Licentiate of Medicine

Tutkintorakenteen tila: published

Lukuvuosi: 2014-15

Lukuvuoden alkamispäivämäärä: 01.08.2014

General studies (33 op)

040105Y: Basic Epidemiology, 1,5 op
040016Y: Basic life support, 0,5 op
041002Y: Environment, Lifestyle and Health Studies, 4 op
    Compulsory
        041002Y-01: Environment, Lifestyle and Health Studies, 1 - 2 op
    Compulsory
        041002Y-04: Environment, Lifestyle and Health Studies, 1 op
        041002Y-05: Environment, Lifestyle and Health Studies, 1 op
040119Y: Environmental health care, 1 op
041001Y: Evidence Based Medicine, 3,5 - 5 op
    Compulsory
        041001Y-01: Evidence Based Medicine-studies, 0,5 - 1 op
        041001Y-02: Evidence Based Medicine-studies, 0,5 op
        041001Y-03: Evidence Based Medicine-studies, 0,5 op
        041001Y-05: Evidence Based Medicine-studies, 1 op
        041001Y-06: Evidence Based Medicine-studies, 0,5 op
    Compulsory
        041001Y-04: Evidence Based Medicine-studies, 0,5 op
040015Y: Health Care Ethics, 1 - 3,5 op
    Compulsory
        040015Y-01: Health Care Ethics compulsory studies, 1 op
        040015Y-02: Health Care Ethics Thesis, 0,5 - 1 op
        040015Y-03: Health Care Ethics Studies, 1 op
        040015Y-04: Health Care Ethics, 1 op
040013Y: Introduction to Medical Studies, 2 op
    Compulsory
        040013Y-01: Introduction to the university studies, 1 op
        040013Y-02: Introduction to Medical Studies, part 2, 1 op
040012Y: Knowledge and Research, 3,5 - 10 op
    Compulsory
        040012Y-01: Information and Communication Technology, small group lessons, 0,5 op
        040012Y-02: Information and Communication Technology, written assignment, 1,5 op
        040012Y-03: Scientific Communication, theme day, 0,5 op
        040012Y-04: Scientific Communication, assignments, 4 op
040012Y-05: Statistical Methods, written examination, 1,5 op
040012Y-06: Statistical Methods, small group lessons, 1 op
040012Y-07: Statistical Methods, assignments, 1 op

040017Y: Leadership in Health Care, 2 op
041003Y: Professional Development in Medicine Studies, 3 op
  compuls5
  041003Y-03: Professional Development in Medicine Studies 3, 1 op
  Compulsory
  041003Y-06: Professional Development in Medicine Studies 6, 2 op

Language and Communication studies (6 op)

902006Y: Reading for Academic Purposes, 1,5 op
902007Y: Scientific Communication, 1,5 op
901006Y: Second Official Language (Swedish), 3 op

Basic studies (81 op)

040201A: Anatomy and medical cell and developmental biology, 21 - 22 op
  compuls9
  040201A-01: Anatomy, examination in cell and developmental biology, 7 op
  040201A-02: Anatomy, examination in neuroanatomy, 4 op
  040201A-03: Anatomy, examinations in small group sessions, 6 op
  040201A-04: Final examination in anatomy, 4 op

040108A: General Pathology, 3,5 - 5 op
  compuls14
  040108A-01: General Pathology, obligatory studies, 2 - 2,5 op
  040108A-02: General Pathology, 0,5 op
  040108A-03: General Pathology, exam, 1 - 2 op

040117Y: Interviewing and examining patients, 4 op
  compuls3
  040117Y-01: General practice, 2 op
  040117Y-02: Internal medicine, 2 op

040103A: Medical Biochemistry and Molecular Biology, 14 - 15 op
  compuls10
  040103A-01: Medical Biochemistry and Molecular Biology Intermediate exams 1, 3 op
  040103A-02: Medical Biochemistry and Molecular Biology Intermediate exams 2, 2 op
  040103A-03: Medical Biochemistry and Molecular Biology Intermediate exams 3, 3 op
  040103A-04: Medical Biochemistry and Molecular Biology Intermediate exams 4, 3 op
  040103A-05: Medical Biochemistry and Molecular Biology Final exams, 1 op
  040103A-06: Medical Biochemistry and Molecular Biology Laboratory works, 1,5 op
  040103A-07: Medical Biochemistry and Molecular Biology Theme day, 0,5 op
  040103A-08: Medical Biochemistry and Molecular Biology Panel discussion, 0,5 op
  040103A-09: Medical Biochemistry and Molecular Biology Patient, 0,5 op

040119A: Microbiology, 9,5 - 10 op
  compuls13
  040119A-01: Microbiology: preliminary exam, 0,5 op
  040119A-02: Microbiology: laboratory works, 2 op
  040119A-04: Microbiology: final exam, 7,5 op

040106A: Pharmacology and toxicology, 10 op
  compuls11
  040106A-01: Pharmacology and toxicology, tutorials, 2 op
  040106A-02: Pharmacology and toxicology, A web-based exam, 1 op
  040106A-03: Pharmacology and toxicology, written exam (part 1), 3 op
  040106A-04: Pharmacology and toxicology, written exam (part 2), 3 op
  040106A-05: Pharmacology and toxicology, final exam, 1 op

040112A: Physiology, 15 op
  compuls12
  040112A-01: Physiology, small group teaching, 2,5 op
  040112A-011: Physiology, biophysics small group teaching, 0,5 op
  040112A-021: Physiology, practicals entry examination, 1 op
  040112A-02: Physiology, term paper, 2 op
040112A-03: Physiology, mid-term examination, 3 op
040112A-04: Physiology, final examination, 6 op
040104A: Psychology, 4 - 4,5 op
  compuls4
  040104A-01: Psychology, obligatory studies, 1 op
  040104A-02: Psychology, final exam, 2 op
  040104A-03: Psychology, compulsory 2, 1 op
040116Y: Public health and interprofessional collaboration, 5 op
  Compulsory
  040116Y-01: Interprofessional collaboration, 3 op
  040116Y-02: Compulsory Studies, 2 op

Intermediate and Advanced studies (192 op)

080601A: Anaesthesiology I, 3 - 4 op
  compuls15
  080601A-04: Anaesthesiology, intubations, 2,5 op
  080601A-07: Anaesthesiology, Resuscitation and vital functions, 1 op
  080601A-08: Anaesthesiology, Optima CPR Exam, 0,5 op
  080601A-09: Anaesthesiology final examination, 0 op
080613A: Anaesthesiology II, 3 op
  Compulsory
  080613A-01: Small group classes, 0,5 op
  080613A-04: Anaesthesiology Examination, 1 op
  080613A-03: Optima examination, 0,5 op
  080613A-02: Theme day, 2 op
080503A: Child psychiatry, 3 op
  compuls24
  080503A-01: Child psychiatry, entering exam, 0 op
  080503A-02: Child psychiatry, final exam, 0 op
  080503A-03: Child psychiatry, logbook, 0 op
042001Y: Clinical Studies, 7 op
  Compulsory
  042001Y-01: Medical Biochemistry and Molecular Biology, clinical studies, 1 op
  042001Y-02: Clinical Physiology 1, 1 - 2 op
  042001Y-04: Clinical Anatomy, 1 op
  042001Y-09: 1st year Medical Biochemistry and Molecular Biology, clinical studies, 2 op
  042001Y-08: Pathology integrated studies, 2nd year, 1 op
080633A: Clinical chemistry, 3 op
  compuls23
  080633A-01: Small group classes Clinical chemistry, 1 op
  080633A-02: Theme Day Laboratory medicine, 0,2 op
  080633A-03: Examination Laboratory medicine, 1,8 op
080505A: Clinical genetics, 2 op
040128A: Clinical pharmacology, 1 op
040127A: Clinical pharmacology and prescriptions, 1 op
  Compulsory
  040127A-01: Clinical pharmacology and prescriptions, literary part, 0,5 op
  040127A-02: Clinical pharmacology and prescriptions, recipe part, 0,5 op
080203A: Dermatology and venereology, 5 op
  compuls26
  080203A-01: Dermatology and venereology Pre-examination, 0,5 op
  080203A-02: Dermatology and venereology Small group classes, 2 op
  080203A-03: Dermatology and venereology Theme day, 1 op
  080203A-04: Dermatology and venereology Seminars, 1 op
  080203A-05: Dermatology and venereology patient cases, 0,5 op
  080203A-06: Dermatology and venereology examination, 1 op
080202A: Forensic medicine, 4 op
  compuls18
  080202A-01: Forensic medicin, obligatory studies, 2 op
  080202A-02: Forensic medicine, exam, 2 op
080914A: Geriatrics, 4 op
080716A: Internal Medicine 2, 4,5 op
Compulsory
080716A-01: Clinical Practice, Internal Medicine 2, 0 op
080716A-02: Infectious Diseases compulsory studies, 1 op
080716A-03: Infectious Diseases, Examination, 1,5 op
080716A-04: Rheumatology, Examination, 1 op
080716A-05: Rheumatology, compulsory studies, 1 op
080716A-06: Internal Medicine 2, Final Examination, 0 op

080711A: Internal medicine I, 4,5 - 21 op
compuls20
080711A-06: Internal Medicine, haematology, 2 op
080711A-07: Internal Medicine, endocrinology, 3 op
080711A-08: Internal Medicine, gastroenterology, 3 op
080711A-09: Internal Medicine, ECG/cardiology, 3 op
080711A-10: Internal Medicine, nephrology, 2 op
080711A-12: Internal Medicine Emergency duties, 0,5 op
080711A-14: Internal Medicine Small group classes, 1 op
080711A-15: Internal Medicine Themedays, 0,5 op
080711A-16: Internal Medicine Clinical practice, 1,5 op
080711A-19: Clinical examination, 0 op

080301A: Neurology, 6 - 6,5 op
compulsory
080301A-02: Neurology, obligatory demonstrations and seminars, 3 op
080301A-03: Neurology, final exam, 3 op

080304A: Neurosurgery, 3 op
compuls21
080304A-01: Neurosurgery, small group rounds, 2 op
080304A-02: Neurosurgery, final exam, 1 op

080510A: OSCE, 0 op

080401A: Obstetrics and gynecology, 10 op
compuls27
080401A-01: Obstetrics and gynecology, entering exam, 0,5 - 1 op
080401A-02: Obstetrics and gynecology, week exams I, II, III, 1 op
080401A-03: Obstetrics and gynecology, 2 op
080401A-05: Obstetrics and gynecology, log book, 4,5 - 5 op
080401A-06: Obstetrics and gynecology, exam, 2 op

080410A: Occupational health, 2 op

080204A: Oncology, 4 op

080303A: Ophthalmology, 4 op
compuls25
080303A-01: Ophthalmology, Pre-examination, 0 op
080303A-02: Ophthalmology, Small group classes, 0 op
080303A-03: Ophthalmology, Final examination, 0 op

080224A: Organ pathology 3, 2 op

Opintojaksojen kuvaUKSET

Tutkintorakenteisiin kuuluvien opintokohteiden kuvaUkset

040105Y: Basic Epidemiology, 1,5 op

Opiskelumuoto: General Studies
Laji: Course  
Vastuuysikko: Medicine  
Arvostelu: 1 - 5, pass, fail  
Opettajat: Jouni Jaakkola  
Opintokohteen kielet: Finnish

ECTS Credits:  
1.5 ECTS  

Language of instruction:  
Finnish/English  

Timing:  
During the second year, spring semester (C4)  

Learning outcomes:  
Upon completion of the course students will understand the basic epidemiologic thinking / basic concepts of epidemiologic methods in medical and health sciences and know the types of epidemiologic studies. They are also able to calculate measures of disease occurrence, use measures of effect to estimate the association between a given exposure and dis-ease and are able to define the concept of confounding and know how to apply it in a given situation.  

Contents:  
Structure of the Course:  
- 1. Introduction to epidemiology; causation  
- 2. Measures of disease occurrence and effect  
- 3. Types of epidemiologic studies: cohort studies  
- 4. Types of epidemiologic studies: case-control studies  
- 5. Biases  
- 6. Random error and statistical methods  
- 7. Analyzing simple epidemiologic data  
- 8. Control of confounding in stratified analysis  
- 9. Interaction  
- 10. Regression models in epidemiology  

In addition, the course includes two exercise sessions conducted in small groups on: 1) epidemiologic methods based on critical reviews of articles and 2) calculation. Students will also review individually and critically an scientific article.

Mode of delivery:  
Face-to-face teaching and independently performed exercise in the Optima environment.

Learning activities and teaching methods:  
The course consists of lectures (10 h), two group exercises (3 h each) and one individual exercise (critical evaluation of an article) which is independently performed in the Optima environment.

Target group:  
Medical and dental students of the second year.

Prerequisites and co-requisites:  
No.

Recommended optional programme components:  
Closely linked to the course in biostatistics taught in the same term.

Recommended or required reading:  

Assessment methods and criteria:  
Participation to the group exercise is mandatory and controlled for. The individual exercise is examined by the teachers. Written final examination.  
Read more about assessment criteria at the University of Oulu webpage.

Grading:  
The course unit utilizes a numerical grading scale 1-5/fail. At least 10 points are required for passing the examination.

Person responsible:  
Professor Jouni Jaakkola.

Working life cooperation:  
No.

Other information:  
No other information.
040016Y: Basic life support, 0,5 op

Voimassaolo: 01.08.2011 -
Opiskelumuoto: General Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Alahuhta, Seppo Matias
Opintokohteen kielet: Finnish

ECTS Credits:
0,5 ECTS

Language of instruction:
Finnish

Timing:
First year, C 2

Learning outcomes:
The students:
- will recognize the patient with cardiac arrest and start the treatment according to CPR guideline including basic life support and defibrillation.
- recognize the need of immediate first aid, knows to prevent deterioration of injuries and support vital functions.
- knows the most important measures which have effect on survival after cardiac arrest
- are willing to continuous training on resuscitation and first aid

Contents:

Mode of delivery:
Blended teaching

Learning activities and teaching methods:
Lectures
practicing in small groups
Independent work

Target group:
For the medical students of the first year

Prerequisites and co-requisites:
The students of the first year.

Recommended optional programme components:
No.

Recommended or required reading:
Basic life support guideline: http://www.kaypahoito.fi/web/kh/suositukset/naytaartikkeli/.../hoi17010

Assessment methods and criteria:
Taking part into the group teaching events.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
pass/fail

Person responsible:
Professor Seppo Alahuhta

Working life cooperation:
No.

Other information:
No other information.

041002Y: Environment, Lifestyle and Health Studies, 4 op

Voimassaolo: 01.08.2011 -
Opiskelumuoto: General Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Op Pettajat: Timo Hugg
Opintokohteen kielet: Finnish

ECTS Credits:
4 ECTS credits/ 106 hours of work

Language of instruction:
Finnish

Timing:
1.-6. academic years
Studies in question belong to track of studies that continue integrated throughout the curriculum

Learning outcomes:
The outcomes of ELH- studies are similar to the outcomes of the ELH-string entity
ELH- track consist of following sub-tracks:
Rehabilitation
Health exercise and sports medicine
Addiction medicine
Nutrition
Environmental health

Upon completion of the course, the student will be able to work in an interprofessional team and
-guide towards right kind of nutrition and exercise and give reasons for the advice
-handle drug abusers properly and recognize and define the need of treatment, and plan it
-describe the influence of environment to one’s health and to discuss matters concerning environmental health
-recognize the need of rehabilitation and plan a rehabilitation program

Contents:
1st year
The topics of the lectures belonging to the Nutrition-side-track
lipid-and water soluble vitamins(6h), minerals(2h)
  1. The synthesis of vitamins/minerals
  2. The influence of vitamins/ minerals on metabolism and
     their tasks in your system
  3. The daily need of vitamins/minerals
  4. The causes and consequences of defiecency of
     vitamins/minerals
The topics of the lectures of addiction medicine (4h)
  1. Alcohol
  2. Drugs

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
1st year:
start seminar jointly with public health and interprofessional collaboration course
lectures and writing tasks:
  • Nutrition: lectures 8 h, self-study 5 h
  • Addiction medicine : compulsory lectures 4 h and self-study which includes writing task
Programme for 4th year and 6th year will be informed later.

Target group:
Graduate students of medicine.

Prerequisites and co-requisites:
No.

Recommended optional programme components:
ELH studies are part of studies including the environment, lifestyle and health (ELH) – track.

Assessment methods and criteria:
1st year:
  • The lectures in nutrition will be examined in the course exams od Medical Biochemistry
  • Addiction medicine includes compulsory lectures and a writing task
The assessment of the course unit is based on the learning outcomes of the course unit.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes verbal grading scale “pass/fail”

Person responsible:
The person in charge of the ELH-studies is Tuula Kaisto.

Following persons are in charge of the sub-tracks:
- Rehabilitation: Jaro Karppinen
- Health exercise and sports medicine: Raija Korpelainen
- Addiction medicine: Pekka Laine
- Nutrition: Olavi Ukkola
- Environmental health: Timo Hugg

Working life cooperation:
No.

Other information:
- compulsory

041002Y-01: Environment, Lifestyle and Health Studies, 1 - 2 op
  
  Voimassaolo: 01.08.2011 -

040119Y: Environmental health care, 1 op

  Opiskelumuoto: General Studies
  Laji: Course
Vastuuyksikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Jouni Jaakkola
Opintokohteen kielet: Finnish

ECTS Credits:
1.0 ECTS credits/ 27 hours of work
Language of instruction:
Finnish/English

Timing:
During the second year, spring semester (C4)

Learning outcomes:
Upon completion of the course, the student will
- get an overview from the system and the function of environmental health
- get to know the most detrimental environmental factors and the health risks associated with those
- understand the role of doctor in the field of environmental health

Contents:
Environmental health consist of following contents:
- Environment and health
- Outdoor air quality and health
- Health effects of hot and cold environment – and control
- Environmental radiation and health
- Environmental noise
- Drinking water, food, microbes, microbiological risks and epidemics
- Chemical risk factors of drinking water
- Physical, chemical and biological risk factors in indoor environments
- Municipal environmental health control
- Exceptional situations related to environmental health – preparation and action
- Role of doctor in environmental health

Mode of delivery:
Face-to-face teaching. The course will be arranged during two seminar days. The course will consist of the lectures, the group works and the final examination.

Learning activities and teaching methods:
The course of environmental health includes:
- 9 h of lectures
- 2.5 h of group works
- 1 h of open conversation

Students will get to know as a group to the case example of environmental health, and try to find answers to the open questions associated with the case examples.

Target group:
Graduate students of medicine and dentistry.

Prerequisites and co-requisites:
No.

Recommended optional programme components:
Studies in question belong to Environment, Lifestyle and Health (ELH) track that continues integrated throughout the curriculum.

Recommended or required reading:
Required reading:
b) Handouts can be loaded from Optima system.

Recommended reading:

Assessment methods and criteria:
The course of Environmental health is an entity with compulsory and active attendance. Students have to participate to the seminar days and pass the final examination.
Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
The course unit utilizes verbal grading scale “pass/fail”

**Person responsible:**
The person in charge of the Environmental health -studies is professor Jouni Jaakkola (research doctor Timo Hugg)

**Working life cooperation:**
No.

**041001Y: Evidence Based Medicine, 3,5 - 5 op**

Voimassaolo: 01.08.2011 -
Opiskelumuoto: General Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Marjo Renko

Opintokohteen kielet: Finnish

ECTS Credits:
4 ECTS credits

Timing:
1-6. yrs

**Learning outcomes:**
After completing EBM studies the student is able to use various information sources and to base clinical decisions on the best available evidence.

**Contents:**
Evidence based medicine (EBM) is the core of modern medicine where all clinical procedures from diagnosis to treatment are based on scientific evidence. Tools to perform EBM are taught from the very beginning of medical studies. The teaching includes for example principles of causation, basics of information technology, biostatistics, epidemiology and clinical decision making. The idea of EBM will be included in all courses during studies.

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**

1. yr (0,5 cr):
Lecture 1 *What is EBM?* Marjo Renko, 15.11.2011
Lecture 2 + group work, Matti Uhari, January 2012

2 yr (0.5 cr):
Lecture 1 *Principles of Epidemiology and what they mean in modern medicine,* Marjo Renko, Matti Uhari
Lecture 2 *Sickness and health. How to appraise diagnostic testing?* Marjo Renko, Matti Uhari

3. lkv (0.5 cr)
Lectures 1 and 2 *Systematic clinical reasoning* Marjo Renko, Matti Uhari

4. lkv (0.5 cr)
Lecture 1 *Study designs*
Lecture 2 *Probability and what does it give to a doctor? The meaning of P-value*
Lecture 3 *Comparing groups with statistical tests*
Marjo Renko, Matti Uhari

5. lkv (1 cr)
Lecture series: *EBM and information sources. How to perform EBM? Further on systematic clinical reasoning,* Marjo Renko, Matti Uhari

6. lkv (1 cr)
Lecture series: *Epidemiology for clinicians,* Marjo Renko, Matti Uhari

**Target group:**
Medical students. 1st and 2nd year dental students.

**Prerequisites and co-requisites:**
No

**Recommended optional programme components:**
EBM-studies are part of studies including the Evidence Based Medicine -track

**Recommended or required reading:**
Assessment methods and criteria:
Lectures and group works. Presence controlled.
Read more about assessment criteria at the University of Oulu webpage.

040015Y: Health Care Ethics, 1 - 3,5 op

Opiskelumuoto: General Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Mäkelä, Jyrki Tapani
Opintokohteen kielet: Finnish
Voidaan suorittaa useasti: Kyllä

ECTS Credits:
Part 1: 1cr
Part 2: 1 cr
Part 3: 1 cr

Language of instruction:
Finnish

Timing:
Part 1: 1st year autumn and spring term
Part 2: 4th year spring term/5 th year (new curriculum)
Part 3: 6th year autumn term

Learning outcomes:
Part 1: Upon completion of the course, the student will be able to use and define the basic concepts of medical ethics and their basis. The student will be able reflect his or her own value system and discuss his or her relation to the laws, norms, ethics and the value base of the society. He or she will also be able to take part in ethical discussion. The student will be able to evaluate the value of learning, what he or she has learned and, his or her responsibility in it.
Part 2: Upon completion of the course, the student will be able to contemplate and discuss the ethical issues involved in clinical work and how to apply them to practice. He or she will also be able to contemplate and discuss the issues involved in research ethics. The student will be able to recognize and evaluate his or her own attitudes towards the issues of health care ethics and the ethical questions concerning the beginning and the end of life, and their background.
Part 3: Upon completion of the course, the student will be able to recognize the social responsibility of the medical profession and to depict the basics of the professional communication. He or she will also be able to apply the principles that guide the medical profession to practice.

Contents:
Part 1: The ethical and judicial basis of the medical profession, the common value base and principles in health care.
Part 2: The ethical questions of different patient groups and individual patients in clinical practice, the principles of research ethics, ethically acceptable application of scientific information to clinical practice, the ethical questions of the beginning and the end of life.
Part 3: The current social challenges in health care ethics, a physician as a part of the health care system.

Mode of delivery:
Face-to-face teaching.

Learning activities and teaching methods:
Part 1: Lectures 3 x 90 min, 1 x 90 min group discussion with teacher, contemplation assignment, tutoring
Part 2: Lectures 1 x 90 min and theme day, contemplation assignment, tutoring
Part 3: Lectures 1 x 90 min and theme day, contemplation assignment, tutoring

Target group:
Medical students. 1st year dental students.

Prerequisites and co-requisites:
No.

Recommended optional programme components:
The course is part of Professional development in medicine – studies including into new curriculum of Medicine

Recommended or required reading:
Lääkärin etiikka (2005) Finnish Medical Association (in Finnish). In addition other scientific literature according to student's choice.

Assessment methods and criteria:
Part 1: Lectures, group discussion, contemplation assignment, learning diary
Part 2: Lectures and theme day, contemplation assignment
Part 3: Lectures and theme day, contemplation assignment

ECTS Credits:
2 ECTS-credits
Language of instruction:
Finnish
Timing:
1.-6. academic years (C1-C12)
Learning outcomes:
Part 1: Introduction to university studies (1. semester): Student knows the structure and goals of the medical education, and orientates to the University of Oulu and Faculty of Medicine as a learning environment.
Part 2: Teacher tutorial (semesters 2-12): Student is able to plan the progression of studies, and builds up his/her professional identity and expertese in medicine.
Contents:
Structure and goals of the medical education, personal study plan (eHOPS), the University of Oulu and the Faculty of Medicine as a learning environment, studying at the university, and becoming a doctor.
Mode of delivery:
Face-to face teaching
Learning activities and teaching methods:
1st year: Information lectures, small group meetings, peer tutoring, planning and evaluating a personal study plan (eHOPS), independent studying, learning diary.

1st-6th year: Teacher tutoring, evaluating a personal study plan (eHOPS), independent studying, learning diary, information lectures

**Target group:**
medical students

**Prerequisites and co-requisites:**
No

**Recommended optional programme components:**
Part of studies belonging to the Professional development in medicine (PMD) -track.

**Recommended or required reading:**
Study guide for the Degree Programme in Medicine and University's Guide for Degree Students.

**Assessment methods and criteria:**
Introduction to university studies (1 ects cr): active participation to peer tutoring, writing a personal study plan. Teacher tutorial (1 ects cr): active participating to teacher tutoring and evaluation of the personal study plan.

Leikkaavuudet:
  ay040012Y  Knowledge and Research (OPEN UNI)  3.5 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:
10 ECTS

Timing:
1st and 2nd year

Learning outcomes:
Upon the completion of the studies the student is able to use the available resources of information technology at the University of Oulu, knows how to use the workstations and data communication available in the Medical Faculty independently, is able to utilize the library services and the most commonly used software in their study, and knows the fundamentals of scientific writing.

The student is familiar with the research process and with the characteristics of scientific information including an ability to obtain and process scientific information, and to report and apply the results especially in the fields of medicine, dentistry and health sciences.

The student knows the role of scientific publications, can use and evaluate information sources critically. The student will be able to search research articles using basic literature retrieval methods and to use bibliographic databases available at the Medical Faculty.

Upon the completion of the module the student is able to recognize different study designs and discipline specific research questions. The student knows basic principles in research ethics and good scientific practice.

The student is familiar with statistical computing in the fields of medicine, dentistry and health sciences. Further, the student is able to analyze data with basic statistical methods, use basic statistical significance tests and inference methods, and evaluate critically scientific research reports.

Contents:
Information and communication technology:
Workstations, information security and confidentiality, networks, and the software needed in the study.

Guidelines for written assignments and word processing:
Structure of assignments and thesis, reporting of findings, tables and figures, citing and references.

Scientific information:
Principles of scientific research, study planning and study designs, ethics in research, research methods in the main disciplines (clinical medicine, epidemiology, biomedicine and health sciences).

Scientific communication:
Scientific journals, research articles, critical evaluation of research findings, ethics in scientific publication and bibliometrics.

Literature retrieval:
Library information systems, medical and dental publications, scientific online journals, Medline, Medic, CINAHL, Scopus, Cochrane Library, electronic books, reference management software.

Scientific communication, study planning, study designs, analyzing research data and reporting.

Special issues in medical research:
Ethics in research, regulations in clinical research and use of animals in scientific research, research groups.

Statistical methods:
Aims and phases of statistical research, planning statistical research, obtaining data, variable distributions (frequencies, graphs and statistics), basics in statistical inference and methods (estimates, significance tests and confidence limits), basic methods in comparing groups and estimating associations between variables, specific methods applied in medical research.

Mode of delivery:
Blended teaching

Learning activities and teaching methods:
1. kv (6,5 ECTS):
040012-01 (0,5 ECTS) Information and Communication Technology, lessons and small group lessons
040012-02 (1,5 ECTS) Information and Communication Technology, written assignment
040012-03 (0,5 ECTS) Scientific Communication, lessons and theme day
040012-04 (4,0 ECTS) Scientific Communication, small group lessons and assignments

2. kv (3,5 ECTS):
040012-05 (1,5 ECTS) Statistical Methods, lessons and written examination
040012-06 (1,0 ECTS) Statistical Methods, small group lessons
040012-07 (1,0 ECTS) Statistical Methods, practical project

Target group:
Medical, dental and medical wellness technology students
Prerequisites and co-requisites:
None
Recommended or required reading:
Material in lessons small group lessons.
Assessment methods and criteria:
Regular and active participation in the small group lessons and completion of practical projects. Written examination. Read more about assessment criteria at the University of Oulu webpage.

Studies in question belong to track of studies that continue integrated throughout the curriculum

Learning outcomes:
The outcomes of the PDM-studies are similar to the outcomes of the PDM-track

PDM- track consist of following sub-tracks:
Ethics
Interaction and communication skills in medicine

PDM-track includes also tutoring
Student grows into the role of medical doctor, and after graduation is able to form medical opinions and converse on the ethical issues and act according to ethical principles of medical profession. Student gains the ability to communicate with patients in a professional manner, take the medical history successfully, diagnose patients and make a realistic plan for treatment, and encourage his/her patients to making healthy choices in their everyday life. Student is fully aware of the importance of patient confidentiality. Student is capable of working as a team member in interprofessional team, and also taking leadership within the interprofessional team when needed. Student knows the natural course of human life span and is able to describe the concepts of health, illness and patient safety. Student recognizes not only his/her own values, but also the values of his/her patients and the health sector. Student becomes aware of his/her own motivation and limitations and their influence to his/her every day work with patients.

Contents:
PDM- track consist of following sub-tracks:
Ethics
Interaction and communication skills in medicine

PDM-track includes also tutoring. There is also PDM-teaching integrated in the teaching of various substances and tracks.

Mode of delivery:
Course unit is delivered as face-to-face teaching

Learning activities and teaching methods:
1.yr
Lectures (6h): Ethics 1 (Pekka Louhiala)
Ethics 2  (Veikko Launis)  
Ethics 3  (Minna Soini)  
Group discussions,  Written essay (C2) and self-study

2.-6-yrs Programme will be informed later

4.yr(1 ECTS): Seminar of ethics  
5.yr (1 ECTS): Lectures on ethics

C1-12 the implementation of methods of the Communication and interaction track vary as it is mainly integrated to other courses and is part of teacher tutoring and learning log book working.

**Target group:** 
Graduate students of medicine

**Prerequisites and co-requisites:** 
No

**Recommended optional programme components:**
PDM- studies are part of the studies belonging to the Professional development in medicine (PDM)-track. Other studies that belong to the LAK- string/track:

1.yr : Introduction to medical studies  
   Basic life support  
6.yr : Leadership in health care

During 1.-6.yrs also:  
   Tutoring,  
   Self evaluation and peer evaluation  
   Learning diary

**Recommended or required reading:**
Ethics:  
Nurmi JE ym. 2006; Ihmisen psykososiaalinen kehitys, Helsinki WSOY

**Assessment methods and criteria:**
Participation in lectures, tutoring and seminars, completing the reflection tasks and learning diary. OSCE exam in C10  
Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
The course unit utilizes verbal grading scale “pass/fail”

**Person responsible:**
Teija Parpala and Essi Varkki

sub-tracks have their own persons responsible:
Ethics: Jyrki Mäkelä  
Communication and interaction: Päivi Lindholm

**Working life cooperation:**
Communication and interaction track is integrated to every work placement during different courses

**Other information:**

- compuls5

041003Y-03: Professional Development in Medicine Studies 3, 1 op  

**Voimassaolo:** 01.08.2011 -

**Opiskelumuoto:** Intermediate Studies  
**Laji:** Partial credit  
**Vastuuysikkö:** Medicine  
**Arvostelu:** 1 - 5, pass, fail  
**Opintokohteen kielet:** Finnish
Compulsory

041003Y-06: Professional Development in Medicine Studies 6, 2 op

Voimassaolo: 01.08.2011 -
Opiskelumuoto: Intermediate Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

902006Y: Reading for Academic Purposes, 1,5 op

Voimassaolo: 01.08.1995 -
Opiskelumuoto: Language and Communication Studies
Laji: Course
Arvostelu: 1 - 5, pass, fail
Opettajat: Eva Braidwood
Opintokohteen kielet: English
Leikkaavuudet:
  ay902006Y    Reading for Academic Purposes (OPEN UNI)    1.5 op

Proficiency level:
B2/C1
Status:
This course is compulsory for the students who choose English but are not exempted on the basis of their matriculation exam grade or an exemption exam. An alternative course is 903007Y German.
Required proficiency level:
Students are expected to have had English as their A1 or A2 language at school or to have acquired equivalent skills.
ECTS Credits:
1,5 ECTS credits
Language of instruction:
English
Timing:
1 st year spring term.
Learning outcomes:
Having completed the course, students will be able to
- understand and master basic medical terminology
- understand the use of appropriate vocabulary and text types in professional communication (with patients and colleagues)
- assess, combine and summarise information from various academic/scientific sources (scientific articles, medical databases and popular texts related to medicine)

Contents:

Mode of delivery:
Contact teaching
Learning activities and teaching methods:

Target group:
Students in the degree programs of medicine, dentistry, and medical technology
Prerequisites and co-requisites:

Recommended optional programme components:
902007Y Scientific Communication
Recommended or required reading:
Specific texts and material prepared by the teacher. Information will be provided at the beginning of the course. Material will be available in Optima during the course.

Assessment methods and criteria:
The course requirements include active participation in classroom work (20hrs) and completion of home assignments (Reading journal and glossary: 20 hrs). Alternatively, an end-of-course examination may be offered. Some course work will be completed online.

Read more about assessment criteria at the University of Oulu webpage.

Grading:
The evaluation scale is 1-5.

Person responsible:
Eva Braidwood

Working life cooperation:
-

Other information:
Students with the matriculation exam grade laudatur or eximia cum laude approbatur are exempted from the course but can participate voluntarily. The same applies to those who have graduated from an IB–program or other English medium secondary education.

For the rest of the students can take an exemption exam in November. The exemption exam is voluntary and can be taken only once. Students sign up for the exam in WebOodi between 1st -15th November.

902007Y: Scientific Communication, 1,5 op

Voimassaolo: 01.08.1995 -
Opiskelumuoto: Language and Communication Studies

Laaji: Course
Arvostelu: 1 - 5, pass, fail

Opettajat: Eva Braidwood

Opintokohteen kielet: English

Leikkaavuudet:
ay902007Y Scientific Communication (OPEN UNI) 1.5 op

Proficiency level:
B2/C1

Status:
This course is compulsory for the students who have chosen English. An alternative course is 903008Y German.

Required proficiency level:
Students are expected to have had English as their A1 or A2 language at school or to have acquired equivalent skills.

ECTS Credits:
1,5 ECTS credits

Language of instruction:
English

Timing:
Students in the degree program of
o medicine: 4th year fall term
o dentistry: 3rd year spring term
o wellness technology: 1st year fall term

Learning outcomes:
Having completed the course students will be able to
- use the English language for professional and academic communication in the student's field of study,
- communicate fluently and accurately and express opinions and demonstrate their knowledge of the field specific to their studies,
- summarize texts on professional and academic topics in the target field,
- give a presentation on a professional or academic topic relating to the student's field of study.

Students with adequate oral skills previously acquired, may choose, as an alternative, a writing course. Having completed this course, students will be able to
- write a research article that follows the main discourse conventions of the target field,
- use grammatical patterns that are stylistically appropriate for the research articles of the target field,
- use general scientific vocabulary and field specific terminology in an idiomatic way,
- create field-specific patterns of text structure,
- develop a systematic argument with supporting detail.

The evaluation scale is 1-5.

Person responsible:
Eva Braidwood

Working life cooperation:
none

Other information:
Medical students sign up for the course in WebOodi from August 15th. Information on the time and place of the classes will be provided in Optima and WebOodi.
Wellness technology and dentistry students sign up at their departments.

901006Y: Second Official Language (Swedish), 3 op

Voimassaalo: 01.08.1995 -
Opiskelumuoto: Language and Communication Studies
Laji: Course
Opintokohteen kielet: Swedish

Proficiency level:
B1/B2 (CEFR scale)

Status:
This course is compulsory to all students. The language proficiency provided by the course is equivalent to the language proficiency required of a state official with an academic degree working in a bilingual municipality area (Act 424/03 and Decree 481/03).

ECTS Credits:
3 ECTS credits (80 h)

Language of instruction:
Swedish

Timing:
2nd year of studies

Learning outcomes:
Upon completion of the course unit the student should have achieved the Swedish language proficiency required in his/her professional work tasks. He/she should be able to manage in typical professional communication situations. The student should be able to understand spoken language of his/her field, use Swedish in various professional situations, read and write texts related to his/her field. He/she should have developed a readiness to improve his/her language proficiency in genuine language use situations.

Contents:
Communicative oral and written exercises, which aim to develop the student's Swedish proficiency in areas relevant to his/her academic field and future professional tasks. The student practises oral presentation and pronunciation. Situational oral exercises done individually and in pairs and groups. Discussions in small groups. Current texts about
the student's special field. Listening comprehension exercises. Written exercises relating to the student's professional field.

Mode of delivery:
Contact teaching

Learning activities and teaching methods:
The course consists of 40 hours of contact teaching and related exercises and 40 hours of independent study. The total workload of the course unit is 80 hours.

Target group:
Students of Medicine

Prerequisites and co-requisites:
See Required Proficiency Level

Recommended optional programme components:
-

Recommended or required reading:
Course material will be distributed during the course

Assessment methods and criteria:
The course unit focuses on improving both oral and written language skills and requires active attendance and participation in exercises, which require preparation time. The course unit tests both oral and written language skills. There are 4 teaching groups in the autumn semester and 2 in the spring. Compensatory exam: a two-part compensatory exam is held at the beginning of the autumn semester. The exam is voluntary and consists of a written section and an oral section. The compensatory exam is only recommended for students who are already proficient in written and spoken Swedish as well as the Swedish of their own special field. If a student proves that he/she is proficient enough and passes both sections of the exam, he/she does not have to take part in the course unit. Students sign up for the written part of the exam by the end of May preceding the exam via email hanna-leena.ainonen@oulu.fi. The oral part of the exam is held for students who pass the written part at a date and time agreed upon separately. Separate grades are given for the written and oral parts of the exam. Grading scale: fail / satisfactory skills / good skills. The grades are based on continuous assessment and testing. Read more about assessment criteria at the University of Oulu webpage.

