

Practical Statistics Club, Autumn 2017

The **Practical Statistics Club, Autumn 2017** programme of workshops will be starting again in October. For those who haven't attended before, these workshops are designed to share knowledge about analytical strategy and statistical methods, techniques, and software. Each meeting will have a theme which you will be notified of in advance. A selected speaker with knowledge in this topic will share some examples of how the methodology can be used in research and help to guide us through some practical examples. Participants are also invited to bring their own work or results if relevant to the theme for some open discussion.

The first meeting will be held on **Fri 6th Oct 12-4pm** in room **KT285**. The topic of this meeting is **ATTRITION**, and will be led by Jouko Miettunen, Marianne Haapea and Tanja Nordström.

Please email estelle.lowry@oulu.fi to register by **Wed 4th Oct** as there are only a limited number of computers!

The second meeting will be on **Thurs 2nd Nov 12-4pm** in room **KT285**. The topic of this meeting is **BASICS IN R**, and will be led by myself (Estelle Lowry) and Anni Heiskala.

The December meeting will be on the topic of **METABOLOMICS** and will be led by the computational medicine group. The exact date of this meeting will be confirmed in the upcoming weeks.

Those who participate in all three workshops will get 1 ECTS for this course

WELCOME!!!
