
Master's programme in Economics offers students a strong theoretical and methodological knowledge in Economics. The learning process in economics is based on a cumulative increase of understanding about the economic processes. Exercises and writing of term papers are included in lecture series. Reading of scientific international journals is an essential part of the studies. Job markets for economists are typically broad including specialist and executive positions both on private and public sector. A student who receives the master degree in economics is allowed to use the title economist. Social and economic changes in the operating environment will open all the time new missions for economists. Contents of the teaching are continuously updated based on the changes in the operating environment.

After completing the Master of Science in Economics, the student

- can choose and apply economic theories
- can use and evaluate the newest scientific research and scientific tendencies in their own work
- can use necessary quantitative methods in independent research
- recognizes the traditional and new approaches in economics and can interpret their empirical applications
- can interpret the economic processes and causes and effects of economic relationships and compare the characteristics and applicability of economic models in different situation
- can write about and discuss economic phenomena applying economic thinking
- is able to do independent research work and write and present research reports showing expertise in some field of economics
