

eduVPN on Windows workstation (non-Univ workstation)

1. Download and install OpenVPN Connect VPN client

Download and install OpenVPN Connect VPN client from <https://openvpn.net/client-connect-vpn-for-windows/>. You need administrator rights to complete the installation.

2. Create and install VPN profile

On service <https://account oulu.fi/> select *Activate eduVPN*.

After identification, login to VPN portal with staff or student username and password:

Sign In

Please sign in with your username and password.

Select *Configurations*, name the profile and select *Create and Download*.

Create

Manually create and download an OpenVPN configuration file for use in your OpenVPN client. Select a profile and choose a name, e.g. "Phone".

Your new configuration will expire on 2020-03-20. Come back here to obtain a new configuration after expiry!

Profile

University of Oulu Staff

Name

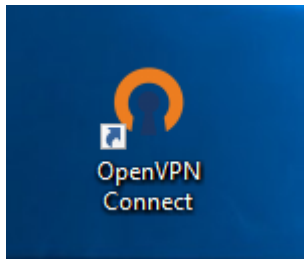

Home Workstation

Create and Download

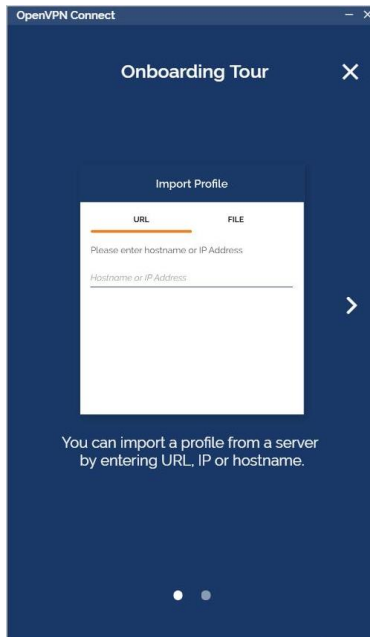

NOTE: The profile is valid up to the given date and after that you have to create and download a new profile.

3. OpenVPN Connect

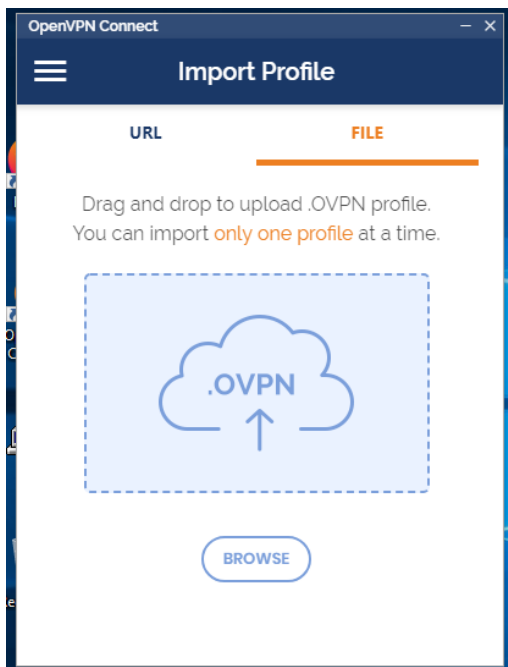

Open the VPN client using the shortcut *OpenVPN Connect*:

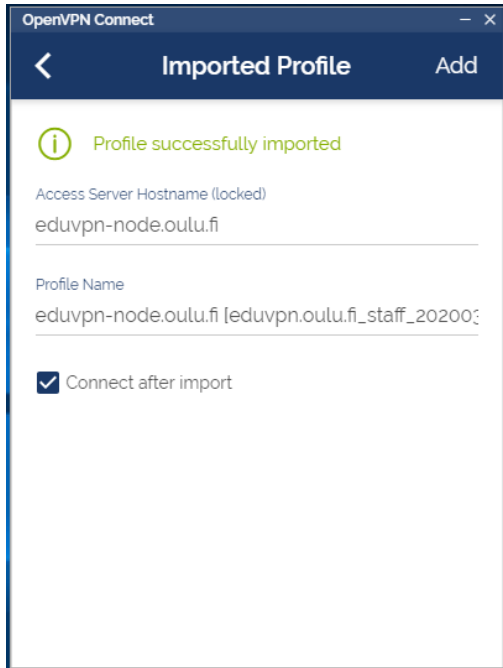

Close Onboarding tour by clicking X:

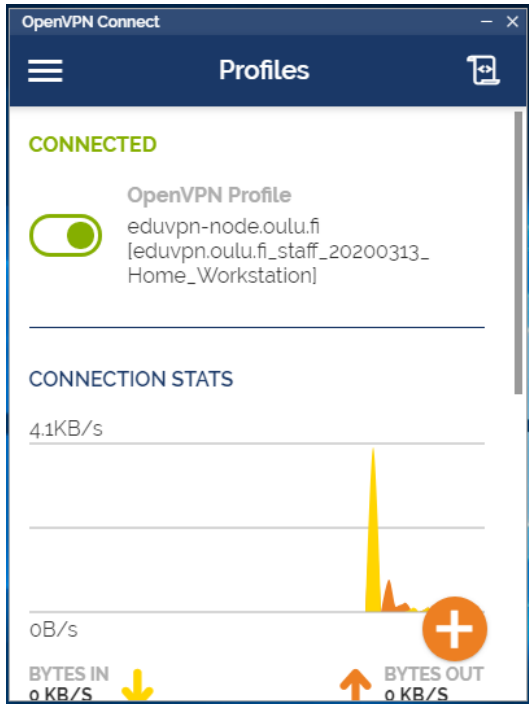

Select *Import* > *File* > *Browse*. Search and select the downloaded profile file:

Select *Connect* after import and select *Add*:

VPN connection is now installed and connected:

To close the connection, use the button in OpenVPN Connection window:
