cooperation:
No.
740148P: Biomolecules, 5 op

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Faculty of Biochemistry and Molecular Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Tuomo Glumoff
Opintokohteen kielet: English

Leikkaavuudet:
- ay740157P Basic biochemistry 1: Biomolecules (OPEN UNI) 4.0 op
- ay740152P Basic biochemistry 1: Biomolecules (OPEN UNI) 5.0 op
- 740143P Biomolecules for Biochemists 8.0 op
- 740147P Biomolecules for Bioscientists 8.0 op

ECTS Credits:
5 credits

Language of instruction:
English and Finnish

Timing:
autumn-(spring)

Learning outcomes:
Upon successful completion students are able to:
- tell the composition, structure and function of the major groups of biomolecules in cells; nucleic acids, proteins, carbohydrates and lipids and describe the forces that modulate their function.
- apply information in the right context and evaluate it critically

Contents:
This module provides an overview of biochemistry, outlining the forces involved in biomolecule structure and the chemical structures and properties of polynucleic acids, proteins, carbohydrates and lipids. There will also be an introduction to prebiotic evolution and a student debate on this subject. The module is arranged into lectures and workshops. All of the exercises are in English. Both a final examination and continuous assessment will count towards the final mark and attendance of some parts is compulsory.

Mode of delivery:
Face to face teaching

Learning activities and teaching methods:
30 h lectures, plus exercises

Target group:
Minor subject students, exchange students

Prerequisites and co-requisites:
-

Recommended optional programme components:
-

Recommended or required reading:
Mathews, van Holde & Ahern: Biochemistry, (3rd edition) , published by Addison Wesley Longman, Inc. or equivalent

Assessment methods and criteria:
Continuous assessment, final examination

Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5/fail

Person responsible:
Tuomo Glumoff

Working life cooperation:
No

Other information:
This module is the same as Biomolecules for Biochemists except that it contains no practical component. Location of instruction: Linnanmaa campus
750121P: Cell biology, 5 op

Voimassaolo: 31.07.2020
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Biology
Arvostelu: 1 - 5, pass, fail
Opettajat: Häggman, Hely Margaretha, Jaana Juvansuu, Henrik Honkanen
Opintokohteen oppimateriaalit:
Heino, Jyrki (2), , 2004
Alberts, B. ym., , 2008
Lodish et al., , 2003
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits / 133 hours of work.

Language of instruction:
Finnish.

Timing:
B.Sc. 1st autumn.

Learning outcomes:
The student is familiar with cellular structure and functioning in plant and animal cells, understands the social structures in multicellular species and knows why and how the genetic organizations (in nucleus, chloroplast and mitochondria) are co-operating, maintaining and regulating the cellular metabolism. Student understands the common origin and evolution of life on planet Earth, and understands the material basis and mechanisms of this continuity.

Contents:
During the recent years especially the development of molecular and microscopic and imaging techniques has increased our knowledge on cells and their social interactions. The structural and functional characteristics of plant and animal cells will be covered as well as the genetic organization maintaining and regulating the system.

Mode of delivery:
Face-to-face teaching.

Learning activities and teaching methods:
48 h lectures, 87 h independent work including deepening the upper secondary school knowledge in biology and chemistry as home work and book reading. Part of the home assignments is obligatory.

Target group:
Compulsory to the biology and biochemistry students.

Prerequisites and co-requisites:
Good basics in biology and especially in chemistry from upper elementary school contributes learning.

Recommended optional programme components:
Cell biology is prerequisite for the following courses: Developmental biology-histology (755320A), Animal physiology (755323A), Plant biology lectures (756346A), Concepts of genetics (757109P). Course also gives readiness for studies in molecular biology and biochemistry.

Recommended or required reading:

Assessment methods and criteria:
Three subexams. After each lecture section is subexam. The only way to do the course is to pass all the three subexams (no credits to Oodi are given from subexams). No final exam. The subexams are ment to be done within one academic year.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5 / Fail. Final grade is average value of the three exams.

Person responsible:
Dr. Jaana Juvansuu, Doc. Helmi Kuittinen and Prof. Hely Häggman.
757109P: Concepts of genetics, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Biology
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
757122P  Concepts of genetics for biochemists  3.0 op
753124P  General genetics  4.0 op

ECTS Credits:
5 ECTS credits / 133 hours of work.
Language of instruction:
Finnish.
Timing:
B.Sc. 1st spring.
Learning outcomes:
To understand and apply basic concepts of genetics, at Mendelian and molecular level.
Contents:
Mode of delivery:
Face-to-face teaching.
Learning activities and teaching methods:
50 h lectures and seminars, 83 h independent studies, exam.
Target group:
Compulsory to the biology students (5 cr) Biochemistry students: parts 1 and 3 (3 cr) compulsory.
Prerequisites and co-requisites:
Cell biology (750121P) or equivalent knowledge.
Recommended optional programme components:
This course is prerequisite to all other genetics courses.
Recommended or required reading:
Assessment methods and criteria:
Homeworks, home exams, lecture diary, exams.
Read more about assessment criteria at the University of Oulu webpage.
Grading:
1-5 / Fail.
Person responsible:
Prof. Outi Savolainen.
Working life cooperation:
No.

ay756347A: Conservation of biodiversity (OPEN UNI), 5 op

Voimassaolo: 01.08.2015 -
800317A: Continuity and derivative, 5 op

Voimassaolo: 01.01.2017 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Mathematics
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:

802163P Derivative 5.0 op
802156P Derivative 4.0 op

ECTS Credits:
5 ECTS credits / 133 hours of work
Language of instruction:
Finnish
Timing:
1st year, 2nd period
Learning outcomes:
Upon completing the course the student is
- able to define the concept of continuous function and apply this definition in examples and deductions
- able to determine derivatives of functions
- able to apply derivative to study functions
- able to apply the concepts of continuity and derivative in various problems, including deductions
Contents:
The course concerns continuity and derivative of real-valued functions of one variable. The central topics are the intermediate value theorem, the chain rule, the derivative of inverse functions, the mean value theorem and its applications. Differential calculus is also applied to various problems. The aim of the course is to improve mathematical thinking as well as computational skills.
Mode of delivery:
Face-to-face teaching
Learning activities and teaching methods:
28 h lectures, 14 h exercises, 91 h independent study
Target group:
1st year mathematics and physics students as well as students taking mathematics as a minor subject
Prerequisites and co-requisites:
Functions and limit 800119P, Introduction to mathematical deduction 802151P
Recommended optional programme components:

Recommended or required reading:
In addition to the material hand out in the course, for example the book P. Harjulehto, R. Klén, M. Koskenoja, Analyysiä reaaliluvuilla.
Assessment methods and criteria:
Final exam, exercises
Grading:
792301A: Economic Geography and its Applications, 5 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuysikkö: Field of Geography

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits: 5 ECTS

Language of instruction: The lectures and related materials are in English. The examination can be answered either in English or in Finnish. The essay and the seminar can be carried out in either in English or in English.

Timing:
2nd year, 1st semester

Learning outcomes:
The course approaches economic geography as applied to the perspectives of regional development and policy. The aim of the course is to familiarize the student with current issues and related theoretical debates in economic geography. After the course, student is able to outline the main features of the central theories in economic geography, and to apply these theories in the context of regional development and policy.

Contents:
Lectures approach economic geography from varied angles, with emphasis on regional development and policy. The course material contains scientific papers connected to each lecture. The course also includes an essay and related seminar. In the essay and seminar, students deepen and enrich the content of the lectures by means of theoretical reflection and practical case studies.

Mode of delivery:
10 hours of lectures (in English), article package, examination and practicals (an essay and a seminar). Participation in the lectures is obligatory.

Learning activities and teaching methods:
Lectures, essay and seminar

Target group:
Obligatory for students of the regional development and regional policy, for others voluntary.

Prerequisites and co-requisites:
-

Recommended optional programme components:
The course is part of minor studies of regional development and regional policy.

Recommended or required reading:
Lectures and articles.

Assessment methods and criteria:
Examination, essay and seminar

Read more about assessment criteria at the University of Oulu webpage.

Grading:
1–5.

Person responsible:
Toni Ahlvist

Working life cooperation:
No.

Other information:
Exchange students are asked to contact Toni Ahlqvist before taking the course.
800119P: Functions and limit, 5 op

Voimassaolo: 01.01.2017 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Mathematics
Arvostelu: 1 - 5, pass, fail
Opettajat: Pekka Salmi
Opintokohteen kielet: Finnish

Leikkaavuudet:
802162P Continuity and Limit 5.0 op
802155P Continuity and limit 4.0 op

ECTS Credits:
5 ECTS credits / 133 hours of work
Language of instruction:
Finnish
Timing:
1st year, 1st period

Learning outcomes:
Upon completing the course the student is
- able to apply the triangle inequality and make approximations
- able to manipulate elementary functions such as polynomials and trigonometric functions
- able to define the limit of a sequence and the limit of a function as well as apply these definitions
- able to apply different techniques to determine limits.

Contents:
The course concerns real-valued functions of one variable. In particular elementary functions are defined and the monotonicity of functions is studied. The notion of absolute value is reviewed and applied to approximation. Also the triangle inequality is used in approximation. The central concept is the limit of a function, which is introduced via the limit of a sequence. The aim of the course is to improve deductive skills as well as computational skills.

Mode of delivery:
Face-to-face teaching, computer exercises

Learning activities and teaching methods:
28 h lectures, 14 h exercises, 91 h independent study

Target group:
1st year mathematics and physics students as well as students taking mathematics as a minor subject

Prerequisites and co-requisites:
Introduction to mathematical deduction 802151P is recommended to be taken simultaneously (or earlier).

Recommended optional programme components:
-

Recommended or required reading:
Lecture notes, STACK exercises. Additional material: for example the book P. Harjulehto, R. Klén, M. Koskenoja, Analyysiä reaaliluvuilla.

Assessment methods and criteria:
Final exam, exercises

Grading:
1-5, fail

Person responsible:
Pekka Salmi

Working life cooperation:
No

Other information:
Replaces the course 802162P Continuity and Limit.

790322A: Geographical Information and Research, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
ECTS Credits:
5 ECTS

Language of instruction:
Finnish.

Timing:
1st year, 1st semester.

Learning outcomes:
The student will deepen his/her understanding about geographical information and research, and he/she will see the research as a part of society. The student will learn the correct practice in scientific research and the principles of copyrights.

Contents:
Communication in science, modes, ethics and interests of geography and science in general; ethical scientific practices; ethics of researcher; as well as structure of a research paper

Mode of delivery:
Face-to-face learning.

Learning activities and teaching methods:
12 hrs lectures, written exam.

Target group:
Common course to all 1st year students of Geography.

Prerequisites and co-requisites:
-

Recommended optional programme components:
Course is part of minor studies of Geography.

Recommended or required reading:
To be announced later

Assessment methods and criteria:
Exam on exam day.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5.

Person responsible:

Arvostelu: 1 - 5, pass, fail

Opettajat: Juha Ridanpää

Opintokohteen kielet: Finnish

Leikkaavuudet:
ay790340A Geographies of global development (OPEN UNI) 5.0 op

ECTS Credits:
5 ECTS

Language of instruction:
Finnish or English.

Timing:
2nd or 3rd year, 1st or 2nd semesters (autumn or spring semesters).

Learning outcomes:
This course gives knowledge of global development problems from geographical point of view. After the course the student can explain what development indicates and what kind of social and economic phenomena will explain both development and under development. He/she is also able to compare different actions that are aimed to diminish the uneven development based on different theories and strategies.

Contents:
The course familiarizes students to the theories that aim to explain differences in uneven development. Under development, and its social, cultural and economic aspects will be studies from national, regional and local level. This course also quires to political programs and strategies that are aimed to stabiles equalizes uneven development.

Mode of delivery:
Book exam.

Learning activities and teaching methods:
Book exam.

Target group:
Compulsory for teachers, others obligatory.

Prerequisites and co-requisites:
-

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
Exam on examinarium.

802120P: Introduction to Matrices, 5 op

Voimassaolo: 01.06.2015 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Mathematics
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Leikkaavuudet:
802118P Linear Algebra I 4.0 op

ECTS Credits:
5 ECTS credits

Language of instruction:
Finnish

Timing:
1. year, 4. period

Learning outcomes:
After completing the course the student is able to
- apply arithmetic operations of matrices
- solve system of linear equations by matrix methods
- study linear depence and linear indepence of vectors
- recognize the subspace of R^n and understands the concepts of basis and dimension of a vector space
- analyse matrices by the parameters and the vectors

Contents:
Vectors and matrices, Systems of linear equations, determinant of a matrix, subspaces of R^n, linear depence and linear indepence of vectors, base, dimension, eigenvalues and eigenvectors of a matrix, diagonalization.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 28 h, Exercises 14 h

Target group:
Major and minor studies

Prerequisites and co-requisites:
802151P Introduction to Mathematical Deduction

Recommended or required reading:
Lecture notes

Assessment methods and criteria:
806113P: Introduction to Statistics, 5 op

Voimassaolo: 01.01.2011 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuyksikkö: Field of Mathematics
Arvostelu: 1 - 5, pass, fail
Opettajat: Hanna Heikkinen

Opintokohteen oppimateriaali:
Wild, Christopher J., 2000
Grönroos, Matti (2), 2003

Opintokohteen kielet: Finnish

Leikkaavuudet:
806118P Introduction to Statistics 5.0 op
806119P A Second Course in Statistics 5.0 op
806116P Statistics for Economic Sciences 5.0 op

ECTS Credits:
5 ECTS cr

Language of instruction:
Finnish

Timing:
4th period. 1st or 2nd year of studies.

Learning outcomes:
Upon completion of the course, student will be
- able to identify and define the main principles of statistical research, collection of the data and analysis
- able to apply basic methods of descriptive statistics and statistical inference in simple quantitative research using a statistical software
- able to critically evaluate results of the statistical research presented in media
- prepared for teaching statistics in secondary school and high school
- prepared for participating in a group.

Contents:
- the nature and the meaning of statistics
- data and the acquisition of them: observations, variables, measuring and designs of a study
- the descriptive statistics of empirical distributions: tables, graphical presentations and descriptive measures of center, variation and dependence
- the most important probability distributions
- the principles and the basic methods of statistical inference: random sample, sample statistics, point estimation, confidence intervals and statistical testing of hypotheses.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 16 h (partly compulsory) / instructed group work (28 h) / independent work 80 h. Group works will be returned. Additional independently implemented learning diary tasks. Independent work contains also preparation for group work and peer assessment.

Target group:
Students of mathematical and physical sciences.

Prerequisites and co-requisites:
The recommended prerequisite prior to enrolling for the course is the completion of the courses: 802151P Introduction to mathematical deduction and 800119P Functions and limit.
Recommended optional programme components:
After the course, student is able to continue other statistics courses.

Recommended or required reading:
Lecture notes.

Assessment methods and criteria:
This course utilizes continuous assessment. Practical works and learning diaries are assessed weekly. In addition web tests and learning tasks. The assessment of the course is based on the learning outcomes of the course. The more detailed assessment criteria is available in the beginning of the course. In addition one compulsory lecture and peer assessment.

Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

802151P: Introduction to mathematical deduction, 5 op

Voimassaolo: 01.08.2009 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Mathematics
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Leikkaavuudet:
ay802151P Introduction to mathematical deduction (OPEN UNI) 5.0 op

ECTS Credits:
5 ECTS cr

Language of instruction:
Finnish

Timing:
First period at the first semester.

