

SCHOLARSHIPS FOR MASTER THESIS STUDENTS

The Department of Communications Engineering DCE with its research unit Centre for Wireless Communications CWC conducts world-class research, trains world-class graduates, creates new technology and supports companies.

In 2013, we are offering up to 15 grants to master thesis students of

a) M.Sc. (Tech.) in Electrical Engineering - Telecommunications option

Students focusing on telecommunications are eligible for applying a grant of 3.000€ for their master's thesis work. The selection criteria are:

- prior completion of both the candidate's thesis and the obligatory training
- minimum 55 credit points received during the academic year following the completion of the candidate work
- successful completion of courses of the module

b) M.Sc. (Tech.) in Wireless Communications Engineering from the International Master's Programme WCE

WCE second-year students are eligible for applying a grant of 3.000€ for their master's thesis work. The selection criteria are:

- prior completion of the the obligatory training
- minimum 55 credit points received during the first academic year in the programme
- successful completion of courses

The grants shall be **paid in two parts:**

- 1st payment once the thesis topic has been fixed and the practical thesis work has started
- 2nd payment once the permission to upload the thesis to Laturi electronic system has been given by the supervisor.

APPLICATIONS

Applications should include the topic(s) preferred by the student and as attachments

1. transcript of study records and
2. CV.

Printed applications should be submitted **by 20 September, 2013 at 15:00** to Antero Kangas in TS 443.

The nominations will be made right after the deadline and the work can be started on October 1. The expected duration of the thesis work is max. six months.