Grading:
Oral and written language proficiencies are tested separately and assessed using the so called KORU-criteria (publication of HAMK University of Applied Sciences, 2006). Separate grades will be awarded for the successful completions of both oral and written portions of the course unit: the possible passing grades are satisfactory skills and good skills (see language decree 481/03). The grades are based on continuous assessment and testing.

040201A: Anatomy and medical cell and developmental biology, 21 - 22 op

Voimassalo: 01.08.2010 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Tuukkanen, Kaarlo Juha Kullervo
Opintokohteen kielet: Finnish

ECTS Credits:
21-22 ECTS credits / 567-594 hours of work

Language of instruction:
Finnish

Timing:
The course unit is held in the autumn semester. The course is recommended to complete at the first autumn semester of medical or dental studies.

Learning outcomes:
Upon completion of the course the student should be able to:
- understand the structure, development and function of the human body in order to manage the rest of the preclinical and clinical studies
- identify and describe the structures essential for all medical doctors in diagnostics and treatment, especially for first aid.
- display common anatomical knowledge for understanding medical theory and research and for dealing with evidence based medicine.

Upon completion of the medical cell and developmental biology part of the course the student should be able to:
- describe the structure of various cell types (especially mammalian cells) and the structure and function of cell organelles
- describe cell growth and cell division
- present the principles of the regulation of cell function and genetic regulation
- list the common research techniques in cell biology
- display an understanding of gametogenesis, fertilization, embryonal development (0-40days) and its regulation as well as the development of embryonal malformations.
- display an understanding of human growth and development.
- identify and describe the basic tissues of the human body and the microscopic structure of the tissues for understanding their normal and pathological function

Upon completion of the anatomy part of the course the student should be able to describe the structure of the organs and their topography in the body as well as surface projections of the internal organs. The student should be able to understand the main principles of the embryonal development. By using light microscope at the student should be able to recognize the main structures that are important for the function of the organs as well as structures which are important for pathological processes. In addition the student should be able to demonstrate the organs in living body, in preparations of the cadavers, anatomical models, X-ray images, diagrammatic drawing and in manual examination.

Contents:
Cell evolution and cell biology, human embryonal development (embryology), basic tissues which make up the organs (histology).
Systemic anatomy: nervous system and sensory organs, cardiovascular system and lymphatic system, thorax and respiratory system, abdomen and alimentary system, integument, pelvis, urinary system, genital systems, endocrine system and musculoskeletal system. Regional anatomy and topographical anatomy, organ development and histology integrated with the previous titles. Examples of the applications of the anatomical knowledge in clinical cases and manual palpation of main organs and structures.

Mode of delivery:
Face-to-face teaching.

Learning activities and teaching methods:
Lectures 140h / small group exercise 75h / Self-study 352 h (includes essay). Small group teaching will be provided in 2-4 h exercises. Each student will have 1-2 exercise sessions per week. Writing an essay in cell and developmental biology. In addition the dental students have at the 2nd term tooth development, histology and morphology given by the department of Dentistry. Anatomy study module includes an optional course of the anatomical dissection.
In addition 1 ECTS of clinical anatomy during clinical courses.

Target group:
First year medical and dental students.

Prerequisites and co-requisites:
The recommended prerequisites for the course unit is Faller and Schuenke, The Human Body. An Introduction to Structure and Function (Thieme), or similar text.

Recommended optional programme components:
The course must be completed during the preclinical stage of studies.

Recommended or required reading:

Anatomy

Textbooks:

Atlas:

Pocket atlas:

Neuroanatomy

Embryology:
Cell Biology:

Histology:
Histology atlas can be found also in Thiemen e-books. (Color Atlas of Cytology, Histology and Microscopic Anatomy, 4th edition).

Web material:
http://herkules.oulu.fi/isbn9789514293238/ collection of essays written by students from previous courses of Medical cell and developmental biology.

Assessment methods and criteria:
This course unit utilizes continuous assessment. During the course unit, there are small exams every during each group practical (35 together). Half of the macroscopic anatomy exams and half of exams in each histology block (1-3) should be passed. In addition to this, the students will be compiling an essay, which will be assessed. The course unit includes three main exams: one in cell biology, one in neuroanatomy and one in organ anatomy. The assessment of the course unit is based on the learning outcomes of the course unit.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.
Anatomy together with cell and developmental biology make the Anatomy course, which is composed of the following grades: examination of cell and developmental biology 30 credit points, neuroanatomy 10 credit points, examinations in small group sessions 30 credit points and final examination in anatomy 50 credit points, in sum 120 credit points graded to 0-5.

Person responsible:
Professor Juha Tuukkanen: Anatomy
Professor Petri Lehenkari: Medical cell and developmental biology

Working life cooperation:
No

Other information:
The course is the same for medical and dental students.

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Karttunen, Tuomo Juhani
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS credits
Language of instruction:
Finnish
Timing:
2nd year, autumn (C3/DC3)
Learning outcomes:
Upon completion the student should know the basic mechanisms of diseases (etiology and pathogenesis), their basic morphological, functional and clinical characteristics, and terminology related with diseases. The student should be able to recognize the most common macroscopic and microscopical features of diseases and be able to reason the relationship between these features of the diseases and their symptoms and other clinical manifestations.

Contents:
Cellular adaptation; cell and tissue injury; genetic and environmental causes of diseases; infections and immunological mechanisms in disease; inflammation; healing; disorders of fluid balance and circulation; basic pathology of neoplastic diseases; basics of medical post-mortem investigation.

Mode of delivery:
Face-to-face teaching.
Learning activities and teaching methods:
Lectures 25 hours, practicals 33 hours. Self study. Written examination 3 hours.
Target group:
Medical and dental students.
Prerequisites and co-requisites:
No.

Recommended optional programme components:
The course has to be completed during preclinical period of medical and dental studies.

Recommended or required reading:
Web-based material (in Finnish): Please, see Optima

Assessment methods and criteria:
The course requirements include participation in the compulsory practicals and passing in the end-of-course examination.
Read more about assessment criteria at the University of Oulu webpage.
Grading:
The evaluation scale is 1-5/fail.
Person responsible:
Professor Tuomo Karttunen
Working life cooperation:
No.

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Savolainen, Markku, Markku Timonen
Opintokohteen kielet: Finnish
ECTS Credits:
4 ECTS: general practice 2.0 and internal medicine 2.0 ECTS
Language of instruction:
Finnish
Timing:
The second year (C4), spring semester
Learning outcomes:
Upon completion of the course, the student is able to:
- distinguish the basic concepts of doctor-centered and patient-centered communication;
- describe the principles of clinical examination of patients.
- exam patients independently;
- describe the interprofessional team-work in the physician’s as well as the dentist's work.
Contents:
The course includes introduction to basic concepts of doctor-centered and patient-centered communication, the medical history and patients record, as well as clinical examination of patients with musculoskeletal, stomach, lungs, heart, neurological problems.
Mode of delivery:
Face-to-face teaching.
Learning activities and teaching methods:
Lectures (14 hours), introductory seminar, small group teaching, exercise session for doctor-patient communication, practical period in health care center (3 days), and closing work-shop.
Target group:
The students from medicine and dentistry.
Prerequisites and co-requisites:
C1 Public health and interprofessional collaboration course have to be done.
Recommended optional programme components:
The course has to be completed during preclinical period (first two years) of medical and dental studies.
Recommended or required reading:
Assessment methods and criteria:
Participation in the introductory seminar, small group teaching, exercise session for doctor-patient communication, practical period in health care center, and in closing work-shop.
Read more about assessment criteria at the University of Oulu webpage.
Grading:
Pass/fail
Person responsible:
Professor Markku Timonen; general practice
Professor Markku Savolainen; internal medicine
Working life cooperation:
Yes, during the three day practical training in health centres.

040103A: Medical Biochemistry and Molecular Biology, 14 - 15 op

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Faculty of Biochemistry and Molecular Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Karppinen, Peppi Leena Elina
Opintokohteen kielet: Finnish

ECTS Credits:
15 ECTS credits /398 hours of work
Language of instruction:
Finnish
Timing:
The course unit is held in the spring semester.
Learning outcomes:
Aim of this course is to learn the function of the cells at the molecular level and recognize the basic biochemical compounds, reactions and the overall regulation of various metabolic pathways, especially those which are meaningful for Medicine. Students will also learn the basics of chemistry, molecular biology and common methodology used in molecular biology.
Contents:
General and inorganic chemistry: Basic concepts of chemistry; structure of atom; chemical bond; chemical formula, reaction and equations, stoichiometry; thermodynamics; phase equilibrium; reaction kinetics; chemical equilibrium; acid/base equilibrium; electrochemistry. Organic chemistry: nomenclature of organic compounds; carbon bonds; stereochemistry; properties and reactions of organic compounds; Structure of carbohydrates, amino acids, lipids and nucleic acids; metabolism of the carbohydrates, amino acids, lipids and nucleic acids; vitamins; minerals; porphyrins and bile pigments; prostaglandins; thromboxanes; leukotrienes; regulation of gene expression; recombinant DNA technology; stem cells; intracellular messengers; energy metabolism; hormones; hypoxia response of the cells; components and function of extracellular matrix.
Mode of delivery:
Lectures, tutorial teaching, laboratory work, web-based teaching, exams.

Learning activities and teaching methods:
Lectures 120 h; optional possibility to practice calculations; laboratory work including tutorial teaching and verbal evaluation 30 h; tutorial teaching 3t; theme day containing preliminary preparations 9 h; exams.

Target group:
Major students.

Prerequisites and co-requisites:
-

Recommended optional programme components:
-

Recommended or required reading:

Assessment methods and criteria:
Medical biochemistry and molecular biology course includes 4 different intermediate exams; the first exam with principle of fail or accepted, and the rest exams will be graded (4 essays, 0-2.5 p/essay, points needed for passing 4.75). Final exam consist of 5 essays (0-10 p/essay). In final exams only 1 essay from 5 can have points lower than 4.5, otherwise exam will be failed. All the intermediate exams should be passed before participation in final exam. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Opettajat: Olli Vainio
Opintokohteen kielet: Finnish
Leikkaavuudet:
040118A Microbiology 9.5 op

ECTS Credits:
10 ECTS credits.
Language of instruction:
Finnish. Some lectures given in English.
Timing:
Autumn 2014, continues spring 2015.
The course unit is held in the second year, C3-C4.
Learning outcomes:
Upon completion of the study module, the student masters the basic knowledge of disease-causing microbes and parasites, their characteristics, preferential modes of the treatment and their diagnostic methods. The student knows the structure and function of body's immune defense mechanism and is able to use immunological methods in clinical diagnostics.
Contents:
Bacteriology, mycology and parasitology: Terminology and principles of clinical microbiology. Diagnostic methods in clinical bacteriology, mycology and parasitology. Basic knowledge of bacteria causing infectious diseases, their laboratory diagnostic procedures and basic guidelines for treatment.

Virology: basic concepts and biological properties of viruses and the essential methods in their clinical diagnostics. Understanding of viruses as disease-causing agents, their epidemiology, prevention and therapeutic possibilities.

Immunology: basic concepts of the structure and function of the immune system. Pathomechanisms of autoimmune diseases. Diagnostic methods in serology and autoimmune diseases.

**Mode of delivery:**
Face-to-face teaching, but also learning in small groups or independently.

**Learning activities and teaching methods:**
Lectures and group instructions.
Different methods of study may be used during the course, including written essays, learning in small groups or independently etc.

**Target group:**
The students from study program in medicine and dentistry.

**Prerequisites and co-requisites:**
No.

**Recommended optional programme components:**
The course has to be completed during the first two years of medical and dental studies.

**Recommended or required reading:**
Hedman, Heikkinen, Huovinen, Järvinen, Meri, Vaara (toim.) Mikrobiologia and Infektiosairaudet. Osat 1 and 3, Duodecim 1. painos 2010 and 2011.

**Immunology:**

**Assessment methods and criteria:**
Lectures, participation in the compulsory teaching (group teaching/instruction) and indicated assignments.
Evaluation is based on entrance and final exam but also methods of continuing evaluation may be used (e.g. written assignments).
Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
The course utilizes a numerical grading scale 0-5. In the numerical scale zero stands for a fail.

**Person responsible:**
Professor Olli Vainio.

**Working life cooperation:**
No.

---

**Compulsory courses**

**040119A-01: Microbiology: preliminary exam, 0,5 op**

Voimassaolo: 01.01.2012 -
Opiskelumuoto: Basic Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Olli Vainio
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

**040119A-02: Microbiology: laboratory works, 2 op**

Voimassaolo: 01.01.2012 -
Opiskelumuoto: Basic Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Olli Vainio
Opintokohteen kielet: Finnish
040119A-04: Microbiology: final exam, 7,5 op

Voimassaolo: 01.01.2012 -
Opiskelumuoto: Basic Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Olli Vainio
Opintokohteen kielet: Finnish

040106A: Pharmacology and toxicology, 10 op

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Hakola, Jukka Antti Tapio
Opintokohteen kielet: Finnish

Required proficiency level:
10 ECTS Credits / 267 hours of work
ECTS Credits: 10.0 p
Language of instruction:
Finnish

Timing:
The course unit is held in the spring semester C4 / DC4

Learning outcomes:
Upon completion of the course the student knows fundamentals of pharmacology and toxicology. The student is able to explain how body affects a specific drug after administration and physiologic effects of drugs and their mechanisms of action. The student is familiar with major drug classes and their role in the treatment of disease. Furthermore, the student understands the basis of individualized drug therapy. After passing the course, the student has ability to safe and efficient drug therapy.

Contents:
The basic terminology of pharmacology: pharmacodynamics and pharmacokinetics. Systematic review of major classes of drugs: drugs affecting cardiovascular system, gastrointestinal drugs, drugs affecting the respiratory tract, drug treatment of pain, drugs used to treat endocrinological disorders, affecting the central nervous system, anesthetic agents, antimicrobial drugs, anticancer drugs. Details of key drugs in each class will be discussed including route of administration, drug effects, drug interactions and most common adverse effects. Toxicology: the basics of toxicology, the most common poisonings, tissue specific toxic responses in most important organs and fundamentals of risk assessment.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 74h / tutorials 20h / Self-study 173h. The tutorials are completed as small group work.

Target group:
Medical and dental students. Also other students can be admitted to the course.

Prerequisites and co-requisites:
-

Recommended optional programme components:
-

Recommended or required reading:
Olavi Pelkonen and Heikki Ruskoaho (eds.) Lääketieteellinen farmakologia ja toksikologia (Kustannus Oy Duodecim) (latest edition) or equivalent textbook.
Assessment methods and criteria:
At the beginning of the course students study independently for a test evaluating the required level of knowledge of pharmacokinetics and pharmacodynamics. In addition, two essay examinations (worth one-third of the final grade) and final exam (worth two-thirds of the final grade) are included. The tutorials are compulsory.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
The evaluation scale is 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Heikki Ruskoaho, professor Jukka Hakkola.

Working life cooperation:
No

040112A: Physiology, 15 op

Voimassaolo: 01.08.2005 -
Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Vuolteenaho, Olli Jaakko Tuomas
Opintokohteen kielet: Finnish

ECTS Credits:
15 ECTS credits /402 hours of work
Language of instruction:
Finnish. Some lectures, a practical and some of the term papers in English.
Timing:
The course unit is held in the autumn semester. The course must completed during the first two years of the Medical School curriculum
Learning outcomes:
After completion of the course the student:
- knows the principles of the function, regulation, and interrelations of the cells, tissues and organ systems of the healthy human being, as required for independent work as a physician or dentist
- can evaluate the knowledge and apply it for investigations of clinical physiological problems and mechanisms of diseases
- can follow and evaluate the development of physiology as a science, and maintain and improve knowledge in it
- can apply knowledge in physiology for acquiring, evaluating and reporting scientific medical and dental information
After reaching the learning aims the student has sufficient knowledge and skills in physiology for studies leading to the degrees of Licenciate of Medicine and Licenciate of Dentistry, and for continuous learning.
Contents:
1. Cell physiology
2. Fundamentals of Biophysics
3. Organ physiology
4. Physiological regulation and integrative physiology
5. Applied physiology
Mode of delivery:
Face-to-face teaching
Learning activities and teaching methods:
Guidance and tutorial (3 h), lectures (106 h), practicals (38 h), term paper (2 h), interim and final examinations (8 h), independent study (245 h).

**Target group:**
Second year medical and dental students.

**Prerequisites and co-requisites:**
The student should have completed the courses of Anatomy, Cell Biology, and Medical Biochemistry & Molecular Biology.

**Recommended optional programme components:**
- 

**Recommended or required reading:**
- Ganong’s Review of Medical Physiology (most recent edition).
- Lecture notes can be found in Optima Environment (http://optima.oulu.fi).
  The availability of the textbook in the library can be checked [here](http://optima.oulu.fi).

**Assessment methods and criteria:**
A
At the beginning of the course there is an examination on the subject of the practicals, which has to be passed. In the middle of the course there is an interim examination on the course contents 1-3, and at the end the final examination. The student has to obtain one third of the maximum points to pass these examinations. Detailed requirements can be found during the course period in the document Course Instructions in the Optima Environment (http://optima.oulu.fi).

**Grading:**
The course unit utilizes a numerical grading scale 1-5. Zero stands for a fail.

ECTS Credits: 4 ECTS.

Language of instruction: Finnish

Timing: Autumn, C3

Learning outcomes: A student learns to see a human comprehensively, from biopsychosocial frame of reference, finds new ways to observe and to influence with psychological methods on patients and their behaviour. Furthermore, an objective is, to help future medical and dental doctor to observe their influence on the behaviour of patients, and on operations of health caring system. Finally, a goal is to develop interactional skills of future doctors, to assist them to be able to continue their working and to prevent their vicarious traumatisation.

Contents: During lectures the following topics will be presented: Biopsychosocial approach, psychoanalytic personality theory, attachment theory, human lifespan, significance of learning theory in changing man's behaviour, basics of system theory, medical and dental doctor as a participant in the mental health care system, different kind of families and their phases of development, well-functioning family, roles of family members, interactional skills and dialog with patients and successfully working with different kind of patients. Furthermore vicarious traumatisation and exhaustion and how to manage them will be described. Topics of small groups are for instance problem solving therapy, traumatic crises, familial and cultural influence on behaviour of a human, youth psychology, psychology of old age, patient and family in health service and forensic psychology.

Mode of delivery: Tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods: Lectures 26 hrs, obligatory small group participation 10 hrs, obligatory seminar participation 20 hrs, peer group participation 10 hrs and self studying.

Target group: Medical and dental students on C 3 course.

Prerequisites and co-requisites: -

Recommended optional programme components: -

Recommended or required reading: Contents of the lectures and written and oral presentations of the works of small groups.

Assessment methods and criteria: End of course examination

Grading: 1-5/fail

040116Y: Public health and interprofessional collaboration, 5 op

Opiskelumuoto: Basic Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Markku Timonen, Jouni Jaakkola
Opintokohteen kielet: Finnish

ECTS Credits:
5 ECTS cr / 153 hours of work.
Language of instruction:
Finnish
Timing:
The course unit is held in the first year, autumn semester, C1.
Learning outcomes:
After the study module students are able to identify the essential challenges of Finnish public health and to describe Finnish health and social welfare systems and national strategies guiding them. In addition students are able to identify the factors that improve doctor-patient relationship and interprofessional collaboration in the work of doctor and dentist.
Contents:
Public health and sickness and inequality in health, concepts of health and sickness, concepts and means of health promotion, concept of positive health, essential concepts and theories of health sociology, doctor-patient relationship and interprofessional collaboration.
Mode of delivery:
Blended teaching.
Learning activities and teaching methods:
Lectures, demonstrations, e-learning, practical period in health care center (3 days), small group working, participating in student congress and preparing the presentations for the congress. Part of the teaching is carried out in collaboration with the students from Oulu University of Applied Sciences.
Target group:
The students from medicine and dentistry and the students from Oulu University of Applied Sciences.
Prerequisites and co-requisites:
No.

Recommended optional programme components:
The course has to be completed during preclinical period of medical and dental studies.

Recommended or required reading:
R

Recommended literature:

Assessment methods and criteria:
Participation in the demonstrations, group works, e-learning, practical period in health care center and in student congress, examination.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Accepted/fail

Person responsible:
Professor Jouni Jaakkola; public health
Professor Markku Timonen; general practice

Working life cooperation:
Yes, during the thee day practical training in health centres.

**080601A: Anaesthesiology I, 3 - 4 op**

**Opiskelumuoto:** Intermediate Studies  
**Laji:** Course  
**Vastuuysikkö:** Medicine  
**Arvostelu:** 1 - 5, pass, fail  
**Opettajat:** Alahuhta, Seppo Matias  
**Opintokohteen kielet:** Finnish

**ECTS Credits:**  
4ECTS  
**Language of instruction:**  
Finnish.  
**Timing:**  
During third year, C 5-C 6  
**Learning outcomes:**  
The students recognize cardiac arrest and can resuscitate. He or she knows what belongs to advanced life support both in adults and children. The student knows how to treat the patient after successful resuscitation. He or she recognizes life threatening cardiac arrhythmias. The student knows how to examine the patient pre-operatively. He or she knows the basics of fluid and nutritional therapy. The student knows the basics of infusion therapy and knows how to manage the airway. He or she knows the local anaesthetics and the techniques of regional anaesthesia. The student understands the basics of general anaesthesia and monitoring during the anaesthesia. He or she is able to recognize the unstable patient and knows how to start the treatment.

**Contents:**  
Theoretical part: resuscitation and first aid, pre-operative examination and treatment, anaesthetic drugs and anaesthesia methods, regional anaesthesia, monitoring of the patient, nutrition and infusion therapy.  
Small group teaching: cardio pulmonary resuscitation, managing the airway, basics of fluid therapy, managing of critically ill patients, practical duty in operating theatres.  
**Mode of delivery:**  
Blended teaching  
**Learning activities and teaching methods:**  
Lectures, theme days, practicing in small groups, practicing in operation theatres, web exams (Optima).  
**Target group:**  
For the students of the third year.  
**Prerequisites and co-requisites:**  
Preclinical studies completed.  
**Recommended optional programme components:**  
The course is performed simultaneously with other third’s year’s courses.  
**Recommended or required reading:**  

Material handed out during the course.  
**Assessment methods and criteria:**  
Taking part into the group teaching events, theme days and practicing in operation theatres. Web exam of resuscitation. Written end examination.  
Read more about [assessment criteria](#) at the University of Oulu webpage.  
**Grading:**  
Pass/fail  
**Person responsible:**  
Professor Seppo Alahuhta  
**Working life cooperation:**  
Yes (practical training in the operating room)  
**Other information:**  
No other information

Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Alahuhta, Seppo Matias
Opintokohteen kielet: Finnish

ECTS Credits: 3 ECTS
Language of instruction:
Finnish

Timing:
Fourth year, C 7- C 8

Learning outcomes:
Upon completion of the course the student:

- has theoretical and practical knowledge of pain treatment both in acute and chronic pain
- is able to explain the social and economical meaning of the pain
- understand basic mechanism of the pain and pain control and can plan the treatment of the pain patient
- knows how to treat pain among special patient groups (e.g. children and elderly people)
- can consultate the multidisciplinary professional team for diagnostics and treatment of chronic pain patient
- knows how to treat cancer pain
- is able to recognize and start treatment in disorders of vital signs
masters fluid and nutrition disorders in-depth

Contents:

The student will deepen his or her knowledge on fluid and nutritional therapy.

Mode of delivery:
Blended teaching

Learning activities and teaching methods:
Variable teaching and learning methods:

Lectures 6h

Practicing in small groups 2 h

Other compulsory teaching

Exams (2) (Variable evaluation methods: book examination, oral examination, web-exam)

Target group:
For the students of the fourth year.

Prerequisites and co-requisites:
The required prerequisite is the completion of the following course prior to enrolling for the course unit:
Anesthesiology 1

Recommended optional programme components:
No

Recommended or required reading:
Textbooks:
- Seppo Alahuhta, Tero Ala-Kokko, Kai Kiviluoma, Juha Perttilä, Esko Ruokonen, Tom Silfvast (toim.)

080503A: Child psychiatry, 3 op

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Medicine

Arvostelu: 1 - 5, pass, fail

Opettajat: Ebeling, Hanna Elina

Opintokohteen kielet: Finnish

ECTS Credits:
3,0 ECTS / 80 hours of work

Language of instruction:
Finnish

Timing:
C 9 and C 10

The course unit is held in the autumn semester and spring semester.(C10)

A lecturer during C9

Learning outcomes:
The student who has passed the course of Child Psychiatry is able to describe the normal psychological development of children, and is able to distinguish mental disorders in different developmental phases. He knows child psychiatric health care organization, legislation and is able to diagnose and treat the most common child psychiatric disorders. The students will have readiness to work as a physician in the health center and as a junior trainee in the hospital.

Contents:
1) Lectures:
- the diagnostics and treatment of the most common child psychiatric disorders and child psychiatric health care organization as well as the main legislation.
- prevention of child psychiatric disorders
2) Special themes:
- sexual abuse and child molestation
- intoxications: drugs and alcohol
3) Own patients:
- getting acquainted with the own patient case and present the case in the study group
- participating to the presentation of the patient cases of the other students in the study group
- getting acquainted with the child psychiatric in-patient treatment
4) Out-patient teaching:
- following of the two out-patient sessions
5) Problem based learning:
- solving and representing the example patient cases in the study group – practicing working together with other professionals
- getting acquainted with the evidence based practices

Mode of delivery:

Lectures
Special themes
Small group teaching: Own patients, Out-patient teaching and Problem based learning.

Learning activities and teaching methods:

Lectures 13h
Theme-day 6h

Small group teaching:
Group work 8h
Following of the own patient 4,5h
Problem based learning:
- guided teaching 4h
- without guidance either privately or in a group 1.5h

The admission exam 1h (web-based)
The Final exam 2 h

Self-study 40h

**Target group:**
Medical Students

**Prerequisites and co-requisites:**
The prerequisites for the course unit are previous studies (C1-8 course units).

**Recommended optional programme components:**
No alternative course units.
Simultaneously with Pediatrics 080502A.

**Recommended or required reading:**

or

**Assessment methods and criteria:**
The assessment of the course unit is based on the learning outcomes of the course unit.

The admission exam is multiple choice test. Required literature: text book, chapter 1: p.16-128, 2: p. 130-190 ja 5: p. 445-465 and lectures from 4th year. The admission exam is evaluated from 0 to 25 points (the approval limit is 15 points). Exam should be passed.

Attending to all compulsory teaching.

The final exam (Requirements: text book, lectures and group teaching material) is evaluated from 0 to 10 points (the approval limit is 5 points), grading scale pass/ fail.

Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
The course unit utilizes verbal grading scale pass/ fail.

The course is approved when all exams are approved and the student has attended to all compulsory teaching.

**Person responsible:**
Professor Hanna Ebeling

**Working life cooperation:**

ECTS Credits:
1 ECTS credits / 27 hours of work

Language of instruction:
Finnish

Timing:
The course unit is held in the 3rd autumn semester.

Learning outcomes:
Aim of this course is to learn the effects of hypoxia in individual cells and organ systems.

Contents:
Regulation of hypoxia response in cells; regulation of production of red blood cells and erythropoietin; hypoxia in diseases; drugs mimicking hypoxia; biochemistry of obesity.
Topics of lectures may vary annually.

**Mode of delivery:**
Lectures, essays. Some of the lectures are integrated to course of hematology.

**Learning activities and teaching methods:**
Lectures 10h from which 2h is integrated to the course of hematology. Essey questions.

**Target group:**
Major students.

**Prerequisites and co-requisites:**
-

**Recommended optional programme components:**
-

**Recommended or required reading:**
Lectures

**Assessment methods and criteria:**
Attendance at lectures is compulsory

**Grading:**
Course is evaluated with principle of fail or accepted.

Opettajat: Risteli, Juha
Opintokohteen kielet: Finnish

ECTS Credits:
3.0 ECTS/ 80 hours of work
Language of instruction:
Suomi
Timing:
Timing C5-6
Learning outcomes:

Objectives By the end of the course the student can list the most frequently used tests in clinical chemistry and haematology and their indications and critical interpretation. The student can specify the facts that affect the deviation of the laboratory tests, biological variation, pre-analytical and analytical factors, and understand their importance in interpreting the test results. The student can standardize sample taking so that the above facts that increase the deviation in test results can be eliminated. The student can specify the basics of the quality control of the laboratory tests.

The student understands the feedback control systems in endocrinology and on this base can diagnose the common endocrine disorders and their reasons. The student cans the hormone determinations and indications to use them. The student cans the common weaknesses and disturbing factors of hormone determinations. The student knows how to diagnose heritable metabolic diseases and the use of cancer markers. The student knows the effects of childhood, pregnancy and older age on the laboratory methods. The student knows what methods are available in the health centres and how the student can order other methods available.

Contents:

Lectures contain following subjects: Clinical Chemistry as a medical speciality, diagnostics of heart and vascular disorders, examination of kidneys and urinary tracts, clinical enzymology, examination of liver and gastrointestinal tract, laboratory tests in haematology, tests to analyze water, sodium and potassium balance, therapeutic drug monitoring and chemical toxicology, most frequently used laboratory test and their indications.

Contents of small group practical courses: taking blood samples and preparation of samples for different tests, results of laboratory test in healthy individuals, reference ranges, sources of errors and their origin and quality controls of laboratory tests, basic blood cell count and microscopic examination of blood cells. Theoretical background of clinical
endocrinology, hormone determinations, adrenal function and its disorders, hypothalamic and hypophysis hormones, the follow up of pregnancy by clinical chemical methods, endocrinology of aging, thyroid function and its disorders and calcium metabolism and its disorders. Analysing congenital heritable metabolic diseases and cancer markers.

Goal of the theme day: The students can perform to point of care tests.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Working methods Lectures 28 h, small group practical courses 6 h and one theme day. In addition the student has independent preparation for small group practical courses and for the theme day.

Target group:
Medical students in clinical phase

Prerequisites and co-requisites:
Candidate of Medicine

Recommended or required reading:

Assessment methods and criteria:
Assessment methods Assessment is based on materials given in lectures, small group practical courses, in textbooks and other materials given to the students.

Grading:
Numerical grading 0-5.

Person responsible:
Professor Juha Risteli

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
1.5 ECTS credits / 40 hours of work

Language of instruction:
Finnish.

Timing:
C 9-10, in the autumn semester.

Learning outcomes:
Upon completion the student will be able to identify/suspect a genetic disease in the patient/family, identify patients who need genetic counselling and refer them further to a clinical genetics unit, describe the structure of chromosomes and genes, their examination and to interpret the results of a chromosome or DNA examination, explain the recurrence risks in different modes of inheritance and to discuss their significance for family members and the possibilities of prenatal diagnostics, explain the unique spectrum of genetic disease in Finland, understand the special nature of genetic disease and recognize the ethical problems related to genetic testing, and to recognize the need of special care for families with a child suffering from congenital malformations/genetic disease and adult patients with serious genetic conditions.

Contents:

Mode of delivery:
Blended teaching

Learning activities and teaching methods:
Lectures 16h / Seminar 4h / Small group teaching 2h. Independent work and activating teaching methods 18h.

Target group:
Medical students.

Prerequisites and co-requisites:
The required prerequisite is the completion of preclinical courses prior to enrolling for the course unit.

Recommended optional programme components:
No alternative course units.

Recommended or required reading:

Assessment methods and criteria:
Participation in obligatory teaching events is required. The final grading is based on continuous assessment and peer grading or a final exam. The assessment criteria are based on the learning outcomes of the course.

Grading:
The course unit utilizes verbal grading scale pass/ fail.

Person responsible:
Jukka Moilanen, Clinical Lecturer in Clinical Genetics

040128A: Clinical pharmacology, 1 op

Voimassaolo: 01.08.2015 - 
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Miia Turpeinen
Opintokohteen kielet: Finnish

ECTS Credits: 2,5 credits
Language of instruction: Finnish
Timing: C8-9

Learning outcomes:
After passing the course the student should have ability to safe, efficient and cost effective drug therapy. The student should understand the basis for drug therapy from the point of view of general practitioner and the treatment of most common intoxications.

Contents:
Factors affecting drug selection, dosage and therapy will be discussed applying knowledge of basic pharmacology. Furthermore, the common problem cases of drug therapy will be discussed. Individualized therapy, use of major classes of drugs, special treatment situations and most common intoxications will also be discussed.

Learning activities and teaching methods:
Introductory lecture 2 hours. Clinical pharmacology patient case report and discussion with tutor. Thematic seminars (11 x 2 h) will cover major areas of drug therapy and special situations of drug treatment and most common intoxications. Final exam.

Recommended or required reading:

Assessment methods and criteria:
Preparation of acceptable clinical pharmacology patient case, discussion with the tutor and passing of the final exam.

Grading: Pass/fail
Person responsible: Miia Turpeinen (miia.turpeinen@oulu.fi)

040127A: Clinical pharmacology and prescriptions, 1 op

Voimassaolo: 01.08.2013 -

Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Viitala, Pirkko Liisa
Opintokohteen kielet: Finnish

ECTS Credits: 1 ECTS credits /26,50 hours of work
Language of instruction: Finnish
Timing:
The course is held in the autumn semester, during the third year of medical studies.

Learning outcomes:
Upon completion of the course, the student will be able to understand an appropriate way to write prescriptions. The student knows authoritative regulations and restrictions concerning the prescription and delivery of pharmaceuticals. In addition, the student understands the role of pharmacy in delivering the drugs. The student understands principles of personalized drug therapy and mechanisms and significance of adverse drug reactions.

Contents:
The construction of a prescription. The information to be entered to the prescription. The authoritative regulations concerning the prescription and delivery of pharmaceuticals. The role of pharmacy in drug delivery, pharmaceutical forms, the quality control and storage of pharmaceuticals. Effect of diseases on pharmacokinetics, adverse drug reactions and reporting adverse drug reactions. Personalized drug therapy. Prescription demonstration.

Mode of delivery:
The tuition will be arranged as face-to-face teaching.

Learning activities and teaching methods:
Lectures 12h/ Demonstration 2h/ Self-study 12,5h.

Target group:
Target groups are 3rd year medical and dentistry students.

Prerequisites and co-requisites:
Prerequisite for participation to the course is the completion of preclinical studies.

Recommended optional programme components:
No alternative courses.

Recommended or required reading:
Terveysportin (http://www.terveysportti.fi) lääketietokannan reseptiopas

ECTS Credits:  
5.5 ECTS/148 hours of work

Language of instruction:  
The tuition is arranged in Finnish. The course unit can be completed in English by group teaching.

Timing:  
The course unit is held in the autumn/spring semester C9-C10.

Learning outcomes:  
Objective of the course expressed in terms of learning outcomes: After this course the student has the knowledge and skills in diagnostics and treatment of common skin diseases in order to be able to work as a general practitioner or house officer. Furthermore, the student has the basic skills to diagnose and treat allergological and venereal diseases.

Contents:  

Mode of delivery:  
The tuition will be implemented as face-to-face teaching and web-based teaching (Optima).

Learning activities and teaching methods:  
Theoretical teaching  49 h  
1. Lectures 42 h  
2. Interactive lectures 3 h  
3. Examinations 4 h  
Practical teaching 15 h  
3. Small group teaching in the outpatient ward 9 h  
4 Small group teaching in the inpatient ward 6 h  
Self study 84 h  
6. Self study using material available in the Optima.

Target group:  
Medical students

Prerequisites and co-requisites:  
The recommended prerequisite is the completion of studies for previous semesters.

Recommended optional programme components:  
The study unit cannot be completed alternatively.

Recommended or required reading:  
Books:  

Reunala T, Paavonen J, Rostila T (eds.): Sukupuolitaudit. Kustannus Oy Duodecim..

Assessment methods and criteria:
Initial examination in the Optima has to be passed before starting the practical teaching. The end-of-course examination: books, lectures and small group teaching. Obligatory presence in the theme day teaching of skin infections, and in the theme day of sexology and venereology. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes a numerical grading scale 1-5.

The end-of-course examination contains 10 questions which are graded from 0-3. Maximal grade is 30 points and the level of acceptance is 15 points. The theme day of sexology and venereology, evaluation: pass/fail.

ECTS Credits:
4 ECTS  
**Language of instruction:**  
Finnish  

**Timing:**  
During spring term of the 4th year (C8)  

**Learning outcomes:**  
Upon completion of the course the student knows the legislation and legal status concerning doctor and patient, knows how to write medical certificates and statements, knows the principles of death investigation and especially investigation of unexpected and violent deaths, and is familiar with forensic way of thinking, e.g. how to act as a medical authority.  

**Contents:**  

**Mode of delivery:**  
Face-to-face teaching  

**Learning activities and teaching methods:**  
Lectures 28 h. Autopsy demonstrations and slide shows 8 h, medical certificates 8 h. A visit to Oulu police department 1.5 h.  

**Target group:**  
For the medical students of the fourth year  

**Prerequisites and co-requisites:**  
All earlier studies in the curriculum of basic medical education.  

**Recommended optional programme components:**  
The course is performed simultaneously with other courses including the curriculum in 4th year.  

**Recommended or required reading:**  
Lectures, slide shows and written exercises (medical certificates).  

**Assessment methods and criteria:**  
Obligatory participation in autopsy demonstrations. Lectures, slide shows and practical training on medical certificates. Examination.  

Examination with 7 questions. The evaluation scale of each question is from 0 to 6. The evaluation scale of the examination is 0-5, according to the total sum of the 7 questions (0-42). The student will not pass the examination if two or more of the answers are graded as 0. Three examinations are arranged each year.  

Read more about assessment criteria at the University of Oulu webpage.  

**Grading:**  
The evaluation scale is 0-5 (0=fail, 5=excellent).

Voidaan suorittaa useasti: Kyllä  

ECTS Credits:  
3th year:  
16.5 ECTS credits/440 hours of work.  
4th year:  
4.5 ECTS/ 122 hours of work  

Language of instruction: Finnish  

Timing:  
3th year, C5-C6  
4th year, C7 – C8  

Learning outcomes:  
3th year:  
After this course the student is familial with diseases of internal medicine as well as diagnostics and treatment of these diseases. The student understands the connection between internal medicine and other medical specialities. The student learns independent problem solving and critical thinking and also to cooperate with healthcare professionals.  