Learning outcomes:
After completing the course, student is:
- able to use different methods proving techniques
- able to use basic set theoretic concepts and definitions
- able to define and apply basic definitions related to functions

Contents:
The course in an introduction to mathematical deduction and introduces different types of proof techniques. The course covers the concepts familiar from upper secondary school studies more profound way. Main concepts in this course are basic set theory and functions.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 28 h, exercises 14 h

Target group:
Major and minor students

Prerequisites and co-requisites:
- 

Recommended optional programme components:
-

Recommended or required reading:
Lecture notes

Assessment methods and criteria:
Final exam
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Pass/Fail

ECTS Credits:
5 ECTS credits / 133 hours of work

Language of instruction:
Finnish

Timing:
Spring

Learning outcomes:
The student can safely make physical measurements, use different measurement tools, read different scales, handle the data, calculate the error estimations and make a sensible report of his laboratory measurements.

Contents:
The skill to make laboratory measurements is important for physicists. This is an introductory course how to make physical measurements and how to treat the measured data. Laboratory works are made in groups. The laboratory security is an essential part also in physics. Measurements are made with different instruments. As a result the most probable value is determined as well as its error. The skills obtained during this course can be applied in the other laboratory courses Laboratory exercises in physics 2 and 3.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 10 h, exercises 20 h (5 x 4 h). Five different works will be made during the course in groups. Self-study 103 h.

Target group:
For the students of the University of Oulu.

Prerequisites and co-requisites:
No specific prerequisites.

Recommended optional programme components:
800149P Introduction to LaTeX

Recommended or required reading:
Lecture material is in Finnish. Work instructions are available also in English.

Assessment methods and criteria:
Written reports of the experiments and one written examination.

Grading:
Numerical grading scale 0 – 5, where 0 = fail

Person responsible:
Seppo Alanko

Working life cooperation:
No work placement period

Other information:
Includes parts:
761115P-01 Laboratory Exercises in Physics 1, lecture and exam
761115P-02 Laboratory Exercises in Physics 1, laboratory exercises
ay752316A: Macro fungi (OPEN UNI), 3 op

Voimassaolo: 01.08.2012 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: University of Oulu, Open University
Arvostelu: 1 - 5, pass, fail
Opetus suunnattu: University of Oulu, Open University
Opintokohteen kielet: Finnish
Leikkaavuudet:
752316A Macro fungi 3.0 op

ECTS Credits:
3 cr.

Language of instruction:
Finnish / English.

Timing:
B.Sc. 3rd autumn. NNE.

Learning outcomes:
Student is able to identify most common macrofungal species as fresh specimens and knows basics of fungal ecology.

Contents:
Demonstrations of macrofungi in the field, basics of identification, ecology and distribution.

Mode of delivery:
Face-to-face teaching.

Learning activities and teaching methods:
14 h lectures, 25 h exercises including excursions, identification exam.

Target group:
Optional.

Prerequisites and co-requisites:
No.

Recommended optional programme components:
-

Recommended or required reading:
The availability of the literature can be checked from this link.

Assessment methods and criteria:
Species identification exam.

Grading:
1-5 / Fail.

Person responsible:
Dr. Annamari Markkola.

Working life cooperation:
No.

Other information:
-

802158P: Mathematics for Economic Sciences, 7 op

Voimassaolo: 01.06.2014 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Mathematics
Arvostelu: 1 - 5, pass, fail
ECTS Credits:
7 ECTS cr

Language of instruction:
Finnish

Timing:
1. period. It is recommended to complete the course at the 1st autumn semester.

Learning outcomes:
After completing the course, student is able to
- define and apply basic mathematical concept such as rationals, absolute value, power and root function
- handle different types of functions and knows their special properties
- solve different equations and inequalities
- define the concepts of limit and continuity of a function
- calculate limits in case of different functions
- calculate and apply derivative, and knows the relevance of the concept
- use all mathematical concepts covered by the course in different problems related to economics (interest, investments, optimization and indeces)

Contents:
Course aims to build a solid background to mathematics in later economics courses. Course begins with a revision of concepts familiar from high school such as sequences, rationals, absolute value and powers. After that we focus on different types of functions such as polynomials, rational functions, exponential functions and logarithm. Different types of equations and inequalities, containing the functions mentioned above, are solved. Main concepts in the course are also limit of a function, continuity and derivative and their applications. Nämä käsitteet tullaan esittelemään kaikille kurssilla käsitettävillä
funktiotyyppille.

After the more mathematical part, the focus is turned on economical applications (such as interests, optimization, investments, indeces).

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 40 h, exercises 20 h.

Target group:
Students in Oulu Business School

Prerequisites and co-requisites:
None

Recommended optional programme components:
After the course, student is able to continue other mathematics courses directed to the students in Oulu Business School.

Recommended or required reading:
Lecture notes

Assessment methods and criteria:
Mid-term exams and/or final exam

Grading:
The course utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Kari Myllylä / Erkki Laitinen

766343A Mechanics 7.0 op
761111P Basic mechanics 5.0 op
761101P Basic Mechanics 4.0 op
766323A Mechanics 6.0 op
761323A Mechanics 6.0 op

ECTS Credits:
5 ECTS credits / 133 hours of work
- 761118P-01, Lectures and exam (4 cr)
- 761118P-02, Lab. exercises (1 cr)

Language of instruction:
The lectures will be in Finnish. The textbook is in English and exercises are selected from the textbook. For further information, contact the responsible person of the course.

Timing:
Autumn

Learning outcomes:
The student is able to describe the basic concepts of mechanics and to apply those when solving the problems related to mechanics.

Contents:

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 30 h, 7 exercises (14 h), 2 laboratory exercises (3 hours/exercise), self-study 83 h

Target group:
For the students of the University of Oulu.

Prerequisites and co-requisites:
Knowledge of vector calculus and basics of differential and integral calculus.

Recommended optional programme components:
No alternative course units or course units that should be completed simultaneously.

Recommended or required reading:

Assessment methods and criteria:
Both parts (761118P-01 and 761118P-02) will be graded separately. The final grade of the course is the weighted average of the grades of part 1 (4 cr) and part 2 (1 cr).
761118P-01: Three midterm exams or final examination
761118P-02: Two laboratory exercises

740149P: Metabolism I, 4 op

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Faculty of Biochemistry and Molecular Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Tuomo Glumoff
Opintokohteen kielet: Finnish

Leikkaavuudet:

ay740158P Basic biochemistry 3: Metabolis (OPEN UNI) 4.0 op
ay740154P Basic biochemistry 3: Metabolis (OPEN UNI) 3.0 op
740146P Metabolism I 6.0 op

ECTS Credits:
4 credits

Language of instruction:
Finnish

Timing:
spring

Learning outcomes:
Students will be able to explain the main principles of how the metabolism is made up, will get a detailed picture of the energy metabolism, and will be able to organize part of the wholeness of metabolism, particularly how energy metabolism is networked to the synthesis and degradation of biomolecules.

Contents:
On this course the central concepts and mechanisms of metabolism, its regulation and the integration of metabolic pathways will be introduced, like anabolism and catabolism, linking of different pathways, and metabolic regulation. Especially the energy metabolism will be studied, concerning carbohydrates, lipids and the respiratory chain. Combined with the course Metabolism II the students will get a good overview on the principles of metabolism, metabolic integration and the methods to study metabolism.

Mode of delivery:
Face to face teaching

Learning activities and teaching methods:
Lectures (28 h), problem-based exercises (workshops) 6 h and final exam.

Target group:
Minor subject students

Prerequisites and co-requisites:
Biomolecules for Biochemists or Biomolecules for Bioscientists or Biomolecules

Recommended optional programme components:
-

Recommended or required reading:
-

Assessment methods and criteria:
Problem-based exercises and a final exam will count towards the final grade.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5/fail.

Person responsible:
Tuomo Glumoff

Working life cooperation:
-

Other information:
This module is the same as Metabolism I (740146P), except that it contains no laboratory component.

Location of instruction: Linnanmaa

791635A: Physical Geography of Fennoscandia, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Physical Geography of Fennoscandia (OPEN UNI) 5.0 op

ECTS Credits: 5 ECTS

Language of instruction: Finnish and English

Timing: 2nd or 3rd year, 1st or 2nd semester.

Learning outcomes:
Course familiarizes students to the geography of the Fennoscandia. When the student has passed the written exam, he/she can define the special characters of the physical geography of Fennoscandia

Contents:
Physical geography of the Fennoscandia.

Mode of delivery:
Book exam.

Learning activities and teaching methods:
Book exam.

Target group:
Obligatory for teachers, others voluntary.

Prerequisites and co-requisites:

Recommended optional programme components:
Course is part of minor studies of Geography.

Recommended or required reading:

Assessment methods and criteria:
Exam on examinarium.

Grading:
1–5.

Person responsible:
Janne Alahuhta

Working life cooperation:
No.

761108P: Physical world view, 5 op

Voimassaolo: 01.08.2017 -
Opiskelumuoto: Basic Studies

Laji: Course

Vastuuysikkö: Field of Physics

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

761112P  Physical world view  3.0 op

ECTS Credits: 5 ECTS credits / 133 hours of work

Language of instruction: Finnish

Timing: Autumn

Learning outcomes:
After the course student can see the position of physics in the advancement of scientific world view and technology. The student has a comprehensive view of different learning and studying methods (s)he can use later on.

Contents:
The forming of key concepts in physics, using models and observations in advancing both classical and modern physics. The meaning of applying physics in modern society. Getting to know different areas of physics research.

Mode of delivery:
Multiform teaching

Learning activities and teaching methods:
48 h face-to-face teaching, 85 h independent work including course work and group work

Target group:
Primarily for the students of the degree programme in physics. Also for the other students of the University of Oulu.

Prerequisites and co-requisites:
No specific prerequisites

Recommended optional programme components:
No alternative course units or course units that should be completed simultaneously.

Recommended or required reading:
Feynman, R. The Character of Physical Law, Penguin Books 1992 (or equivalent, there are several prints). The original Messenger Lectures by Richard Feynman in 1965 (7x55min) can be found online with search "Richard Feynman messenger lectures".

Assessment methods and criteria:
Passed course work or final exam

Grading:
Numerical grading scale 0-5, where 0 = fail

Person responsible:
Laura Timonen

Working life cooperation:
No work placement period

Other information:
https://wiki.oulu.fi/display/761112P/

756346A: Plant biology lectures, 5 op

Voimassaolo: 01.08.2015 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Field of Biology
Arvostelu: 1 - 5, pass, fail
Opettajat: Anna-Maria Pirtilä, Häggman, Hely Margaretha
Opintokohteen kielet: Finnish
Leikkaavuudet:

752345A Basics of functional plant biology, lectures 4.0 op

ECTS Credits:
5 ECTS credits / 133 hours of work.

