## About Bittium

Bittium provides reliable and secure solutions for connectivity, tactical communications and biosignal measuring and monitoring.

## Key Figures

# Connectivity Enabled

# Technology trends

R&D services and  
consultation

## Wireless communications

- Use of commercial technologies will increase in public safety solutions as well as in tactical communications.

## Cyber security

- Governmental institutions are requiring higher level of certified data security in mobile communications.

## Biosignal measurements and analyses

- Need for low latency, secure wireless solutions is increasing in patient care.

## Digitalization

- Services are increasingly being digitalized. Analyses will be based on or supported by machine learning.