4th year:  
Internal medicine: This course gives the student advanced knowledge in internal medicine and skills of critical thinking. The student is able to treat the patients' appropriate way in health care system. The student understands the significance of different levels of healthcare.  

Internal medicine II course consist of:  

Infectious Diseases: After this course the student is able to treat common infectious diseases. The student learns problem solving and critical thinking skills and is able to study the field independently.  

Rheumatology: The student will identify the most common rheumatic diseases. The students understand the role of health centers in in the treatment of rheumatic diseases and situations in which the patient should be immediately referred to a specialist hospital.  

Contents:  
3th year:  
Endocrinology and metabolic diseases, cardiology, kidney diseases, haematology, rheumatology, gastroenterology and emergencies in internal medicine  
4th year:  
Infectious Diseases: Most common infectious diseases and treatments. Rheumatology: Most common rheumatologic diseases and treatments. Internal medicine: Essential issues of internal medicine.  

Mode of delivery:  
3th year:  
Face to face teaching.  
4th year:  
Blended teaching (web-based teaching and face to face teaching).  

Learning activities and teaching methods:  
3th year:  
1. Lectures 75 h  
2. Guided medical procedures and examinations. Carried out in small group classes and in ward practice.  
3. Small group classes 24 h. Student participates in small group classes in various wards. Attendance is compulsory.  
4. Practice in outpatient clinic 4 h. Attendance is compulsory.  
5. Practice in the Department of Emergency (Internal Medicine) 3 x 6 h. Attendance is compulsory.  
6. Ward practice 40 h. Attendance is compulsory. Part of practice is carried out in the hospitals of Northern Finland. Student writes accurate patient history and status of patients that he/she has examined carefully.
7. Theme days 45 h. Problem-oriented discussions about wider thematic entities. Attendance is compulsory.
8. Seminars 2 h. Problem-oriented discussions. Attendance is compulsory.
9. Exams 11 h
Independent work 223 h.

4th year:
Variable teaching and learning methods.
Lectures 26 h. + 12h
Small group classes 2 h + 2h. Attendance is compulsory.
Seminars 4 h + 4h Attendance is compulsory.

Internal medicine
The practice at internal medicine wards (both in University hospital and in some Central hospital of the Northern Finland)

Target group:
Medical students, C5-C6 and C7-C8

Prerequisites and co-requisites:

3th year:
Student must have completed preclinical studies.

4th year:
Student must have completed the course of Internal Medicine I.

Recommended optional programme components:
The course is performed simultaneously with other third and fourth year's courses.

Recommended or required reading:

3th year:

4th year:

Textbooks:

Infectious Diseases:
• Pasternack, A (toim.): Nefrologia (2012), Kustannus Oy Duodecim
• Hockerstedt K, Färkkilä M, Kivilaakso E, Pikkarainen P. Gastroenterologia ja hepatologia (2007), Kustannus Oy Duodecim
• Kaarteenaho R., Brander P., Halme M., Kinnula V (toim.): Keuhkosairaudet – diagnostiikka ja hoito (2013), Kustannus Oy Duodecim
• Koskenvuo K. (toim.): Sairauskien eikäisy (2003), Kustannus Oy Duodecim

Thaler M. The only EKG book you'll ever need. 4th ed (2003). Lippincott Williams & Wilkins
Assessment methods and criteria:

3th year:
Attendance in teaching.
Examinations of endocrinology and metabolic diseases, cardiology, kidney diseases, haematology and gastroenterology.

4th year:
Attendance at compulsory teaching. Small exams and final exam of internal medicine.

Read more about assessment criteria at the University of Oulu webpage.

Grading:

3th year:
Grading scale in intermediate examinations is 1-5 and the lowest accepted points are 20/40.

Intermediate exams form 50% of the final grade of the course.

4th year:
Infectious Diseases: The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Rheumatology: The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Internal medicine: Exam consists of eight short essays. Six points is maximum / essay. Exam is failed if the total points are less than 24 or if one of the essays is worth of 0 points. The final grade of internal medicine consists of the final exam and the exams of endocrinology and metabolic diseases, cardiology and ECG, kidney diseases, haematology, infectious diseases rheumatology and gastroenterology. Proportion of final exam is 50% and proportion of smaller exams is 50% in the final grade of internal medicine.

The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:

3th year:
Professor Markku Savolainen (markku.savolainen@oulu.fi)

4th year:
Working life cooperation:

3th year:
Yes. Small group teaching, ward practice, practice in outpatient clinic and in the department of emergency.

4th year:
No

Other information:
Required studies before final examination: preexaminations of Internal Medicine, attendance at compulsory teaching (year 3 and 4). Registration to final examination (https://weboodi.oulu.fi/oodi/jsf/frame.jsp) at least one week before the examination. Attendance is accepted only when all the required studies are passed.

080301A: Neurology, 6 - 6,5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Majamaa, Kari Gunnar
Opintokohteen kielet: Finnish
Voidaan suorittaa useasti: Kyllä

ECTS Credits:
6.5 ECTS
Language of instruction:
Finnish
Timing:
During autumn term of the 3rd year (0.5 ECTS) and during 4th year (6 ECTS) of medical education

Learning outcomes:
The course focuses on pathogenesis, diagnostics, treatment and prevention of common neurological diseases and rehabilitation of neurological patients. After completing this course the student should
- be able to carry out the neurological examination of the patient;
- be familiar with the diagnosis and management of common neurological illnesses;
- be familiar with ancillary investigations that are used for neurological evaluation;
- be familiar with current developments in the clinical neurosciences.

Contents:
The neurology course consists of an introductory course on clinical neurological examination and the main neurology course. Lectures will be given in Finnish and are voluntary. Small group sessions will be held in outpatient neurology clinic and neurology ward. Lumbar puncture will be practised with a torso simulated manikin. Each student also participates in the clinical evaluation of patients at the emergency department and at the neurology ward and examines patients under supervision at the outpatient clinic. Attendance is mandatory in small group sessions and emergency service. Course also includes seminars, three of them are mandatory. There is a written final exam in the end of the course.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
I Preparatory neurology
- Lectures 2 h

II Neurology course consists of the following activities
- Lectures 19,5 h (in Finnish)
- Introductory course of clinical neurological examination 6 h
- Small group sessions at the outpatient clinic and neurology ward 12 h
- Service at neurology ward 12h including practicing lumbar puncture
- Practising at emergency department 5 h

Seminars 29,5 h

Target group:
Fourth year medical students

Prerequisites and co-requisites:
All earlier studies in the curriculum of basic medical education.

Recommended optional programme components:
The course is performed simultaneously with other courses including the curriculum in 3rd and 4th year

Recommended or required reading:

Assessment methods and criteria:
Attendance to all small group sessions and clinical examination of patients in neurology ward and emergency department, attendance to three seminars and passed examination.

A written final examination consists of five questions. The requirements of the final exam include the textbook, issues raised in the lectures, small group sessions and seminars. Zero points is allowed only in one question. In order to pass the exam the student must obtain half of the total points.

Read more about assessment criteria at the University of Oulu webpage.

Grading:
The evaluation scale is 0-5 (0=fail, 5=excellent).

Person responsible:
Professor Kari Majamaa

Working life cooperation:
In small group sessions held in outpatient neurology clinic and neurology ward. Each student also participates in the clinical evaluation of patients at the emergency department and at the neurology ward and examines patients under supervision at the outpatient clinic.

Ei opintojakoksokuvauksia.

080301A-03: Neurology, final exam, 3 op
080304A: Neurosurgery, 3 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Sami Tetri
Opintokohteen kielet: Finnish

ECTS Credits:
3.0 ECTS credits/ 82 hours of work
Language of instruction:
Finnish

Timing:
C8
Learning outcomes:
After the course the student has knowledge of clinical manifestations, diagnostics and treatment of neurosurgical diseases from the general practitioners point of view. The student can evaluate the urgency of treatment of neurosurgical conditions and understands the life-threatening nature of these diseases.

Contents:

Mode of delivery:
Face-to-face teaching.
Learning activities and teaching methods:
Lectures (14h) including patient demonstrations. Mandatory small group patient rounds and discussion (8h). Four symposia.
Target group:
Medical students
Prerequisites and co-requisites:
The required prerequisite is the completion of the following courses prior to enrolling for the course unit: 040108A General pathology; 080211A-01 Organ Pathology I
Recommended optional programme components:
No alternative course units.
Recommended or required reading:
Assessment methods and criteria:
The course requirements include participation in compulsory practicals and passing the end-
Read more about assessment criteria at the University of Oulu webpage.
Grading:
The evaluation scale is 1-5/fail.

Final examination (6 essay and multiple choice questions). At least half of the total points are needed to pass the test, and a minimum of 1 point per question must be achieved. One month clinical internship can enhance the grade.
Person responsible:
Sami Tetri

**Working life cooperation:**
Alternatively, international students can also get full ETCS credits through the Erasmus program clinical elective. This requires full-time (8:00 am – 3:45 pm) participation in all clinical activities for a minimum of four weeks. For ETCS credits, the above textbook final examination must be passed; it is usually taken during the last week of practice.

The course unit is held in the spring semester

**Learning outcomes:**
To assess the abilities of student performance on the subjects of the 5th year curriculum.

**Contents:**
A joined examination of the subjects on the fifth year.

**Mode of delivery:**
Contact teaching

**Learning activities and teaching methods:**
Each student makes a circuit of about 15 stations comprising of practical tests in different disciplines. 8 minutes /station, 2 minutes for transferring between stations. Total time about 2 hours 30 minutes

**Target group:**
Medical Students

**Prerequisites and co-requisites:**
The prerequisites for the course unit are previous studies (C1-10 course units)

**Recommended optional programme components:**
No alternative course units.

**Recommended or required reading:**
Textbooks and manuscripts of the fifth year.

**Assessment methods and criteria:**
The assessment of the course unit is based on the learning outcomes of the 5th year course units.

The examiner on each station assesses the performance of the student.
Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
Pass/fail in every single station.

The course is approved when all practical tests are approved.

The course unit utilizes verbal grading scale pass/fail.

**Person responsible:**
Prof. Matti Uhari

**Working life cooperation:**
No

**Other information:**
OSCE exam is compulsory examination for the fifth year students. The final grade of the course unit is required for the sixth year student.

**080401A: Obstetrics and Gynecology, 10 op**

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuysikkö:** Medicine

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Hannu Martikainen

**Opintokohteen kielet:** Finnish

**ECTS Credits:**
11,0 ECTS/ 294 hours of work

**Language of instruction:**
Finnish

**Timing:**
C9 and C10

The course unit is held in the autumn semester and spring semester

**Learning outcomes:**
After completing the course Obstetrics and Gynecology the student will have sufficient theoretical and practical knowledge in obstetrics and the most common gynecological illnesses, as well as the diagnostics, treatments and prevention thereof. Furthermore, the student will learn about a normal pregnancy, childbirth and puerperium. The course will provide the student skills required to work in a public health center as a general practitioner and to handle the treatment of acute cases.

**Contents:**
Introduction: patient's anamnesis and examination, diagnosis and treatment plan, ultrasonography and other medical procedures, sexology.

Obstetrics: physiology of a pregnancy, planning and monitoring of pregnancy, monitoring of childbirth, puerperium.
Pregnancy complications: miscarriage and gynecological hemorrhage, pre-eclampsia or eclampsia, multiple pregnancy, fetal growth retardation, premature delivery and preterm loss of amniotic fluid, infections during pregnancy, 3rd trimester hemorrhaging and placental ablation, postpartum hemorrhaging, diabetes and pregnancy.

Gynecology: menstrual cycle, abnormal menstrual bleeding, sexually transmitted diseases and infections, birth control, sterilization, and termination of pregnancy, gynecological endocrinology and infertility.

Gynecological abnormalities: pelvic inflammatory disease (PID), uterine prolapse and incontinence, endometriosis, abnormal gynecological bleeding, infertility, benign and malignant tumors, hormonal replacement therapy and osteoporosis.

Mode of delivery:
Blended teaching

Learning activities and teaching methods:
Lectures 28 h
Theme-days 10 h
Student Congress 4 h
Practical training in Central Hospitals 40 hours

Small group teaching
- Group teaching 13 h
- Ward rounds and learning at wards, following of the own patient 19 h
- Outpatient clinic learning 17 h
- Maternity care center and health care center learning 7 h (learning diagnostics and treatment of real patients)

Problem based learning:
- guided teaching 20h
- without guidance either privately or in a group 30h

The admission exam 6 h (web-based)
Week exams I, II and III (web-based) 6 h
The Patient cases exam 4 h

Self-study (preparing for Theme-days, congress and exams) 120 h

Target group:
Medical students

Prerequisites and co-requisites:
The prerequisites for the course unit are previous studies (C1-8 course units).

The admission exam (web-based) should be passed.

Recommended optional programme components:
No alternative course units.

Recommended or required reading:

Text book:

Alternative reading:

Recommended reading:
*E Malcolm Symonds. Essential obstetrics and gynaecology. Churchill Livingstone (last ed.).

Assessment methods and criteria:
The assessment of the course unit is based on the learning outcomes of the course unit.

The admission exam is multiple choice test. Required literature: text book. Exam should be passed.

Attending to all compulsory teaching
(evaluated pass/fail)
Week exams I, II and III.
Grading: 1-5/fail.

The Patient cases exam (final exam): evaluated from 0-48 points, approval limit is 24 points.
Grading: 1-5/fail.
Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.
The final grade of the course is formed of Patient cases exam (70 %) and Week exams (30 %).

**Person responsible:**
Prof. Hannu Martikainen

**Working life cooperation:**
Each student will participate the work of gynecologist/obstetrician taking care of patients in one central hospital during one week.
In maternity care center and health care center learning diagnostics and treatment of real patients.

Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Leena Ala-Mursula
Opintokohteen kielet: Finnish

ECTS Credits:
1.5 ECTS credits/ 40 hours of work

Language of instruction:
The course is held in Finnish.

Timing:
The course is scheduled in the 6th year, C11.

Learning outcomes:
Upon completion of the course, the student is able to consider work-related origins of ill health, as well as the aspect of promoting work ability as a part of all medical practitioning.
The student will be able to understand the structure of the Finnish Occupational Health Care system and the principles of co-operation with the system, both within the Health Care and with the workplaces.

Contents:
The basics of Occupational Health Care
Work-health relationship, work-related diseases, occupational diseases.
Possibilities of supporting work ability

Mode of delivery:
Face-to-face tuition is used

Learning activities and teaching methods:
There will be 12 hours of Lectures and 8 hours of other guided group teaching. Activating methods will be utilized in all teaching. The remaining 20 hours of self-study will be partly group work.

Target group:
Medical students in their 6th year, C11.

Prerequisites and co-requisites:
All earlier studies in the curriculum of basic medical education.

Recommended or required reading:
Material is in Finnish, see left column.

Assessment methods and criteria:
The students participate in guided teaching by producing small presentations and through active conversation. Passing the Examination is required.

Read more about assessment criteria at the University of Oulu webpage.

Grading:

Arvostelu: 1 - 5, pass, fail
Opettajat: Karihtala, Peeter Johannes, Turpeenniemi-Hujanen, Taina Marjatta
Opintokohteen kielet: Finnish

ECTS Credits:
4.0 ECTS credits /107 hours of work

Language of instruction:
Tuition shall be arranged in Finnish.

Timing:
The course unit is held in the end of the autumn semester (September-December).

Learning outcomes:
Upon completion of this curricular unit, student should be able to understand principles of cancer etiology, diagnosis, therapeutic modalities and will be able to give basic chemotherapies based on instructions. In addition, student will be able to detect and treat possible advert events of therapeutic modalities, organize outpatients controls of common malignancies and advice patients to rehabilitation after cancer therapy. Furthermore, the student will be able to master principles of palliative care and consult a specialist when needed.

Contents:
The diagnostics, oncological therapeutic modalities and monitoring of solid cancers and lymphomas

Mode of delivery:
The tuition will be implemented as blended teaching.

Learning activities and teaching methods:
Lectures 29h/ Small Group Teaching 10h/ Oncological Seminars 10h/ Preliminary Examination 2h (online)
Final Examination 2h

Target group:
Target groups are the 5-6 th year medical students (MD).

Prerequisites and co-requisites:
The required prerequisite for participation to the course unit is the completion of 5 years of medical studies.

Recommended optional programme components:
There are no alternative courses.

Recommended or required reading:

Assessment methods and criteria:
During the course unit, there are preliminary and final exams. Both of them should be passed. In addition, passing of preliminary exam is required before the final exam.
080303A: Ophthalmology, 4 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Aura Falck
Opintokohteen kielet: Finnish
ECTS Credits: 4 ECTS Credits/108 hours
Language of instruction: English (but lectures are in Finnish)
Timing: (C9-10)
Learning outcomes:
The course of ophthalmology is focused on learning basic ophthalmology and skills needed for working in general practise. After completing the course the student will have basic knowledge of symptoms, diagnostics and treatment options of ophthalmic diseases and of relationship of systemic diseases and ophthalmic problems. The student will be able to examine vision and eye health for purposes of health check up, screening a child’s vision, treatment of common eye diseases and assessing the need and urgency for consultation.

Contents:
Examination of eyes and visual acuity and treatment of ophthalmic diseases focusing on the skills needed as a general practitioner.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
The course contains lectures (38 h, in Finnish), group sessions (10 h) and evaluation of the course through exams (6 h). Self-study 54 hours.

Target group:
Medical students

Recommended or required reading:

Assessment methods and criteria:
The student has to attend the obligatory learning sessions. The assessment is based on examination. Read more about assessment criteria at the University of Oulu webpage.

Grading:
Preliminary examination: pass/fail; final examination 0-5.

Arvostelu: 1 - 5, pass, fail
Opettajat: Karttunen, Tuomo Juhani
Opintokohteen kielet: Finnish

ECTS Credits:
6 ECTS/ 160 hours of work
Language of instruction:
Finnish
Timing:
3rd year
Learning outcomes:
This course focuses on the essential features of etiology, pathogenesis and structural changes of diseases of the different organ systems. Pathophysiological aspects of diseases are reviewed as well as relationship between the abnormal function and structure and the clinical manifestations of disease, such as symptoms and clinical findings.

After the course, students should be able to describe etiology and pathogenesis of the most important diseases of each organ system, and the structural abnormalities of such diseases. The student should be able to explain how structural and functional abnormalities manifest themselves as clinical symptoms and signs. In addition, students should be able to identify and classify the most common types of macroscopic and microscopic abnormalities in different organ systems. He/she should know the most important sources of error in surgical pathological and cytological diagnostics, and be prepared on a proper teamwork with pathologists in his/her clinical work, for the best of his/her patients.
Contents:

Mode of delivery:
The tuition will be implemented as face-to-face teaching.