Language of instruction:
Finnish.

Timing:
B.Sc. 2nd spring.

Learning outcomes:
The student can understand and explain the function and regulation of plant cells, tissues and entire plants.

Contents:
The most important phenomena of plant life, like photosynthesis, nitrogen metabolism and plant hormones are discussed.

Mode of delivery:
Face-to-face teaching, book exam.

Learning activities and teaching methods:
Lectures (20 h) and exams.

Target group:
Compulsory to the biology students.

**Prerequisites and co-requisites:**
Cell biology (750121P) or equivalent knowledge helps in following this course. This course is a prerequisite for course Plant biology practicals (756341A) and Advanced course in plant biology (752682S).

**Recommended optional programme components:**

- **Recommended or required reading:**
  Terävä, E. & Kanervo, E. 2008: Kasvianatomia or equivalent.
  The availability of the literature can be checked from [this link](#).

**Assessment methods and criteria:**
Lectures, book, exams.
Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
1-5 / Fail.

**Person responsible:**
Prof. Hely Häggman and Doc. Anna Maria Pirttilä.

**Working life cooperation:**
No.

**Other information:**

---

790326A: Qualitative research methods, 5 op

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuysikkö:** Field of Geography

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Juha Ridanpää

**Opintokohteen kielet:** Finnish

**ECTS Credits:**
5 ECTS

**Language of instruction:**
Finnish.

**Timing:**
2nd year, 2nd semester.

**Learning outcomes:**
The course offers proficiency in conducting qualitative research. After the course student is acquainted with how qualitative methods are used in geography. Student is also able to compare various stages

**Contents:**
The course focuses on the basic concepts of qualitative research with introducing the various manners for approaching geographical phenomena qualitatively. The lectures focus on qualitative research methods and research process in general. Students also read the topical articles in human geography and ponder various factors concerning the philosophical viewpoints, research material collection and qualitative analysis.

**Mode of delivery:**
Face-to-face learning.

**Learning activities and teaching methods:**
8 hrs lectures, 20 hrs practicals, seminar report.

**Target group:**
The course is aimed at all students in geography, excluding students in physical geography.

**Prerequisites and co-requisites:**
790104P Introduction to systematic Human Geography

**Recommended optional programme components:**
The course can be studied as a subsidiary subject. The course is linked with Field course in human geography.

**Recommended or required reading:**
Will be announced later.
Assessment methods and criteria:
A practical work.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5.

Person responsible:
Juha Ridanpää

Working life cooperation:
No.

766116P: Radiation physics, biology and safety, 5 op

Voimassaolo: 01.01.2015 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Field of Physics
Arvostelu: 1 - 5, pass, fail
Opettajat: Seppo Alanko
Opintokohteen kielet: Finnish

Leikkaavuudet:

761116P Radiation physics, biology and safety 3.0 op

ECTS Credits:
5 ECTS credits

Language of instruction:
Finnish

Timing:
Spring

Learning outcomes:
The student knows the origin of ionising radiation and the principles of its interaction with matter. He/she can explain the essential effects of ionising radiation on human tissue and remembers the principles of radiation safety and laws and regulations (in Finland) concerning this.

Contents:
The topics of the course include the origin of ionizing radiation e.g. as a result of radioactive decay and in nuclear reactions, the interaction between radiation and matter, the detection and measurements of radiation, physical quantities and measuring units related to radiation, radiation in the environment, and examples of utilizing radiation. The biologic effects of radiation and the legislation on radiation safety are also discussed.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 28 h, 7 problem solving exercises (14 h) and 2 laboratory exercises (8 h). Self-study 90 h.

Target group:
For the students of the University of Oulu.

Prerequisites and co-requisites:
No specific prerequisites

Recommended optional programme components:
740368A Radiation and safety

Recommended or required reading:
Lecture material (in Finnish), Laws and regulations concerning radiation safety

Assessment methods and criteria:
Final examination

Grading:
Numerical grading scale 0 – 5, where 0 = fail

Person responsible:
Seppo Alanko

Working life cooperation:
No work placement period

790106A: Region, culture and society, 5 op
**ECTS Credits:**
5 ECTS

**Language of instruction:**
English and Finnish

**Timing:**
2nd year, 1st semester.

**Learning outcomes:**
A student can explain and represent the main ideas of regional geography, theoretical and practical meanings of concept 'region' and the role of region in order to manage society and culture.

**Contents:**
Development of (contemporary) regional geography, theoretical meanings of concept 'region', region and power. Lecture serves different fields of specialization.

**Mode of delivery:**
Face-to-face learning.

**Learning activities and teaching methods:**
16 h lectures and an exam (lectures and literature)

**Target group:**
Common course to all students of Geography.

**Prerequisites and co-requisites:**
-

**Recommended optional programme components:**
Course is part of minor studies of Geography.

**Recommended or required reading:**
Material will be delivered during the course.

**Assessment methods and criteria:**
Exam on exam day.
Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
1–5.

**Person responsible:**
Anssi Paasi.

**Working life cooperation:**
No.

**792319A: Regional politics, policy and development: Northern Europe, 5 op**

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuysikkö:** Field of Geography

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Heikki Sirviö

**Opintokohteen kielet:** Finnish

**ECTS Credits:**
5 ECTS

**Language of instruction:**
Finnish and English. English speaking students should contact the teacher before the course.

