Kokkola Material Week 2019
9.11. - 14.11.

The international Kokkola Material Week offers annual high-level coverage of current research and development prospects in the chemical, bio-economy and mineral economy sectors. Kokkola Material Week has evolved into a major networking event for industry and stakeholders. Kokkola Material Week is the biggest material chemistry event in northern Europe and will be held in Kokkola, Finland. All seminar topics are related to material science and represent the latest innovations and knowledge in the field.

A significant number of companies representing state-of-the-art chemical expertise are concentrated in Kokkola which makes the City of Kokkola Scandinavia’s most significant concentration of inorganic chemistry. Area’s innovation system covers everything from education and basic research to R&D and commercialization services for businesses.
