UNIVERSITY of OULU
OULUN YLIOPISTO
FINLAND
MCH is one of the University of the Arctic's Master's Programmes, and a part of the Barents Cross Border University. MCH graduates are awarded a Master of Health Sciences degree, and they will be able to work, e.g. in administrative and managerial positions within healthcare and wellbeing services, as well as in education, development, and research.

The Global North is a real-time test laboratory. Climate change, environment, and unique social structures have a significant influence on the health and wellbeing of Northern residents, and on the delivery of healthcare and wellbeing services. We share this knowledge through the International Master’s Programme in Health and Wellbeing in the Circumpolar Area (MCH).

The two-year (120 ECTS) MCH is established by collaboration of an international partner university network:

- University of Oulu (Centre for Arctic Medicine, Institute of Health Sciences, Thule Institute)
- University of Greenland/Greenland Center for Health Research, Greenland
- Lulea University of Technology, Sweden
- Northern State Medical University, Russia
- Northern (Arctic) Federal University, Russia
- University of Lapland, Finland
- University of Manitoba, Canada

MCH graduates are awarded a Master of Health Sciences degree, and they will be able to work, e.g. in administrative and managerial positions within healthcare and wellbeing services, as well as in education, development, and research.

Apply to Study with us