**Timing:**
2nd year, 1st semester

**Learning outcomes:**
Upon completion of the course the student will be able to:
- analyse and classify basic theories, concepts and models of regional development and policy,
- apply theories, concepts and models in interpretation, recognize their use in scientific papers and discuss them,
- perceive the characteristics and challenges in the regional development and policy in Northern Europe.

Contents:
Students familiarize themselves with the basic theories, concepts, and models of regional development and policy, and their application in practical challenges and decision-making by reading and analysing scientific articles.

Mode of delivery:
Face-to-face teaching, independent work.

Learning activities and teaching methods:
The course involves 14 h of reading group sessions and 118 h of self-learning by reading the assigned articles, writing memos and preparing an essay.

Target group:
Students who take the Regional development and policy module.

Prerequisites and co-requisites:

Recommended optional programme components:
The course does not require additional studies carried out at the same time. Course is part of minor studies of regional development and regional policy.

Recommended or required reading:
Reading list will be available by the beginning of the course.

Assessment methods and criteria:
The assessment criteria are based on the learning outcomes of the course. Read more about assessment criteria at the University of Oulu webpage.

Grading:
1–5.

Person responsible:
Heikki Sirviö

Working life cooperation:
No.

790305A: Special themes in Human Geography, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Field of Geography
Arvostelu: 1 - 5, pass, fail
Opettajat: Paasi Anssi
Opintokohteen kielet: Finnish
Voidaan suorittaa useasti: Kyllä

ECTS Credits:
5 ECTS

Language of instruction:
Finnish.

Timing:
1st year, 2nd semester.

Learning outcomes:
After lectures the student is familiar with the research fields of cultural geography of the department and their research practices.

Contents:
The aim is to make student to interpret and understand cultural reality in geographical way. Lectures will lead to the selected themes of the cultural geography.

Mode of delivery:
Face-to-face learning.

Learning activities and teaching methods:
20 hrs lectures and a study circle

Target group:
Obligatory for students of Human Geography and HG-orientated teachers.

Prerequisites and co-requisites:
Recommended optional programme components:
Course is part of the minor studies of Geography for students of Biology (teachers). This course is possible to perform by substituting book exam (790348A).

Recommended or required reading:
Reading circle:

Exam
- Other readings, to be announced later.

Assessment methods and criteria:
Exam on exam day and participation in reading circle
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5.

Person responsible:
Anssi Paasi and Tuomo Alhojärvi

790303A: Special themes in Physical Geography, 5 op

Opiskelumuoto: Basic Studies
Laji: Course

Vastuuysikkö: Field of Geography

Arvostelu: 1 - 5, pass, fail

Opettajat: Janne Alahuhta

Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS

Language of instruction:
Finnish.

Timing:
1st year, 2nd semester.

Learning outcomes:
After this course, the student is able to define and interpret the phenomena of physical nature.

Contents:
Special characteristics of northern nature. GIS in environmental research.

Mode of delivery:
Face-to-face learning.

Learning activities and teaching methods:
8 hrs lectures, 20 hrs practicals and report.

Target group:
Obligatory for students of Physical Geography and teachers.

Prerequisites and co-requisites:
GIS Basics and Cartography (790101P)

Recommended optional programme components:
Course is part of the minor studies of Geography. Course is also possible to perform by substituting book exam (790346A)

Recommended or required reading:

Assessment methods and criteria:
Learning diary and report.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1-5.

Person responsible:
Janne Alahuhta

Working life cooperation:
No.
790350A: Special themes in Regional Development and Regional Policy, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Geography
Arvostelu: 1 - 5, pass, fail
Opettajat: Jonne Hytönen
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS

Language of instruction:
Finnish and English

Timing:
2nd or 3rd year, 1st or 2nd semesters (autumn or spring semesters)

Learning outcomes:
1) Student understands the idea of Communicative Planning Theory. Student acquaint her/himself with critical theoretical debates regarding the communicative approach.
2) Student understands the theoretical debates about strategic planning and city-regionalism. Student learns to interpret novel and forthcoming reforms in the planning system from a critical point of view.

Contents:
communicative planning theory, market-driven processes and planning, strategic planning and city-regionalism, reforms of planning system

Mode of delivery:
Compilation of essays. Exchange students are asked to contact the teacher in advance, if planning to pass the course during her/his exchange.

Learning activities and teaching methods:
Student studies the given literature with care and writes the compilation of essays independently. Detailed instructions from the teacher.

Target group:
Students specializing in Regional Development and Policy, voluntary for others.

Prerequisites and co-requisites:
The course is planned for those students who already have some basic knowledge of regional development or regional policy. The student should have passed some general level introductory studies to the field of regional development/policy in her/his home institution (equivalent to the course ‘Introduction to Regional Development and Regional Policy’ in Oulu) before attending this course. Please contact teacher in advance and clarify your starting level to her/him.

Recommended optional programme components:
-

Recommended or required reading:
Ask instructions and the list of literature from the teacher.

Assessment methods and criteria:
Compilation of essays as independent work.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1–5

Person responsible:
Jonne Hytönen

Working life cooperation:
No.

Other information:
Exchange students are asked to contact the teacher before registration.

790320A: Tourism planning and development, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Field of Geography
ECTS Credits:
5 ECTS

Language of instruction:
Finnish and English.