Learning activities and teaching methods:
Lectures 25 h, theme days 8 h, practical training 32 h, exam 2h
Independent work 93 h

Target group:
Medical students

Prerequisites and co-requisites:
040108A General Pathology

Recommended or required reading:
Or: Cross SS: Underwood's Pathology, a clinical approach (6th ed. 2013)
Other: Kumar V. et al.: Robbins and Cotran, Pathologic basis of disease (8 th ed. 2010 or 7th ed. 2005); Rubin & Strayer; Rubin's Pathology (2005).

Lecture handouts; Guidebook for microscopy practicals, Guidebook for autopsy (in Finnish)

Assessment methods and criteria:
Attendance in compulsory teaching, examination

Grading:
1 - 5, fail

Person responsible:
Professor Tuomo Karttunen

Working life cooperation:
No

ECTS Credits:
2 ECTS credits/ 52 hours of work
Language of instruction:
Finnish
Timing:
C 7-8, autumn and spring semesters
Learning outcomes:
Upon completion the student should know, for each organ system included, the basic mechanisms of diseases (etiology and pathogenesis), their basic morphological, functional and clinical characteristics, and terminology related with diseases. The student should be able to recognize and classify the most common diseases of the organ systems, understand the relationship between these features of the diseases and their symptoms and other clinical manifestations. The student should know the most important sources of error in histopathological diagnostics, and be familiar with the collaboration between clinician and pathologists needed in every day clinical work.
Contents:
Pathology of ear and eye diseases.
Mode of delivery:
Face-to-face teaching.
Learning activities and teaching methods:
Lectures 13 hours, Practicals 10 hours. Self study 34 hours. Written examination 1 hour.
Target group:
Medical students.
**Prerequisites and co-requisites:**
The required prerequisite is the completion of the following courses prior to enrolling for the course unit: 040108A General pathology; 080211A-01 Organ Pathology I

**Recommended optional programme components:**
No alternative course units.

**Recommended or required reading:**
Books: Cross SS: Underwood’s Pathology, a clinical approach (6th ed. 2013) sections relating on the organs/organs systems, which are on the focus of this course (see Contents); or Underwood JCE: General and systematic pathology (5th ed. 2009); or Kumar V. et al.: Robbins Basic Pathology, (9th ed. 2012 or 8th ed. 2007). Alternatives: Kumar V. et al.: Robbins and Cotran, Pathologic basis of disease (8th ed. 2010 or 7th ed. 2005); Rubin & Strayer; Rubin's Pathology (2005).

**Assessment methods and criteria:**
The course requirements include participation in compulsory practicals and passing the end-of-course examination.

**Grading:**
The evaluation scale is 1-5/fail.

**Person responsible:**
Tuomo Karttunen

**Working life cooperation:**

080302A: Oto-rhino-laryngology, 6 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuyksikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Alho, Olli-Pekka
Opintokohteen kielet: Finnish

ECTS Credits:
6 ECTS credits / 159 hours of work
Language of instruction:
Finnish
Timing:
The course is held in the autumn semester, during the fourth year
Learning outcomes:
The aim of the course is to familiarize the student with examining, treating and referring an otorhinolaryngological patient. After the course, the student has the knowledge and skills needed to work as an independent general practitioner.

Contents:
The course deals with diseases of the ear, nose, paranasal sinuses, mouth, throat, salivary glands and larynx as well as facial trauma. The epidemiology, diagnostics, treatment and also rehabilitation regarding these diseases are handled. An introduction to the specialty of Foniatrics is included. The group instructions, theme day and independently performed tasks focus on diagnostics and treatment of the ear, throat and nose diseases as well as on techniques of the most common ambulatory procedures.

Mode of delivery:
The course is delivered as face –to-face teaching
Learning activities and teaching methods:
Lectures 38 h (+self study 38 h)
Policlinical real-case based group teaching 14 h (+self study 14 h).
Indepedently performed tasks 6 h
Theme day 4 h (+self study 4 h)
Entering examination 8 h
Final examination 32 h

Target group:
For the medical students of the fourth year
Prerequisites and co-requisites:
All earlier courses in the curriculum are completed
Recommended optional programme components:
The course is an independent entity and does not require additional studies carried out at the same time.
Recommended or required reading:
Assessment methods and criteria:
The teachers monitor, evaluate and give feedback to the students during all face-to-face teaching situations. At the beginning of the course, the students have an entering examination. Performed group teaching sessions, independent tasks and theme day are registered in the course log book. At the end, the students have the final examination.

Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course utilizes a numerical grading scale 1-5 (based on the final exam). In the numerical scale zero stands for a fail.

Person responsible:
Professor Olli-Pekka Alho

Working life cooperation:
No

Opettajat: Uhari, Matti Kalervo
Opintokohteen kielet: Finnish

ECTS Credits:
13.5 ECTS / 358 hours of work
Language of instruction:
Finnish
Timing:
C9 and C10
The course unit is held in the autumn semester and spring semester

Learning outcomes:
Upon completion the student is able
- to diagnose and treat the most common pediatric diseases as a general practioner or as a first-year resident in a hospital
- to provide first aid to acutely and critically ill children
- to understand pediatric preventive health care and health education

Contents:
Growth and development; medical history and clinical examinaion of a child; allergology; endocrinology; diabetology, gastroenterology, hematology, infectious diseases; cardiology, pediatric surgery; pediatric neurology, nephrology, neonatology; oncology; emergency medicine

Mode of delivery:
Blended teaching

Learning activities and teaching methods:
Lectures 66 h
Theme-day 4 h
Small group teaching
- Group teaching 38h
- Ward rounds and learning at wards, following of the own patient 24h
- Outpatient clinic learning 26 h
- Attending to the pediatric emergency (including patient examinations and 7 case records) 12 hours
Seminars 16 h
Student-visit 3 h
Practical training in Central Hospitals 40 h

The admission exam 1h (web-based)
The patient exam 1 h
The final exam 4 h

Self-study 123 h

Target group:
Medical Students

Prerequisites and co-requisites:
The prerequisites for the course unit are previous studies (C1-8 course units)

Recommended optional programme components:
No alternative course units.

Recommended or required reading:
Printed version of lectures.

Recommended reading:
Assessment methods and criteria:
The assessment of the course unit is based on the learning outcomes of the course unit.

Preliminary test is multiple choice test. Required literature: text book. The preliminary test is evaluated from 0 to 50 points (the approval limit is 20 points). Exam should be passed during one week from the beginning of the course.

Attending to all compulsory teaching
(evaluated pass/fail)

Patient cases exam (evaluated from 0 to 20 points, approval limit is 5 points)
Grading: 1-5/fail

The final exam (evaluated from 0-60 points, approval limit is 35 points.
Grading: 1-5/fail.

Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.
The final grade of the course is formed of final exam (85%) and patient cases exam(15%)

Person responsible:
Prof. Matti Uhari

Working life cooperation:
Yes. Each student will follow the work of pediatricians taking care of patients in one central hospital during one week.

- **Arvostelu**: 1 - 5, pass, fail
- **Opintokohteen kielet**: Finnish
- ** VOIDAA SUORITTA USEASTI**: Kyllä
- **ECTS Credits**: ECTS credits 12.0
- **Language of instruction**: Language of instruction Finnish.
- **Timing:**
Timing S7-S8, 4th year, autumn and January

**Learning outcomes:**
To provide basic facts on psychiatric diseases and treatment, particularly in primary health care. Students are able to identify common mental disorders and know how to treat them in adult, young and elderly patients, in accordance with the Treatment Recommendations (psychotherapy, psychopharmacology) in primary and in some extent in specialist level health care settings. Students can identify severe mental disorders in adolescents, adults and elderly patients and be able to send the patients to the psychiatric emergency and psychiatric care, involuntarily if necessary. The student can identify patients with psychosis and those patients at risk of suicide or violent acts.

**Contents:**

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
Lectures covering various themes in psychiatry (psychiatric epidemiology, schizophrenia and other psychoses, depression, anxiety disorders, substance use disorder, perinatal mental disorders, psychiatry in health care center, adolescent psychiatry etc.). Besides lectures, the teaching consists mainly of group teaching, several seminars and also clinical practice which includes following clinical work in psychiatric units and also on emergency duty in psychiatry. There is a final written examination. Question time and feedback, including questionnaire in Optima. The student has to understand and speak Finnish fluently in order to be able to participate in the course.

**Target group:**
Fourth year medical students.

**Prerequisites and co-requisites:**
Previous medical studies has to be completed.

**Recommended optional programme components:**
The course is performed simultaneously with other fourth year’s courses.

**Recommended or required reading:**

**Assessment methods and criteria:**
Taking part to compulsory studies and practice including group studies, theme days and clinical practice. Final written examination. Question time and feedback, including questionnaire in Optima.

**Grading:**
The evaluation scale for the final examination is 0-5 (and in the intranet Optima: pass/fail). The best grading is 5.

**Person responsible:**
Professor Pirkko Räsänen
Department of Psychiatry

**Working life cooperation:**
Yes. Small group classes, ward practice, following clinical work in psychiatric units on emergency duty.

**Compulsory**

**080103A-05: Psychiatry preexamination, 0,5 op**

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Markku Timonen
Opintokohteen kielet: Finnish

ECTS Credits:
9.5 study credits
Timing:
Semester 11 (C11)
Learning outcomes:
The student will understand the principles of health at population level, and as applicable to a particular disease. The student will have knowledge of the most important public health schemes and programmes, and is able to apply them at a local level.

The student will know the principles and organisation of insurance and rehabilitation medicine, and is able to apply their knowledge into clinical practice. The student will understand the aetiological factors of disease both at an individual and population level and is competent at diagnosis and management of the common diseases.

The student is able to critically assess and interpret findings of public health research, and to act as an expert of preventative medicine in primary care. The student will learn the ability to adopt and apply methods of health promotion and disease prevention at an individual-, family-, and population level, therein also considering the expertise role of the multidisciplinary team.

Student will have an appreciation of the doctor-patient relationship and the role of communication between family members as applicable to patient management, and is able to use and apply communication skills in different clinical scenarios. The student is able to evaluate the quality and economics of all his/her work.

Contents:
Population health, health promotion and recognising health problems; preventative medicine; encouragement of health behaviour that will promote health. Epidemiology, social- and health service and economics as part of patient management. Medical law, application of social security law in clinical practice, medical certificates and medical statements. Introduction to rehabilitation, environmental medicine and nutrition at population level. Team working with expert members of the multi-disciplinary team.

Learning activities and teaching methods:
Lectures, theme days, seminars and workshops. One-week practical training module at a primary health care centre, which includes a set of learning tasks.

Recommended or required reading:

Availability of course materials can be checked here.

Assessment methods and criteria:
Written examinations. Participation in seminars, workshops, theme days and practical training module at a primary health care centre.

Grading:
Medical law exam will be graded as pass/fail. Final grade of this course will consist of final written exam and seminar assessment, the latter graded on a scale of 0 to 5. The final grade will be calculated as 2/3 of the grade from final exam + 1/3 seminar grade. Final exam will contain a medical certificate, graded as pass / fail.

Person responsible:
Professor Markku Timonen

Other information:
The course forms part of the following learning modules of public health and general practice: 1) disease prevention and health promotion 2) multidisciplinary leadership and management 3) examination and management of the patient 4) effect-based contributions to the society & rehabilitation and social security, and 5) research knowledge and skills & interpretation and application of research (Appendix 4).

Learning outcomes:
The student will understand the principles of health at population level, and as applicable to a particular disease. The student will have knowledge of the most important public health schemes and programmes, and is able to apply them at a local level.
The student will know the principles and organisation of insurance and rehabilitation medicine, and is able to apply their knowledge into clinical practice. The student will understand the aetiological factors of disease both at an individual and population level and is competent at diagnosis and management of the common diseases.
The student is able to critically assess and interpret findings of public health research, and to act as an expert of preventative medicine in primary care. The student will learn the ability to adopt and apply methods of health promotion and disease prevention at an individual-, family-, and population level, therein also considering the expertise role of the multidisciplinary team.
Student will have an appreciation of the doctor-patient relationship and the role of communication between family members as applicable to patient management, and is able to use and apply communication skills in different clinical scenarios. The student is able to evaluate the quality and economics of all his/her work.

Contents:
Population health, health promotion and recognising health problems; preventative medicine; encouragement of health behaviour that will promote health. Epidemiology, social- and health service and economics as part of patient management. Medical law, application of social security law in clinical practice, medical certificates and medical statements. Introduction to rehabilitation, environmental medicine and nutrition at population level. Team working with expert members of the multi-disciplinary team.

Learning activities and teaching methods:
Lectures, theme days, seminars and workshops. One-week practical training module at a primary health care centre, which includes a set of learning tasks.

Recommended or required reading:

Availability of course materials can be checked here.

Assessment methods and criteria:
Written examinations. Participation in seminars, workshops, theme days and practical training module at a primary health care centre.

Grading:
Medical law exam will be graded as pass/fail. Final grade of this course will consist of final written exam and seminar assessment, the latter graded on a scale of 0 to 5. The final grade will be calculated as 2/3 of the grade from final exam + 1/3 seminar grade. Final exam will contain a medical certificate, graded as pass / fail.

Person responsible:
Professor Markku Timonen

Other information:
The course forms part of the following learning modules of public health and general practice: 1) disease prevention and health promotion 2) multidisciplinary leadership and management 3) examination and management of the patient 4) effect-based contributions to the society & rehabilitation and social security, and 5) research knowledge and skills & interpretation and application of research (Appendix 4).

040116A: Public health science, 5 op

Voimassaolo: 01.08.2014 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteenv kielet: Finnish

080205A: Pulmonary diseases, 3 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Maritta Jaakkola
Opintokohteen kielet: Finnish

ECTS Credits:
3 ECTS / 80 hours of work

Language of instruction:
Finnish

Timing:
4th year, C7 – C8

Learning outcomes:
Objective for learning of respiratory diseases is the knowledge of the treatment of the most common patients in primary health care i.e. health centers. Most pivotal lung diseases are asthma, chronic obstructive pulmonary disease (COPD), cough, sleep apnea and respiratory infections, in which cases the diagnostics, treatment, controls and estimation for the need for specialist care assessment are usually taken place in the primary health care. Basic principles of the diagnostic and treatment of acute and chronic respiratory failure, interpretation of spirometry and PEF, arrangement of smoking cessation, evaluation of pleural diseases and pleural effusion, the most common occupational lung diseases, and interstitial and fibrotic lung diseases as well as palliative treatment of respiratory symptoms are aimed to possess.

Contents:
Contents of the learning of respiratory diseases consist of lectures, small group and bed side teachings in respiratory ward and outpatient department, theme-days and seminars as well as examinations in the onset and in the end of the course. The main focus will be on the most common lung diseases, which will be taught by using also evidence based and problems based elements in addition of classical learning methods. In addition of lung diseases, interpretation of lung function tests as well as smoking cessation methods will be rehearsed in multiple lessons. The choice of correct places for treatment, i.e. health center and hospital will be taught too.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Lectures 16 h.
Exam 1h Attendance is compulsory.
Small group classes 2 h. Attendance is compulsory.
Practice in outpatient clinic 4 h. Attendance is compulsory.
Theme days 11
Final exam Attendance is compulsory. and seminar. Attendance is compulsory.

Seminar Attendance is compulsory.

**Target group:**
Medical students, C7-C8

**Prerequisites and co-requisites:**
Student must have completed interviewing and examining patients - course

**Recommended optional programme components:**
The course is performed simultaneously with other fourth year's courses.

**Recommended or required reading:**
Textbook:
Kaarteenaho R, Brander P, Halme M, Kinnula V. Keuhkosairaudet – Diagnostiikka ja hoito (Duodecim 2013, ensimmäinen painos)
Käypä hoito-suositukset:
Asta, hengitysvajaus, keuhkohtaumatauti, keuhkokuume, keuhkoputkitehdus, keuhkosyöpä, tupakkariippuvuus
ja tupakasta vieroitus sekä uniapnea (obstruktiiivinen uniapnea aikuisilla)

**Assessment methods and criteria:**
Attendance in compulsory teaching, examinations.
Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
Scale in examinations is 1-5:
36-40=5, 32-35=4, 28-31=3, 24-27=2, 20-23=1
Examination consists of four short essays. Ten points is maximum / essay. Examination is failed if the total points are less than 20 or if one of the essays is worth of 0 points.

**Person responsible:**
Professor Riitta Kaarteenaho

Opiskelumuoto: Intermediate Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Miika Nieminen
Opintokohteen kielet: Finnish

ECTS Credits:
1.5 ECTS
Language of instruction:
Finnish
Timing:
The course unit is held in the second year, C3-4
Learning outcomes:
After the course the student can describe different forms of radiation and their application in medicine, explain the biological effects and mechanisms of radiation, define the decrees pertaining to the use of radiation and describe the radiation safety measures in the hospital working environment. The student can apply knowledge in practice and guide others to safe working practices.

Contents:
Basics of radiation physics, basics of radiation biology, decree of radiation protection, radiation safety procedures in working environment, radiation use in medicine.
Mode of delivery:
Face-to-face learning.
Learning activities and teaching methods:
lectures, exam
Target group:
The students from medicine and dentistry
Recommended optional programme components:
The course has to be completed during preclinical stage of medical and dental studies.
Assessment methods and criteria:
Read more about assessment criteria at the University of Oulu webpage.
Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Miika Nieminen

Working life cooperation:
No

Other information:
The course is statutory radiation protection education in medical training.

080803A: Radiology I, 3,5 - 5 op

Voimassaolo: 02.08.2012 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuysikkö: Medicine

Arvostelu: 1 - 5, pass, fail

Opettajat: Tervonen, Osmo Antti

Opintokohteen kielet: Finnish

ECTS Credits:
3,5 ECTS credits /93 hours of work

Language of instruction:
Tuition shall be arranged in Finnish.

Timing:
The course unit is held during the autumn and spring semester of the third year of medical studies.

Learning outcomes:
Radiology 1

Upon completion of this first curricular unit of radiology, student should be able to understand the principle of justification of radiological studies. Additionally student should have competence to explain the most important indications for radiological studies and principles of radiological modalities, including nuclear medicine. After completing the unit, student should master basic image interpretation skills of radiographs and know the most common findings of these examinations.

Contents:
General introduction to radiology (techniques) and indications, principle of justification, emergency radiology, musculoskeletal radiology, thoracic radiology, abdominal radiology, neuroradiology and nuclear medicine and molecular imaging

Mode of delivery:
The mode of delivery for the course unit is face-to-face teaching.

Learning activities and teaching methods:
The implementation methods of the course vary.

Interactive lectures consist of 19,5 hours. There will be 16,5 hours of guided small group teaching events (image interpretation, Image acquisition [x-ray], Ultrasound anatomy, Emergency duty, Ultrasound clinical surveillance, Nuclear medicine) and 55 hours of studying privately or in a group.

Target group:
Target group are the 3rd year medical students (MD).

Prerequisites and co-requisites:
Prerequisite for participation to the course unit is the completion of preclinical studies (first 2 years of medical school)

Recommended optional programme components:
There are no alternative courses.

Recommended or required reading:
Books: Either, Soimakallio (Editor): Radiologia [in Finnish] or Mettler, FA (Editor): Essentials of Radiology

100-tärkeintä rtg-kuvaa (National teaching image base): Distributed through university domain

Assessment methods and criteria:
This course unit utilizes exam assessment.

**Grading:**
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail. The grade will not be given until all the obligatory teaching courses are completed.

**Person responsible:**
Osmo Tervonen, Professor
Jaakko Niinimäki, Professor

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Juvonen, Tatu Sakari
Opintokohteen kielet: Finnish

ECTS Credits:
16 ECTS/428 hours of work
Language of instruction:
The tuition shall be arranged in Finnish.
Timing:
During third year.
C 5-6

Learning outcomes:
The students will be made familiar with surgical thinking, working in the first aid clinic, in a surgical operating-room and surgical ward. They will learn: 1) How to speak to and examine a surgical patient, 2) The diagnostics of surgical diseases, 3) The basics of surgical care, and 4) The most common surgical procedures at public health care level.

Contents:
The basics in General surgery, Gastroenterological surgery, Urology, Orthopedics and Traumatology and in Thoracic and Vascular surgery.

Practical part:
Supervised and independent clinical examination and planning of treatment strategy, the surgical rounds in different surgical divisions, the seminar days, the surgical wound care, teaching in OR, teaching in the surgical out-patients clinic and the practice in surgical wards.

Mode of delivery:
The tuition will be implemented as blended teaching (mainly face-to-face teaching, but there might be some web-based teaching)

Learning activities and teaching methods:
Lessons from different field of surgery, seminar days concerning important surgical topics, the group teachings of specific topics, clinical practices in wound care, teaching in the operating theatres, practice and teaching in surgical out-patients clinics. Preoperative care of the surgical patient. The practice at surgical wards (both in University hospital and in some Central hospital of the Northern Finland) includes clinical examination of 6 surgical patients and the practice in operating theatres assisting in 3 operative procedures. Contact teaching 214 h and independent teaching 214 h.

Target group:
This course of surgery is focused for medical students in their clinical phase.

Prerequisites and co-requisites:
The required prerequisite is the completion of the following courses prior to enrolling for the course unit:
040201A Anatomy
040103A Medical biochemistry and molecular biology
040106A Pharmacology and Toxicology
000119A Microbiology
040112A Physiology

Recommended optional programme components:
The other medical courses planned to be performed at the same time are as follows: Internal medicine, pathology, radiology, clinical chemistry and anesthesiology

Recommended or required reading:
Textbooks:
Lecture material and other materials too.

Recommended textbooks:

Assessment methods and criteria:
Participating in the group teaching, seminar days and training in surgical wards, propedeutic test, intermediate test I, reports of clinical examinations of surgical patients, assisting in 3 surgical operations, service at the surgical emergency room (3 times and OR (1 time). Contact teaching approximately 214 hours and independent work approximately 214 hours.

Grading:
The final score of surgery is based on final exam. Mid-term exam is accepted if at least 50% of total score is made.

The grading scale is 1-5. In the numerical scale zero stands for a fail.

Person responsible:
Professor Tatu Juvonen and professor Jyrki Mäkelä
Working life cooperation:
Yes.

The course of surgery includes one week surgical ward practice in OYS or other hospitals in Northern Finland.

Other information:
No other information

20 ECTS credits

**Language of instruction:**
Finnish

**Timing:**
1.-6. academic years

Learning outcomes:
The thesis in the degree Programmes of Medicine and Dentistry is a scientific work which shows the student's ability
to scientific thinking and research. The student gets aquainted with scientific research and is able to evaluate
research publications, the student is cabable of independent and responsible work as part of a scientific community,
develops his/her problem solving skills as well as critical and ethical thinking, and increases his/her readiness to
scientific comminucation.

Contents:
Writing a study plan which includes the research plan. Supervised research and writing a thesis or scientific article
(student as a first or second writer). Oral presentation of the research.

Mode of delivery:
Supervised research work and self-study

Learning activities and teaching methods:
Formulation of research plan and independent research work under the supervision of the teacher. Writing a thesis
and oral presentation. Maturity exam.

Target group:
Graduate students of medicine

Prerequisites and co-requisites:
The research plan and teaching agreement form "tutkielman ohjaussopimus" has to be accepted before returning the
thesis.

Recommended optional programme components:
080705S-01 Thesis, research plan
040300A Maturity exam

Recommended or required reading:
As agreed with the mentor teacher

Assessment methods and criteria:
Accepted study and research plan, accepted thesis or scientific article, oral presentation.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Pass / fail.

Person responsible:
Dean of Education Olli Vainio

Working life cooperation:
According to accepted research plan and as agreed with the mentor teacher.

Other information:
http://www.medicine.oulu.fi/peruskoulutus/laaketieteen-koulutusohjelma/tutkielma-ja-kypsyysnayte.html

Compulsory

080705S-01: Thesis, Study plan, 4 op

Opiskelumuoto: Advanced Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
0 ECTS Credits

Language of instruction:
finnish

Timing:
1.-5. study year

Learning outcomes:
The student can specify research problems to his/her research, choose the research method and formulate
a blueprint for collecting, processing and reporting the matter, and the time scale for the research.

Contents:
The student formulates a research plan, in which he/she introduces context of his/her research, research problems, research method and the blueprint for collecting, processing and reporting the matter, and the time scale for the research.

**Mode of delivery:**
self-study

**Learning activities and teaching methods:**
The student establishes with a mentoring teacher a teaching agreement. The agreement form “Tutkielman ohjaussopimus” is found in [home page of Faculty of Medicine](#) and in Optima.

**Target group:**
Medical students

**Prerequisites and co-requisites:**
No

**Recommended optional programme components:**
080705S Thesis
040300A Maturity exam

**Recommended or required reading:**
As agreed with mentor teacher.

**Assessment methods and criteria:**
The student returns the agreement form and the plan for research to office of Faculty of Medicine and copies of them to the mentoring teacher.
Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
The teacher subscribes the research plan and the teaching agreement form. The accepted plan for research will be registered to completed courses in WebOodi.

**Person responsible:**
Dean of Education Olli Vainio

**Working life cooperation:**
No

**Other information:**
Accepted research plan is one of the requirements to eligibility for 5th year locum post.

080705S-02: Thesis, 16 - 20 op

**Opiskelumuoto:** Advanced Studies
**Laji:** Partial credit
**Vastuuyksikkö:** Medicine
**Arvostelu:** 1 - 5, pass, fail
**Opintokohteen kielet:** Finnish

Ei opintojaksokuvauksia.

080707S: Practical training, 3 - 24 op

**Opiskelumuoto:** Practical Training
**Laji:** Practical training
**Vastuuyksikkö:** Medicine
**Arvostelu:** 1 - 5, pass, fail
**Opintokohteen kielet:** Finnish
**Voidaan suorittaa useasti:** Kyllä

Ei opintojaksokuvauksia.
080707S-01: Practical training, 6 op

Opiskelumuoto: Practical Training
Laji: Practical training
Vastuuyksikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish
Voidaan suorittaa useasti: Kyllä

Ei opintojaksokuvauksia.

Tutkintorakenteisiin kuulumattomien opintokonaisuuksien ja -jaksojen kuvaukset

040201A-06: Anatomy, 0 op

Voimassaolo: 01.08.2016 -
Opiskelumuoto: Intermediate Studies
Laji: Partial credit
Vastuuyksikkö: Medicine
Arvostelu: 0,0 - 99,9
Opettajat: Tuukkanen, Kaarlo Juha Kullervo
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

040138Y: Brand ambassador career skills, 2 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuyksikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

ECTS Credits:
2 credits / 53 hours of work
Language of instruction:
The course can be completed in Finnish. The course can also be completed in English, if agreed with the amanuensis.
Timing:
Recommended completion date no earlier than 2 in the fall semester.
The course can be held in all semesters and periods.
Learning outcomes:
After completing the course the student will be able to guide small groups, as well as to present and explain his/her field of studies and expertise to the public. The student is also able to collect and receive feedback on their performance and change his/her presentation in response to the feedback.
Contents:
Developing and training the career skills as part of student recruitment. The focus being on the presentation skills and education, training and counseling skills.
Mode of delivery:
The course includes both lectures and learning at work.
Learning activities and teaching methods:
- Guided instruction (4-6 hours)
- Self-familiarization with the subject and the work before the start of training (10 hours)
- Training and work-based learning as a part of student recruitment (10-15 hours)
- Independent work training and preparations for the (10-16 hours)
- Learning diary related to training (10 -13 hours).
The other methods can also be used if agreed with the amanuensis.
- If other working methods are used, must be noted that the total length of the course (2 credits) includes 53 hours of work.

Target group:
The course is for all the students at the University of Oulu.

Prerequisites and co-requisites:
The completion of this course is not conditional to prior studies, but it is recommended no to complete the course before the second academic year.

Recommended optional programme components:
The course is an independent entity. It does not require other studies carried out at the same time.

Recommended or required reading:
There is no literature for this course. The student will apply previous studies to this course and to presenting his /her field of study.

Assessment methods and criteria:
Completion of the course succesfully requires participation in the guided instruction. The student also has to complete the training period(s) in the student recruitment and complete the learning diary.
Student must complete the learning study. The information about the training and also evaluation by at least one person must be included to the learning diary.
In the learning diary the student evaluates his/her performance before, during, and after the training period. In the learning diary the student will summarize the tasks and the measures, which he/she has participated in the context of student recruitment.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Pass/fail

Person responsible:
The contact person in the faculty.

Working life cooperation:
Yes. Students practice and develop their skills in presentation or organization and coordination or education, training and counselling.

042001Y-05: Clinical Pathology, 1 op

Voimassaolo: 01.08.2011 -
Opiskelumuoto: Intermediate Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

042001Y-03: Clinical Physiology 2, 1 op

Voimassaolo: 01.08.2011 -
Opiskelumuoto: Intermediate Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.
080603A-05: Clinical chemistry, endocrinology, 1,5 op

Voimassaolo: 01.08.2001 -
Opiskelumuoto: Intermediate Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Risteli, Juha
Opintokohteen kielet: Finnish

ECTS Credits: 1,5 ECTS
Language of instruction: Finnish
Timing: Timing C9-10

Learning outcomes: By the end of the course the student understands the feedback control systems in endocrinology and on this base can diagnose the common endocrine disorders and their reasons. The student can the hormone determinations and indications to use them. The student can the common weaknesses and disturbing factors of hormone determinations. The student knows how to diagnose heritable metabolic diseases and the use of cancer markers. The student knows the effects of childhood, pregnancy and older age on the laboratory methods. The student knows what methods are available in the health centres and how the student can order other methods available.

Contents: Theoretical background of clinical endocrinology, hormone determinations, adrenal function and its disorders, hypothalamic and hypophysis hormones, the follow up of pregnancy by clinical chemical methods, endocrinology of aging, thyroid function and its disorders and calcium metabolism and its disorders. Analysing congenital heritable metabolic diseases and cancer markers.

Mode of delivery: Face-to-face teaching
Learning activities and teaching methods: Lectures 16 h, small group practical course 2 h and independent preparation for small group practical course of patient cases.
Target group: Medical students in clinical phase
Prerequisites and co-requisites: Candidate of Medicine
Assessment methods and criteria: Assessment is based on materials given in lectures, small group practical course and textbook.
Grading: The evaluation is based on examination which given 1/3 of total score of clinical chemistry. Total evaluation scale is 0-5.
Person responsible: Professor Juha Risteli
Working life cooperation: No

080603A-05: Clinical genetics, examination, 0 op

Opiskelumuoto: Intermediate Studies
Laji: Partial credit
080505A-02: Clinical genetics, mandatory, 0 op

Opiskelumuoto: Intermediate Studies
Laji: Partial credit
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: Finnish

Ei opintojaksokuvauksia.

040126A: Clinical pharmacology, 2,5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Risto Kerkelä
Opintokohteen kielet: Finnish

ECTS Credits:
2.5 ECTS / 66 hours of work

Language of instruction:
Finnish

Timing:
C9-10

Learning outcomes:
After passing the course the student should have ability to safe, efficient and cost effective drug therapy. The student should understand the basis for drug therapy from the point of view of general practitioner and the treatment of most common intoxications.

Contents:
Factors affecting drug selection, dosage and therapy will be discussed applying knowledge of basic pharmacology. Furthermore, the common problem cases of drug therapy will be discussed. Individualized therapy, use of major classes of drugs, special treatment situations and most common intoxications will also be discussed.

Mode of delivery:
Face-to-face teaching

Learning activities and teaching methods:
Introductory lecture 2 hours. Clinical pharmacology patient case discussion in study groups. Thematic seminars (11 x 2 h) will cover major areas of drug therapy and special situations of drug treatment and most common intoxications. Final exam.

Target group:
Medical students

Prerequisites and co-requisites:
The required prerequisite is the completion of the following courses prior to enrolling for the course unit: Pharmacology and toxicology (040106A)

Recommended optional programme components:
No.

Recommended or required reading:
Assessment methods and criteria:
Attending the patient case discussion with the tutor and passing of the final exam.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course unit utilizes verbal grading scale pass/ fail

Person responsible:
Doc. Risto Kerkelä (risto.kerkela@oulu.fi)

Working life cooperation:
No.

Other information:

903008Y: Conversational Skills in German, 1,5 op

Voimassaolo: 01.08.1995 -
Opiskelumuoto: Language and Communication Studies
Laji: Course
Arvostelu: 1 - 5, pass, fail
Opintokohteen kielet: German

Proficiency level:
A2-B1 on the CEFR scale. If the student wishes to include this course in his/her compulsory foreign language studies, the student must prove that he/she has attained the proficiency level of B1 prior to taking the course.

Status:
The course can be approved as a partial completion of the course Foreign Language. It may also be taken as a separate optional course.

Required proficiency level:
At least 3 years of German studies at school. If you wish to choose German as the language of your compulsory foreign language studies, you must have completed German as B2, A2 or A1 language at school or have equivalent knowledge. For more information about these requirements, contact the course's teacher.

ECTS Credits:
1,5 credits / 40 h of student's work

Language of instruction:
German

Timing:
Autumn term

Learning outcomes:
Upon completion of the course the student should be able to manage in typical professional and medical-field specific communication situations in an interactive manner. He/she should be able to actively participate in discussions about medical topics. He/she should be able to justify his/her views on the different matters as well as discuss the pros and cons of different options.

Contents:
The course consists mainly of oral exercises, which can take the form of dialogues, discussions in groups, role plays, simulated discussion situations etc. The student practises various professional situations (doctor seeing patients at the hospital etc.) and discusses various current medicine-related topics. Some of the topics covered are agreed upon with the participants at the beginning of the course.

Mode of delivery:
Contact teaching

Learning activities and teaching methods:
This course will be completed by participating the course 903053Y Conversational Skills in German / Mündliche Kommunikation - 2 ECTS, however the scope for medical students will be only 1,5 credits.

Target group:
Students of the Faculty of Medicine

Prerequisites and co-requisites:
See Required proficiency level

Recommended optional programme components:

Recommended or required reading:
Material prepared by the teacher will be distributed in class.

Assessment methods and criteria:
Continuous assessment. Completion of the course requires regular and active participation in teaching and completion of the given assignments. Read more about assessment criteria at the University of Oulu webpage.

Grading:
1 - 5 or pass / fail

Person responsible:
Sandra Mänty

Working life cooperation:
-

Other information:
Course will be held at Kontinkangas campus, at Aapistie. There will be an information session in September where students may register for the course. It is also possible to register in WebOodi.

040401A: Dissection, 3 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Tuukkanen, Kaarlo Juha Kullervo
Opintokohteen kielet: Finnish

Timing:
C1. The course is optional and organized in the end of C1.

Learning outcomes:
The learning outcomes are to understand the topographical structure of the human body.

Contents:
The course concentrates in musculoskeletal system, cardiovascular system, thorax and respiratory system, abdomen and gastrointestinal system, urinary system, pelvis and genital systems, skull and brains. The dissection course may compensate the obligatory small group teaching of extremities in the end of the anatomy course.

Learning activities and teaching methods:
The students will study the regional anatomy in advance before the following dissection sessions. The dissection is performed during 2 weeks in 4 to 6 hours sessions under supervision of the teachers.

Recommended or required reading:
The material of the anatomy study module.

Assessment methods and criteria:
Participation in all the dissection sessions is obligatory. The course is performed by cadaver dissection. Read more about assessment criteria at the University of Oulu webpage.

Grading:
The course is not graded.

Person responsible:
Professor Petri Lehenkari (Professor Juha Tuukkanen, leave of absence)

Other information:
The course is the same for medical and dental students.

080722A: Elective Course of Surgery, 1 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Juvonen, Tatu Sakari
Opintokohteen kielet: Finnish

ECTS Credits:
1 ECTS

Language of instruction:
The tuition shall be arranged in Finnish.

**Timing:**
During sixth year
C 11-12

**Learning outcomes:**
The student will be familiar with the symptoms, diagnostics and treatment of the most usual surgical diseases.

**Contents:**
The repetition concerning most problems in important surgical diseases. Lessons during two days of Orthopedics, Thoracic and Vascular surgery, Pediatric surgery, Gastroenterological surgery and Urology.

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
Lessons 20h. Contact teaching 20 hours, independent work 7 hours.

**Target group:**
This is an intensive unit course of surgery is of particular benefit for medical students who will shortly graduate.

**Prerequisites and co-requisites:**
Surgery 1 and 2

**Recommended or required reading:**
Lecture material.

**Assessment methods and criteria:**
Obligatory study

080417A: General Practitioner and Public Health, 9.5 op

Voimassaolo: 01.08.2007 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Heini Kelloniemi, Markku Timonen
Opintokohteen kielet: Finnish

ECTS Credits:
9.5 ECTS credits
Language of instruction:
Finnish/English
Timing:
The sixth year, autumn semester, C11.
Learning outcomes:
Upon completion of the course the student will understand the principles of health at population level, and as applicable to a particular disease. The student will have knowledge of the most important public health schemes and programmes, and is able to apply them at a local level. The student will know the principles and organisation of insurance and rehabilitation medicine, and is able to apply their knowledge into clinical practice. The student will understand the aetiological factors of disease both at an individual and population level and is competent at diagnosis and management of the common diseases.

The student will receive an overview of the challenges of global health / global public health. He/she is able to critically assess and interpret findings of public health research, and to act as an expert of preventative medicine in primary care. The student will learn the ability to adopt and apply methods of health promotion and disease prevention at an individual-, family-, and population level, therein also considering the expertise role of the multidisciplinary team.

Student will have an appreciation of the doctor-patient relationship and the role of communication between family members as applicable to patient management, and is able to use and apply communication skills in different clinical scenarios. The student is able to evaluate the quality and economics of all his/her work.

Contents:
Population health, health promotion and recognising health problems; preventative medicine; encouragement of health behaviour that will promote health. Epidemiology, social- and health service and economics as part of patient management. Medical law, application of social security law in clinical practice, medical certificates and medical statements. Introduction to rehabilitation. Team working with expert members of the multi-disciplinary team. Global health / Global public health.

