

# NGS Project Request Form

The following form is used to collect background information required to initiate a new next-generation sequencing project and it helps us to provide you with the pricing information.

Please indicate date(s) that would be best for you to organize a project initiation meeting. During the project initiation meeting we will go through all details related to your project including the experimental design, sample requirements and multiplexing, aimed numbers of reads, schedule and pricing, and data analysis.

After receiving this form, we will contact you shortly.

Invoice address/Cost center

Reference for invoicing (project no.), required for Oulu University projects

Name of the group leader/principal investigator

Project background and objectives

Studied species (human, mouse, other)

Estimated sample number

Sample origin (fresh tissue, blood, FFPE, other)

Sample quality (good quality, degraded samples)

Sample material (genomic DNA, total RNA, mRNA, other)

Estimation about the depth of the needed sequencing coverage

Application (whole genome sequencing, targeted sequencing of exomes and gene panels, transcriptomics):

Are current samples connected to previous projects, if yes which

Are current samples part of bigger project planned to be extended in the future

Sample status (are the samples ready and if not when are they estimated to be ready)

Sample is dissolved in

Are you planning to prepare your own libraries

Preferred time(s) for the project initiation meeting

Additional information