Timing:
3 year, 2nd semester.

Learning outcomes:
After this course, student understands the relationship between tourism planning and regional development and he/she knows the most central models of planning and development in local, regional and national level. He/she knows the starting points of the tourism policy in local and European level, the background aspects of the tourism policy.

Contents:
Concepts and theories of the tourism development and tourism planning, economic impacts in regional level and basic aspects of the tourism policy and regional tourism strategies.

Mode of delivery:
Face-to-face learning.

Learning activities and teaching methods:
16 hrs lectures, written seminar work and presentation, exam.

Target group:
Students who're specialising to Tourism Geography. Course is part of minor studies tourism geography.

Prerequisites and co-requisites:

Recommended optional programme components:
Course is part of minor studies tourism geography.

Recommended or required reading:

Assessment methods and criteria:
Exam on exam day.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
1–5.

Person responsible:
Kaarina Tervo-Kankare

Working life cooperation:
No.

Other information:
Written exam can be written also in Finnish. Written seminar work and presentation is in English. If needed, this course can be organised as written exam and practical's.

761310A: Wave motion and optics, 5 op

Voimassaolo: 01.08.2017 -
Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuysikkö: Field of Physics

Arvostelu: 1 - 5, pass, fail

Opettajat: Seppo Alanko

Opintokohteen kielet: Finnish

Leikkaavuudet:

766349A Wave motion and optics 7.0 op
761114P Wave motion and optics 5.0 op
ECTS Credits:
5 ECTS credits / 133 hours of work

Language of instruction:
Finnish. The course material and exercises are available in English.

Timing:
First spring

Learning outcomes:
The student is able to treat different types of waves by methods of general theory of wave motion. The student is also able to solve problems related to basic optics and apply her/his knowledge to teaching and research in physics.

Contents:
General principles of wave motion, sound, electromagnetic waves, propagation of light, image formation in mirrors and lenses, optical instruments, interference, Fraunhofer diffraction, diffraction grating.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 28 h, exercises 14 h, 2 laboratory exercises (3 hours/exercise), self-study 90 h

Target group:
No specific target group

Prerequisites and co-requisites:
Basic skills in mathematics.

Recommended optional programme components:
No alternative course units or course units that should be completed simultaneously

Recommended or required reading:

Assessment methods and criteria:
Two written intermediate examinations or one final examination

Grading:
Numerical grading scale 0 – 5, where 0 is fail

Person responsible:
Seppo Alanko

Working life cooperation:
No work placement period

Other information:
Includes parts:
761310A-01 Wave motion and optics, lectures and exam
761310A-02 Wave motion and optics, lab. exercises

Compulsory

761310A-01: Wave motion and optics, lectures and exam, 0 op

Voimassaalo: 01.08.2017 -
Opiskelumuoto: Intermediate Studies
Laji: Partial credit
Vastuuyksikkö: Field of Physics
Arvostelu: 1 - 5, pass, fail
Opettajat: Seppo Alanko
Opintokohteen kielet: Finnish
Leikkaavuudet:
766349A Wave motion and optics 7.0 op
761114P Wave motion and optics 5.0 op
761114P-01 Wave motion and optics, lectures and exam 0.0 op
Language of instruction:
Finnish. The course material and exercises are available in English.

Timing:
First spring

Learning outcomes:
The student is able to treat different types of waves by methods of general theory of wave motion. The student is also able to solve problems related to basic optics and apply her/his knowledge to teaching and research in physics.

Contents:
General principles of wave motion, sound, electromagnetic waves, propagation of light, image formation in mirrors and lenses, optical instruments, interference, Fraunhofer diffraction, diffraction grating.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 28 h, exercises 14 h, 2 laboratory exercises (3 hours/exercise), self-study 90 h

Target group:
No specific target group

Prerequisites and co-requisites:
Basic skills in mathematics

Recommended optional programme components:
No alternative course units or course units that should be completed simultaneously.

Recommended or required reading:

Assessment methods and criteria:
Two written intermediate examinations or one final examination

Grading:
Numerical grading scale 0 – 5, where 0 is fail

Person responsible:
Seppo Alanko

No work placement period
790349A: World regional geography, 5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Field of Geography
Arvostelu: 1 - 5, pass, fail
Opettajat: Janne Alahuhta
Opintokohteen kielet: Finnish
Leikkaavuudet:

ay790349A World regional geography (OPEN UNI) 5.0 op

ECTS Credits:
5 ECTS
Language of instruction:
Finnish and English.
Timing:
2nd or 3rd year, 1st or 2nd semester.
Learning outcomes:
After the course, the student can define and interpret different regional phenomena and processes in the global level.
Contents:
Regional phenomena of the world and their role in Physical Geography.
Mode of delivery:
Online course in Moodle: [https://moodle.oulu.fi/course/view.php?id=584](https://moodle.oulu.fi/course/view.php?id=584)
Target group:
Recommended for teachers, others voluntary.
Prerequisites and co-requisites:
-
Recommended optional programme components:
Course is part of the minor studies of geography.
Assessment methods and criteria:
Read more about assessment criteria at the University of Oulu webpage.
Grading:
1–5.
Person responsible:
Janne Alahuhta
Working life cooperation:
No.
Other information:
The course will be arranged twice during an academic year. The course consist of five periods. Each of these periods last for two weeks.
