The Oulu University Secure Programming Group (OUSPG) is searching for candidates to work on *information security* as

Trainee, Research Assistant (Master's thesis worker) or Doctoral Student

OUSPG studies, evaluates and develops methods of implementing and testing software in order to discover security vulnerabilities in a pro-active fashion. We focus on implementation level security issues and software security testing, while battling the ever increasing complexity in IT.

Job description:

We are looking for persons interested in becoming the future security and networking experts. The aim is to study different fields of information security, such as secure programming practices, security evaluation of software, vulnerability testing and assuring privacy in the always-connected world.

We offer:

- Good opportunity to learn effective team-working skills
- Professional skills and the secrets of information security
- Valuable contacts to international experts
- Infrastructure and guidelines to build your research on
- Assimilation of your interests to serve our needs

We expect:

- Respect for concept of confidentiality, and careful wording
- Appropriate prior studies
- Strong experience in programming
- Track record of successful software development
- Fluent skills in English, at least in written form
- For the Master's thesis worker position, you are in the advanced phase of your studies
- For the Doctoral Student position, you have graduated with a M.Sc. or equivalent and would like to continue your studies

Starting date:

as Research Assistant (Master's thesis worker) or Doctoral Student: **the earliest possible**
as Trainee: **May 2014**

Duration of the contract is first one year (except for Trainee), but it can be continued depending on the progress of the research and funding available. The salary will be based on the salary system for teaching and research staff in use at the University of Oulu, the job demand levels being for the Research Assistant: 1, for Doctoral student: 2 and for Trainee: 1300-1500 euros. In addition, on the basis of personal work performance up to 46.3% of the job demands level can be paid.