Mode of delivery:
Face-to-face teaching.
Learning activities and teaching methods:
Lectures, theme days, seminars and small group teaching. One-week practical training module at a primary health care centre, which includes a set of learning tasks.
Target group:
The students from medicine.
Prerequisites and co-requisites:
C10 Health centre practice course have to be done.
Recommended or required reading:
Assessment methods and criteria:
Written examinations. Participation in seminars, small group works, theme days and practical training module at a primary health care centre.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Final grade of public health course will consist of final written exam and seminar assessment. The best seminar work (written and oral presentation) from each seminar is selected by the group of supervisors and awarded with 3 additional points in the final exam. Final examination of public health comprises 4 questions, altogether max 5 points each. At least 10 points are required for passing the examination. Final examination of general practice comprises 4 questions, altogether max 5 points each. At least 10 points are required for passing the examination, and a student can attend the examination after passing all other teaching activities of general practice. Final grade of the whole course is the mean of the final grade of public health and the final examination of general practice.

Person responsible:
Professor Markku Timonen; general practice
Professor Jouni Jaakkola; public health

Working life cooperation:
Yes, during the one week practical training in health centres.

080415A: Health centre practice, 4,5 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Markku Timonen
Opintokohteen kielet: Finnish

ECTS Credits:
4.5 ECTS credits/ 121 hours of work

Language of instruction:
Finnish

Timing:
C 10, the course unit is held in the spring semester.

Learning outcomes:
The student is able to use history taking and clinical examination as primary sources of information, and to use information obtained from these to request appropriate further examinations and tests. The student is familiar with the main examination and management strategies used in general practice, and understands the role which the probability of disease has for the selection of a management strategy.
The student gains experience in: management of a range of clinical problems which present to primary care; coordination and organization of treatment; and working using a patient-centred approach.
The student gains insight into: disease prevention and health promotion in paediatric, antenatal-care and school-based health care settings; main examination and treatment strategies in general practice; issuing expert statements in matters of social security system, rehabilitation and employment; time management and coordination of clinical work in primary care; multidisciplinary team work.

Contents:
Theoretical learning of the "key principles" of general practice. Practical learning in different areas of general practice: scheduled and acute appointment at the health centre; antenatal- and maternity-, paediatric-, family-planning- and school services, inpatient care on the health care centre wards, and inpatient care on long-term wards, community care.

Mode of delivery:
Group work. Practical training in health care centres (2 weeks).

**Learning activities and teaching methods:**
Lectures 7.5 h including independent work.
Group work for four days (32 hours).
Two-week practical training in health care centres (74 hours).

**Target group:**
Medical students.

**Prerequisites and co-requisites:**
All earlier studies in the curriculum of basic medical education.

**Recommended optional programme components:**
No alternative course units.

**Recommended or required reading:**

**Assessment methods and criteria:**
The assessment of the course unit is based on the learning outcomes of the course unit

Attending to all compulsory teaching

The assessment of the learning outcomes: The final examination during the sixth year of medical education.

Read more about [assessment criteria](#) at the University of Oulu webpage.

**Grading:**
The course unit utilizes verbal grading scale “pass/ fail “

The final examination during the sixth year of medical education utilizes a numerical grading scale 1-5

**Person responsible:**
Markku Timonen, professor of general practice

**Working life cooperation:**
Yes, during the two-week practical training in health centres.

**080713A: Internal Medicine II, (Additional Studies of Internal Medicine), 3 - 9 op**

**Voimassaolo:** 01.08.2010 -
**Opiskelumuoto:** Intermediate Studies
**Laji:** Course
**Vastuuysikkö:** Medicine
**Arvostelu:** 1 - 5, pass, fail
**Opettajat:** Savolainen, Markku
**Opintokohteen kielet:** Finnish

**ECTS Credits:**
3 ECTS / 80 hours of work.

**Language of instruction:**
Finnish

**Timing:**
C XI-C XII

**Learning outcomes:**
This course gives the student advanced knowledge in internal medicine and skills of critical thinking. The student is able to treat patients in an appropriate way in the health care system. The student can recognize symptoms and clinical features of diseases and is able to critically evaluate scientific articles. The student understands the significance of different levels of our health care system.

**Contents:**
Essential issues of internal medicine and geriatrics.

**Mode of delivery:**
Face-to-face teaching

**Learning activities and teaching methods:**
Internal medicine
1. Lectures 9 h.
2. Seminars 6 h. Attendance is compulsory.

Geriatrics
1. Small group classes 2 h. Attendance is compulsory.
2. Seminars 16 h. Attendance is compulsory.

Target group:
Medical students

Prerequisites and co-requisites:
Student must have completed the course of Internal Medicine I.

Recommended optional programme components:
The course is performed simultaneously with other sixth year's courses.

Recommended or required reading:
The other literature will be agreed during the course.

Assessment methods and criteria:
Attendance at compulsory teaching. Final exam of internal medicine.
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Exam consists of eight short essays. Six points is maximum / essay. Exam is failed if the total points are less than 2 is worth of 0 points.
The final grade of internal medicine consists of the final exam and the exams of endocrinology and metabolic disease, kidney diseases, haematology, rheumatology and gastroenterology.
Proportion of final exam is 50% and proportion of smaller exams is 50% in the final grade of internal medicine.
Total points of exams and the grading scale:
51.7 -60.0 # 5, 43.4 - 51.6 # 4, 35.1 - 43.3 # 3, 26.8 - 35.0 # 2, 18.5 - 26.7 # 1.

Person responsible:
Professor Markku Savolainen (markku.savolainen@oulu.fi)

Working life cooperation:
No

Other information:
Required studies before final examination: preexaminations of Internal Medicine, attendance at compulsory teaching (year 3, Semesters 5 and 6) and practice in outpatient clinic and in the department of emergency and the course of infectious diseases. Additionally is required written patient history and physical examination for 6 patients.
Examined carefully. Registration to final examination on Weboodi at least one week before the examination.
Attendance is accepted only if registration is made properly by the closing date and all the required studies are passed. The final grade of internal medicine takes Polyclinic clerkship in internal medicine.

040419S: Management of acute pain - simulation training, 0.5 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Alahuhta, Seppo Matias
Opintokohteen kielet: Finnish

ECTS Credits: 1.5 ECTS
Language of instruction: Finnish
Timing: C 8/ C 10
Learning outcomes:
The aim of the course is that medical and nursing students will practice in multidisciplinary groups practical skills in CPR and other life threatening situations. Upon completion of the course the students will understand that the management of emergencies requires good communication, leadership and team work besides knowing clinical guidelines.

Contents:

**The students will practice in groups practical skills in CPR and other life threatening situations.**

**Mode of delivery:**
Blended teaching

**Learning activities and teaching methods:**
Simulation training will be carried out in groups of 3-4 students and it includes introduction, simulation scenario and debriefing.

**Target group:**
12 students will be taken in course unit.

**Prerequisites and co-requisites:**
The required prerequisite is the completion of the following courses prior to enrolling for the course unit: Courses of the third year

**Recommended optional programme components:**
Internal medicine, surgery, radiology, clinical chemistry

**Recommended or required reading:**
Lecture, handouts

**Assessment methods and criteria:**
Participation in simulation training
Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
pass/fail

**Person responsible:**

**Proficiency level:**
A2-B1 on the CEFR scale. If the student wishes to include this course in his/her compulsory foreign language studies, the student must prove that he/she has attained the proficiency level of B1 prior to taking the course.
Status: Compulsory / optional

**Required proficiency level:**
3 years of German studies during secondary education or equivalent knowledge. If the student wishes to include this course in his/her compulsory foreign language studies, the student must prove that he/she has attained the proficiency level of B1 prior to taking the course.

**ECTS Credits:**
1.5 credits / 40 h of students work

**Language of instruction:**
German

**Timing:**
Every term.

**Learning outcomes:**
Upon completion of the course the student should be able to understand standard medical texts as well as scientific articles from the field of Medicine. He/she should be able to recognise the way the writers' personal perspectives manifest themselves in the discussed texts. He/she should be able to comment on the content of the texts and summarise the texts in Finnish. The student should be conversant with various reading strategies and be familiar with the distinctive features of written German expression.

**Contents:**
The student practises reading comprehension with various medical texts and completes exercises involving vocabulary and grammatical structures needed in the most common communication situations.

**Mode of delivery:**
Guided self-study

**Learning activities and teaching methods:**
This course will be completed by participating the course 903000Y Reading Comprehension in German (2 - 3 ECTS credits), however the scope for medical students will be only 1.5 credits.

**Target group:**
Students of the Faculty of Medicine.

**Prerequisites and co-requisites:**
See Required proficiency level

**Recommended optional programme components:**
- 

**Recommended or required reading:**
Material will be provided by the teacher.

**Assessment methods and criteria:**
Completion of given assignments, regular participation in the tutoring.

C5
Learning outcomes:
By the end of the course the student will have practiced the following skills:
- providing clinical knowledge
- using electronic patients information systems
- using health care classification systems
- using workstations and network for clinical work

Contents:
Medical databases, critical appraisal of medical research article, electronic patients records and information systems.

Mode of delivery:
Regular and active participation in the lessons and completion of a practical project.

Learning activities and teaching methods:
Lessons 6 h and completion of a practical project. 10 h.

Target group:
Medical students

Prerequisites and co-requisites:
None

Recommended optional programme components:
This course is a part of the studies in research skills.

Recommended or required reading:
The literature will be agreed during the course.

Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Mika Nevalainen
Opintokohteen kielet: Finnish

ECTS Credits:
1 study point.

Timing:
Spring term

Learning outcomes:
The ability to understand Latin terminology, especially in anatomy and diagnostics. During the course, students will be introduced to the structures of Latin, as well as the inflection of nouns and adjectives. After completing the course, students will be more familiar with the vocabulary of medical Latin. They will also be able to use Latin correctly in their work.

Contents:

Learning activities and teaching methods:
Lectures 10 h

Recommended or required reading:

Assessment methods and criteria:
80 % compulsory attendance and exam.
Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
Pass / fail

**Person responsible:**
Dr. Timo Sironen. The course teachers are Mika Nevalainen (BM) and Jukka Ahola (BA)

**Other information:**
50 students are admitted to the course. The course will be convened if 20 or more students enrol. The course is a joint project between the Department of Anatomy and the Faculty of Humanities

---

**080221A: Organ pathol II, 2,5 op**

**Voimassaolo:** 01.08.2010 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Medicine

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Karttunen, Tuomo Juhani

**Opintokohteen kielet:** Finnish

**ECTS Credits:**
2.5 ECTS credits/66 hours of work

**Language of instruction:**
Finnish

**Timing:**
C 9-10, spring semester

**Learning outcomes:**
Upon completion the student should know, for each organ system included, the basic mechanisms of diseases (etiology and pathogenesis), their basic morphological, functional and clinical characteristics, and terminology related with diseases. The student should be able to recognize and classify the most common diseases of the organ systems, understand the relationship between these features of the diseases and their symptoms and other clinical manifestations. The student should know the most important sources of error in histopathological diagnostics, and be familiar with the collaboration between clinician and pathologists needed in every day clinical work.

**Contents:**

**Mode of delivery:**
Face-to-face teaching.

**Learning activities and teaching methods:**
Lectures 6 hours; theme days 8 hours, Practicals 7 hours. Self study 44 hours, written examination 1 hour.

**Target group:**
Medical students.

**Prerequisites and co-requisites:**
The required prerequisite is the completion of the following courses prior to enrolling for the course unit: 040108A General pathology; 080211A-01 Organ Pathology I

**Recommended optional programme components:**
No alternative course units.

**Recommended or required reading:**

**Assessment methods and criteria:**
The course requirements include participation in compulsory practicals and passing the end-of-course examination.

Read more about assessment criteria at the University of Oulu webpage.

**Grading:**
The evaluation scale is 1-5/fail.
080703A: Physiatry, 3 op

Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Karppinen, Jaro Ilari
Opintokohteen kielet: Finnish

ECTS Credits:
3 ECTS credits/88 hours of work

Language of instruction:
Finnish

Timing:
The course is held in the autumn and spring of the 4th study year

Learning outcomes:
Upon completion of the course, the student will know the basics physical medicine and rehabilitation to the extent required by a general physician. Spinal disorders are focused due their high societal importance.

In the practical sessions the student will practice manual examination of musculoskeletal disorders and proper injection technique. Start-up examination before the main course is based on Current Care -guidelines.

Contents:
Diagnostics, treatment and functional evaluation of musculoskeletal disorders
Biomechanics of walking
Principles of physiotherapy and occupational therapy
How to refer patients to physiotherapy
Rehabilitation of neurologic diseases
Medical aids and artificial limbs
Biological background of rehabilitation
Rehabilitation process

Mode of delivery:
Face-to-face teaching
Start-up examination is based on data in web

Learning activities and teaching methods:
Lectures 32 h (32 h independent learning)/ practical group-sessions 8 h (no need for independent learning)/ theme day in collaboration with neurosurgeons 3 h (+ 3 h independent learning)/web-based learning for start-up examination 10 h

Target group:
Medical students

Prerequisites and co-requisites:
No

Recommended optional programme components:
Prior medical courses accomplished

Recommended or required reading:
Textbook Arokoski et al Physical and Rehabilitation Medicine, 2009

Assessment methods and criteria:
Pass/Fail
Read more about assessment criteria at the University of Oulu webpage.

Grading:
Pass/fail

Person responsible:
Professor Jaro Karppinen

Working life cooperation:

Ei opintojaksokuvauksia.

080812A: Radiology II, 3 op

Voimassaolo: 01.08.2010 -
Opiskelumuoto: Intermediate Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Tervonen, Osmo Antti
Opintokohteen kielet: Finnish

ECTS Credits:
3 ECTS credits /80 hours of work

Language of instruction:
Tuition shall be arranged in Finnish.

Timing:
The course unit is held in the autumn semester of 6th year.

Learning outcomes:
Upon completion of this second curricular unit of radiology, the student should be able to understand principles of image interpretation as well as obtain basic image interpretation skills of radiographs. The student should master the indications for selected investigations in radiology within general practices clinical context and understand correct ordering (percipio) and reporting routines in clinical situations.

Contents:
Radiology II
Musculoskeletal radiology, thoracic radiology, abdominal radiology, neuroradiology, urogenital radiology, interventional radiology and pediatric radiology

Mode of delivery:
The mode of delivery for the course unit is face-to-face teaching.

Learning activities and teaching methods:
The implementation methods of the course vary.

Lectures consist of 18 hours. There will be 15 hours of guided small group teaching events (image interpretation, Image acquisition [x-ray], Ultrasound anatomy, Emergency duty, Ultrasound clinical surveillance and 47 hours of studying privately or in a group.

Target group:
Target groups are 6th year medical students (MD).

Prerequisites and co-requisites:
Prerequisite for participation to the course unit is the completion of Radiology I course.

Recommended optional programme components:
There are no alternative courses.

Recommended or required reading:
Books: Either, Soimakallio (Editor): Radiologia [in Finnish] or Mettler, FA (Editor): Essentials of Radiology

100-tärkeintä rtg-kuva (National teaching image base): Distributed through university domain.

Assessment methods and criteria:
This course unit utilizes exam assessment.
Grading:
The course unit utilizes a numerical grading scale 1-5. In the numerical scale zero stands for a fail. The grade will not be given until all the obligatory teaching courses are completed.

Person responsible:
Osmo Tervonen, Professor
Jaakko Niinimäki, Professor
(deputy of Roberto Blanco Sequeiros, Professor)

040415S: Refresh course of resuscitation, 1,5 op

Opiskelumuoto: Advanced Studies
Laji: Course
Vastuuysikkö: Medicine
Arvostelu: 1 - 5, pass, fail
Opettajat: Alahuhta, Seppo Matias
Opintokohteen kielet: Finnish

ECTS Credits:
1.5 ECTS

Language of instruction:
Finnish

Timing:
C 8/C 10

Learning outcomes:
Rehearsal of resuscitation guidelines (basic life support and advanced life support) and ability to understand the basic mechanisms behind the guidelines and use them in practice.

Contents:
Lectures, simulation training and taking part to teaching of the first year students

Mode of delivery:
Blended teaching

Learning activities and teaching methods:
Resuscitation guidelines (basic life support and advanced life support), simulation training in small groups, teaching first year students

Target group:
12 students will be taken to the course unit.

Prerequisites and co-requisites:
The required prerequisite is the completion of the following courses prior to enrolling for the course unit: Courses of the third year.

Recommended optional programme components:
Internal medicine and surgery

Recommended or required reading:
Elvytyksen käypä hoito-suositus, Duodecim, ERC:n elvytyssuosituksset, Resuscitation.

Assessment methods and criteria:
Taking part to lecture and simulation training and teaching 3-4 times first year students.

Grading:
pass/fail

Person responsible:
Professor Seppo Alahuhta

Working life cooperation:
No

Voidaan suoritata useasti: Kyllä  

080712A-04: Surgery II, 6 op  

Voimassaolo: 01.08.2005 -  
Opiskelumuoto: Intermediate Studies  
Laji: Partial credit  
Vastuuysikkö: Medicine  
Arvostelu: 1 - 5, pass, fail  
Opettajat: Juvonen, Tatu Sakari  
Opintokohteen kielet: Finnish  

ECTS Credits:  
6 ECTS  
Language of instruction:  
The tuition shall be arranged in Finnish.  
Timing:  
During sixth year.  
C 11-C12  
Learning outcomes:  
The students will be familiar with surgical thinking, the diagnostics and treatment of surgical diseases and the  
ground of surgical treatment and surgical procedures.  
Contents:  
Pediatric surgery, Thoracic and Vascular surgery, Hand surgery and Plastic surgery and Orotopedic theme day 3 h.  
Mode of delivery:  
The tuition will be implemented as blended teaching.  
Learning activities and teaching methods:  
Lessons 40h  
Target group:  
Medical students  
Prerequisites and co-requisites:  
The required prerequisite is the completion of the following courses prior to enrolling for the course: Surgery 1  
Recommended or required reading:  
For finnish speaking students:  
Rokkanen, Päätälä, Tunturi, Raitanen, Ahtinen: Kirurgiset pientoimenpiteet. Tampereen Lääketieteellinen  
Kandidaattiseura ry. 5. uudistettu painos 2012.  

For english speaking exchange-program students:  
Burkitt, Quick, Reed: Essential Surgery, Problems, Diagnosis & Management: Churchill Livingstone Elsevier Ltd.  
Edinburgh. 4th ed 2007  
Assessment methods and criteria:  
Obligatory lecture of Hand surgery and exam should be passed.

040019S: Thesis Data-analysis, 2 op 
Opiskelumuoto: Advanced Studies 
Laji: Course 
Vastuuyksikkö: Medicine 
Arvostelu: 1 - 5, pass, fail 
Opettajat: Pentti Nieminen 
Opintokohteen kielet: Finnish
ECTS Credits:  
2 ECTS

Learning outcomes:  
The student will be able to plan study designs and statistical computing related to the research question of his/her thesis, obtain and analyze data with basic statistical methods, use basic statistical significance tests and inference methods, and report the findings.

Contents:  
Aims and phases of statistical research, planning statistical research, obtaining data and suitable methods to solve the research questions of the thesis. Use of statistical software.

Mode of delivery:  
Blended teaching

Learning activities and teaching methods:  
Face-to-face meetings with the teacher, small-group lessons, independent work, assignments

Target group:  
All students working with their thesis

Prerequisites and co-requisites:  
None

Recommended optional programme components:  
040012Y Knowledge and Research

Recommended or required reading:  
Material in Optima.

Assessment methods and criteria:  
Regular and active participation in the small group lessons and completion of practical projects.
